ANNUAL REPORT OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

Washington, D. C., November 15, 1916.

To the Senate and House of Representatives of the United States of America in Congress assembled:

The Commissioners of the District of Columbia herewith submit for the information of Congress, in accordance with the requirements of section 12 of "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878 (20 Stat., 108), and section 9 of the sundry civil appropriation act approved August 1, 1914, a report of the official doings of the government of the District of Columbia for the fiscal year ended June 30, 1916.

This report embraces the reports made to the commissioners by the heads of the several departments and offices of the government of the District of Columbia, setting out in detail their transactions during the period mentioned, which the commissioners have prefaced with an abstract of the portions of the reports which they deem of exceptional interest to the public, and with comments and recommendations which their experience suggests for improvement and progress in the administration of the municipal affairs entrusted to their supervision.

FINANCIAL.

Consolidated statement showing cash income from all sources, net expenditures on account of appropriations, trust and special funds, and balances for fiscal year ended June 30, 1916:

RECEIPTS AND EXPENDITURES.

Cash receipts from all sources for the fiscal year amounted to \$16, 201, 401.20, made up as follows: From taxation, licenses, and miscellaneous sources, \$8,400,397.58; amount paid by the United States as share of expenses of government under the act of June 11, 1878, \$6,332,691.79; trust and special fund collections, including the water fund, \$1,468,311.83.

Cash expenditures for the fiscal year amounted to \$14,183,619.54, of which there was paid from appropriations and the general fund, \$12,808,460.73, and from trust and special funds, including the water

fund, \$1,375,158.81.

The expenditures from appropriations and the general fund are as follows: For general government, \$722,437.07; protection of life and property, including the police and fire departments, \$1,988,108.80; health and sanitation, including the health department, sewage disposal, and construction, \$1,220,901.29; highways, including street improvements and extensions and care of public highways, \$1,741,195.78; charities and corrections, \$1,652,329.40; education, including public schools and libraries, \$3,520,236.94; recreation, including public parks, playgrounds, and bathing beach, \$675,158.67; miscellaneous, including tax and license refunds, \$101,634.33; public-service enterprises, including water supply and markets,

\$214,305.18; and interest and debt, \$972,153.27.

The expenditures from trust and special funds include payments for general government, \$656.32; protection of life and property, including pay of police and fire pensions and salaries of street railway crossing police, \$212,905.50; health and sanitation, including cost of sewer construction, \$11,034.47; highways, including cost of repairs to streets incident to cuts made for street railway companies, corporations, private persons, plumbers, etc., \$100,384.18; charities and corrections, including payments made from collections of the juvenile court for the support of abandoned wives and children, \$51,738.80; education, including prize awards in the public schools, \$154.05; recreation, including the placing of trees in private parking space, \$581.77; miscellaneous, being principally amounts paid on account of redemption of tax-sale certificates and the refund of unused balances of deposits made for work to be done by the District for private persons, \$393,308.22; public-service enterprises, being principally for the expenses of the water department paid from the District water fund, \$604,395.50.

BONDED INDEBTEDNESS OF THE DISTRICT OF COLUMBIA, 3.65 BONDS.

At the close of the preceding fiscal year, June 30, 1915, the District owed on account of outstanding 3.65 bonds the sum of \$6,518,000, less assets held by the sinking fund, \$295,000, leaving a net indebtedness of \$6,223,000.

During the fiscal year bonds were purchased and retired amounting to \$338,100, and investments made and held for account of the sinking fund amounting to \$411,845.45, which, together with the cash balance held for this account at the close of the year, \$3,254.73, makes a total reduction in net bonded indebtedness for the year of \$753,200.58.

At the close of the fiscal year ended June 30, 1916, the District owed on account of outstanding 3.65 bonds the sum of \$6,179,900, less assets held by the sinking fund, \$710,100.58, leaving a net indebtedness of \$5,469,799.42.

The District has no unfunded debt that its current resources are insufficient to discharge.

APPROPRIATIONS AND REVENUES.

The cash revenues of the District of Columbia for the fiscal year amounted to \$8,400,397.58, which, plus the District's share of unexpended balances of appropriations lapsed and charged off the books by the surplus warrant of June 30, 1916, \$67,277.78, gives a resulting credit of \$8,467,675.36. The total appropriations for the fiscal year amounted to \$12,492,686.52, of which there was chargeable to District revenues the sum of \$6,322,349.72, leaving a surplus of revenues over appropriation charges for the year itself of \$2,145,325.64.

NET SURPLUS.

If we deduct from the foregoing surplus on account of the fiscal year 1916 the deficiency in revenues at the close of the preceding fiscal year, \$765,106.74, it leaves a resulting net surplus of revenues over all appropriations and charges to and including June 30, 1916, of \$1,380,218.90.

This surplus of revenues over appropriations and charges is accounted for as follows: Cash balance to credit of District of Columbia in the Treasury of the United States, \$2,664,717.77, plus cash balance on account of general fund in hands of the collector of taxes, \$28,792.12, making total cash balances \$2,693,509.89; less the District's obligations on account of its share of unadvanced appropriations on the books of the Treasury Department, June 30, 1916, \$1,313,290.99; leaving a resulting surplus of revenues over all appropriation and other charges to and including June 30, 1916, as above stated, of \$1,380,218.90.

POPULATION.

No census of the population of the District of Columbia has been taken by the District authorities since April, 1915, but the United States Bureau of the Census informs the commissioners that its estimate of the population of the District on July 1, 1916, is 363,980.

ACCOUNTING FOR DISTRICT PROPERTY, REAL AND PERSONAL.

Congress, in the District appropriation act for the fiscal year ended June 30, 1916, provided:

That all persons in the employment of the government of the District of Columbia having, as a result of such employment, custody of or chargeable with property, other than real estate, belonging to the District of Columbia, shall, at such times and in such form as the Commissioners of the District of Columbia shall require, make returns to said commissioners of all such property remaining in their possession, and the condition thereof, and, with reference to all property that may have come into their custody that shall have been consumed in use, a statement showing the quantity thereof and the purpose for which used.

Pursuant to the provisions of this law, the commissioners appointed a committee to draft a plan for the establishment of a strict accountability for all District property, as directed by the act above. Based upon a report by this committee, the commissioners, by their order of June 29, 1915, established a division of property accounting in the office of the auditor.

Under the system so established an original inventory was required and submitted to the auditor by the several officers and departments having the custody of District property. As rapidly as possible, upon the receipt of these original inventories, accounts were opened for each article in each department, in loose-leaf ledgers, one sheet being given to each article and the articles grouped into classes, each class being divided into "expendable" and "nonexpendable" property, each department's accounts being kept in one or more ledgers.

Quarterly returns are required to be made by all departments, for all property received, expended, or transferred during the quarter. These accounts are duly audited and entered, being checked with copies of the several orders issued by the purchasing officer for supplies furnished the several offices, departments, and institutions of the District.

In the event of an officer charged with the custody of property leaving the service, an accounting is had, all property in his charge being checked and transferred to his successor in office, a receipt being taken for property so transferred.

being taken for property so transferred.

A physical checking of the properties held by the several departments is now under way by the auditing department, thus verifying the book or return inventory by actual count.

The greatest economic value of the new system is seen in the great saving made and which will be made annually by reason of the utilization of property no longer required by a department that may be transferred and used by another department. Formerly the greater portion of this material was sold as junk or old materials at a nominal price. During the fiscal year just ended the value of the property transferred and utilized by departments amounted to \$25,951.07. Sales of old materials for same period amounted to \$7,622.32.

TAXATION.

REAL ESTATE.

The assessment of real estate for the fiscal year 1917 is as follows: Land, \$207,355,359; improvements, \$194,743,873; total, \$402,-099,232; tax, \$6,031,488.48.

Total assessment of real and personal property, 1916.		

Out of a total number of 18,198 personal tax accounts, there are 7,608 who pay a tax of less than \$5. There are 741 who pay a tax of \$100 or over, leaving 9,849 whose tax is between \$5 and \$100.

The personal tax levy of the past year has been made under the act of Congress approved July 1, 1902, which provides that tangible property, such as jewelry, household goods, wares, merchandise, stock in trade, horses, vehicles, boats, etc., shall be assessed, and in addition a percentage on the gross earnings of banks, trust companies, and public utilities. The tax on intangible personal property, provided for by the act of September 1, 1916, can only be imposed on and after July 1, 1917.

SPECIAL ASSESSMENTS.

The amount of special-assessment work is set forth in the following statement.

The number of special-assessment notices served during the year was 9.215.

Assessment and permit work	\$96, 951. 5 87, 680. 8	9 9
Assessments levied by juries during the year ended June 30, 1916:		- \$184, 632. 48

CHAIR PAIRS	10, 700.0	- 28, 152. 38
Total		212, 784. 86

YEARLY ASSESSMENT.

Real estate has, since 1894, been assessed triennially (28 Stat., 282) at not less than two-thirds of its true value (act of July 1, 1902) by the board of three assistant assessors (28 Stat., 282).

The commissioners have for a number of years recommended that assessments be made annually and a step has been taken in this direction by the enactment of September 1, 1916, which requires that hereafter assessments of real estate in the District of Columbia for purposes of taxation shall be made biennially in the same manner as is now required by law for triennial assessments. In order to enable the office to carry into effect such assessment, there has been provided five field men whose need has been greatly felt in the past and who will afford much aid toward equalizing real estate assessments in the District.

TRUE CONSIDERATION.

It has been found impossible to collect all sales and ascertain the facts bearing on them, even with a larger force of field assistants. The time consumed in following up one large or important sale is sometimes very great, and this office feels that aid is needed from Congress in a manner heretofore suggested, namely, to require the owner to file an affidavit with this office as to the true consideration, to be used only by the assessors as an aid in their work

LICENSES.

During the year ended June 30, 1916, this office issued 8,588 miscellaneous licenses, amounting to \$112,083.34, a slight decrease over the previous year. During the same period 273 barroom licenses were issued, amounting to \$409,500, and 89 wholesale licenses, amounting to \$71,200, making the total receipts from liquor licenses \$480,700.

On October 16, 1915, the automobile office was transferred from the permit clerk to this office, and the clerk in charge of licenses was appointed secretary to the automobile board. Since October 16, 1915, and up to and including June 30, 1916, the total revenues collected through the secretary of the automobile board amounted to \$29,065.85.

BIENNIAL ASSESSMENT OF REAL ESTATE.

A clause in the act of Congress entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, nineteen hundred and seventeen, and for other purposes," approved September 1, 1916, provides for the biennial assessment of real estate as follows:

Hereafter assessments of real estate in the District of Columbia for purposes of taxation shall be made biennially in the same manner as is now required by law for triennial assessments of real estate in said District; and the time for the completion of each biennial assessment, and the time in which appeals from such assessments may be taken to the board of equalization and review shall be the same as is now provided for the assessment of real property which has become subject to taxation and which has not been taxed, and for the assessment of new structures, as set forth in section eleven of the act approved August fourteenth, eighteen hundred and ninety-four, entitled "An act to provide an immediate revision and equalization of real estate values in the District of Columbia; and also to provide an assessment of real estate in said District in the year eighteen hundred and ninety-six, and every third year thereafter, and for other purposes."

ASSESSMENT OF INTANGIBLE PERSONAL PROPERTY.

Another clause in the act above mentioned provides for the assessment of intangible personal property as follows:

That the moneys and credits, including moneys loaned and invested, bonds and shares of stock (except the stock of banks and other corporations within the District of Columbia the taxation of which banks and corporations is herein provided for) of any person, firm, association, or corporation resident or engaged in business within said District shall be scheduled and appraised in the manner provided by paragraph one of said section six for listing and appraisal of tangible personal property, and assessed at their fair cash value, and as taxes on said moneys and credits there shall be paid to the tax collector of said District four-tenths of one per centum of the value thereof: Provided, That savings deposits of individuals in a sum not in excess of \$500 deposited in banks, trust companies, or building associations, subject to notice of withdrawal and not subject to check, shall be exempt from this tax:

ASSESSMENT FOR PRIVATE USE OF VAULT SPACE IN STREETS.

The liability of private users of space under the streets to assessment for that privilege was established by the provision in the District appropriation act above mentioned:

That hereafter the Commissioners of the District of Columbia are authorized and directed to assess and collect rent from all users of space occupied under the sidewalks and streets in the District of Columbia, which said space is occupied or used in connection with the business of said users.

ASSESSMENT OF PRIVATE PROPERTY FOR IMPROVEMENT OF ROADWAYS.

The same act contains the following provision for assessing private property abutting roadways for the benefits derived from such improvements, which embodies modifications of the previous law on the subject needful to meet conditions developed by experience and not adequately covered by that statute:

Sec. 8. That hereafter the half cost of the paving or repaving of a roadway between the side thereof and the center thereof with sheet asphalt, asphalt block, granite block, vitrified block, cement concrete, bituminous concrete, macadam, or other form of pavement shall be assessed against the property abutting the side of the street so improved, such assessments to be levied and collected as now provided as to alleys and sidewalks: *Provided*, That the advertisement by publication of the commissioners' intention to do such work and the formal hearing in respect thereto required by law as to alley and sidewalk improvements shall not be required as to roadway improvements.

There shall be included in the area the cost of which is assessable hereunder only the roadway area abutting the property between lines normally projected from the building of the street being improved at the points of intersection with the building lines

of intersecting streets.

There shall be excluded from the cost of the roadway work to be assessed hereunder: First. The cost of all such work beyond a line twenty feet from the side thereof. Second. The cost of all such work within the space within which street railway companies are required to pave by law, and nothing herein contained shall be construed as relieving street railway companies from bearing all the expense of paving and repairing streets and avenues between lines two feet exterior to the outer rails of their tracks, as required by section five of the act providing a permanent form of government for the District of Columbia, approved June eleventh, eighteen hundred and seventy-eight.

REVISION OF THE TAX AND LICENSE LAWS.

A revision of the tax and license laws of the District of Columbia is contemplated by a provision in the same statute, which prescribes:

That a joint committee consisting of the Committee on the District of Columbia of the Senate and the Committee on the District of Columbia of the House of Representatives is hereby appointed to make by subcommittee or otherwise a careful and exhaustive study of the tax laws of the District of Columbia, including license taxes, with a view of recommending such changes in the laws as the joint committee may deem fair and equitable, report to be made to the Congress during the next session.

THE COLLECTION OF REVENUE.

The total collections for the year ended June 30, 1916, were \$10,130,191.93. The amount credited to the general fund, which is strictly revenue, was \$8,390,746.06. The collections this year show a net increase of \$350,680.98. The increase in realty taxes was \$265,885.32. The increase in personal taxes was \$211,117.46. This increase in personal tax was due to the settlement, during the year, of several large accounts which were pending before the courts.

The trust funds collected amounted to \$1,447,334.14. The miscel-

laneous receipts were \$1,098,791.16.

There was also collected on account of miscellaneous receipts credited to the United States \$275,440.02, showing an increase of \$59,530.20.

The total water fund collected, including rents, etc., was \$698,312.17. The real estate tax sale for March, 1916, was the largest in the history of the collector's office. There were 51 bidders for the lots

offered for sale, the number of lots sold being 6,699. The total amount of tax sale, including over \$23,000 surplus and 10 cents for the recording of each lot, was \$208,511.49.

A few things are essentially needed in legislation for this branch

of the taxing department of the District of Columbia.

One is a law substantially as recommended by the commissioners at the last session of Congress, permitting the holder of tax title to real estate to go into a court of equity and seek settlement, where all parties concerned may present their claims and have them properly adjudicated. Ample time should be given the owner of the property to settle these claims, but when this time shall have expired, any further delay on the part of the holder of the property, who perhaps during all this time has enjoyed the privilege of occupancy or the emoluments of rental, imports that he is willing to enjoy the privileges and protection of government, while evading his share of its financial burdens. There are a few conspicuous examples of such delinquency, which render it advisable that such a law should be enacted, not only for the additional revenue it will bring the community, but for the specific purpose of preventing such evasive property holders from setting a bad and unpatriotic example for others.

Another change that should be immediately effected, for the furtherance of proper accounting and the placing of administrative responsibility where it directly belongs, is the enactment of a law transferring the posting of the accounts of all tax ledgers from the

office of the assessor to the office of the collector of taxes. That proposition was also favorably recommended by the commissioners

during the last session of Congress, but failed of enactment.

An annual registration or license tax on automobiles, motorcycles, and all other motor vehicles, in lieu of all personal taxes thereon, is again recommended. The present system of a perpetual license tag is susceptible to many kinds of abuse. It furnishes no basis of correct information as to the actual number of automobiles owned in the District. An annual license charge sufficient to bring revenue to the District would be surely collectible, while a personal tax levied must always depend upon many contingencies. Such a change deserves careful consideration.

A similar registration of motor boats, launches, and other water craft, requiring the owners thereof to register their boats, with name and complete description, issuing to them an identification number, would facilitate efforts in this office to collect personal taxes levied

on them.

DISBURSING OFFICER.

The total amount expended during the fiscal year 1916, by the disbursing office was \$11,422,055.11, of which sum \$2,340,598.45 was handled in cash and the balance by checks.

Statement of receipts and disbursements.

urer 358.792		11, 780, 848. 06
Balance to credit of disbursing officer, District of Columbiance 30, 1916.		

The work of this branch of the District service shows a steady increase. A total of 101,210 checks were issued (an increase of 13,128 over the previous year) in the payment of salaries, contracts, etc., while the payment of salaries, fees, etc., in cash amounted to 73,680. The increase in the number of payments now being made is mainly due to the fact that all employees of the District government, unless otherwise provided by law, are now being paid twice a month.

In the year's work of handling the District's funds, involving over 200,000 money transactions and nearly eleven and a half million dollars, the disbursements cleared, without loss by error in calculation or identification, through the exacting practical and technical audit both of the district auditor and the United States Treasury

officials.

PURCHASING DEPARTMENT.

It is through this office that purchase is made of all supplies and materials used by the District government.

The total expenditures for the year ending June 30, 1916, amounted to \$1,669,293.87, embracing supplies and materials of every conceivable nature, which may be classified generally as follows:

Construction materials used in sewer, road, and street work. Hardware, plumbing supplies, paints, oils, and lumber. Fuel. Forage, including livery and horseshoeing. Food supplies. Books, playground, athletic, and kindergarten supplies. Furniture, house iurnishings, office equipment. Stationery. Lighting service for District institutions. Fire-fighting apparatus and supplies. Machinery, engines, boilers, and repairs thereto. Printing, engraving, binding, blank books. Dry goods, boots, and shoes. Vehicles, including motor driven. Electrical supplies. Drugs, chemicals, hospital, biological, and laboratory supplies. Horses. Postage. Saddlery Transportation. Telephone service. Ice. Laundry.	174, 328, 81 173, 899, 06 120, 855, 04 133, 506, 50 52, 208, 32 76, 186, 58 53, 042, 00 34, 732, 57 42, 760, 61 47, 085, 69 27, 857, 43 34, 996, 82 40, 799, 52 22, 718, 39 42, 141, 87 10, 490, 00 12, 157, 74 9, 584, 12 15, 294, 89 8, 308, 10 6, 412, 83 4, 216, 42

Inventory at close of business June 30, 1916, discloses that the District at that time had stock of construction materials in the various property yards amounting to \$94,288.42.

CORPORATION COUNSEL.

In the Supreme Court of the United States 1 case was decided in favor of the District, in 1 case certiforari was denied, and 2 cases are there pending.

The Court of Appeals of this District decided 7 cases favorably to the District of Columbia, 7 adversely, 2 were dismissed, and 2 are

there pending.

In the Supreme Court of the District of Columbia 13 judgments were rendered in favor of the District of Columbia, 11 were adverse, 4 cases were dismissed, and 78 are pending. In the equity branch 4 cases were decided in favor of the commissioners, 3 adverse, 2 were dismissed, and 29 are there pending. Of the 6 cases involving the Public Utilities Commission, 2 were decided in favor of the commission, 1 was dismissed, and 3 are pending.

In the district court 18 verdicts of condemnation were confirmed, 5 cases were dismissed, and 15 cases are there pending. Seven probate matters are now pending, while of the 4 lunacy cases, other than commitments, 1 was decided favorable to the District and 3 are pending. Two habeas corpus cases were decided favorable to the District, 1 was dismissed, and 2 are now pending. There were

5 appeals from judgments rendered in the municipal court and 2 certiorari cases from the municipal court, all of which are pending. In the lunacy court 451 cases were disposed of.

Twenty-six thousand three hundred and thirty-six informations were filed against offenders in the police court, and fines aggregating

\$97,666.16 were collected.

In the municipal court 4 cases were decided favorable to the Dis-

trict, 1 was adverse, 1 was dismissed, and 16 are pending.

In the juvenile court of this district 1,168 informations were filed and collections in the sum of \$47,407.34 were made in behalf of deserted families.

ALIENIST.

The total number of cases of suspected insanity examined were 1,752. This shows an increase of 141 cases over the preceding year; 70 cases were examined at the juvenile court, an increase of 45; 390 cases at the Government Hospital for the Insane, an increase of 80, and 1,292 at the Washington Asylum Hospital, an increase of 6. Of those examined at the Washington Asylum Hospital, 755 were mental suspects, an increase of 580; 518 alcoholic cases, a decrease of 79, and 39 were addicted to the habitual use of morphine, which was 70 less than the number treated last year at this institution.

The lack of facilities for the proper care and attention of those cases suspected of being insane suggests the need of a psychopathic ward, similar to those existing in other municipalities, for the District of Columbia, as early care and treatment of these cases which it would facilitate, would in many instances, result in restoration to health.

Attention is invited to the number of cases before the court for permanent commitment under section 167 of the District Code. More than 50 per cent of these cases exhibit mental symptoms that leave no doubt in the minds of their friends and relatives that they need care and treatment, and the only advantage in requiring their presence in court is to conform with legal requirements. This is done in many instances against the protest of their friends, relatives and of the patients themselves. It would seem that unless there is some reason for their commitment attendance at court is an unnecessary hardship to the patient and family, as well as an expense to the District of Columbia. The commissioners believe that the law dealing with this subject should be amended.

DEPARTMENT OF INSURANCE.

This department was organized in 1902 and has supervision overall matters pertaining to insurance in the District of Columbia.

There has been no change or amendment in the insurance laws in the District during the past year. In point of fact, there are few States where the incorporation laws relating to insurance companies are so lax. There is a marked tendency throughout the various States toward uniformity in insurance legislation and it is hoped that in the near future the insurance laws of the District will reflect the latest progressive enactments which have already proved their value in many States.

Residents of the District during 1915 paid for premiums on all classes of insurance \$7,589,545.07. The losses paid on risks in the

District amounted to \$3,194,854.05, and the risks written, exclusive of casualty, amounted to \$493,919,911.38, as shown by the following exhibit:

0	Premiums received.	Losses paid.	Risks written.
Life insurance companies. Health, refrient, and life insurance companies and associations. Miscellane us insurance companies. Fraternal bene cial associations. Fire and marine insurance companies. Total.	712, 219. 20 511, 968. 25	\$1,954,641.69 206,201.24 252,563.02 456,254.07 325,194.03 3,194,854.05	\$20, 814, 101, 59 4, 831, 932, 52 3, 120, 070, 00 465, 153, 807, 27 493, 919, 911, 38

At the end of 1915, 254 insurance companies and associations were licensed to transact business here.

The assets of all insurance companies and associations transacting business here on December 31, 1915, amounted to \$5,720,742,079; liabilities, \$4,680,011,198.69, and surplus, including capital, \$1.040,730,880.31.

The revenue collected by the department during 1915 consisted of \$19,509.76 for license fees and assignments and \$86,548.83 for taxes on premiums, making a total of \$106,058.59, an increase over the previous calendar year of \$3,285.48. The total expenses of operating this department amounted to \$10,719.16.

There were 16 companies admitted to the District, 6 withdrew or reinsured, and 3 companies withdrew applications for license or were refused license.

DEPARTMENT OF WEIGHTS, MEASURES, AND MARKETS.

Division of weights and measures.—The department has, during the last fiscal year, exercised closer supervision over weights and measures in the District than ever before. Each scale in the District is tested twice a year, and the number of so-called surprise inspections has been gradually increased. Test purchases for the purpose of ascertaining whether or not correct weights and measures are being given have been made frequently, and every complaint of short weight or measure has been promptly investigated. Prosecutions have been resorted to where it was believed the public interest demanded.

During the latter part of the year the department began the work of testing the gasoline measuring pumps in the District, and this work will be prosecuted until all such pumps have been tested and sealed by an inspector. In the future each pump will be tested once a year.

It is the intention to take up during the coming fiscal year the work of testing the druggists' prescription scales and jewelers' scales. This is a field which has not been covered before, but which is of considerable importance.

The municipal markets.—The municipal markets provide means whereby producers and dealers may secure, at nominal rental, a place to sell their products, and thus enable the consumers to purchase the necessaries of life at a lower price than they could otherwise do. The Farmers' Produce Market (now known as the Haskell Market) especially meets a very definite need of the truckers and farmers

adjacent to Washington. While this market is now crowded and it is often found impossible to accommodate all who come, it is believed that when an additional shelter which has been provided for has been erected, the accommodations will be adequate. Conditions at the fish wharf and market have steadily improved since the control of the property was taken over by the District, and when the new building at that point, for which an appropriation of \$185,000 has been made, is completed, the possibilities of the market can be fully developed, and trade which has been going away from Washington for want of facilities will come back. Conditions at the Eastern, Western, and Georgetown Markets have not been entirely satisfactory during the year. It has required considerable effort to keep the stalls rented, due, it is believed, partially to the fact that a great many hucksters operate in the District, and to the further fact that needed repairs have not been made.

Lumber and wood.—During the year 6,968,664 feet of lumber were inspected and graded and 415,790 feet condemned. The gross fees collected amounted to \$2,238.64; expenses, \$749.53; net fees re-

tained by the inspector for services, \$1,489.11.

The wood inspectors reported 16,762\(\frac{2}{3} \) cords of wood measured and graded; gross fees collected, \$1,508.60; expenses, \$139.80; net fees retained for services, \$1,368.80.

Receipts and expenditures.—The total receipts of the department, excluding the fees of the wood and lumber inspectors which, under the law, are retained by these employees for services rendered, were \$37.382.49. The total expenditures were \$23,311.02, leaving a net

revenue of \$14,071.47.

The commissioners recommend the enactment of a law fixing the standard weight of bread manufactured for sale, sold, or offered for sale in the District, that the wood and lumber inspectors be placed on a fixed salary and the fees collected for their services be turned into the Treasury, and the enactment of a comprehensive weights and measures law for the District which will meet the requirements of modern business methods.

DEPARTMENT OF PLAYGROUNDS.

It is the purpose of this department to make the playground a source of physical, moral, and mental benefit to children of the District of Columbia. By providing recreation in the open air, free from conditions which prejudice physical development, the playgrounds perform the functions of a sanitorium, without the cost, and in a large measure obviate the necessity for hospitals.

By instilling into the child the principles of fair play, honesty, self-control, and mutual responsibility the playground teaches the elements of citizenship. It gives instruction in industrial work, and thus becomes a specialized school without the expense of one and without its

restrictions on individual enterprise.

The work of the department, so far as it can be shown by tabulation

of figures, is set forth in the detailed report.

During the fiscal year 1916 there were in succession three different supervisors of playgrounds—Daniel J. Donovan, George M. Roberts, and Mrs. Susie Root Rhodes. Thirteen playgrounds were maintained during the year, three of which were for colored children.

The total number of persons attending regularly was 1,004,174, an increase of 22,194 over last year.

The playgrounds are designated and located as follows:

WHITE.

Bloomingdale, First and Bryant Streets NW. Gallinger, Eighteenth and C Streets NW. Georgetown, Thirty-third and Volta Place NW. Garfield Park, Second and New Jersey Avenue SE. Montessori, 1840 Kalorama Road.

Mount Pleasant, Fourteenth Street and Park Road NW. New York Avenue, First and New York Avenue NW. Rosedale, Seventh and Kramer Streets NE. Virginia Avenue, Tenth and Virginia Avenue SE. Zoological Park. 1

COLORED.

Cardozo, First and I Streets SW. Howard, Fifth and W Streets NW. Willow Tree Park, Third and Four-and-a-half, B, and C Streets SW.

With the exception of the months of January and February, the playgrounds were open all the year—from 9 a. m. until dark in summer and from 11.45 until dark during the public-school term. Each was under the supervision of a director and a watchman, with such assistants as were necessary from time to time.

The work of the department was divided into three classes—indus-

trial, physical, and social.

Industrial work consists of instruction in basketry, knitting, sewing, crocheting, paper cutting, cooking, and similar occupational and in-

structive recreation for both boys and girls.

The physical work includes all athletic contests such as baseball, basket ball, soccer football, track and field games, etc. In conjunction with the playground department and under its direction there are organized public-school leagues in the principal branches of sport. In each league or division, which has the playground in its neighborhood as a center, trophies were given the winning teams, while the winners of the city championship contests received special trophies.

The social activity differs on each playground. Clubs are organized for children of various ages, and many dances, parties, and entertainments are given to keep the young people of the city off the

streets at night.

All grounds are equipped with recreation facilities such as swings, gymnasium apparatus, tennis courts, baseball, basket ball, and football fields, shelter houses, etc. Supplies such as baseballs, basket balls, tennis racquets, etc., are furnished by the department.

For the repair and upkeep of the grounds, as well as for the storing and care of supplies, the department maintains a storehouse and

workshop at 1068 Wisconsin Avenue NW.

One of the most attractive and wholesomely useful features of the playgrounds this year has been the swimming pools installed at the Georgetown, Rosedale, and Howard playgrounds. Special instruction in swimming has been given and many aquatic meets have been held.

¹ These playgrounds were discontinued after summer of 1915.

BATHING BEACH.

As a separate division under the playground department is the bathing beach, or municipal swimming pools. During the summer of 1916 the total attendance at the pools for white people was 78,958, while that at the colored people's pool was 8,058.

The total appropriation for playgrounds for the year was \$44,415

and for the bathing beach \$4,730.

With the belief that when a city makes it illegal to play in the streets, it should provide places where play may not only be lawful but encouraged, the following recommendations are submitted:

That additional playgrounds be established until there be one

accessible to every child in the District of Columbia.

That every playground have either a swimming pool or a wading

pool provided.

That the wider use of the school plant, in connection with play-

ground activities, be encouraged by all workers.

That shelter houses or open-air halls be provided on all grounds now in operation. The summers are so hot and the winters so cold that unless we provide against these extremes of climate much time will be lost in the outdoor life of our children.

That the playgrounds be lighted and open evenings.

That moving-picture apparatus be purchased for all lighted grounds. That the shops of the elementary schools be open in summer vacation so the children attending the playgrounds near by may have elementary woodwork and simple carpentry. The repairing of broken furniture and toys would be good occupational play.

That school kitchens be opened in summer vacation and near-by playground children be given cooking lessons as an occupational

recreation

Acknowledgment is made of the cooperation and support of the department of public buildings and grounds, the police department, and the directors of playgrounds.

PUBLIC SCHOOLS.

DAY SCHOOLS.

The total enrollment of pupils for the year was-

	Male.	Female.	Total.
White	20, 635 8, 479	20,447 9,965	41,082 18,444
Total		30, 412	

The total enrollment of pupils was distributed as follows:

Class of pupils.	White.	Colored.	Total.
Elementary. Secondary. Normal. Vocational. Total	35, 507	16, 281	51,788
	5, 252	1, 656	6,908
	175	152	327
	148	355	503
	41, 082	18, 444	59,526

The total enrollment shows an increase of 1,993, or 3.46 per cent more than that of the previous year.

The average enrollment was 52,696, or 3.20 per cent above that of the previous year.

The average daily attendance was 49,625.

THE FREE PUBLIC LIBRARY.

A reading of the report of the board of trustees of the Free Public Library and of the report of the librarian to the trustees gives emphasis to at least three facts about public-library development in Washington: (1) The Public Library is furnishing to the District a large and constantly increasing service of high quality; (2) it is doing this on an insufficient basis of financial support—a support that remains almost stationary and one that does not increase as fast as its work increases; and (3) the public library needs of the District are far from being met and this must continue until (a) the present library system is better supported and until (b) the system is enlarged to include a series of properly supported branch libraries.

The librarian's report shows that the library circulated \$80,043 volumes into Washington homes last year, or nearly 10 per cent more than the figures of 1915 of \$02,998 volumes, and 23 per cent more than the circulation of 1914 of 713,634 volumes; and that the picture circulation of 110,934 was an 18 per cent increase over 1915 and a 30 per cent increase over 1914. This record of largely increased work has been made without any material increase of force for the last two

years.

The library report contains some striking comparisons between the local Public Library and the public libraries of other American cities above 200,000 population. These comparisons show that our library is inadequately supported as compared with other municipal libraries of its class. Out of 31 other cities nearest Washington in population 22 (including seven cities smaller than Washington) have larger library appropriations than has Washington. In these same 31 cities 24 have a higher per capita expenditure for their public libraries than has Washington; the average is nearly 30 cents as against 21.2 cents for Washington. That the local Public Library is economically administered is shown by the fact that in Washington it costs but 8.7 cents per volume to circulate Public Library books into homes as compared with an average cost of 11.6 cents per volume for the public libraries of all of the 32 American cities above 200,000, including Washington. The local library's per capita circulation among the population of the District of 2.42 volumes is exceeded by 21 other cities above 200,000 population. The average for all 32 cities above 200,000 is 2.8 volumes. The report shows that the present per capita circulation in the District has only been secured by reason of the large increase of circulation (170,000 volumes) through the school-deposit collections. But it also shows that for all of the cities above 200,000 the average is increasing more rapidly than is the local rate of increase. From this it is evident that Washington in its public-library book circulation, although that circulation is rapidly and steadily increasing, yet in relation to other cities, it is falling behind in the procession of municipal libraries in cities of its The librarian maintains that until the local library has a system of branches properly supported and with more adequate support for the main organization and for other extension work, it will not be able either to take its proper rank with other municipal public libraries of its class or to render adequate service to its highly intelligent constituency or to become the model Free Public Library in the amount and quality of its service that ought to obtain in the national capital city.

POLICE DEPARTMENT.

The police force, which includes 715 men, exclusive of the street-railway crossing officers, to whom Congress gave pension and other privileges in the 1917 appropriation act, is smaller to-day than it was 10 years ago, when 718 men were assigned to the same duties, and 20 less than it was in 1912 when the number was 735.

The fiscal year ending June 30, 1916, was one during which few changes were made in the personnel of the commissioned officers of the force. The two important promotions made were brought about when a vacancy in the position of assistant superintendent was created by the death of Inspector Robert H. Boardman, who was chief of detectives in the Metropolitan Police Department for 17 years.

There have been a number of administrative changes made after a careful study of the department's needs and thorough consideration of the best methods to get maximum efficiency in the administration and work of the force. Some of the principal changes which have been made in the administration of the department during the year

1916 and in the last months of the previous fiscal year were:

1. Giving increased attention to traffic problems in streets, working to prevent accidents, and holding monthly meetings of all men engaged in regulation of traffic for study of uniform methods of work and study of traffic problems.

2. Permitting each and every man on the force to confer with the head of the department concerning any matter of interest which he

might wish to lay before the major and superintendent.

3. Reviving weekly conferences with commanding officers of precincts, and including in these conferences for the first time the inspectors and lieutenants.

4. Inaugurating monthly meetings of sergeants for the purpose of discussing sergeants' duties in connection with the various problems, and particularly methods of strengthening the work of supervision of

patrolmen.

5. Reducing and doing away with numerous details of men engaged on inside work in various departments of the District government. Each change was made after careful consideration and after it was decided by the head of the department and approved by the District Commissioners that the services of the men were needed more in patrolling the streets than on detail assignments.

6. Adoption of new style overcoat for the winter, similar to the overcoat worn by the men on the forces of New York, Philadelphia,

and virtually all of the larger and progressive cities.

7. Development of methods and procedure, by which more effective administrative control and increased efficiency in the work of the

department may be obtained.

8. Working out a system of reports on each and every assignment given in the detective bureau, so that permanent record may be kept of work done and action taken on every case, and doing away entirely with the old haphazard system in the department of trusting to a man's memory when information is called for on a case at any time.

9. Reviving revolver practice in the department in order to prevent danger of accidents sometimes caused by inaccurate shooting when men are untrained or out of practice in the use of the revolver.

10. Inaugurating a course of instruction in first-aid work, in order to give each man on the force information on the case of an injured

person during the time of waiting for an ambulance.

11. Giving to the men information on methods of keeping well and improving their condition of health, and planning for annual athletic carnivals and field games.

PENSION AND SALARY LEGISLATION.

Although the size of the force was not increased, the Metropolitan police department was fortunate in receiving more consideration from Congress during the fiscal year 1916 than ever before in its history. In the last annual report of the major and superintendent three important pieces of legislation were recommended. Request was made first for the consideration of a new pension law providing an adequate pension fund and doing away with the use of police court fines as a source of revenue for the fund, on the theory that a policeman should not have even the remotest financial interest in any arrest.

The legislation second in importance was a substantial increase in the salaries of precinct commanders, their lieutenants and sergeants.

The third important recommendation was for the amalgamation of the Metropolitan police force and the crossing officers' force, the latter men formerly having no pension privileges of the Metropolitan force nor chances of promotion.

The District appropriation bill, which was approved September 1, 1916, contained provisions for an adequate pension fund, increased salaries, and amalgamating the crossing police force with the Metro-

politan force was passed by Congress.

CRIMES.

The test of the efficiency of any police department is in the apprehending of criminals who have committed felonies. During the last fiscal year there has been an increase in the number of persons arrested and held where felonies or serious crimes have been charged, 1,969 cases of this kind having been made in 1916, as compared with 1,699

in 1915 and 1,192 in 1914.

The police department was perhaps more fortunate in apprehending murderers in the fiscal year 1916 than it was in any similar period in its history. There were committed in the District of Columbia during the year 24 murders. For 23 of these crimes arrests were made of persons held guilty for the offense charged. In the twentyfourth case the department made an arrest of the man held responsible for the crime by the coroner's jury, but the grand jury did not consider the evidence sufficient to indict. Besides making arrests of 23 of the 24 persons held for murders committed, the department arrested one man who had been indicted for murder committed in Of the 24 murders, 3 of the persons killed were white and the men held guilty for the crime were of the same color, and in the remaining 21 cases both the person killed and the person held guilty of the crime were colored.

The total number of arrests for all offenses in 1916 was 39,377 against 37,219 in 1915. Of this number 54.50 per cent were white as against 52.39 per cent in 1915, and 45.50 per cent were colored in

1916 as against 47.61 per cent in 1915.

An encouraging increase was made in the percentage of convictions, showing that the police are using greater care in getting evidence and are not making arrests except when they have the best information that the laws have been violated. Of the 39,377 arrests made in 1916, the percentage of convictions, exclusive of those held for investigation and as witnesses, was 91.77, as compared with 89.79 in 1915 with arrests numbering 37,219.

The percentage of acquittals was only 4.89 as compared with 5.66 in 1915, and the percentage of cases nolle prosequied was only 3.34

as compared with 4.37 in 1915.

The following is a classification of those charged under the law:

White	21, 462
Colored	17, 915
Male	35, 402
Female	3,975
Read and write.	37, 377
Unable to read and write	2,000

ESTIMATE OF LOSSES AND RECOVERIES.

Members of the police department were also successful in recovering a larger percentage of stolen, lost, or mislaid property than they

have been in recent years.

During the fiscal year 1916, property to the value of \$336,067.34 was reported stolen, lost, or mislaid, and of this amount \$204,846.97 was recovered. In addition, however, there was recovered by the department property to the value of \$89,255.39 which had been lost or mislaid, but which had not been so reported to the police. Property to the value of \$5,410.34, which had been stolen in other jurisdictions, was also recovered in the District of Columbia by the department, making the grand total of property recovered during the last fiscal year \$299,512.70, out of \$336,067.34 reported stolen, lost, or mislaid.

In addition to this amount there came into the possession of the police department property to the value of \$1,388.57 which was used as evidence in the several courts in the District of Columbia, \$3,417.41 belonging to persons alleged to be of unsound mind, and \$7,051.98 the value of property belonging to the estates of deceased persons dying in the District of Columbia and which was taken in charge by the members of the police force, making the grand total of property delivered to the chief clerk and property clerk in accord-

ance with law \$311,370.66.

MOUNTED SERVICE.

The officers mounted on motorcycles and bicycles have continued their work of enforcing the speed law during the past fiscal year and attempted in every way possible to check reckless driving of automobiles.

The most dangerous type of reckless driver, the man who is guilty of running an automobile while drunk, is being curbed by the revocation of his license. During the fiscal year 23 persons arrested for driving an automobile while under the influence of intoxicants had their licenses revoked. This action had to be taken in order to prevent accidents and to prevent drivers from killing themselves or others when they were not in condition to handle a machine of any

kind, especially an automobile.

The traffic regulations in Washington have been enforced liberally, and in cases of technical violations of law officers have issued warnings instead of taking citizens to court. In cases of persistent violation, however, or reckless driving which might have resulted in injury to a pedestrian or other driver, arrests have been made to the number of 11,046 as compared with 7,615 in the previous year. The increase of 3,431 traffic cases is due to the increase in the number of motor vehicles in the District of Columbia, and also to the fact that the police department had its motorcycle equipment increased from 8 to 18 machines.

STREET TRAFFIC.

Attention is called to the need for the creation of the position of traffic captain, to be in command of the traffic branch of the police department along with a lieutenant and three traffic sergeants, in line with the organization of traffic work in other cities.

The great increase in vehicular traffic on the streets of Washington and the increase of complex traffic problems makes the creation of a traffic branch of the police department more and more

 ${f u}$ rgent.

Traffic problems have increased during the year as the ownership of automobiles has increased. Streets in several sections of the city which were used very little now are important traffic ways. Traffic conditions in the streets can be improved by further cooperation of the police and members of the engineer department. The study of the distribution of traffic and the study of engineering problems which will make traffic flow easier becomes more and more important.

ANNUAL AUTOMOBILE LICENSES.

One of the most needed pieces of legislation at the present time is a law providing for the annual licensing of automobiles. At the present time they are numbered serially, starting with No. 1, issued on

October 8, 1907.

Many of the cars for which licenses were given 3 to 10 years ago are now out of commission, and the number tags of them are sometimes used illegally. These so-called "dead numbers" cause endless amount of confusion to the police in tracing lost and stolen cars, and also are an incentive to some persons to indulge in certain dishonest practices, such as selling Maryland tourists coming into Washington on Sundays license tags which will carry them through the day.

TALKS TO SCHOOL CHILDREN.

During the fiscal year Washington became the second city in the country to inaugurate a series of talks to school children by policemen, having for the purpose the teaching of lessons in the observance of laws and regulations making for better citizenship, and in teaching lessons on accident prevention. There were also inaugurated during

the latter part of the last school term a series of talks in schools on water safety, swimming, and saving lives. This work started with talks in the classrooms, followed by dry-land instructions in swimming, and was completed by demonstration in the water at the municipal bathing pools.

SAFETY-FIRST EXPOSITION.

The Washington police department was the only department of the municipal government which participated in the safety-first exposition which was held in the foyer of the new Museum Building from February 21 to February 26, 1915.

REGULATION OF FIREARM SALES.

In the work of crime prevention nothing will help the police department more than the enactment by Congress of a law placing a further restriction on the sale of firearms and dangerous weapons. Many crimes result from persons purchasing revolvers and shooting others while still in a fit of passion. The commissioners propose the enactment of a law which will restrict further the sale of firearms.

PHYSICAL FITNESS.

A movement was begun in the department during the year to awaken the men to an interest in their physical well-being and in the benefits of proper exercises.

CHANGE IN UNIFORM.

The availability of the force for general duty is seriously restricted by the assignment of so many patrolmen to special patrol and post service at foreign legations, railroad stations, markets, etc., at which 85 of them are located. Ninety-nine others are on detail as station-house clerks, plain-clothes men, in the enforcement of the child-labor laws, gambling laws, hack laws, patrol wagon, and signal service, etc., which further depletes the street-service force, and emphasizes the need for a material increase in the personnel of the police department.

FIRE DEPARTMENT.

FIRE LOSS.

The report of chief engineer shows that the total number of alarms of fire received during the year was 1,340, a decrease of 87 from the number received during the preceding year. The total fire damage during the year was \$444,825, covered by insurance in the amount of \$6,184,467. This fire loss is an increase of but \$496 over the loss for the preceding year, notwithstanding the fact that 24 fires of exceptional severity occurred, these 24 fires being in themselves responsible for a loss of \$302,624. This holding in check of the fire loss in the District of Columbia, notwithstanding the marked increase in buildings and business, is very gratifying to the commissioners and the fire department and speaks most highly for the splendid efficiency of this important branch of the public service.

FIRE PREVENTION.

Fire-prevention work in practically every municipality of this country has become recognized as at least of equal importance with the extinguishing of fire, and the fire-prevention bureaus have grown from year to year in proportion as the work has increased in scope until at the present time the fire-prevention bureau of every community is recognized as one of the most necessary branches of public safety. It is a source of regret to the commissioners that efforts to increase the force of the fire-prevention office in this city have been unsuccessful, and renewed efforts will be made along that line.

MOTOR APPARATUS.

During the past two years the commissioners have been successful in securing from Congress appropriations for motor apparatus extremely more liberal than in any year heretofore, and this recognition of our legislators of the prime necessity for this type of apparatus leads to the belief that within the next three years the fire department will be completely motorized and horses in the said department become a thing of the past.

DISCIPLINE.

During the past year the commissioners have been called upon to administer severe discipline upon members of the fire department in but four cases, and are gratified to note that the general deportment of the officers and members of the department has been maintained at its usual high standard.

PENSION FUND.

Congress at the last session passed legislation to provide an adequate fund for the relief of disabled members of the fire department. During the year four pensions were granted, all to widows of deceased members of the department.

NEW APPARATUS.

With the purchase during the year of two two-passenger roadsters the fire department has completed the equipment of its chiefs with this method of transportation. Two two-wheeled tractors, and two motor-propelled hose wagons were also purchased, enabling the department to motorize engine companies Nos. 3 and 9, and a motor pumping engine and a motor hose wagon have also been provided for No. 28 engine company, a new company the building for which will shortly be completed.

HORSES.

The present number of horses in the fire department is 204, of which 175 are in good condition. Twenty-eight horses were purchased during the year, and 38 transferred to other departments.

HEALTH DEPARTMENT.

Deaths numbered 6,505 in the calendar year 1915, as compared with 5,866 during the preceding calendar year. The death rate rose, therefore, from 16.59 to 18.18, or 9.6 per cent. This is the highest recorded death rate since the calendar year 1910. The same apparently high death rate has continued during the first six months of the calendar year 1916, when deaths numbered 3,388, substantially the same number as was reported during the corresponding period of the preceding year, 3,398. Careful inquiry has failed to reveal any cause for this increase. In view, however, of its wide distribution throughout the entire range of causes of death and among both races and all age periods, and in the absence of any corresponding increase in mortality in any other city; it seems probable that the increase was apparent rather than real and that it is the result of some discrepancy between the methods of enumerating the population in 1913 and in 1915. Possibly the fact that the earlier census was taken about the 1st of May while the latter wat taken about the 1st of November may account for the difference. The fact that the enumeration of November, 1915, when compared with the enumeration of April, 1913, shows an increase of population amounting to but one-half of 1 per cent tends to support the hypothesis, every day observation giving a very strong impression of a greater growth of the population during the interval between these censuses.

Even, however, if the high death rate for the calendar year 1915 be accepted as an established fact, yet when the death rate of that year is compared with the average annual death rate for the five-year period 1906–1910 the general downward trend of mortality is shown. This general downward tendency in the death rate is due, however, to a decrease in the number of deaths from communicable diseases and diseases generally that are preventable by public efforts and has occurred notwithstanding a tendency toward an increase in the deaths due to faulty personal habits beyond the reach of Government agen-

cies except through education.

The death rate from pulmonary tuberculosis decreased from 222 to 195 per 100,000. Deaths from typhoid fever decreased 35 to 12. Deaths from diarrhea, among children under two years of age, decreased from 91 to 47. None of the other communicable disenses, except pneumonia and grippe, now contribute materially to the general death rate. In contradistinction from the decreases just stated the following increases are to be noted: Organic heart disease, from 169 to 204; pneumonia, from 163 to 188; Bright's disease, from 131 to 171; apoplexy, from 98 to 128; milignant growths, from 82 to 110, and arteriosclerosis, from 25 to 43. The lesson to be learned from these figures seems to be that it is now of prime importance to equip the health department with facilities for a search with respect to the prevention of the diseases that appear now to be on the increase, and with means for instilling into the public mind and the mind of the individual such knowledge as now seems to be available with respect to the influence of personal habits on these diseases. The work of a modern health department is no longer mere y that of combating communicable diseases, but it must engage in a general campaign for increased bodily vigor and for the prevention of diseases of all kinds.

BIRTHS AND STILLBIRTHS.

Births and still births together numbered 7,507, a natality of 21 per thousand, computed on the basis of the entire population. Still-births numbered 440, equivalent to 5.9 per cent. Illegitimate births, including stillbirths, numbered 670, equivalent to 8.9 per cent.

COMMUNICABLE DISEASES OF ANIMALS.

During the calendar year 1915, 19 dogs and 5 other animals were reported to the health department as rabid or suspected of being rabid. The dogs rabid or suspected of being rabid bit 17 persons and 5 domestic animals. Nine persons were bitten by dogs and cats definitely shown by post-mortem examination to be rabid.

In view of the continued prevalence of rabies in the District of Columbia the commissioners, on August 3, 1915, issued a proc'amation requiring the muzzling of all dogs running at large, to take effect on August 10, 1915, and to continue for a period of one year.

ADMINISTRATION.

Organization.—In order to facilitate the transaction of the business of the health department, through a simpler and more effective provision for the distribution of duties and responsibilities within the department, the work of the department was distributed during the year among five units, designated as the bureau of administration, bureau of vital statistics, bureau of sanitary inspection, bureau of

food inspection, and bureau of preventable diseases.

Bureau of preventable diseases.—The work of the bureau of preventable diseases during the fiscal year 1916 is indicated in a general way by the fact that 7,412 cases of reportable diseases were registered during the year. This number was considerably in excess of the number of cases registered during the preceding fiscal year, 5,839. The increase was due to the annual prevalence of measles, reported cases rising from 1,743 to 2,450, and to the increase in the number of registered cases of whooping cough from 563 to 1,131. The reported cases of typhoid fever increased from 319 to 362. Registered cases of diphtheria increased from 357 to 861, and registered cases of chicken pox from 932 to 1,044. Scar'et fever was less prevalent, registered cases decreasing from 719 to 478. Cases of tuberculosis dimished from 1,135 to 1,045.

The smallpox hospital during the year cared for 8 patients, was in active service on 80 calendar days, and rendered 88 patient-days' service.

The quarantine station cared for 8 inmates during the year, was open 117 days, and rendered 123 inmate-days' service.

The ambulance for patients suffering from so-called minor contag ous diseases carried during the year 494 patients on 232 days. Thei substitution of a motor vehicle for the present horse-drawn ambulance would contribute materially to the comfort of patients who must be carried in such a conveyance.

The isolating wards at Garfield Memorial Hospital rendered during the year 9,041 patient-days' service, of which 6,582 were rendered to patients sent to the institution by the health officer for treatment at public expense. For such service the Government paid \$7,000,

or \$1.06 per patient per day.

The isolating ward at Providence Hospital rendered 3,795 patient-days' service, of which 2,701 were rendered to patients sent to the institution by the health officer for treatment at the expense of the District. The cost per patient per day at this institution was \$1.85.

There were disinfected during the year by the disinfection service connected with the bureau of preventable diseases 2,041 premises, and 1,396 articles were removed from such premises to the disin-

fecting station for disinfection.

In the public crematorium there were burned during the year 569 bodies—150 adults, 161 infants, and 258 stillborn babies. The crematorium was in active operation on 116 days. While the total cost of maintenance and operation during the year was \$1,824.17, there must be offset against this \$965 collected as fees for cremations at private expense. The net cost to the Government for the maintenance and operation of the crematory was therefore \$859.17.

In the bacteriological laboratory there were examined during the year 17,255 specimens. Of these 12,514 related to diphtheria, 1,551 to tuberculosis, 581 to typhoid fever, and 207 to malaria.

In connection with the food-control service of the health department, there were examined 1,893 specimens of milk and cream.

Bureau of food inspection.—Grocery stores, commission houses, markets, bakeries, confectionery stores, restaurants, lunch rooms, hucksters, and other places and persons vending foodstuffs under the supervision of the health department numbered at the close of the year 5,832. Of these establishments, 49,978 inspections were made.

With a view to procuring cleanliness and decency with respect to certain of the utensils used in restaurants, lunch rooms, confectionery stores, drug stores, and other like places for the service of foods and beverages to consumers, the commissioners during the year promulgated certain regulations providing for approved methods of cleansing such utensils so as to prevent the spread of communicable diseases through them.

Slaughterhouses in the District, not under Federal inspection,

number 21. These were inspected 307 times during the year.

The number of registered dairy farms producing milk for consumption or manufacture in the District of Colimbia numbered at the close of the year 1,236. Four thousand one hundred and eighty-three inspections of these farms were made during the year.

Samples of milk, numbering 8,304, and of cream, numbering 316, were examined chemically during the year. Bacteriologically,

1,642 samples of milk were examined.

Of foods other than milk and cream there were examined chem-

ically during the year 481 samples.

Bureau of sanitary inspection.—Complaints acted on during the year numbered 7,069, a daily average of 22.9, and a daily average per inspector of 2.8. The total number of calls of all kinds made by the sanitary inspectors was 56,191. Violations of sanitary laws and regulations were found in 11,119 instances, but in 10,698 the objectionable conditions were corrected prior to the close of the year. Cases awaiting action at the close of the year numbered 421. Special attention has been given during the year to the inspection of printing offices.

Establishments coming within the purview of the smoke law numbered during the year 413. Of these establishments, 8,173 observations were made.

Private hospitals and asylums holding licenses from the commissioners numbered 36—26 for human beings and 10 for domestic animals.

Eight-hour law for females.—Establishments coming within the law registered at the close of the year numbered 1,830. Of these establishments 9.437 inspections were made. Prosecutions were instituted in 23 cases.

Pound service.—The total number of animals that passed through the pound during the fiscal year was 6,892, of which 2,973 were dogs, 3,913 were cats, 5 were horses, and 1 a coyote. There were collected through the activities of the pound service during the year \$951.

Bureau of administration.—There were received by the health department during the fiscal year 1916, 10,146 letters and 3,588 oral complaints. Letters sent by the department numbered 10,340. Special reports filed by employees numbered 1,299.

Bureau of vital statistics.—There were recorded during the year 6,495 deaths that occurred in the District of Columbia and 595 deaths of persons whose bodies were brought into the District of Columbia to be disposed of. Births certificates numbering 7,224 and stillbirth certificates numbering 425 were received. One thousand one hundred and seventy-nine transcripts were issued from the records of births, stillbirths, deaths, and marriages for which fees amounting to \$514 were collected.

There were on the registers of the health department at the close of the year 1,870 physicians authorized to practice medicine in the District, 867 dentists, 286 undertakers, and 92 midwives.

CHARITIES AND CORRECTIONS.

The annual report of the Board of Charities reviews in detail the numerous activities of the various charitable, penal, and correctional institutions.

The workhouse farm.—Continued development of the work at Occoquan on the farm and buildings is recounted. Further experience of open-air treatment for the prisoners as opposed to the old cellular system has proven most satisfactory.

Reformatory.—The proposed reformatory for the District is now practically ready for the reception of prisoners and will probably be opened during the month of November, 1916. The success of this institution will mean that hereafter persons convicted of crime in the District of Columbia will be confined at the new institution, whereas they have formerly been sent to the Federal penitentiaries at Atlanta and Leavenworth, and in numerous instances have been sent to State prisons when there was not sufficient room for their accommodation in Federal institutions.

Indeterminate sentence.—Attention is again called to the importance of securing early enactment of an indeterminate sentence and parole law. Such a law becomes a practical necessity in the handling of long-term prisoners.

Municipal hospital.—The estimate for the erection of buildings for a numicipal hospital is renewed, and this need is corphasized as one of the most urgent of all needs in the District of Columbia. The board calls attention to the opposition to the placing of the hospital on the site purchased by the District for that purpose and records its opinion that such opposition is not well founded, giving the reasons for its position in this regard.

Board of Children's Guardians.—The important work of the Board of Children's Guardians is reviewed and certain recommendations

for the increase of the working force of that board are made.

Industrial home schools.—It is recommended that the Industrial Home School for White Children be moved to a larger site in the country where opportunity will be afforded for agricultural training. Additional cottages are recommended at the Industrial Home School for Colored Children to meet the urgent demand for the training of this class of children.

Care of the feeble-minded.—Attention is again called to the urgent need of proper facilities for the care and training of feeble-minded children. The Tinkham bill (H. R. 13666) is indersed by the board

as offering a satisfactory solution of the problem.

Municipal lodging house.—Plans are being made for the erection of the new municipal lodging house authorized by Congress last year. Thus one very pressing need for the care of the indigent is being met.

Ambulances.—The estimate for the purchase of motor ambulances to supplant the inadequate service of horse-drawn vehicles now maintained is earnestly urged as being humane and economical.

NULLIFICATION OF CRIMINAL JUDGMENTS AGAINST CHILDREN.

The act of Congress of April 27, 1916, eliminating any judgment of conviction of record in the juvenile court of the District against any child as a disqualification for any public office or duty, or as a part of a criminal record of conviction against such child, is a memorable advance in the field of juvenile legislation.

CADETS AT THE UNITED STATES MILITARY ACADEMY.

Provision is made in an act of Congress approved May 4 last for an increase in the number of cadets from the District of Columbia to the United States Military Academy from two, as previous to that date, to four. But in view of the probable inadequacy of the then existing facilities for the immediate accommodation of such a large increase in the number of cadets from all parts of the country as that legislation involves, the law contained a provision restricting its observance to a gradual increment in the number of appointments under it. The District has therefore received the allotment of only one of the cadetships provided by the statute, but will in the near future be accorded its full quota of four.

Three cadets from the District are now at the Military Academy,

one of whom will be graduated next June.

FRAUDULENT AUCTION ENTERPRISES.

The act of Congress approved September 8 last to prevent fraud at public auctions was much-needed legislation for the protection of the District from imposition and, the reputable merchants of the District from unfair and dishonorable competition.

CORONER.

During the year embraced in this report the coroner held 83 inquests and directed the performing of autopsies in 108 cases for the District of Columbia and 30 cases for the United States.

The total number of deaths from accidents and other forms of

violence was 367, of which 35 were homicidal.

There were received at the morgue 979 bodies.

The total number of cases fully within the jurisdiction of the coroner and certified to by that official during the year was 1,365.

BOARD OF PHARMACY.

The board held quarterly examinations during the year, for which there were 75 applicants, 30 of whom were successful and therefore licensed to practice pharmacy in the District of Columbia. Four applicants were licensed through reciprocal agreements, this making a total of 34 licenses issued during the year.

Five permits for the sale of poisons for use in the arts and as insecti-

cides were issued: 12 which had expired were renewed.

The total number of names appearing upon the register are as follows: Series A, 546; series B, 53; series C, 228; total, 823.

The treasurer's report showed balance from last annual report, \$11.21; receipts from all sources, \$754; disbursements, \$763.23.

Through its membership with the National Association of Boards of Pharmacy reciprocal relations are enjoyed with 37 States.

THE BOARD OF EXAMINERS IN VETERINARY MEDICINE.

Two applications for licenses to practice were received but were not examined until after July 1, 1916, owing to the late date on which they were filed and the absence of some of the board from the city on matters connected with the United States Army. No receipts during the year. Disbursements during the year for stationery, printing, etc., amounted to \$10.60.

Balance of secretary's bank account is \$30.73, June 30, 1916.

Books were audited by the District of Columbia auditor in August, 1916, showing a balance at that time of \$45.87.

There has been received \$20 since June 30, 1916, for two applications and \$4.86 expended since that date.

BOARD OF DENTAL EXAMINERS.

Fifty-two applicants were examined under the law as to their qualifications to practice dentistry in the District of Columbia.

Thirty-five were certified for registration, and two among this number presented certificates from their State board, and under the law as amended February 5, 1904, were granted certificates without examination.

Five registered dentists having lost their certificates, the board directed that five certificates be issued in duplicate.

Eighteen applicants failed to pass the examination and were refused

certificates.

One applicant applied for examination in theory alone and requested that she be allowed to take the clinical examination in

January, 1917, which was granted.

Two applicants qualified in June, 1915; one was sick, the other was ordered away by the Government, in whose employment he is engaged; consequently the board granted them permission to take the January, 1916, examination without further payment.

Receipts during the year, \$516.

Disbursements during the year, \$516.

ANATOMICAL BOARD.

The anatomical board reports that the number of cadavers distributed to medical schools was 96.

Financial statement.

RECEIPTS.

Balance in American Security & Trust Co. June 30, 1915	360.00
	1, 036. 45
DISBURSEMENTS.	
July 1, 1915, to June 30, 1916	910. 25 126. 20
•	1, 036. 45

BOARD OF MEDICAL SUPERVISORS.

The board of medical supervisors reports that it issued during the fiscal year ended June 30, 1916, 56 licenses to practice medicine and surgery in the District of Columbia, 3 of which were on reciprocal applications from Georgia, Virginia, Maryland, and Maine.

The personnel of the board, with one exception, remains unchanged. The board has under consideration, at the present time, material amendment to the medical practice act, which it deems inadequate to present needs.

NURSES' EXAMINING BOARD.

The nurses' examining board reports:

Number of certificates issued by it from June 30, 1915, to July 1, 1916	63
Number of training schools registered	3
Total receipts	\$1, 350, 33
Balance	
Expenditures	\$538.93
Compensation to members	\$240,00
Compensation to inspector of training schools	\$90.00

AUTOMOBILE BOARD.

The automobile board reports its transactions during the year, as follows:

•	Number issued.	Amount.
Automobile and motorcycle tags issued to residents of the District of Columbia. Automobile and motorcycle tags issued to nonresidents of the District of Columbia. Permits issued for esidents of the District of Columbia. Permits issued to nonresidents of the District of Columbia. Receipts from duplicate tags. Sale of lists of automobile registrations.	7,147 4,597 5,790 3,823 413	\$14,042 9,194 11,120 7,646 413 33
Total receipts.		42,448

VETERINARY SURGEON.

The veterinary surgeon reports the following transactions during the year:

Thirty-two horses certified for purchase.

Nineteen horses recommended to be sold.

Eleven horses recommended to be destroyed. Eighteen horses died.

One hundred and ninety-five horses were treated at the hospital.
One hundred and seventy-three animals were recommended to be transferred from one department to another.

Five hundred and twenty-one horses have been branded.

The District of Columbia now has in its possession 718 horses and mules.

ROADWAY PAVEMENTS.

The accompanying table shows the area in square yards of new roadway pavements laid and old roadway pavements resurfaced during the year, with the totals in square yards and miles of the various kinds of pavements at the close of the fiscal year.

Comparative statement showing character and extent of roadway pavements.

	Existing amount on June 30, 1915.		on New pave- ment laid during the Replaced with		Existing amount on June 30, 1916.	
	Square yards.	Miles.	year (square yards).	asphalt.	Square yards.	Miles.
Sheet asphalt and coal tar. Asphalt block. Asphaltic or bituminous concrete: On concrete base. On broken-stone base. Cement concrete. Granite block and rubble. Vitrified block Cobble. Macadam Gravel and unimproved. Gutters on concrete streets. Gutters on concrete streets. Pavements maintained by street rallways.	594,626 78,708 51,088 51,997 465,685		9,451	20, 863 11, 952 8, 930 2, 042	3,007,952 603,261 78,708 51,088 68,655 444,822 25,535 68,799 1,961,304 217,032 11,201 559,089	161.31
Total	7,028,037	510. 19			7,097,446	513.69

Note.—67,093 square yards of sheet-asphalt pavement replaced, including 38,978 square yards of asphalt surface laid on old base.

The sums appropriated for expenditures during the year under this head were as follows:

For paving new roadways and repairing old roadway pavements	\$525, 400
For the construction and repair of suburban roads	-199, 200
For grading streets, alleys, and roads.	15,000

The types of fixed roadway pavements laid during the year were sheet asphalt, asphalt block, and concrete. But a limited amount of asphalt block was laid in comparison with sheet asphalt, due to the low prices received during the year for sheet-asphalt pavement.

The prices paid under contract for roadway pavements during the year were as follows:

Laying sheet-asphalt pavement (2½-inch asphalt surface, 2-inch binder, before compression), with 6-inch concrete base. \$1.49
Laying vitrified-block gutters, with 6-inch concrete base. 1.23
Laying sheet-asphalt pavement (2½-inch asphalt surface, 2-inch binder, before compression), with 5-inch concrete base. 1.43
Laying vitrified-block gutters, with 5-inch concrete base. 1.45
Allowance for stone furnished by the District of Columbia: 90
On bistrict wharf, per cubic yard 90
On barges alongside District wharf, per cubic yard 75

The project for the fixed wear 1017 are as follows:

The current prices for resurfacing and repairing asphalt pavements under a contract for a period of two years beginning July 1, 1916, are as follows:

In suburban road construction, in addition to the roadways paved with sheet asphalt under contract, there were constructed about 11,230 square yards, or 0.63 mile, of cement roadways; 20,166 square yards, or 1.9 miles of macadam roadway, and 9,744 square yards, or 0.74 mile, of gravel roadway. In addition, the grading of suburban streets aggregated 25,437 cubic yards. The larger part of the appropriation for repairs to suburban roads was expended in the repairing of the trunk lines of travel. Among the principal roads repaired were New Cut Road, Massachusetts Avenue extended, Rhode Island Avenue extended, Pennsylvania Avenue SE., Georgia Avenue NW., Bladensburg Road NE., Michigan Avenue NE., Connecticut Avenue NW., and Benning Road NE.

Approximately \$34,000 was expended for surface treatments of roadways with tar and oil and \$2,600 for sprinkling roadways with water.

MUNICIPAL ASPHALT PLANT.

The District of Columbia operates a portable municipal plant in the repair of asphalt pavements and the repair of macadam streets by the construction of an asphalt-macadam wearing surface thereon. The plant was operated 236 working days during the year, with an average daily output of 715 cubic feet, and a total output of 168,684 cubic feet. This output is not the capacity of the plant, but its use is limited by the needs of the service. Old material is used to a large extent in the manufacture of the output. Old asphalt topping removed from the streets in resurfacing is crushed to a finely broken product to which is added new material. The materials purchased for use during the year for this plant were as follows:

Sand, 2,160 50 cubic yards, per cubic yard	81.03
Asphaltic cement, 461.74 tons, per ton	10.00
Limestone dust, 205 tons, per ton.	2.53
Screenings, 855 tons, per ton	1.32

There was purchased for use in operating the crusher and mixer the following large items:

Fuel oil, 23,927 gallons, per gallon	§0.031
Coal, 170 tons, per ton	3.45
Wood, 80 cords (average), per cord	5.00

The details of the cost of operation are contained in the report of the engineer of highways. The cost of the product laid on the street as compared with the contract price of a similar product is as follows:

	Municipal plant, per cubic foot.	Contract price, per cubic foot,
Asphalt surface (class b). Asphalt surface (class a). Asphaltic binder (class a). Asphaltic binder (class b).	.4512	\$0,47 .52 .39 .41

The total cost of minor repairs to sheet-asphalt pavements during the year was \$41,982.41.

This cost represents the maintenance of all asphalt streets not under guaranty by contractors, a total yardege of 2,396,063. The cost per square yard was therefore about 1.9 cents.

SIDEWALKS AND ALLEYS.

The sum of \$220,000 was appropriated for paving sidewalks and alleys, and in addition the sum of \$10,000 for laying sidewalks and curbs around public reservations and municipal buildings. Sidewalks are paved with cement and alleys with vitrified brick or asphalt block: 30,219 square yards of vitrified block and 5,439 square yards of asphalt block pavements were laid in alleys. There was also 2,940 square yards of concrete pavement laid in alleys, this being a new departure during the year. The cement sidewalks laid aggregated 77,072 square yards. One-half the cost of curbs, sidewalks, and alley paving is assessed against the abutting property, except in the case of public buildings and reservations. Cement sidewalks are laid under contract and alleys are paved by day labor.

The contract prices paid for laying cement sidewalks during the year were as follows:

For the fiscal year 1917 the prices are as follows:

The initiative in the matter of paving sidewalks and alleys is generally left with the owners of abutting property, the commissioners requiring a majority petition for such work before it is ordered. Exceptions are made, however, in cases where, on account of public danger or other public reason, the paving is demanded. The law requires the commissioners to advertise for two weeks their intention to lay sidewalks and curbs and to pave alleys and to give a hearing to the property owners affected. The work is ordered subsequent to such hearing when, in the opinion of the commissioners, it is necessary for the public safety, health, comfort, and convenience. The demand for this class of construction is constant, and increased appropriations for this work could advantageously be expended.

BRIDGES.

The Q Street Bridge across Rock Creek was completed during the year and the approaches paved. By an order of the commissioners this bridge was named Dumbarton Bridge. The bridge across Rock Creek on the line of Pennsylvania Avenue was also completed during the year, and by order of the commissioners this bridge was named Meigs Bridge. A description of these two bridges will be found in the report of the engineer of bridges, which also gives the detail of expenditures on the smaller bridges in the District of Columbia. The engineer of bridges calls attention to the necessity for replacing the Calvert Street Bridge over Rock Creek. An appropriation of \$6,000 has been made for the preparation of plans for a new bridge at this point, and it is the intention to obtain competitive designs for the structure.

Among the larger items of improvements made during the year were the reflooring of the old Aqueduct Bridge across the Potomac River, the paving of the roadway of the Connecticut Avenue Bridge over Rock Creek, and the widening of the south approach to the Anacostia Bridge.

At the last session of Congress a bill was passed providing for replacing the old Aqueduct Bridge across the Potomac River with a new bridge at an estimated cost of \$1,000,000. This work was placed under the jurisdiction of the Chief of Engineers, United States Army.

SURVEYOR'S OFFICE.

The work done by the surveyor is of two classes, namely, that done for private parties and that done for the District of Columbia and the United States. For the work done for private parties fees are charged in accordance with the schedule approved by the commissioners. The total amount of fees collected during the year was \$15,005.15. The amount received during the previous fiscal year was \$12,817.95.

The surveys made for the District of Columbia and the Federal Government also considerably increased over the previous year. Considerable time was spent in making a survey of the Anacostia River and Flats for the purpose of instituting condemnation proceedings to acquire land in connection with reclamation of these flats.

Under an appropriation of \$2,500 made for surveys of old subdivisions many old boundary lines were marked out on the ground. For the present fiscal year no appropriation was made for this pur-

pose, although the work has not been completed.

STREET AND ALLEY EXTENSIONS.

During the year 24 street, alley, and park condemnation cases were prepared and filed, an increase of 6 over the previous year. Twenty-eight street and park condemnation cases and 15 alley condemnation cases were under consideration by the courts during the year. Among the important cases were the opening of Thirteenth Street between Spring Road and Colorado Avenue; Perry Place and Spring Place; eleven small park places: the widening of Wisconsin Avenue between Garfield Street and the District line; Widening of Naylor Road between Good Hope Road and the District line; the opening and extension of Calvert Street and Cleveland Avenue; the widening of Georgia Avenue and of Benning Road.

A table appended to the report of the surveyor gives the status of all condemnation cases instituted by the District of Columbia where the proceedings have been instituted or have been completed during

the year.

TREES AND PARKINGS.

The number of trees on streets, in school yards, and on play-grounds at the close of the fiscal year was 104,490. The trees planted during the year amounted to 3,421, and those removed amounted to 2,066, leaving a net increase over the preceding year of 1,355 trees. Of the total number of trees, 104,306 are planted along the curbs of streets, the increase in the number of trees along curbs being 1,488. The mileage of trees at the close of the year was 592.64, being an increase of 8.46 over the mileage of the preceding year. The trees are planted on both sides of the street and the mileage is figured on the basis of 352 trees to the mile. The length of streets planted with trees is 296.32 miles, being an increase of 4.23 over the preceding year. The amount expended for planting and care of trees was \$43,879.63. The amount spent in care and mowing of parkings was \$2,190.91. This office also issued 768 permits to grade parking terraces.

It was not possible to undertake any general trimming of trees on account of the smallness of the appropriation, and the total trees trimmed was only 10,119.

STREET AND ALLEY CLEANING.

The street and alley cleaning division serves a population of 357,749 and covers an area of approximately 70 square miles. It has charge of the cleaning of all streets, avenues, and alleys in the District of Columbia, except such work on the outlying county roads

and suburban streets as is done under the supervision of the superintendent of county roads. The work is done by day labor and not

by contract.

The best method of cleaning streets is by hand patrol, supplemented by washing with either squeegees or flushers. By the hand patrol the coarser particles are removed before they have chance to be crushed by traffic into dust. The washing removes all fine dust. The area cleaned by this method has gradually been increased, and the expenditures for hand patrol work and washing represents over two-thirds of the expenditure in street cleaning work. The street flushers are used to clean roughly paved streets.

The unit cost per 1,000 square yards of this work is as follows:

Hand patrol	80.132
Machine sweeping	. 144
Alley cleaning	.326
Squeegeeing	. 106
Flushing	. 212

The total cost of street cleaning, including all charges except interest on investment and depreciation, was \$297,317.19. With the population served, 357,749, this gives a per capita cost of \$0.831.

COLLECTION AND DISPOSAL OF CITY REFUSE.

New contracts for the collection and disposal of city refuse went into effect at the beginning of the fiscal year. The contract prices were as follows:

1 (I CELLIA CELLIA
Garbage	\$69, 840
Miscellaneous refuse	28,400
Ashes	69,000
Dead animals	2,988

The contracts for garbage, miscellaneous refuse, and dead animals were for a three-year period ending June 30, 1918. The contract for ashes was for a one-year period ending June 30, 1916. For the fiscal year 1917 a new contract was made for a period of two years at a price of \$60,000 per annum.

The unit costs are as follows:

Garbageper ton	\$1.34
Ashes	
Miscellaneous refusedo	. 18
Night soilper barrel.	1.17
Dead animals each	. 7.4

The per capita cost of this service is about 61 cents.

MUNICIPAL COLLECTION OF CITY REFUSE.

At the last session of Congress the commissioners recommended an appropriation of \$300,000 toward the purchase of site and the construction of a plant for the disposal of city refuse, in accordance with plans which had been prepared under an appropriation made by Congress. The total cost of such plant was estimated at \$885,900. This appropriation was not made. The contracts for the disposal of garbage, refuse, and dead animals expire June 30, 1918, and unless municipal collection and disposal is authorized by Congress in time to construct the plant before the expiration of the present contracts

either new long-term contracts must be made or some other plan adopted to carry on the work by contract during the construction of the municipal plant. The commissioners have included in their estimates for the ensuing fiscal year a modified plan, providing for the construction of a reduction plant on land owned by the District of Columbia at Blue Plains, D. C., to take care of garbage and dead animals. The question as to whether the municipality is to take care of the disposal of city refuse itself or to continue the method of collection and disposal by contract should be settled at an early date.

BUILDING OPERATIONS.

The estimated value of building construction, including repairs, during the year, not including buildings under construction by the Federal Government, was \$13.495,535, an increase over the preceding year of \$4,895,603.

The number of permits issued for buildings, building repairs, awnings, signs, engines, motors, etc., was 5,797, an increase of 226 over

the preceding year.

The total number of new baildings constructed during the year was 1,839, an increase of 353 over the preceding year. Of these 1,349 were dwellings, an increase of 194 over the preceding year; 60 were apartment houses, an increase of 18 over the preceding year, and 430 were business buildings, an increase of 141 over the preceding year. The permits issued for repairs to buildings were 3,236, a decrease of 132 under the preceding year.

The distribution of the cost of these improvements, including

repairs, is as follows:

· ·	Buildings.	Repairs, etc.
Northeast Southeast Northwest Southwest County	\$411,423 252,610 4,037,764 105,655 6,983,979	875,077 50,195 837,551 101,347 621,519
Total	11,791,431 1,685,689	1,685,689
Sum total	1 13, 477, 120	

¹ Does not include awnings or signs, cost of which is estimated.

It is estimated that there are 63,590 brick buildings and 26,576 frame buildings in the District of Columbia, of which 1,529 brick and 310 frame were erected during the year. There were torn down dur-

ing the year 38 brick and 71 frame buildings.

Permits for buildings are issued upon the payment of a fee, which is intended to cover the cost of the operation of the building inspector's office. The fees collected during the year amounted to \$31,285.05, an increase of \$4,650 over the preceding year. The receipts for fees just about equaled the salaries of the office, but expenses incurred for transportation and contingencies made the total expenses \$2,797.32 in excess of the receipts. The building operations in the District of Columbia were the largest since the year 1912.

About 800 passenger elevators were inspected by the two elevator inspectors during the year.

INSPECTION OF STEAM BOILERS.

The number of steam boilers inspected by the inspector of steam boilers during the year was 525. The compensation of this official is received from fees paid by the owners of the boilers. The total amount of fees reported by him during the year was \$2,300, and the expenses of inspection \$325, leaving a net compensation of \$1,975.

EXAMINATION OF STEAM ENGINEERS.

The board of examiners of steam engineers held 53 meetings, and examined 118 applicants, of whom 39 were found competent and 79 incompetent.

CONSTRUCTION OF MUNICIPAL BUILDINGS.

During the year seven buildings were under construction, as follows:

AND THE PROPERTY OF THE PROPERTY OF THE PARTY OF THE PART	Medican melaphinahannal. I ramman ayan soru serruman puntabah dan bankan bahari kecinan sengangan banyang serian dan segarah dan serian bankan dan bankan ba	Visit in the property and the second
Building.	Location.	Estimated cost.
New Central High School, No. 173	Eleventh and Thirteenth Streets, Florida Avenue and Clifton Street.	\$1,118,886.67
Dunbar High School, No. 174 Park View School, No. 175	First Street, between N and O Streets	414, 719, 13 120, 796, 46
Western High School, No. 117, re- building.	Thirty-fifth and R Streets NW	132, 572. 30
Powell School, No. 157, addition Engine house No. 28	School Street, opposite Lamont Street	71,869.00 25,613.52
Truck house No. 1	New Jersey Avenue, between D and E Streets NW.	35, 595.21

The plans and specifications for all buildings appropriated for were completed and contracts made before the end of the fiscal year with the exception of the fish market and the public convenience station at Fifteenth and H Streets NE. The Central and Dunbar High Schools and the Park View School were completed and occupied on the opening of the school term, October 2, 1916. The Powell School addition is expected to be completed and ready for occupancy on December 1, 1916. Truck house No. 1 on New Jersey Avenue, between D and E Streets, and engine house No. 28, at Connecticut Avenue and Ordway Street, have been completed.

School buildings and other District buildings have heretofore been contracted for at a cost of between 14 and 17 cents per cubic foot. On account of the great advance in wages and in the price of building materials the buildings to be constructed during the next fiscal year will probably cost from 18 to 20 cents per cubic foot. The increase in cost since 1898 has been about 60 per cent.

REPAIRS TO MUNICIPAL BUILDINGS.

All municipal buildings are kept in repair by the superintendent of repairs under the direction of the municipal architect. In repairs to school buildings \$119,777.11 was spent.

In repairs to engine houses of the fire department \$11,780.85 was spent.

In repairs to police stations \$5,793.02 was spent.

In repairs to the police court building \$990.09 was spent.

PLUMBING AND PLUMBING INSPECTION.

During the year the plumbing office made 35,742 inspections, a decrease under the preceding year of 1,736. It is estimated that the total cost of new plumbing work installed in private buildings during the year was \$962,978, and the estimated value of repairs and remodeling to old plumbing is \$331,695. This is an increase over similar construction during the preceding year. The average number of inspections per day per man was 15, and the greatest number 61. Fifteen cases of violations of the plumbing regulations were prosecuted in the police ccurt.

Under the compulsory drainage set 27 cases were forwarded by the health department and other branches of the District government for the installation of sewer and water, in those instances where the owner had failed to do the work after notice served upon him. In 15 of these cases the owner or agent subsequently agreed to install the services, and in 1 case the building was torn down by the owner. Only in 3 cases was it necessary for the work to be done by the District of Columbia and an assessment of the cost made against the property. There are 8 cases now under consideration.

PUBLIC CONVENIENCE STATIONS.

The three public convenience stations located at Seventh Street and Pennsylvania Avenue NW., Thirteenth Street and Pennsylvania Avenue NW. and Ninth and K Streets NW. were operated during the year from 6 a. m. until midnight. The total number of patrons of these stations was 3,122,948. Receipts from pay compartments aggregated \$3,098.16.

The use of these stations demonstrates their value and necessity to the community, and it is the intention of the commissioners to recommend the construction of additional stations at points where the

public demand is urgent.

PLUMBING BOARD.

During the year the plumbing board held 26 sessions for examination for candidates for license as master plumber and gas fitter. The total number of applicants examined was 48, of whom 22 were original candidates, of whom 6 passed and 16 failed, and 26 were candidates who had been previously examined, of whom 1 passed and 25 failed.

STREET LIGHTING.

There are 18,805 street lamps of all kinds in the District of Columbia, as follows:

Mantle gas.	10, 248
Electric arc	940
Electric incandescent. Street designation lamps.	$\frac{1,238}{479}$
-	10.00

This was a net increase during the year of 604 lamps.

Improved incandescent lighting was extended during the year on slightly over 3 miles of streets involving the erection of 528 lamps of 100 candlepower each on Pennsylvania Avenue SE., from Second

Street to Seventeenth Street: Eighth Street SE., from Pennsylvania Avenue to M Street: Eleventh Street SE., from Pennsylvania Avenue to O Street: Seventh Street NW., from New York Avenue to Florida Avenue: and Nichols Avenue SE., from Navy Yard Bridge to Sheridan Road.

FIRE-ALARM, TELEPHONE, AND TELEGRAPH SERVICE.

Four and eight-tenths miles of underground cable were installed during the year. The amount in service at the close of the year was 140 miles.

The aerial cable in service at the end of the fiscal year was 5.3

 $_{
m miles}$

Twelve new fire-alarm boxes were placed in service during the year, making a total of 593. The total number of fire alarms received and transmitted during the year was 1,362, of which 130 were false.

The total number of poles connected with street and steam railroads, telephone, telegraph, and electric light, and the District service at the end of the year was 18,072, of which 17,202 are line poles and 870 guy poles.

The fees collected for the inspection of electric wiring in private

premises amounted to \$6,008.

PERMITS.

· The permits issued by the permit clerk of the engineer department other than those for buildings amounted to 14,071, and of this number 9,565 were covered by fees and 4,506 were issued without fee.

ROCK CREEK PARK.

The jurisdiction and control over Rock Creek Park is placed by law under the Commissioners of the District of Columbia and the Chief of Engineers, United States Army, acting jointly. The amount appropriated for the care and maintenance of the park during the year was \$18,000. The principal improvement during the year was the completion of the macadamizing of Ross Road, which was begun in the preceding fiscal year. The sum spent on this work was \$4,662.12. In the general repair and care of the park \$8,694.99 was expended, and in the cutting and hauling of fallen timber \$1,342.92. The timber was cut into firewood, of which 222 cords were sold to the public schools and 30 cords to private parties, the amounts received from this source being turned in to the Treasury.

The bridle path along the west side of Rock Creek was widened and relocated for about three-fourths of a mile and connected with the bridle-path system farther west. Additional temporary toilet facilities were provided, two baseball diamonds were laid off, the existing swimming pools were provided with rustic shelters, and one new swimming pool established. It is proposed during the ensuing year to clear of undergrowth as much as possible the area of the park adjacent to roadways and in the more frequented sections of Rock Creek Park and the Piney Branch Parkway and to extend the system of bridle paths and footpaths, and, in addition, it is contemplated to

construct another line of roadway crossing the park.

ANACOSTIA RIVER AND FLATS,

The total expenditure on the project for the reclamation and improvement of the Anacostia River and Flats from the Anacostia Bridge to the District line to June 30, 1916, as reported by the Chief of Engineers, United States Army, under whom this work is being prosecuted, amounted to \$425,766.17. The balance of the appropriation unexpended was \$256,632.28. The amount required to be appropriated for the completion of the project in addition to funds heretofore appropriated is estimated at \$2,006,000 (exclusive of the cost of the acquisition of the land). At the end of the fiscal year 1916 the project was about 16 per cent completed. The work done included the dredging of 1,143,024 cubic yards of material, the construction of 7,702 feet of masonry sea wall, and the placing of 98,703.6 cubic yards of riprap. By the operations to date 120 acres of land have been reclaimed or partially reclaimed.

HARBOR FRONT.

The total amount received from the rental of wharves and river frontage placed by law under the direction of the commissioners was \$19,601.75, divided as follows:

Potomac River front	\$17, 278, 00
Anacostia River front	
James Creek Canal	1,367.50

19,601.75

The actual water frontage in the District of Columbia devoted to commerce, with the exception of canals, is about 2 miles. The total available water frontage is about 18 miles, of which about 8 miles is set aside for parks and purposes of the United States. The largest amount of wharf property under the control of the commissioners is along the Washington Channel. The total frontage along this channel is 9,275 linear feet, of which 4,675 linear feet, between the grounds of the War College and the south curb line of N Street, is under the control of the United States. Of the remaining 4,600 linear feet, 4,021 linear feet is under the jurisdiction of the commissioners and 559 linear feet, between Thirteenth and Fourteenth Streets, has been designated by Congress as the site of the central heat, light, and power plant.

Along the frontage under the control of the commissioners are located the harbor police station and dock of the harbor boat, house and dock of the fire boat, the District morgue, the municipal fish wharves, and a District property yard. The balance of the frontage is leased to private parties, generally for terms of five years, the basis of rental being a net return of 4 per cent on the estimated value of the wharf property, with the requirement that the lessee shall make all improvements and repairs.

The public space along James Creek Canal, in the southeastern section of the city, extending from N to P Streets, a distance of 1,000 feet, is under lease for commercial purposes. By an order of the commissioners, dated September 29, 1916, based upon a recommendation by the health officer, it has been determined to fill the canal between N and P Streets as soon as questions affecting existing leases have been

settled. This will leave the canal open from P Street to the Anacostia. River, a distance of about 3,000 linear feet, along the grounds of the War College and Engineer School.

CONDEMNATION OF INSANITARY BUILDINGS.

The board for the condemnation of insanitary buildings held seven meetings and issued orders for the demolition of 64 buildings and the repair of 89 buildings. Of those demolished 48 were in streets and 16 in alleys, and of those repaired 57 were in streets and 32 in alleys.

Since the creation of the board it has examined 6,583 buildings, of which 2,040 were demolished and 1.527 repaired. Of buildings in alleys 664 were demolished and 490 repaired, and of buildings in streets 1,376 were demolished and 1,037 repaired.

The estimated number of tenants required to secure other quarters through the action of the board in the demolition of buildings has been 5,947. The estimated number of tenants benefited by repairs to buildings required by the board is 5,116.

SEWERS.

The length of main and pipe sewers constructed during the year was 20.15 miles. The total length of main and pipe sewers in the District of Columbia on June 30, 1916, was 702.06, of which 139.53 are main sewers and 562.53 miles are pipe sewers. The total cost of the sewerage system to June 30, 1916, was \$13,294,695.25. The cost of the sewage-disposal system to June 30, 1916, was \$4,671,279.19, making the total cost of the complete system to June 30, 1916, \$17,965,974.44.

The main sewage outfalls of the sewagesdisposal system on the Potomac River about opposite Alexandria were under observation throughout the year. In general the condition of the river water continued good, the beaches free of any deposit, and the river bottom failed to disclose appreciable evidence of sludge deposits. There is an approaching need, however, for the removal of a considerable portion of the organic matter in sewage before discharging it into the river. This has been indicated during the year by odors observable for the first time over considerable areas in the vicinity of the outfall. With the increasing volume of sewage these conditions will gradually grow worse unless an adequate remedy is applied. This remedy would involve the installation of sewage-treatment works, and the commissioners have given this matter consideration in the preparation of their estimates to Congress.

The sanitary survey of the river, undertaken by the United States Public Health Service, particularly with reference to the discharge of sewage from the District of Columbia, was published during the year: and indicated that in important respects there was no apparent need at present for any apprehension that the sanitary condition of the river is such as to be a menace to health by the pollution of oyster beds in the lower river or otherwise. This thorough study of the river explains the peculiar natural local conditions favorable to the disposal of sewage by dilution, but also indicates that there is a limit to the volume of sewage which may be so disposed. When this limit is reached it must be expected that unfavorable conditions will

develop.

Metropolitan sewerage system.—In the last District appropriation act authority was granted the commissioners to enter into agreements with the authorities of Maryland to take care of the question of the streams carrying sewage from the adjacent counties of Maryland into the District of Columbia. Gradual installation of sewerage systems in the bordering Maryland towns which discharge their sewage into these streams is the principal cause of increase in pollution. It is hoped under this legislation to permanently remedy this condition by providing the necessary intercepting sewers to connect the Maryland system with the District of Columbia system.

Sewage-disposal system.—The sewage-disposal system was in continuous operation throughout the year, handling the sewage of practically the entire District, as well as the storm water from the 900 acres of low area within the District. At the pumping station at the foot of New Jersey Avenue 21,034,000,000 gallons of sewage and 303,000,000 gallons of storm water were pumped. In this service 10,156,250 pounds of coal were used. In addition to this main station there are substations at Poplar Point and Woodridge. The Poplar Point station pumped 273,000,000 gallons of sewage and the Woodridge station 5,156,000 gallons.

Sewer construction.—The following table shows the length and cost of sewers constructed during the year:

Section.	Length.	Cost.
1. County west of Rock Creek. 2. County east of Rock Creek. 3. County west of Anacostia River. 4. County east of Anacostia River. 5. Washington City.	7.822.29	\$76,651.65 46,900.73 16,569.54 121,203.31 59,110.21

PARKS.

Within the last three years \$75,000 has been appropriated for the acquisition of small parks outside of the limits of the original city of Washington. The appropriations for these parks not only required that they should be located outside of the city of Washington, but that they should be surrounded by streets. The commissioners have made selections of small parks complying with these two conditions, and the parks have either been condemned or are in process of condemnation. A considerable proportion of the money appropriated can not be judiciously expended, however, due to the lack of land complying with requirements of the law.

The commissioners do not believe that they should be restricted in their selections, but should be left free to select for small parks land situated anywhere within the District of Columbia, and it is their intention to submit to Congress a list of such parcels as they think

should be acquired.

In their estimates for the ensuing fiscal year they have also included items providing for the acquisition of larger parks as follows: Patterson tract, lying north of Florida Avenue and east of New York Avenue; Dean tract, located at the intersection of Connecticut and Florida Avenues; and the Klingle Valley from Woodley Road to the Zoological Park. For the Klingle Valley Park approximately 8\frac{3}{4} acres will be required.

WATER MAINS.

During the year 54,114 linear feet, or 10.2 miles, of water mains of all sizes were laid, making the total length of water mains in service at the end of the year 3,220,487 linear feet, or 609.9 miles; 6,083 linear feet of water main of various sizes were abandoned.

Two hundred and fifty-three hydrants, 5 public hydrants, 4 sanitary fountains, and 1 horse fountain were erected during the year, and 183 fire hydrants, 4 public hydrants, and 1 sanitary fountain were abandoned, making the total number in service at the end of the year as follows:

Fire hydrants.	3,444
Public hydrants	
Sanitary fountains.	
Horse fountains.	153

There are also 44 deep public wells and 9 shallow public wells in service.

WATER CONSUMPTION AND WASTE.

By means of the installation of water meters and the operation of the pitometer service for the detection of leaks, the mean daily rate of consumption has been reduced from 52,512,000 gallons reported during the preceding year to 49,698,000 gallons, and the per capita rate has been reduced from 144 gallons to 136.5 gallons. Measures to reduce the consumption of water were started in 1905, when the mean daily rate had reached 65,000,000 gallons and the per capita rate about 227 gallons.

The total pumpage of water during the year was 8,623,533,740 gallons, and the coal burned in this pumping amounted to 5,845.71

tons.

In the report for last year attention was invited to the very large use of water in Federal buildings for condensing and cooling purposes. As there is no direct charge against Federal departments for water delivered to them, the cost of the water is seldom taken into consideration when additions are made to the mechanical equipment in such buildings, and, with an unlimited supply of water available, without cost, there is no incentive to conserve the supply by the use of cooling devices.

Some of the largest users of water among the Federal departments are the Washington Navy Yard, averaging 1,860,518 gallons per day; the Government Printing Office, 2,497,402 gallons; the Bureau of Engraving and Printing, 168,382 gallons; and the Capitol power plant,

648,159 gallons.

WATER REVENUES AND EXPENDITURES.

The water revenues from all sources during the year amounted to \$866,133.22. The cash expenditures amounted to \$617,690.45. The outstanding liabilities, including balance of appropriation not available to June 30, 1916, amounted to \$204.831.47, leaving a balance available for appropriation carried forward to the fiscal year 1917 of \$45,137.86. Of the total cost of work done during the year 42.1 per cent was for new work, 39.7 per cent for operation, 12.7 per cent for general repairs, and 5.5 per cent for replacements.

WATER METERS.

During the year there were installed 5,880 water meters, at a cost of \$69.617.67. This makes the total number in use on June 30, 1916, 53,983. The percentage of water services now metered is 77.5. average cost of installing a meter is \$11.27, of which amount the meter costs \$5. The rate charged for water on metered services during the year was 4 cents per 100 cubic feet for all used in excess of 7,500 cubic feet. The minimum charge to each premises, allowing the use of 7,500 cubic feet, is \$4.50 per annum. On unmetered services the rate for domestic service is charged according to stories and front feet. For premises of two stories with a front width of 16 feet or less the minimum rate is \$5 per annum; for each additional front foot or fraction thereof 31 cents is charged. For each additional story one-third of the charges as computed above is added. For business premises not metered rates vary from \$1 to \$25 per annum. Where the rate is \$25 or more a meter is required to be installed at the expense of the consumer.

Very respectfully,

OLIVER P. NEWMAN,
LOUIS BROWNLOW,
CHARLES W. KUTZ,
Commissioners of the District of Columbia.

REPORT OF THE ASSESSOR.

Washington, D. C., October 9, 1916.

Gentlemen: In compliance with your order, I have the honor to submit herewith the report of the assessor's office for the fiscal year ended June 30, 1916, together with a statement of the assessed value of the taxable real estate and personal property in the District of Columbia for the fiscal year ended June 30, 1916, and certain suggestions and recommendations looking toward the improvement of the service.

The act of Congress approved August 14, 1894 (28 Stat., 283), provides that real estate in the District of Columbia shall be assessed every three years. The triennial assessment now in force is for the fiscal years 1915, 1916, and 1917. The assessment beginning July 1, 1915, i. e., for the fiscal year 1916, is as follows:

, ,	
Washington City and County: Assessed valuation of land. Assessed valuation of improvements.	\$207, 173, 905. 00 187, 035, 999. 00
Total assessed valuation of real estate in the District of Columbia for the fiscal year ended June 30, 1916	394, 209, 904. 00 5, 913, 149. 00
For the fiscal year ended June 30, 1915, the assessed real estate in the District of Columbia was as follows:	l valuation of

PERSONAL TAX LEVY.

The total levy for the fiscal year 1916 amounted to \$1,318,342.72. The assessed valuation of tangible personal property in the District of Columbia for the fiscal year 1916 amounted to \$35,042,000.

The personal tax work is conducted through the year as follows: At the beginning of the fiscal year, viz, July 1, the personal tax schedules are filed in the office and continue to come in during the entire month of July, up to and including August 1. Several clerks are kept constantly busy taking affidavits from those who call in person. Last July there were about 10,000 schedules filed. During this same period the inspectors are working in the field, listing the names, addresses, and business designations of all places where there is indication of being any personal property subject to taxation. Also, beginning July 1, work is begun in the outlying sections of the District by an appraiser who makes tentative lists and assessments while in the field. This work is begun in July and not completed until about the first of January. After the schedules are arranged in street order, the figures thereon are entered in field books, together with the information procured by the inspectors, and a complete record of the preceding year is also carried to the current field books.

The work of compiling field notes keeps the inspectors busy until late in December. As soon as the field books are ready the appraisers begin their field work of making assessments in all cases where returns have not been made, and rejecting such returns as appear to have been made under a misunderstanding of the law. The regular work of appraising begins in August or September and is completed and the books checked about January 15. The entire force of clerks is then engaged in writing notices of assessments so that said notices may be ready for delivery when the board of personal tax appeals meets on the first Monday in February. Last year there were 12,394 such notices, of which 5,932 were served in person by the inspectors and 6,462 delivered through the mail.

The board of personal tax appeals convenes on the first Monday in February and remains in session until the second Monday in March. The time of the entire board of assistant assessors is occupied with these appeals for from five to six weeks. After the appeals are completed the clerks write up the cards, showing the new assessments, the ledgers, and bills, all of which must be completed before May 1, when payments become due. During the month of May the clerks render bills and post the ledgers daily of all payments made. The middle of June sees all May payments properly credited, and the last two weeks of June but little work is to be done. On July 1 the whole operation is again commenced.

Out of a total number of 18,198 accounts, there are 7,608 who pay a tax of less than \$5. There are 741 who pay a tax of \$100 or over,

leaving 9,849 whose tax is between \$5 and \$100.

The personal tax levy of the past year has been made under the act of Congress approved July 1, 1902, which provides that tangible property, such as jewelry, household goods, wares, merchandise, stock in trade, horses, vehicles, boats, etc., shall be assessed, and in addition a percentage on the gross earnings of banks, trust companies, and public utilities. By an act approved September 1, 1916 (Public, No. 250) there is provided an amendment to section 11 of the above act imposing a tax on moneys and credits, including moneys loaned and invested, bonds and shares of stock, etc. The rate on this intangible property is fixed at four-tenths of 1 per cent. of the value. This tax, however, can only be imposed on and after July 1, 1917. This new form of tax will give additional work to the personal tax force, but the extra time can be more than compensated for if there be enacted needed legislation regarding the assessment of automobiles and motorcycles.

This office again strongly recommends the annual registration of automobiles and motorcycles, and also the passage of the law requiring the payment of an annual fee based on the value and horsepower of the machine, and the abolition of the personal tax against all vehicles so registered. A bill was introduced in the first session of the Sixty-fourth Congress, House bill 3653, which was intended to impose a special license tax upon automobiles and motor vehicles in the District of Columbia. This Bill, however, did not intend to repeal any portion of the law requiring a personal tax against

automobiles or motorcycles.

In a report on the bill made by the commissioners, on February 4, 1916, the commissioners said in part as follows:

The advisability of providing for a double tax, one based on horsepower and the other a personal tax, is questioned. The commissioners believe that only one tax should be imposed, the amount of that to be determined on the horsepower basis, as the double tax proposed by the bill would be excessive and burdensome.

A law of this kind would not only equalize assessments on automobiles but would keep better track of ownership, would relieve the board of appeals of a most annoying form of appeal from personal-tax assessments, thereby allowing them to devote their attention to other important matters, as appeals from assessments on automobiles take up a large part of the time of the board hearings.

It is again recommended that a regulation be adopted requiring owners of motor boats and sailing vessels (except those engaged in interstate commerce) to procure annually a tag number for the pur-

pose of identification.

The assessment and collection of personal taxes under the law of 1902 have been as follows:

Year.	Tax value.	Collected during year.
1904	\$563, 533, 06 637, 415, 61 666, 247, 20 724, 334, 69 805, 688, 00 863, 882, 10 919, 453, 22 4, 007, 022, 41 4, 089, 540, 79 1, 131, 945, 63 1, 139, 505, 30 1, 230, 091, 87 1, 275, 827, 31 1, 318, 342, 72	\$471, 954, 26 630, 750, 02 725, 698, 22 696, 498, 26 752, 492, 59 821, 933, 04 931, 160, 91 1, 000, 605, 81 1, 058, 790, 14 1, 098, 505, 8 1, 130, 840, 52 1, 164, 918, 73 1, 111, 827, 88 1, 322, 945, 34

YEARLY ASSESSMENT.

Real estate has, since 1894, been assessed triennially (28 Stat., 282) at not less than two-thirds of its true value (act of July 1, 1902) by

the board of three assistant assessors (28 Stat., 282).

This office has for a number of years recommended that assessments be made annually and a step has been taken in this direction by a recent enactment of Congress, approved September 1, 1916 (Pub. No. 250) which requires that hereafter assessments of real estate in the District of Columbia for purposes of taxation shall be made biennially in the same manner as is now required by law for triennial assessments. In order to enable the office to carry into effect such assessment, there has been provided five field men whose need has been greatly felt in the past and who will afford much aid toward equalizing real estate assessments in the District.

APARTMENT HOUSES.

An extra effort has been made to compile, during the past year, rents, cost of construction, cubic contents, and other data in relation

to apartment houses in the District of Columbia.

The value of an apartment house depends on so many different factors that it can not ordinarily be arrived at until after considerable research and study. The relation between first cost, sale price, and gross rentals has been studied in order to reduce the subject to its simplest form.

Ordinarily those who handle apartments will say that their value is equal to the price of the ground plus the construction of the building. The cost of construction is taken generally to mean what a builder would contract to erect the building for after a fair competition in the way of bids submitted on given specifications, adding also, architects' fees, commission on loans, interest on principal, and all incidental expenses necessary to the completion of the building.

The above way of estimating value can not be absolute, as the ground may on certain occasions be purchased at a low figure or again at an exhorbitant rate for apartment-house purposes. Then, too, the building may or may not be designed in the very best manner for a given site, and for these reasons it is necessary to ascertain the yearly rental or income of the property before a really satisfactory appraisal can be made. The character of the construction and the

depreciation of the building are factors of importance, but the condition of the building as well as its adaptability to the location are reflected by the rentals received. Net rentals will be found to bear a certain ratio to the gross rental of the property, so that with the gross rentals given the net returns are known, and this furnishes us with the most important clue as to the true value of the property, after giving full consideration as to any lack of efficient management. The relation between the gross rental and the net rental will be different for different classes of buildings, so that the factors between gross rental and the value of a property will be determined by the class of the building.

For the purpose of comparison, apartment houses have been divided

into four special classes, as follows:

First class.—Apartments thoroughly fireproof and therefore substantially built, with high-class trimmings, elevator service, large rooms, and efficient service in the way of baths, etc.

Second class.—A semifireproof building with elevator service, generally of seven or eight stories in height, and with average size apart-

ments of four and five rooms.

Third class.—Apartments of cheap construction with no elevator service, and generally from three to four stories in height.

Fourth class.—Apartments of cheap construction, two stories in

height.

The gross rental of some 700 or 800 apartment houses has been compiled, so that the office is able to make a comparison, or estimate the general ratio, between the gross rental and value of the property. The net rental has been obtained in a number of cases and shows a great variance even for the same class of apartment houses, due to the management, upkeep, or financial difficulties. With apartment houses in good condition and well managed the running expenses are from 40 to 45 per cent of the gross rentals and rarely fall below 35 per cent, but are more frequently 50 per cent and sometimes as great as 70 per cent.

In a number of well-authenticated sales, totaling over \$3,500,000 and including 50 apartment houses, the sales were about eight times the gross rentals. In 10 sales of apartments worth over \$100,000 each, and aggregating \$2,000,000 worth of property, the amount of cost or purchase was 8.6 times the gross rental. In the cost of 15 apartment houses aggregating nearly \$1,000,000, the value was 7.32 times the gross rental. In 22 apartment houses, worth over \$600,000, the cost was 7 times the gross rental. These last apartments averaged about \$30,000 apiece and were, of course, the cheaper class

apartments.

In our assessments of the apartment houses of the higher class 100 of them, valued at nearly \$18,000,000, are assessed at 8.15 times their gross rental. About 400 apartment houses of the middle class, aggregating over \$14,000,000, are assessed at a basis of 7.73 times the gross rental. About 140 apartment houses of the cheaper class, aggregating about \$1,500,000, are assessed on a basis of 7.15 times the gross rental. The last yearly assessment showed that 24 apartment houses, valued at \$2,152,000, are assessed on a basis of 7.3 times the estimated gross rental.

The importance of an accurate estimate of apartment-house properties is shown in the extent of building going on in that direction, as

one-third of the assessment on new buildings entered this year is for apartment houses. The most active years previous to this were in 1909 and 1910, when permits for nearly \$3,000,000 were taken out for apartment houses and nearly double that amount for brick and frame dwellings. This year the permits show that the amount estimated on apartments is four and one-third million dollars, or a million more than for brick buildings and almost equal to brick and frame combined. Although the total estimate of new buildings this year falls short of the operations of 1909 and 1910, the amount to be expended on apartment houses is nearly double the active years of 1909 and 1910.

TRUE CONSIDERATION.

This office is not in possession of all sales made within the District of Columbia during the last five years, but has gathered with considerable accuracy sales relating to acreage property, sales within the business section, within the high-class residential section of the northwest, and within the high-class subdivisions west of Rock Creek, as well as within the heart of the northeast, southeast, and southwest. This work has been done by the assessors, assisted by one record clerk. Congress, in the last District appropriation act (app. Sept. 1, 1916) provided for an additional force of five field men. who will not only help to gather data as to sales, but will aid the assessors in supplying data regarding the size and condition of all buildings. It has been found impossible to collect all sales and ascertain the facts bearing on them, even with a larger force of field assistants. The time consumed in following up one large or important sale is sometimes very great, and this office feels that aid is needed from Congress in a manner heretofore suggested, namely, to require the owner to file an affidavit with this office as to the true consideration, to be used only by the assessors as an aid in their work. The objections of "business interference" raised against giving this data have on occasions been put aside. During the last period of appeals persons interested in the business section furnished the office, over their sworn statements, with the prices of nearly all the important and late sales. This was done for the purpose of equalization and could have been given on an earlier occasion to the advantage of all concerned.

CERTIFICATES OF TAXES.

During the fiscal year ended June 30, 1916, 9,842 tax certificates were issued, as against 8,715 in 1915. A fee of 50 cents was collected for each certificate, amounting in the aggregate to \$4,921.

In addition to the certificates above mentioned for which a fee is charged, there have been during the past fiscal year issued by this office 854 free certificates, accompanying subdivisions, condemnations of land, and tax deeds, involving the same care in their preparation as the regular certificates of taxes.

WATER-MAIN DIVISION.

The water-main division has arranged all ledger and card accounts so that "bills receivable" may be readily ascertained and tax cer-

tificates issued without danger of erroneous statement thereon as to any water-main tax. Pending assessments, however, required to be noted on tax certificates by this office, would be a more perfect system if notification would be sent us of all abandoned projects.

A diagram is now made by this division showing the continuation

of all mains laid by the District.

During the fiscal year ended June 30, 1916, assessments for water mains were levied in the amount of \$46,988.28, said assessments being on 1,083 pieces of property; and the collections follow: Current tax accounts, \$53,537.52; tax sales, March 21, 1916, \$6,469.56; interest, \$4,640.72; advertisement, \$198.08; total, \$64,845.88. One thousand two hundred and four notices have been delivered.

Certain properties have had long-delayed delinquent taxes canceled, a reassessment immediately placed upon the ledger, and at least partial collections made. Action has been taken upon many official

and subdivisional papers.

A ruling as to the statute of limitation barring the collection of a tax, which was operated for a lengthy period of time, resulted in a number of tax certificates being issued on which was recited, "No unpaid water-main tax." Since December 30, 1913, when it was held taxes were not subject to the bar of the statute of limitation, certificates have been issued citing all the water-main tax due, without regard to the date of assessment. Confusion and the mistrust of the value of these certificates have arisen. Any amendment to the law, which may be contemplated should cancel these assessments or sustain the right to reassess the same.

Renewal of the recommendation in the report of 1915 of an equitable plan of assessment on irregularly shaped lots is herewith made.

ARREARS OF TAXES.

The arrears division is equipped with a card index, consisting of about 22,000 cards, which makes it possible to show at a glance all arrears of general taxes chargeable to any given lot or parcel. For each parcel, or lot, or part of lot, a separate card is provided upon which is listed the year or years of delinquency, and opposite to each year the amount due for all general taxes, other than those of the current levy. If there are unpaid special or water main assessments, the book and folio upon which they are entered in the special assessment division, or the water-main division, as the case may be, are noted upon the card.

In the arrears ledger are assembled all unpaid general taxes as they appear upon the cards, but with the difference, that a card represents the taxes due on but one lot, or part of lot, while a given page in the ledger may show the taxes against a number of lots. Because of this arrangement it has been found necessary to prepare a new ledger about once in every four years. During the past year, however, it was decided to construct this ledger upon the plan of the card index system by using a separate leaf, of a loose-leaf ledger, for each individual lot, or portion of a lot, and the work thereon has so far progressed that it is now approaching completion. A ledger, constructed along the lines of this plan, will be a labor-saving device, as it will likely serve its purpose for a period of at least 12 or 15 years.

LICENSES.

During the year ended June 30, 1916, this office issued 8,588 miscellaneous licenses amounting to \$112,083.34, a slight decrease over the previous year. During the same period 273 barroom licenses were issued, amounting to \$409,500, and 89 wholesale licenses amounting to \$71,200, making the total receipts from liquor licenses \$480,700.

On October 16, 1915, the automobile office was transferred from the permit clerk to this office and the clerk in charge of licenses was appointed secretary to the automobile board. Since October 16, 1915, and up to and including June 30, 1916, the total revenues collected through the secretary of the automobile board amounted to \$29,065.85.

Receipts from licenses during the year ended June 30, 1916. (Not including liquor licenses.)

SUMMARY.

The work of the office has consisted in writing some 35 tax ledgers, both real and personal, the rendition of current, arrears, and special assessment bills, reports upon subdivisions and tax certificates, the issuance of licenses, official action upon office reports, etc., and transfers covered in instruments of conveyance, which have to be noted upon the card records as well as the ledgers.

In the appendix I have given the estimates of the assessor's office

for the fiscal year 1918.

WM. P. RICHARDS, Assessor, District of Columbia.

The Commissioners of the District of Columbia.

APPENDIX.

Estimate of amounts necessary for support of assessor's office for the fiscal year to end June 30, 1918.

WM. P. RICHARDS, Assessor, District of Columbia.

The Commissioners of the District of Columbia.

· REPORT OF THE AUDITOR.

Washington, October 10, 1916.

GENTLEMEN: I have the honor to submit the following report of the business transacted in the office of the auditor of the District of Columbia for the fiscal year ended June 30, 1916:

RECEIPTS AND EXPENDITURES.

Cash receipts from all sources for the fiscal year amounted to \$16,201,401.20, made up as follows: From taxation, licenses, and miscellaneous sources, \$8,400,397.58; amount paid by the United States as share of expenses of government under the act of June 11, 1878, \$6,332,691.79; trust and special fund collections, including the water fund, \$1,468,311.83.

Cash expenditures for the fiscal year amounted to \$14,183,619.54, of which there was paid from appropriations and the general fund, \$12,808,460.73, and from trust and special funds, including the water

fund, \$1,375,158.81.

The expenditures from appropriations and the general fund are as follows: For general government, \$722,437.07; protection of life and property, including the police and fire departments, \$1,988,108.80; health and sanitation, including the health department, sewage disposal, and construction, \$1,220,901.29; highways, including street improvements and extensions and care of public highways, \$1,741,195.78; charities and corrections, \$1,652,329.40; education, including public schools and libraries, \$3,520,236.94; recreation, including public parks, playgrounds, and bathing beach, \$675,158.67; miscellaneous, including tax and license refunds, \$101,634.33; public-service enterprises, including water supply and markets, \$214,305.18; and interest and debt. \$972,153.27.

The expenditures from trust and special funds include payments for general government, \$656.32; protection of life and property, including pay of police and fire pensions and salaries of street railway crossing police, \$212,905.50; health and sanitation, including cost of sewer construction, \$11,034.47; highways, including cost of repairs to streets incident to cuts made for street railway companies, corporations, private persons, plumbers, etc., \$100,384.18; charities and corrections, including payments made from collections of the juvenile court for the support of abandoned wives and children, \$51,738.80; education, including prize awards in the public schools, \$154.05; recreation, including the placing of trees in private parking space, \$581.77; miscellaneous, being principally amounts paid on account of redemption of tax-sale certificates and the refund of unused balances of deposits made for work to be done by the District for private persons, \$393,308.22; public-service enterprises, being principally for the expenses of the water department paid from the District water fund, \$604,395.50.

The full details of the foregoing receipts and expenditures are set

forth in the accompanying statements.

BONDED INDEBTEDNESS OF THE DISTRICT OF COLUMBIA, 3.65 BONDS.

At the close of the preceding fiscal year, June 30, 1915, the District owed on account of outstanding 3.65 bonds the sum of \$6,518,000, less assets head by the sinking fund, \$295,000, leaving a net indebtedness of \$6,223,000.

During the fiscal year bonds were purchased and retired amounting to \$338,100, and investments made and held for account of the sinking fund amounting to \$411,845.45, which, together with the cash balance held for this account at the close of the year, \$3,254.73, makes a total reduction in net bonded indebtedness for the year of \$753,200.58.

At the close of the fiscal year ended June 30, 1916, the District owed on account of outstanding 3.65 bonds the sum of \$6,179,900, less assets held by the sinking fund, \$710,100.58, leaving a net indebtedness of \$5,469,799.42.

APPROPRIATIONS AND REVENUES,

The cash revenues of the District of Columbia for the fiscal year amounted to \$8,400,397.58, which, plus the District's share of unexpended balances of appropriations lapsed and charged off the books by the surplus warrant of June 30, 1916, \$67.277.78, gives a resulting credit of \$8,467,675.36. The total appropriations for the fiscal year amounted to \$12,492,686.52, of which there was chargeable to District revenues the sum of \$6,322,349.72, leaving a surplus of revenues over appropriation charges for the year itself of \$2,145,325.64.

If we deduct from the foregoing surplus on account of the fiscal year 1916 the deficiency in revenues at the close of the preceding fiscal year, \$765,106.74, it leaves a resulting surplus of revenues over all appropriations and charges to and including June 30, 1916, of

\$1,380,218.90.

This surplus of revenues over appropriations and charges is accounted for as follows: Cash balance to credit of District of Columbia in the Treasury of the United States, \$2,664,717.77, plus cash balance on account of general fund in hands of the collector of taxes, \$28,792.12, making total cash balances \$2,693,509.89; less the District's obligations on account of its share of unadvanced appropriations on the books of the Treasury Department, June 30, 1916, \$1,313,290.99; leaving a resulting surplus of revenues over all appropriation and other charges to and including June 30, 1916, as above stated, of \$1,380,218.90.

ACCOUNTING FOR DISTRICT PROPERTY, REAL AND PERSONAL.

Congress, in the District appropriation act for the fiscal year ended June 30, 1916, provided:

That all persons in the employment of the government of the District of Columbia having, as a result of such employment, custody of or chargeak le with property, other than real estate, belonging to the District of Columbia, shall, at such times and in such form as the Commissioners of the District of Columbia shall require, make returns to said commissioners of all such property remaining in their possession, and the condition thereof, and, with reference to all property that may have come into their custody that shall have been consumed in use, a statement showing the quantity thereof and the purpose for which used.

Pursuant to the provisions of this law, the commissioners appointed a committee to draft a plan for the establishment of a strict accountability for all District property, as directed by the act above. Based upon a report by this committee, the commissioners, by their order of June 29, 1915, established a division of property accounting in the office of the auditor.

Under the system so established an original inventory was required and submitted to the auditor by the several officers and departments having the custody of District property. As rapidly as possible, upon the receipt of these original inventories, accounts were opened for each article in each department, in loose-leaf ledgers, one sheet being given to each article and the articles grouped into classes, each class being divided into "expendable" and "nonexpendable" property, each department's accounts being kept in one or more ledgers.

Quarterly returns are required to be made by all departments, for all property received, expended, or transferred during the quarter. These accounts are duly audited and entered, being checked with copies of the several orders issued by the purchasing officer for supplies furnished the several offices, departments, and institutions of

the District.

In the event of an officer charged with the custody of property leaving the service, an accounting is had, all property in his charge being checked and transferred to his successor in office, a receipt being taken for property so transferred.

A physical checking of the properties held by the several departments is now under way by the auditing department, thus verifying

the book or return inventory by actual count.

The greatest economic value of the new system is seen in the great saving made and which will be made annually by reason of the utilization of property no longer required by a department that may be transferred and used by another department. Formerly the greater portion of this material was sold as junk or old materials at a nominal price. During the fiscal year just ended the value of the property transferred and utilized by departments amounted to \$25,951.07. Sales of old materials for same period amounted to \$7,622.32

All supplies and materials no longer required for use by a particular department are sent to the District property yard at Ninth and Water Streets SW., where they are classified. It has been found by making a proper classification very much higher prices may be obtained in the sale of old material. Old materials, junk, etc., of no further use or value to the District are sold directly to the contractor for the purchase of such materials. It has been found, however, by closely following the needs of the various departments that much of the material received can be made use of, and moreover, under the close system of inspection now inaugurated, materials and supplies that formerly were discarded are being continued in use. It is believed that during the coming fiscal year by the establishment of a repair shop at the workhouse, which shop will be furnished exclusively with machinery and equipment discarded by the various departments of the District government, that a great saving will be effected in the repair. of furniture and other District equipment reserved and recovered from the old material turned in at the District property yard.

The property system established has been in operation but one year, and it is realized that under the present plan it entails a large amount of work in the proper accounting in detail for the articles received and used in the various departments. A study is now being made in order to determine what modification may be adopted in order to curtail the amount of detail work required in the handling and accounting for the numerous items of District property. It has been found that while a great saving has been effected by the actual conservation of materials and supplies discarded which have again been utilized, by far the larger saving, which can not be tabulated, is the saving that has occurred in all of the departments of the District government due to the fact that under the law above referred to and order of the commissioners a property accounting system, requiring a strict accountability, has been adopted.

There is transmitted herewith a statement showing the value of materials transferred to the various departments and the money received from the sale of old materials during the fiscal year. The materials transferred were appraised at a nominal value and transferred without cost to those departments which could best utilize them. Had they been sold, very little would have been realized. The metals sold to the water department were charged at the contract rates for old materials, while the prevailing rates for metal at the time would have indicated a value of \$3,503.06, a saving to the

water department of \$1,808.58.

There are also transmitted herewith statements as of June 30, 1916, showing cost of sites and construction of public-school buildings, fire-engine houses, police stations, water-department structures, bridges, and miscellaneous District property, together with a statement showing the value on June 30, 1916, of its expendable and nonexpendable personal property.

OFFICE WORK, PERFORMED.

The extent of the work performed by this office is perhaps best indicated in the figures of the net business done for the year. The total net receipts on all accounts for the year were \$16,201,401.20, and the total net expenditures for the same period, \$14,183,619.54, making total transactions for the year \$30,385,020.74.

Cash collections through the office of the collector of taxes for the year amounted to \$10,130,191.93, an increase of \$350,680.98 over the prior year. All receipts issued by the collector are countersigned by the auditor, and his accounts are audited daily and the collections

received deposited in the Treasury of the United States.

In the accounts of the disbursing officer of the District of Columbia for the year there were 28,090 vouchers duly audited and approved, and 101,548 checks prepared and countersigned in payment of said vouchers and pay rolls, amounting to \$11,422,055.11, and checks drawn for repayment of disbursing funds to the Treasury amounting to \$358,792.95; in all, \$11,780,848.06.

Very respectfully,

A. TWEEDALE,
Auditor of the District of Columbia.

The Commissioners of the District of Columbia.

### REPORT OF THE COLLECTOR OF TAXES.

Washington, D. C., October 12, 1916.

Gentlemen: I have the honor to submit the following report of business transacted in the office of the collector of taxes of the District

of Columbia for the fiscal year ended June 30, 1916.

The total collections for the year ended June 30, 1916, were \$10,130,191.93. The amount credited to the general fund, which is strictly revenue, was \$8,390,746.06. The collections this year show an increase of \$350,680.98. The increase in realty taxes was \$265,885.32. The increase in personal taxes was \$211,117.46. This big increase in personal tax is due to the fact that several large accounts which were pending before the courts were settled this year.

The trust funds collected amounted to \$1.447,334,14. The mis-

cellaneous receipts were \$1,098,791.16.

There was also collected on account of miscellaneous receipts credited to the United States \$275,440.02, showing an increase of \$59.530.20.

The total water fund collected, including rents, etc., was \$698,312.17. The real estate tax sale for March, 1916, was the largest in the history of the collector's office. There were 51 bidders for the lots offered for sale, the number of lots sold being 6,699. The total amount of tax sale, including over \$23,000 surplus and 10 cents for the recording of each lot, was \$208,511.49.

A few things are essentially needed in legislation for this particular branch of the taxing department of the District of Columbia.

One is a law substantially as recommended by the commissioners at the last session of Congress, permitting the holder of tax title to real estate to go into a court of equity and seek settlement, where all parties concerned may present their claims and have them properly adjudicated. Ample time should be given the owner of the property to settle these claims, but when this time shall have expired, any further delay on the part of the holder of the property, who perhaps during all this time has enjoyed the privilege of occupancy or the emoluments of rental can mean but one thing and that is that he is willing to enjoy the privileges and protection of government, while evading that which he, in justice, owes the community for such privileges. He then becomes, in every sense of the word, a tax dodger. There are a few notorious examples, as above cited, and such a law should be enacted, not only for the additional revenue it will bring the community, but for the specific purpose of preventing these property holders from setting a bad and unpatriotic example for others to follow.

Another change that should be immediately effected, purely for the benefit of proper accounting and the placing of administrative responsibility where it directly belongs, is the enactment of a law whereby the posting of the accounts of all tax ledgers will be placed in charge of the collector of taxes. That proposition was also favorably recommended by the commissioners during the last session of

Congress, but failed of enactment.

An annual registration or license tax on automobiles, motor cycles, and all other motor vehicles, in lieu of all personal taxes on same is again recommended. The present system of a perpetual license tag is susceptible to many kinds of abuse. It furnishes no basis of correct information as to the actual number of automobiles owned in the District. An annual license charge sufficient to bring revenue to the District would be surely collectible, while a personal tax levied must always depend upon many contingencies. Such a change deserves the careful consideration of the Board of Commissioners.

A similar registration of motor boats, launches, and other water craft, requiring the owners thereof to register their boats, with name and complete description, issuing to them an identification number, would facilitate efforts in this office to collect personal tax levied on same.

Very respectfully

Ben L. Prince, Collector of Taxes, District of Columbia.

The Commissioners of the District of Columbia.

## REPORT OF THE DISBURSING OFFICER.

Washington, September 29, 1916.

Gentlemen: The following report of the operations of the disbursing office of the District of Columbia during the fiscal year

ended June 30, 1916, is submitted:

The total amount disbursed was \$11,422,055.11, of which \$2,340,598.45 was in cash, involving about 200,000 individual transactions with employees, merchants, contractors, etc., and all of which cleared through the audit of the District auditor and the Auditor for the State and Other Departments, the accounts receiving

credit for accuracy and technical perfection.

During the year the total sum of \$11,800,512.19 was placed to the official credit of the disbursing officer; the unexpended balance from the previous year was \$25,447.52, and the canceled checks and special deposits amounted to \$3,312.58, making a grand total of \$11,829,272.29 to be accounted for. The amount of checks drawn against the said total charged was \$11,422,055.11 and the amount of repayments to appropriations was \$358,792.95, leaving a net balance to the credit of the disbursing officer on June 30, 1916, of \$48,424.23.

During the year 101,210 checks were issued by this office, an

increase of 13,128 over the preceding year.

Approximately 73,680 payments were made to employees in cash

and 73,156 to employees by check.

The number of vouchers upon which checks were disbursed was 28,091, or 152 more than were issued during the year 1915.

The number of cash payments to witnesses, jurors, etc., was as follows:

Police court witnesses.	. 2, 970
Police court jurors	. 1,502
Juvenile court jurors	340
Witnesses, lunacy proceedings.	. 351
Coroner's jurors	277
Coroner's witnesses	321
Repayments of fines	Qθ

The number of payments to beneficiaries under the act of Congress providing for the support of abandoned wives and nonsupported wives and children was 10.916, an increase of 1,838.

Pensioners of the police and fire departments were paid 2,912 and

1,144 checks, respectively.

Over 2,100 written communications were received in the office, a

majority of which required and received written response.

All employees of the District of Columbia, unless otherwise provided by law, are now being paid twice a month and these, as well as the merchants and contractors having dealings with the District, are being paid promptly.

137.

The employees of the office have maintained its record for accuracy and efficiency in handling the details connected with the disbursement of the large sums stated, and the fact that the year's work has been accomplished without the loss of a cent speaks for itself.

A detailed statement of all financial transactions of the District

for the year is submitted herewith.

L. C. Wilson, Disbursing Officer District of Columbia.

11, 829, 272. 29

The Commissioners of the District of Columbia.

Cash account of L. C. Wilson, disbursing officer of the District of Columbia, with the Treasurer of the United States for the fiscal year ended June 30, 1916.

### REPORT OF THE CORPORATION COUNSEL.

Washington, October 13, 1916.

Gentlemen: I have the honor to transmit herewith the annual report of the corporation counsel for the fiscal year ending June 30, 1916, together with the reports of the assistants at the juvenile court and the police court, and the attorney in charge of lunacy inquisitions.

From the tables submitted it will be noted that in the Supreme Court of the United States 1 case was decided in favor of the District, in 1 case certiorari was denied, and 2 cases are there pending.

The court of appeals of this District decided 7 cases favorably to the District of Columbia, 7 adversely, 2 were dismissed, and 2 are

there pending.

In the Supreme Court of the District of Columbia 13 judgments were rendered in favor of the District of Columbia, 11 were adverse, 4 cases were dismissed, and 78 are pending. In the equity branch 4 cases were decided in favor of the commissioners, 3 adverse, 2 were dismissed, and 29 are there pending. Of the 6 cases involving the Public Utilities Commission 2 were decided in favor of the commission,

1 was dismissed, and 3 are pending.

In the district court 18 verdicts of condemnation were confirmed, 5 cases were dismissed, and 15 cases are there pending. Seven probate matters are now pending, while of the 4 lunacy cases, other than commitments, 1 was decided favorable to the District, and 3 are pending. Two habeas corpus cases were decided favorable to the District, 1 was dismissed, and 2 are now pending. There were 5 appeals from judgments rendered in the municipal court and 2 certiorari cases from the municipal court, all of which are pending. In the lunacy court 451 cases were disposed of.

Twenty-six thousand three hundred and thirty-six informations were filed against offenders in the police court, and fines aggregating

\$97,666.16 were collected.

In the municipal court 4 cases were decided favorable to the

District, I was adverse, I was dismissed, and 16 are pending.

In the juvenile court of this District 1,168 informations were filed, and collections in the sum of \$47,407.34 were made in behalf of deserted families.

The general office work consisted of the approval of 337 bonds, 241 contracts, the preparation and approval of 218 tax deeds, and the preparation of 385 written opinions. Seventy-nine damage claims

and 37 acts of Congress were passed upon.

I again strongly recommend to the commissioners that Congress be requested to enact a law which will compel claimants for damages against the District, occasioned by the alleged negligence of the District, to report the time, place, and circumstances of such negligence within 10 days after the cause of action arises, or some other short time, and that a failure to so report shall be considered in law a bar to the right to recover damages against the District on account of such alleged negligence. This law will entail no hardship upon

the claimant, and will give the District an opportunity to inquire into the conditions which have caused the accident and correct them promptly. Under the present law a claimant can wait three years before commencing action. In the meantine such evidence as the District might be able to use in its defense is usually unavailable. This condition has worked great hardship to the District, and should be remedied.

In this report I desire to call particular attention to the faithful and efficient services of those who are associated with me in this branch of the District service. The assistants to the corporation counsel have been faithful, able, and efficient in every respect. No private corporation could secure the services and ability which they have displayed for double the salary they are now receiving. The inadequacy of their compensation has in no wise diminished the integrity and efficiency of their services, and their duty has not been measured by them in any respect by the compensation received.

The clerical force of the office has been no less faithful and efficient than those I have mentioned, and has willingly and ably responded to all calls upon it both in the regular work of the office and such extra work as the interests of the service have from time to time

demanded.

Respectfully submitted.

Conrad H. Syme, Corporation Counsel, District of Columbia.

Washington, July 1, 1916.

Hon. Conrad H. Syme,

Corporation Counsel.

SIR: I have the honor to submit herewith report of the disposition of the lunacy cases referred to this office during the fiscal year ending June 30, 1916, as follows:

Adjudged of unsound mind. 2 Adjudged of sound mind. Dismissed upon motion. Discharged by Government Hospital for the Insane. Died before trial. Pending cases Other admissions to hospital	12 34 49 19 50
Other admissions to hospital.	11

My assignment to the care and prosecution of these cases has been of such a recent date that I have had very little opportunity to give any thought to suggestions for an improvement for more modern and humane proceeding in these cases.

an improvement for more modern and humane proceeding in these cases.

It has recently come to may attention that in some of these cases, where personal surety is given by committees and trustees, the bondsmen could not be found when wanted. I am, therefore, of the opinion that surety bonds for the faithful performance of their duty should be required to give an account of their trusts at stated intervals.

There has recently been such an increase in my work at the police court, and the amount of time which I have to devote to it, that I have had very little time, aside from the actual presentation of these lunacy cases in court, to prepare some amendments to the statute under which we proceed which have suggested themselves to me from time to time. I wish, however, before Congress convenes, to go over the whole situation with you in order that we may take the matter up with the commissioners.

Very respectfully,

GEORGE R. TAGGART, Assistant Corporation Counsel detailed at Police Court, In charge of lunacy cases.

Washington, July 1, 1916.

Hon. CONRAD H. SYME, Corporation Counsel.

DEAR SIR: I have the honor to report that there were 1,168 informations filed during the year, involving nonsupport of wives and children, an increase of 190 over the previous year. Of these, 759 were adjusted by your assistant, either by the payment of a weekly stated sum by the defendant or by the continuance of the case on probation. Your assistant is glad to state that in numerous cases, after a preliminary hearing of these cases and a full discussion between the parties in his presence, the differences which existed between them were happily adjusted and the parties reconciled. In this connection, it may be interesting to note the procedure relative to the

adjustment of these cases, and the part played by your assistant therein.

In adopting the scheme, outlined by the court some time ago, every nonsupport case is first heard unofficially by the assistant corporation counsel. After the wife swears to an affidavit, a summons is issued to the husband to be in court at a certain time. At this time the husband and wife are brought together in the office of the assistant corporation counsel, where this matrimonial difference, as it appertains to the question of nonsupport is thoroughly gone into by the assistant corporation counsel. The wife is first questioned as to her side of the controversy, and then the husband is allowed to state his case, if he desires. After hearing both sides and ascertaining all the facts as relating to the husband's habits, treatment of his family, and earning capacity, if there is no conflict in the statement, the assistant corporation counsel fixes an amount, which he thinks the man should pay, for the support of his wife and children. This is generally made payable at one of the police precincts in certain weekly or monthly installments. The assistant corporation counsel's authority in these proceedings, which are known as preliminary hearings, only extends to the adjustment of the cases on agreement and satisfaction of both parties. About 50 per cent of the cases are adjusted in this way.

Your assistant, after hearing of a case, often finds that the so-called insurmountable difficulties existing between the parties are susceptible of adjustment to the end that the parties are happily reunited. There are many cases in which the husband and father are given a chance to reestablish their homes. In all these cases proceedings are continued indefinitely with a view of keeping the parties out of court until a breach of some of the agreement made to the assistant corporation counsel when they are summoned into court and tried before the judge. Your assistant is particularly pleased when he is instrumental in any way of effecting a reconciliation between husband and wife. In the event cases can not be adjusted in the manner just indicated, they

are set down for hearing before the judge and tried in the regular way.

The sum of \$47,407.34, an increase of \$5,019.75 over the previous year, was collected and disbursed on account of support of wives and minor children. This is only a small indication of the good work performed by the court, because without a tribunal of this kind much of the support would have been lost to the beneficiaries and the charitable organization would be called on to bear the burden. Aside from this monetary consideration, however, it is the purpose and object of your assistant, and the court, to instill into the erring husband his duty to his wife and children and to the State. It has been the experience of your assistant that there are some good points in nearly every man that can be reached in an appeal to support his wife and children. A man must be thoroughly bad who will willfully and deliberately allow his offspring to suffer for the want of food, shelter, or clothing. For such a person the imposition of a jail sentence is the proper remedy.

There were 41 bastardy cases filed during the year. Because of their very nature these are bad cases to handle, because of the difficulty in securing proper evidence. These cases are generally bitterly contested, and require much time for preparation for the juries. It is interesting to note, however, that 29 have been found guilty, 9 acquitted, and 7 cases are still pending.

Your assistant does not investigate the juvenile cases, that function being performed by the prolate officer, as it is the object and desire of the court not to place these cases in the category of prosecution, but simply have hearings. Your assistant, however, has charge of the presentation of cases for the Board of (hildren's Guardians for the commitment of children, I ecause of destitution and other causes. These cases are investigated very thoroughly by your assistant, in conjunction with the investigators of the board, with a view that no extra tax might I e placed on the District, and with the main idea in mind that a plan might be devised to save the children to the parents.

From a sociological view, the following number of original and recommitment petitions filed, involving both white and colored children, will prove interesting, viz:

Petitions for destitution and benefit homes presented by Board of Children's Guardians.

			White. Colored.						P. La P. William (1997) Theorem Community
		Peti- tions.		Legiti- mate.	Illegiti- mate.	Peti- tions.	Chil- dren.	Legiti- mate.	Illegiti- mate.
Permanent commitments to Board of Children's Guardians Temporary commitments to Board of	23	7	7	6	1	16	23	12	11
Children's Guardians	303 15	156 13	305 24	249 22	56 2	147 2	255 2	180 2	75
Total	341	176	336	277	59	165	280	194	86

During the year a bill to change the procedure in the juvenile court was introduced in the Congress, passed the House of Representatives, and is now pending in the Senate. This bill makes considerable changes relative to the hearing and disposition of cases against minors, but does not affect the procedure in nonsupport cases.

In conclusion. I desire to call attention to the urgent necessity for probation officers to assist your assistant in the handling of nonsupport cases. While there are six probation officers assigned to cases against minors, your assistant has none to help him in determining the truth or falsity of charges made against each other by husband and wife. There should at least be several to assist in this work, and, by their kindly visits and interest, keep the family intact, and assure them that the court still has a benevolent interest in their welfare.

Respectfully submitted.

Assistant Corporation Counsel, Detailed at Juvenile Court.

Washington, October 13, 1916.

Hon. CONRAD H. SYME,

Corporation Counsel, District of Columbia,

Washington, D. C.

DEAR SIR: I have the honor to submit herewith annual report of the business transacted in the District of Columbia branch of the police court for the year ending June 30, 1916:

There were 26,336 informations filed during the year, and the fines and forfeitures amounted to \$97,666.16, an increase of \$13.750.65 over the preceding year. While this increase was considerably in excess of that of the preceding year for fines and forfeitures, an examination of the accompanying itemized statement of violations of different acts of Congress and police regulations will show regardless of their disposition an increase of fully 25 per cent in the total amount of business transacted. I have, during the past year, kept a special report from day to day, independent of that of the police department, of the disposition of the various classes of cases which have arisen in our branch of the court, and while this record goes into some detail, it will, I think, it kept from year to year, be of some benefit by way of comparison in ascertaining the increase in violations of each regulation and act of Congress with which our office is charged with the prosecution.

While I have, in a measure, overcome the handicaps which I mentioned in my report of last year in regard to the great difficulty of taking care of the mass of routine office business and at the same time giving proper attention to the actual prosecution of cases in the court room, the business is still exceedingly congested and if it were

possible to assign an additional assistant here, even for a brief period in the foren on, the business of the court would be greatly expedited.

I again wish to commend Mr. I avid E. Langley and Mr. William S. Shelby, detailed

from the police department to assist in this office, for the ability and industry they have displayed during the year—The services of Mr. Langley and Mr. Shelby in this office are regarded by me at the present time as absolutely indispensable. They have been here during the period of time when there has been an increase of fully 50 per cent in the volume of business which has been handled in the District branch of the police court, with no corresponding increase in the clerical force, and they have worked with myself, on occasions when necessity demanded it, or when the business of the office required it, night and day, in the preparation at different times of different jury cases which required particular attention,

In submitting the following table, I have included under the head of violations of miscellaneous building regulations all of the cases which come under that head with-

out specifying the particular nature of the offense.

## REPORT OF THE ALIENIST.

Washington, October 12, 1916.

Gentlemen: I hereby submit a report of the operations of the office of the alienist of the District of Columbia for the fiscal year end-

ing June 30, 1916.

The total number of cases examined were 1,752. This shows an increase of 141 cases over last year's report. Seventy cases were examined at the juvenile court, an increase of 45: 390 cases at the Government Hospital for the Insane, an increase of 80; and 1,292 at the Washington Asylum Hospital, an increase of 6. Of those examined at the Washington Asylum Hospital 735 were mental suspects, an increase of 580; 518 alcoholic cases, a decrease of 79: and 39 were addicted to the habitual use of morphine, which was 70 less than the number treated last year at this institution. These examinations required attendance at court 44 days and 48 visits to the Government Hospital for the Insane during the year.

In examining the cases under treatment at the Washington Asylum Hospital I have been impressed with the lack of facilities furnished by that institution for the proper care and attention of those cases suspected of being insane, and would earnestly recommend that a psychopathic ward, similar to those existing in other cities, be provided for the District of Columbia, as in my judgment early care and treatment of these cases will result in their restoration to health in

many instances.

The provision for the employment of a stenographer and clerk will

greatly facilitate the work of the alienist.

I respectfully call your attention to the number of cases that are brought before the court for permanent commitment under section 167 of the District of Columbia Code. More than 50 per cent of these cases exhibit mental symptoms that leave no doubt in the minds of their friends and relatives that they need care and treatment, and the only advantage in requiring their presence in court is to conform with the legal regulations. This is done in many instances against the protest of their friends, relatives, and of the patients themselves. It would therefore seem that unless there is some reason for their commitment that their attendance at court is an unnecessary hardship to the patient and family, as well as an expense to the District of Columbia. I would therefore recommend an amendment to the District of Columbia Code as follows:

"All persons committed to the Government Hospital for the Insane under the act (Public, 177) approved April 27, 1904, shall be detained in that institution for treatment until discharged in accordance with the existing law. Procedure under section 167 of the Code of Laws of the District of Columbia shall not be held unless a formal demand is made upon the Commissioners of the District of Columbia by the person so committed, his attorney, or the corporation counsel of the District of Columbia."

Very respectfully,

D. Percy Hickling, M. D., Alienist, District of Columbia.

## REPORT OF THE PURCHASING OFFICER.

Washington, September 20, 1916.

Gentlemen: I have the honor to submit the following report, showing the transactions of the office of the purchasing officer, District of Columbia, and the amounts expended for general supplies, construction materials, etc., for the various departments and institutions of the District government during the fiscal year ending June 30, 1916, together with a comparative statement for the previous year, as follows:

	1916	1915
Circular proposals sent inviting quotations on articles not covered by annual general supply schedules and contracts. Requisitions received for supplies and materials. Number of orders issued. Vouchers prepared and forwarded. Vouchers transmitted through this office for certification as to prices, and record of purchase. Transfer of appropriation vouchers, prepared and forwarded. Contractors ineasurements, on account of materials furnished, examined and passed upon. Letters and indorsements sent.	29, 336 452 24, 505 260	27, 030 13, 503 28, 569 491 24, 959 228 288 4, 222
Amount paid into the office of the collector of taxes, District of Columbia, for condemned materials sold by this office by public auction, and through annual bids for purchase of same:  Horses.  Miscellaneous items (barrels, metals, vehicles, waste paper, etc.)	\$310.19 2,760.23	\$656.73 3,678.66
Total amount received.	3,070.42	4, 335. 39

¹The custody of old materials, immediate supervision and sale thereof transferred on Feb. 9, 1916, from the purchasing office to the auditor's office.

List of seven statements comparing 1915 with 1916.

Report of inspector of fuel, District of Columbia, who is under the supervision of this office, also forwarded herewith.

Respectfully,

M. C. Hargrove, Purchasing Officer.

The Commissioners of the District of Columbia.

Hon. OLIVER P. NEWMAN,

President Board of Commissioners.

District of Columbia.

(Through the purchasing officer.)

DEAR SIR: I have the honor to submit the following report covering the transactions of this office during the fiscal year ending June 30, 1916.

I have inspected and accepted  $5{,}158 \frac{440}{2130}$  tons anthracite coal.  $30.876 \frac{1390}{2330}$  tons bituminous coal, 67 tons semibituminous coal, and 21 tons coke; inspected, measured, and accepted 4194 cords of wood; inspected and rejected 128 tons anthracite, and 1 cord wood.

Respectfully,

M. N. Bergin, Inspector of Fuel. District of Columbia.

# FIFTH ANNUAL REPORT OF THE DEPARTMENT OF PLAY-GROUNDS.

It is the purpose of this department to make the playground a source of physical, moral, and mental benefit to the children of the District of Columbia by providing recreation in the open air, free from conditions which prejudice physical development. The playgrounds perform the functions of a sanitorium without the cost, and in a large measure obviate the necessity for hospitals.

By instilling into the child the principles of fair play, honesty, self-control, and mutual responsibility the playground teaches the elements of citizenship. It gives instruction in industrial work and thus becomes a specialized school without the expense of one and

without its restrictions on individual enterprise.

The achievements of the playground department can not be measured by rule of thumb. Children may be counted and the number of track and field games statistically compiled, but the effect of recreation centers on character, though known to be considerable, can not be measured with mathematical accuracy.

The work of the department, so far as it can be shown by tabula-

tion of figures, is set forth below.

#### PART I.

#### GENERAL STATEMENT.

It has been the desire of the department to interest parents in what is being done by their children. • Exhibition days have therefore been inaugurated and a full day's program has been presented on each ground. In order to bring the activities before the people in general in a more extended manner, a demonstration was made at the beginning of this fiscal year in the form of a Fourth of July celebration, when the "Liberty Pageant" and Play Festival were presented on the Monument Grounds. It was estimated that there were 10,000 people in the audience.

#### INDUSTRIAL WORK.

Industrial work was an important summer feature of the playgrounds. There were two classes each day on most of the grounds one in sewing, crocheting, and embroidery, and the other in reed and raffia basketry.

At the end of the season of 1915 each ground gave an exhibit of its work, from which the best pieces were chosen and placed for six weeks on exhibition in the National Museum. The work was done

by children between the ages of 3 and 17, many of whom were doing it for the first time.

Number of children taught for the first time.  Number of last year's children taught.	$739 \\ 1,518$
-	
Total number taught	2 257
Total cost of supplies	8265, 50
Cost per child	\$0.11

#### THE TRAINING CLASS FOR PLAYGROUND WORKERS.

Once a week from the 1st of March until the 1st of July a training class was conducted for those who had applied for positions as playground teachers. There were 65 entrants, 35 of whom were dropped because of inaptitude; 32 took the final examination. The course briefly covered story telling; first aid; free, organized, and ring games; folk dancing; crocheting; raffia basketry; and kindergarten construction work. Each applicant was required to teach for a time on the playgrounds, after which the director sent in a report of his ability. Although only a few received positions on the municipal playgrounds, many taught on school and private playgrounds in and near Washington.

#### THE TEACHERS' MEETINGS.

Once a week during the fall and winter the teachers met, played games, discussed local problems, and made plans for the coming week. As a result there have been more organized games played on the grounds than ever before.

#### PART II.

#### REPORT ON PLAYGROUNDS.

#### WHITE.

Bloomingdale, First and Bryant Streets NW.—Bloomingdale is a beautiful, well-equipped playground. Tennis is the most popular game because of the fact that there were many tournaments for both boys and girls during the past season. One was played by the girls for a silver cup presented by one of the citizens of the neighborhood. Several successful track meets were held during the spring and fall. A popular outdoor kindergarten was conducted the year around.

Gallinger, Eighteenth and C Streets NW.—Because the Federal Government planned to erect a building on the site of the Gallinger playground at Eighteenth and C Streets that ground was closed on December 31, 1914. From October, 1915, to December, 1915, the management of the Horse Show Grounds kindly allowed the department to use those grounds for soccer football and baseball. After the new ground opened at Eighteenth and C Streets NW., April 1, 1916, the regular activities were taken up and the attendance, which had fallen off during the fall, gradually resumed its normal condition.

Garfield Park, Second and Virginia Avenue SE.—Garfield Park, which is loaned to the department of playgrounds by the Department of Public Buildings and Grounds, has been further equipped with a small house and two fountains; a well-made tennis court has

also been added. Several athletic meets with Virginia Avenue playground were held here during the spring and fall, in which

children of all ages participated.

Georgetown, Thirty-third and Volta Place NW.—During the past season at Georgetown there have been tennis tournaments for boys and girls, three basket-ball leagues that have played private schools, gymnasium classes, and playground teams, with special programs every Saturday. Once or twice a week during the summer the girls have gone for "hikes" and cooked their supper in the woods. Exhibition day was held in September; groups, representing every type of playground activity, danced and played before a large audience. The swimming pool, which opened this season, has been a most attractive feature to men and women as well as children.

Mount Pleasant, Fourteenth and Park Road NW.—Despite the fact that the Mount Pleasant playground has been crowded for space, there have been several tennis tournaments, track meets, and basket-ball games on the ground. In September the summer indus-

trial work was exhibited in the shelter house.

New York Avenue, First and New York Avenue NW.—The new York Avenue playground developed good football, tennis, and basket-ball teams during the past season. The outdoor kindergarten, which had an enrollment of 50 children, gave an exhibition of its songs and ring games in June. The industrial exhibit was in the form of a tea to which the parents were invited. Music was furnished by the National Training School Band.

Rosedale, Seventeenth and Gales Streets NE.—Rosedale is the largest playground. The attendance has been good and the activities interesting during the past season. A series of track meets were held every Saturday during the fall and spring. Winners in these meets were given prizes; at the end of the season he who had the most points to his credit was declared Rosedale champion and given a gold medal. Daily physical tests were held for small boys and their physical improvement noted. In cooperation with Noel House a May-day pageant was given in which several hundred children participated.

'Virginia Avenue, Tenth and Virginia Avenue SE.—The space at Virginia Avenue has been taxed to its greatest capacity this year. The attendance has been large, and the activities varied and interesting. There were weekly athletic meets during the spring and summer. Beside the regular leagues, there were summer baseball and junior basket ball for boys and girls and junior baseball and soccer football leagues. The junior leagues were composed of children of the fifth grade and under. The managers were members of the leagues who showed marked ability.

#### COLORED.

Cardozo, First and I Streets SW.—There is an exceptional interest in athletic work at Cardozo playground. Volley ball and tennis tournaments were held during the past season, beside regular field and track games. There were several athletic clubs managed by the director, and the frequent meets at this ground were well attended. The Public School Athletic League is the largest organization using these grounds. Industrial work, including creditable basketry and sewing, was exhibited at the close of the summer.

Howard, Fifth and W Streets NW.-At the Howard playground the athletic work for boys has been particularly good. There were tennis, baseball, football, and basket-ball leagues on the grounds. A boys' club met every Mo iday night for story-telling and singing. The Public School Athletic League played here. The track and field meet held by the playground on the campus of Howard University was attended by a large audience. The swimming pool which opened this spring has been an attractive feature.

Willow Tree Park, Four-and-a-half and B Streets SW.-Willow Tree park is filling a great need as a playground for colored people. The outdoor kindergarten is well attended. The sewing clubs are large, industrious, and painstaking in their work. Great interest is shown in baseball and organized games. This is one of the best equipped grounds of the city, is picturesque, and artistically laid out.

Attendance on the municipal playgrounds from July 1, 1915, to June 30, 1916.

#### PART III.

## REPORT OF ATHLETICS.

#### ELEMENTARY SCHOOLS' BASEBALL LEAGUE.

The elementary schools' baseball league was organized into nine divisions in the spring of 1916. The Rosedale division was subdivided into the Rosedale and Patterson divisions. A regular schedule of games was played, the results of which were as follows:

Bloomingdale division.—Number of schools entered, 7; championship won by Gage School.

Gallinger division.—Number of schools entered, 7; championship won by Grant School.

Garfield Park division.—Number of schools entered, 7; championship won by Dent

Georgetown division.—Number of schools entered, 7; championship won by Industrial Home School.

Mt. Pleasant division.—Number of schools entered, 10; championship won by Monroe School.

New York Avenue division .- Number of schools entered, 8; championship won by Henry-Polk School.

Patterson division .- Number of schools entered, 6; championship won by Carbery

School.

Rosedale division.—Number of schools entered, 8; championship won by Pierce School

Virginia Avenue division.—Number of schools entered, 9; championship won by Wallach School.

#### CITY CHAMPIONSHIP SERIES, 1916.

#### Results of the city championship baseball series, 1916.

School.	Won.	Lost.	Percentage.
Industrial Home. Monroe. Henry-Polk Pierce.	2	0 1 2 3	1,000 667 333 000

#### SUMMER BASEBALL LEAGUE.

During the summer vacation period of each year the playground department conducts an interplayground baseball league, in which the several playgrounds compete for the championship. Each playground chooses a team consisting of the boys who frequent that ground and who do not weight more than 125 pounds. In the series of games during the summer of 1915 the team representing the Virginia Avenue playground won the championship and a handsome trophy, given by A. G. Spalding & Bros.

#### Standing of teams, season of 1915.

Playground.	Won.	Lost.	Percentage.
Virginia Avenue. Georgetown. Rosedale. New York Avenue. Bloomingdale Garfield Park. Mount Pleasant	5 3	0 1 3 3 3 5 6	1000 833 500 500 500 167 000

#### SOCCER FOOTBALL, 1915.

The second year of soccer football in the municipal playgrounds found this branch of sport to be of great interest. The various elementary schools were placed in eight divisions, according to their proximity to the eight municipal playgrounds. The winners in the playground divisions were as follows:

New York Avenue playground	Blake School.
Virginia Avenue playground	Lenox School.
Garfield Park playground	Dent School.
Rosedale playground	Pierce School,
Georgetown playground	Hvde School.
Mount Pleasant playground	Monroe School.
Bloomingdale playground	Brookland School.
Gallinger playground	Grant School.

The playgrounds were then divided into eastern and western divisions, the Virginia Avenue, Garfield Park, New York Avenue, and Rosedale playgrounds being in the former, and the Gallinger, Bloomingdale, Georgetown, and Mount Pleasant playgrounds in the

latter. The New York Avenue playground, represented by the Blake School, came out in the lead in the eastern division and the Georgetown playground, represented by the Hyde School, won in the western division. After a series of three games the Hyde School team, of the Georgetown playground, was declared the city champion of soccer football for the year 1915.

Division.	Number of teams:	Number of boys.
Virginia Avenue Georgetown New York Avenue Mount Pleasant Rosedale Gallinger Garfield Park Bloomingdale	h :	185 140 160 154 137 147 130 82

#### BASKET BALL.

This year, for the first time, there was a city-wide basket-ball league for girls. Teams organized in 36 elementary schools were divided into 7 playground divisions, each of which had its own schedule and championship match. A city championship series was not played, but a placque was awarded to each division champion.

Playground division.	Number of schools entered.		Champion team.
Bloomingdale Garfield Park Georgetown Mount Pleasant New York Avenue Rosedale Virginia Avenue	7 5	30 75 50 117 78 60 111 521	Gage School. Dent School. Addison School. Ross School. Twining School. Blow School. Wallach School.

#### TENNIS.

Basket-ball for girls was so successful as to warrant the department in organizing a tennis league. Each school was allowed four teams of two players each. Four separate schedules were arranged in each of the eight divisions. The playground department offered bronze medals to the winners. The Washington Times offered eight cups for the division championship teams.

#### RESULTS.

Bloomingdale division.—Times cup won by first team, Gage School—Christine Bell and Mary Goodlove. Playground medals won by first team, Gage; third team, Gage; second team, Brookland; and fourth team, Gage.

Gallinger division.—Times cup won by first team, Grant—Dorothy Van Hoesen and Sadie Silverberg. Playground medals won by first, Grant; third, Thomson; second, Grant; and fourth, Weightman.

Garfield Park division.—Times cup won by fourth team, Brent School—Sophia Taschof and Doris Hullings. Playground medals won by first team, Brent; third, Jefferson; second, Jefferson; and fourth, Brent.

Georgetown division.—Times cup won by first team, Jackson School—Virginia Thompson and Estelle Harris. Playground medals won by first, Jackson; third,

Jackson.

Mount Pleasant division.—Times cup won by first team, Johnson School—Jessamine Thorne and Fannie Krucoff. Playground medals won by first team, Johnson; second, Johnson; third, Hubbard; and fourth, Hubbard.

New York Avenue division.—Times cup won by third team, Twining School—Helen Nash and Mary Sullivan. Playground medals won by first, Twining; second, Twin-

ing; second, Abbot; and fourth, Henry.

Rosedale division.—Times cup won by fourth team, Blow School—Susie Hillsinger and Bessie Christman. Playground medals won by first, Blow; second, Blow; third,

Blow; and fourth, Blow.

Virginia Arenve division.—Times cup won by first team, Lenox School—Julia Hutchison and Virginia Ball. Playground medals won by first team, Lenox; third, Wallach; second, Cranch; and fourth, Cranch.

#### INTERPLAYGROUND TENNIS TOURNAMENT, 1915.

For the first time in the history of the playground department an interplayground tennis tournament was held for boys. Each playground was represented by a team of two boys who were not over 15 years of age. Each playground played each other once were awarded to the winners of each match, and Bloomingdale playground, scoring the greatest number, was declared the champion.

#### STANDING OF TEAMS, SEASON OF 1915.

Playground.	Points.	Playground.	Points.
Bloomingdale	• 8	New York Avenue. Rosedale. Garfield Park	4

#### 1916 SPRING ATHLETIC MEET.

Each spring an athletic meet for the public schools is conducted. Each playground receives entries for the various events from the schools in its district. The school winning the greatest number of points is awarded the division championship. After the division meets have been held, a city meet is conducted in which all boys winning first, second, or third place in the division meets are permitted to compete for the city championship.

The events and classification for the athletic meets are as follows:

85-pound class: 50-yard dash. Running high jump. Running broad jump. 220-yard relay race. 100-pound class: 60-yard dash. Running high jump. Running broad jump. 440-yard relay race.

115-pound class: 70-yard dash. Running high jump. Running broad jump. 440-yard relay race. Unlimited class: 100-yard dash. Running high jump. Running broad jump.

880-yard relay race.

Placques were presented to the schools scoring the greatest number of points in the division meets; also a placque donated by A. G. Spalding & Bros. was awarded to the school winning the greatest number of points in the city championship meet. There were 1,063 boys entered in the eight division meets and nearly 600 of these qualified for the city championships. The results are as follows:

City championship trophy.—Placque, presented by A. G. Spalding & Bros.; perpetual trophy awarded to school scoring highest number of points in the elementary schools' championship games; won by Ross School, 1916.

Bloomingdale division trophy.—Placque, presented by department of playgrounds; won by Takoma School, 1916.

Gallinger division championship trophy.—Placque presented by R. Harris & Co.;

won by Force School, 1916.

Garfield Park civision championship trophy.—Placque presented by Henry P. Blair; won by Hilton School, 1916.

Georgetown division championship trophy.—Placque presented by Dr. Arthur L.

Murray; won by Industrial Home School, 1916.

Mount Pleasant division championship trophy.—Placque presented by Dieges & Clust; won by Cooke School, 1916.

New York Avenue division championship trophy.—Placque presented by National Sporting Goods Co.; won by Henry-Polk School, 1916.

Rosedale division championship trophy.—Placque presented by W. B. Hibbs; won

by Carbery School, 1916.

Virginia Avenue division championship trophy.—Placque presented by B. B. Earnshaw; won by Bryan School, 1916.

Total points scored by divisions, 1916.

Points were scored in city championship track and field games as follows: Mount Pleasant, 58; Rosedale, 37; New York Avenue, 23; Georgetown, 19; Gallinger, 16;

Pleasant, 58; Rosedale, 37; New York Avenue, 23; Georgetown, 19; Gallinger, 16; Virginia Avenue, 11; Garfield Park, 7; Bloomingdale 5.

Total points won by each school in city championship track and field games, 1916: Ross, 25; Force, 15; Industrial Home, Henry-Polk, 14; Maury, 13; Cooke, 12; Bryan, 9; Ludlow, Carbory, 6; Gales, Pierce, Brookland, Hubbard, Dennison, Monroe, West, 5; Brent, Abbot, 4; Hilton, Wheatley, Webb, 3; Langdon, Addison, 2; Hayes, Cranch, Ketcham, Thomson, Curtis, and Eaton, 1; Wallach, Tyler, Lencx, Congress Heights, Buchanan, Edmonds, Blow, Blair, Twining, Seaton, Morse, Blake, Arthur, Powell, Petworth, Morgan, Johnson, Chevy Chase, Jackson, Hyde, Filmore, Corcoran, Smallwood, Dent, Weightman, Tonor, Grant, Adams, Takoma, Gage, Emery, Eckington, Cleveland, failed to score.

#### PART IV.

#### REPORT OF THE SWIMMING POOLS AND BATHING BEACH.

Late in the spring of 1916 the three playground swimming pools provided for by Congress the previous year were completed and opened on June 23, 1916.

They are located on the following playgrounds: Georgetown, Rosedale, and Howard (colored). In charge of each is a head life guard, who is assisted in its management by a life guard, attendant, and key boy. Each pool will accommodate about 100 bathers at one time, and follows an hourly schedule from 9 o'clock in the morning until dark. Provision has been made to supply suits and towels to the public at a nominal cost, but bathers are encouraged to furnish

their own apparel.

The pools are of the open-air type, 28 feet wide by 75 feet long, with a sloping depth of 3½ feet to 6½ feet. Each pool holds about 96,000 gallons of water, which is supplied from the city mains. The water is filtered, and the pools are so constructed that an overflow of water is always going off while they are in use. The water was frequently tested by the health authorities and has always been found in the most sanitary condition.

The bathing beach at Seventeenth and A Streets NW. was placed under this department a year ago. Here follows the annual report

for the season of 1916:

Opened June 10, 1916; closed September 15, 1916.

Hours of operation:

Boys-10 to 12 a.m. on Tuesdays, Wednesdays, Thursdays, and Fridays,

Men—Sundays 10 a. m. to 12 m. and 2 to 5 p. m; week days 4 to 6 p. m., except Wednesdays and Saturdays.

Women-Mondays and Fridays from 7 a. m. to 12 m.; Wednesdays, 2 to 6 p. m.

Men and women—Tuesdays from 7 to 10 a.m.; Saturdays, 2 to 6 p. m. From June 10 to 19, owing to lack of sufficient appropriation, the pools were open from

2 to 6 p. m. only.

#### Attendance.

Markle .	White.			
Month.		Men.	Women.	Total.
June July August September Total	7,998 15,479 12,096 2,083 35,655	2,109 5,137 4,456 803 12,506	3,060 12,720 10,286 2,722 28,788	13, 166 33, 336 26, 848 5, 608 78, 958

e ·	Colored.			
Month.	Boys.	Men.	Women.	Total.
June July August September	891 1,716 2,238 478	166 427 630 152	87 407 699 167	1,144 2,550 3,567 797
Total	5,323	1,345	1,360	8,058

The receipts from the rental of bathing suits and towels were \$420.60, which was deposited with the collector of taxes. Samples of water were taken daily and tests were made by the health department to determine the amount of pollution. Due to the very limited capacity of the pools and the greatly increasing patronage, it was frequently necessary to change the water supply, thus considerably reducing the time allotted for bathing.

During the season several swimming meets were held with gratifying results, showing that the number of persons unable to swim is steadily

diminishing.

#### PART V.

## REPORT OF REPAIR AND CONSTRUCTION DIVISION.

With the acquisition of a central and permanent storehouse and shops the matter of distributing of supplies and equipment, as well as of keeping the grounds in repair, reached a higher standard than had been maintained before.

When the property at 1062 Wisconsin Avenue NW. was assigned to this department for a storehouse it was badly in need of repair. It was necessary to place a new roof on it, to paint the building and renovate it throughout, as well as build a blacksmith shop and pipe-storage house. As the building now stands it is in excellent repair and contains a carpenter shop, blacksmith shop, small machine shop, paint shop, tool rooms, storage rooms, etc., as well as the offices of

the repair and construction division.

This division takes care of all the repair and construction work on the various playgrounds, as well as the three swimming pools and the bathing beach, which was added to the playground department this year. On July 1, 1915, when this division was organized, it was found that all of the playgrounds were out of repair and many pieces of apparatus were entirely out of use. The whole of the summer and fall was devoted to rebuilding and repairing them, and by cold weather all apparatus was in use and the playgrounds in an excellent state of repair. During the winter months the force was in the shops making repairs on the building, getting tools ready for use, and manufacturing different articles of equipment and parts, such as kindergarten tables and benches, concrete baseball bases, balance beams, bicycle racks, incline boards, seesaw boards, baby-hammock frames, box swing chairs, park benches, etc.

With the opening of spring all the playgrounds were painted and all the shelter houses renovated. Baseball diamonds were laid out, tennis courts and backstops built, new pieces of apparatus installed, several grounds treated with dust layer, etc. New sections of lockers were built on the three swimming pools, which were

completely equipped for the opening on June 23, 1916.

One new playground, Gallinger, was laid out at Eighteenth and C Streets NW. The work consisted of the grading of the ground, taking 2,000 loads of earth, the erection of over 1,200 feet of fencing, the laying out of tennis courts, baseball and soccer-ball fields, the erection of backstops, a shelter house, toilet facilities, and the following pieces of apparatus: Seesaws, swings, giant stride, travelinging frame, ladder, parallel bars, slides, tether-ball poles, etc.

#### PART VII.

#### RECOMMENDATIONS.

With the belief that when a city makes it illegal to play in the streets it should provide places where play may not only be lawful but encouraged, the following recommendations are submitted:

That additional playgrounds be established until there be one

accessible to every child in the District of Columbia.

That every playground have either a swimming pool or a wading pool provided.

That the wider use of the school plant, in connection with play-

ground activities, be encouraged by all workers.

That shelter houses or open-air halls be provided on all grounds now in operation. The summers are so hot and the winters are so cold that unless we provide against these extremes of climate much time must be lost in the outdoor life of our children.

That the playgrounds be lighted and open evenings.

That moving picture apparatus be purchased for all lighted grounds. That the shops of the elementary schools be open in summer vacation so the children attending the playgrounds near-by may have elementary woodwork and simple carpentry. The repairing of broken furniture and toys would be good occupational play.

That school kitchens be open in summer vacation and near-by playgrounds children be given cooking lessons as an occupational

recreation.

I wish to acknowledge the helpful cooperation of the Department of Buildings and Grounds, the splendid courtesy of the Police Department, and my appreciation of the enthusiastic and earnest efforts of the directors of playgrounds. To the newspapers of the District I am grateful for giving space in which to bring our plans and achievements before the public.

I have found it a joy to be a factor in this great work of trying to make the playgrounds the best social expression of the neighborhood.

Respectfully submitted.

Susie Root Rhodes,
Supervisor.

The Commissioners of the District of Columbia.

## REPORT OF THE BOARD OF MEDICAL SUPERVISORS.

Washington, D. C., July 28, 1916.

Sirs: I beg to submit herewith the report of the secretary of the board of medical supervisors of the District of Columbia for the year

ending June 30, 1916.

The first part of this report shows, in tabulated form, the work done by the board of supervisors and the board of examiners; the second

part is the financial statement for the year.

In addition to this routine work, the board has conducted a hearing upon a complaint against Dr. Thomas June Kemp by the executive committee of the Medical Society of the District of Columbia. As a result of said hearing the board revoked the license of the said Dr. Kemp to practice medicine and surgery in this District. An appeal has been taken from the action of the board to the Court of Appeals of the District of Columbia.

The board recommends that the balance on hand June 30, 1916,

amounting to \$764.30, be distributed as follows:

,	
Dr. E. P. Copeland, secretary	\$600.00
Dr. G. C. Birdsall, president	27, 00
Dr. L. D. Walter, member of board	9.00
Mr. F. A. Fenning, member of board.	27.00
Mr. W. B. Guy, member of board.	. 27.00
The board of examiners.	. 74.30
Total	764 30

The secretary of the board waives that portion of the fund due him as a member of the board of examiners in favor of the remaining members of the board.

Respectfully submitted.

EDGAR P. COPELAND, M. D., Secretary.

The Commissioners of the District of Columbia.

J. RAMSAY NEVITT, M. D., Coroner.

The Commissioners of the District of Columbia.

## REPORT OF THE ANATOMICAL BOARD.

## Washington, D. C., October 5, 1916.

Gentlemen: In accordance with the regulations governing the anatomical board of the District of Columbia, I have the honor of submitting to you the annual report of the board, July 1, 1915, to June 30, 1916.

Very respectfully,

C. L. Davis, Secretary-Treasurer, Anatomical Board, District of Columbia. The Commissioners of the District of Columbia.

Washington, D. C., October 6, 1916.

At a specially called meeting of the board held December 11, 1915, at the office of the health officer for the District of Columbia, Dr. C. L. Davis was elected secretary-treasurer, to succeed Dr. Emory Reisinger.

Regular meetings of the board were held February 3 and May 22, 1916.

Number of cadavers distributed to medical schools, 96.

# REPORT OF THE BOARD OF PHARMACY.

Washington, July 1, 1916.

Sirs: As provided for by law, I have the honor to submit the following as the annual report of this board for the fiscal year just ended.

Upon the receipt of your appointment of Dr. Charles J. Furhmann, to serve for a period of five years from July 1, 1915, the board organized for the year as follows: President, Augustus C. Taylor: secretary,

William T. Kerfoot, jr.; treasurer, Charles J. Fuhrmann.

The board has become a member of the National Association of Boards of Pharmacy, and through this it is enabled to extend reciprocity with 37 States, and the prospects are that this number will be increased from time to time. The State of Ohio has withdrawn the agreement which has existed for many years, thus abrogating our reciprocal relations with that State. This action on their part was due to a recently enacted pharmacy law which required a candidate to have been a graduate of a college or school of pharmacy before he or she is eligible to examination. The board of that State held that under the new law that they could not legally reciprocate with any State or jurisdiction unless their law contained the same requirement.

Ten meetings were held during the year, two of which were special. Seventy-one candidates presented applications for examination, 30 of whom succeeded in passing the requirements of the board and were registered. Four applications for registration were received and ac-

cepted through reciprocity.

The books of the secretary's office show the following:

The books of the secretary's office show the following:	
71 application for examination \$716.00 4 applications for reciprocity 40.00 5 permits for the sale of poisons, etc. 5.00	
12 renewal of permits.       6.00         3 certifications.       3.00	Ama ( 00
1 application withdrawn

Attest:

AUGUSTUS C. TAYLOR, President. W. T. Kerfoot, Jr., Secretary.

The Commissioners of the District of Columbia.

# REPORT OF THE BOARD OF DENTAL EXAMINERS.

Washington, D. C., June 30, 1916.

Gentlemen: I hereby submit for your consideration the transactions of the board of dental examiners of the District of Columbia for the fiscal year ending June 30, 1916.

Fifty-two applicants were examined under the law as to their

qualifications to practice dentistry in the District of Columbia.

Thirty-five were certified for registration, and two among this number presented certificates from their State board, and under the law as amended February 5, 1904, were granted certificates without examination.

Five registered dentists having lost their certificates, the board

directed that five certificates be issued in duplicate.

Eighteen applicants failed to pass the examination and were re-

fused certificates.

One applicant applied for examination in theory alone and requested that she be allowed to take the clinical examination in

January, 1917. Request granted.

Two applicants qualified in June, 1915; one was sick, the other was ordered away by the Government, in whose employment he is engaged; consequently the board granted them permission to take the January, 1916, examination without further payment. Last certificate number, 939, issued to John E. Morgan.

Receipts during the year, \$516.

Disbursements during the year, \$516.

Respectfully submitted.

STARR PARSONS, Secretary.

THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

# REPORT OF THE NURSES EXAMINING BOARD.

Gentlemen: At the annual election for the present year Miss Sallie F. Melhorn was reelected president and Miss Helen W. Gardner was reelected secretary and treasurer.

Report for the year ending June 30, 1916.

Total	1, 350. 33

At the January meeting Miss Kanely, who had been president of of our board for several years, resigned the presidency, owing to pressure of other work. The board accepted it with regrets, and Miss Sallie F. Melhorn was elected to fill the vacancy until the annual meeting.

Two examinations were held during the year, at which 88 were present. Fifty-six made the required average of 75 per cent, 4 failing in the November, 1915, examination, and 20 failing in the May, 1916, examination, making an average below 60 per cent in two or more subjects out of the five subjects given.

The following is the average per cent obtained by the graduates of schools in the District of Columbia for the year ending June 30, 1916:

School.	Num- ber taking.	Num- ber failing.	Average.	School.	Num- ber taking.	Num- ber failing.	Aver age
Garfield. Columbia. Freedman's Children's Emergency	6 2 9	2 1	84 80 84 77 84	Sibley. Providence. Georgetown George Washington Homeopathic	1 10 12 12 12 5	2 7 5 1	90 79 70 78 82

The schools of Emergency and Columbia Hospitals were registered for one year from January 1, conditionally that they each give their nurses six months' additional training at the Bellevue and Allied Hospitals, and a report of medical and children's cases treated at their hospitals be sent in quarterly.

Miss Fay Gring Butler acted as inspector of training schools during

the year, and reports as follows:

#### GARFIELD HOSPITAL REPORT.

First visit March 23, forenoon and afternoon: completed.

Three-vear course; two months' probation.

Probationers only allowed four hours' daily duty.

9.30 to 12, study; 20 hours a week practical demonstration by superintendent of nurses and her assistant.

2 to 4 p. m., class.

Have an excellent preliminary course, with final examinations to determine acceptancy of pupil.

Age at entrance, 20 to 35; total number of pupils, 61. Vacations, three weeks in second and third years.

Day duty, 8 hours; night duty, 12 hours.

Total number of beds, 225; average of daily occupancy, 150.

Internes, 6. Three months' course in dietetics by Miss Saunders (theory, 20 lessons); each senior

nurse given two months' daily diet kitchen instruction. The metric system is not used; has been taught for several years.

Affiliate with children's hospital for two months.

No laboratory experience; all theory.

No difficulty in securing applicants with educational requirements.

No new ideas introduced since last inspection.

Hospital in excellent condition at time of inspection.

# CAPITAL TRAINING SCHOOL FOR NURSES, OR WASHINGTON ASYLUM HOSPITAL REPORT.

First visit March 27, afternoon; second visit April 6, afternoon.

Three-year course; two months' probation.

One hour once a week demonstration to probationers; nurses are placed on general ward duty under instruction of supervising nurse as soon as entered.

Age at entrance, 19 to 25; total number of pupils, 27.

Vacations, two weeks yearly. Day duty, 10 hours; night duty, 12 hours.

Total number of beds, 265; average daily occupancy, 235.

Increase since last year; more crowded condition. Number of internes, 6.

Dietetics by Miss Shilling; theory only.

Paid; a graduate of Pratt; course of 16 lessons.

There is no place for kitchen demonstration and lessons in cooking. Affiliate with Harlem Hospital one year for general nursing; no private cases except special duty; no laboratory experience or demonstration, all theory.

Metric system not used, but taught.

Since last year's inspection Miss Stacy is acting superintendent, having succeeded Miss Murdock. (Apr. 6 Miss Stacy resigned, succeeded by a Mrs. Healy, a Providence graduate.)

Miss Stacy intended introducing a new idea of giving massage to first-year pupils next fall so the remaining years of their course the nurses could use the knowledge of their massage lessons; Miss Lippett is the teacher.

Third-year nurses have an excellent course of 16 lessons in orthopedics and bandaging by Dr. Larkin.

There are 21 volunteer lecturers connected with the training school.

The superintendent of nurses says she has considerable difficulty securing applicants

having the educational requirements.

At time of inspection this year all the wards were in a very crowded condition. Female (colored), 33 beds or patients; two nurses in the forenoon, one in the afternoon. White (male) medical ward, 42 patients; had recently 46; two nurses in the forenoon, one in the afternoon. Colored (male) chronic cases, 29 patients; very

insanitary conditions prevailed owing to lack of proper appliances and poor ventilation; one nurse.

Hospital linen and covers in a deplorable condition.

The nurses work splendidly considering the depleted condition of all necessary hospital outfit, and there are too few nurses to cope with the present situation.

#### THE GEORGE WASHINGTON UNIVERSITY HOSPITAL.

First visit March 30, afternoon; second visit March 31, afternoon.

Three-year course; four months' probation. Two hours' daily classes by the superintendent of nurses in demonstration for one month: not permitted to do ward duty first two weeks; two hours' study daily; no examinations.

Age at entrance, 19: total number of pupils, 56; 40 on duty.

Affiliation with Episcopal Hospital, four months; Children's Hospital, two months.

Vacations, two weeks first and second year; three weeks third year.

Day duty, 10 hours; night duty, 12 hours.

Total number of beds, 105; daily occupancy, 75.

Internes. 5.

Dietitian a graduate of Columbian College, New York; 36 lessons of two hours each, combining theory and experiments.

Metric system not used nor taught; will be in the fall.

Laboratory tests of 14 lessons by Dr. Lyons, combining theory and experiments, in

which the nurses assist; this is the first class doing laboratory work.

The superintendent of nurses says next fall every senior nurse will spend two or three hours daily for two months being instructed and assisting in pathological tests and blood counts.

Dressings of clean cases saved, washed, boiled, and resterilized for dispensary use.

Massage taught by Miss Kernan; 24 lectures to senior class.

A general change has been made in the curriculum of the training school since last October, after the return of the superintendent of nurses. Miss Glascock, from the Boston (Mass.) General Hospital, having taken a six months' course in institutional government.

The hospital was in very good condition at time of inspection.

#### FREEDMAN'S HOSPITAL REPORT.

First visit March 20, forenoon; second visit March 24, afternoon; third visit March 30, afternoon (lecture terminated by a written examination); fourth visit April 4, afternoon.

Three-year course; two months' probation.

Age at entrance, 21 to 35 years; total number of pupils, 48. Vacations, two weeks each year.

Day duty, 10 hours; night duty, 12 hours.

Total number of beds, 300; daily occupancy, 280.

Internes, 11.

Dietitian a graduate nurse, also a graduate dietitian; the assistant superintendent of nurses; voluntarily given.

No preliminary course for probationers.

Once a week, lessons in practical demonstration by assistant superintendent of

Nurses not permitted to give medicines or hypodermics until accepted; otherwise they do general ward duty under instruction of ward supervisors.

Massage given by graduate teacher voluntarily.

The superintendent of nurses insists upon applicants being high-school graduates; thus, she claims, the superior education produces superior work.

The metric system not used or taught; will be next term.

No laboratory work; theory only.

Dressings of clean cases saved, washed, and resterilized.

No new ideas introduced since last inspection. Splendid experience in children's diseases. Hospital in good condition at time of inspection.

### EMERGENCY HOSPITAL REPORT.

First visit March 17, forenoon and afternoon; second visit April 5, afternoon.

Three-year course; three months' probation.

Time for demonstration classes varies at present, but fall classes will have a schedule of routine, daily demonstration, classes in theory, study hours, and ward work. The present superintendent has only been here several months, having made a complete change in the training-school curriculum.

Age at entrance, 18 to 30; total number of pupils, 42.

Vacations, three weeks each year.

Day duty, 10 hours; night duty, 12 hours.

Total number of beds, 141; daily occupancy, 116.

Internes, 6.

No difficulty in securing applicants with educational requirements.

Dietitian a graduate of Pratt Institute. New York; Miss Beaker (paid) is a resident dietitian.

Each intermediate nurse spends two months daily on duty in diet kitchen under Miss Beaker's instruction.

Affiliate with Columbian for obstetrical experience.

Metric system not used or taught, but fall classes will be taught and examined in same.

Six lectures in pathology; laboratory experiments with class in theory.

Soiled dressings are never saved.

The present superintendent of nurses has most excellent plans and schedules for fall classes, especially preliminary practical and theoretical for probationers; examinations to also determine acceptance of pupils at expiration of probationary time.

One hundred and seventy-one medical cases in December, January, and February.

Children's cases increasing.

Hospital in excellent condition.

#### GEORGETOWN UNIVERSITY HOSPITAL REPORT.

First visit March 16, forenoon and afternoon; second visit March 20, afternoon.

Three-year course; two months' probation.

Two hours' daily instruction in demonstration and theory by superintendent of nurses; nurses not permitted to do more than five hours' ward duty, then only in work previously instructed.

Age at entrance, 20 years; total number of pupils, 48.

Vacations, two weeks yearly.

Day duty, 10 hours; night duty, 12 hours.

Total number of beds, 265; daily occupancy, 150.

Interne staff, 5.

Dietetic course, by resident graduate of Drexel, 16 lessons, combining theory and practical lessons.

The metric system is not used nor taught, but will be taught in the future.

No practical instruction in laboratory work; 6 lessons theoretical.

Dressings saved of clean cases; washed, boiled, and resterilized. Having little difficulty in securing applicants with educational requirements.

Nurses have an excellent course of lessons in bandaging and asepsis by Dr Donohue.

No new ideas introduced since last inspection.

Hospital in very good condition at time of inspection.

#### SIBLEY HOSPITAL REPORT.

First visit March 21, forenoon and afternoon; second visit March 23, forenoon; third visit April 1, afternoon (class postponed); fourth visit April 5, afternoon.

Three-year course; 6 months' probationary period.

Daily demonstration of one hour for two months; the remaining four months' demonstration, twice a week.

Probationers on duty from 7.30 to 10 a.m. and from 4 to 6 p.m.; intervening hours for study; oral examinations before being accepted.

Age at entrance, 21 years; total number of pupils, 56.

Four weeks' vacation during first and second years, none the third year.

Day duty, 9 hours; night duty, 12 hours.

Total number of keds, 150; daily occupancy, 115.

Internes, 3.

The theory of dietetics taught by Miss Knibloe, a graduate of Pratt; paid.

Twice a week, two hours each, lessons in cooking, a graduate dietitian; Miss Pratt;

The metric system not used or taught; it will be taught in the future.

Since last inspection the third year nurses have two hours' daily laboratory instruction for one month, making tests under direction of pathologist.

Dressings are not saved for reuse.

No difficulty in securing applicants with educational requirements. Hospital in good condition at time of inspection.

Most excellent instruction: practical and theoretical in dietetics.

#### CHILDREN'S HOSPITAL REPORT.

First visit. February 24. afternoon: second visit, March 18. afternoon.

Three-year course: two months' probation. No scheduled or systematized preliminary course for probationers: once a week, sometimes twice, demonstration classes to probationers, by Miss Woodworth, superintendent of nurses: no examinations before accepting probationers.

Age at entrance, 18 to 35 years: total number of pupils, 35.

Vacations, four weeks first and second years. Day duty. 8 hours: night duty. 12 hours.

Total number of heds, 135: daily occupancy, 80.

Internes. 2.

Dietetic course by Mrs. Bailey, a Drexel graduate; 26 lectures; paid.

Affiliated with Garfield four months, for contagious and obstetrical experience; with Episcopal Hospital, four months, for eye, ear, nose, and throat instruction.

Metric system not used: not taught. Miss Woodworth did not evince any interest in the metric system idea of instructing her school in a comprehension of it, even if not used at the present time.

No new ideas introduced since last inspection.

Hospital in very good condition at time of inspection.

Difficulty in securing applicants meeting required educational standard.

#### PROVIDENCE HOSPITAL REPORT.

First visit February 25, afternoon; second visit March 21. forenoon; third visit March 27, forenoon.

Three year course: six months' probational period.

Most excellent course in preliminary training during six months' probation; at the completion of time final examinations, written and oral, must be passed by the student before she is accepted into the school. Subjects studied are general nursing, hygiene,

dietetics, bacteriology, materia medica, anatomy, and physiology.

Outline of daily schedule in preliminary course: 7 to 8 a. m., class work, by Sister Placida (superintendent of nurses): 8 to 10 a.m., ward duty, such as dressings to various wards, collection of covers, rearrangement of ward supply closets (seeing that needed articles are in good condition, etc.); 10 to 11.30 a.m., demonstration class. by Sister Placida: 12.30 to 2 p. m., study: 2 to 4 p. m., making of dressings, cleaning, etc.: 4.30 p. m., retire from duty.

Pupils admitted from 19 to 35; number of pupils. 80.

Yearly vacations, 16 days.

Day duty, 10 hours; night duty, 12 hours.

Total number beds, 335; daily occupancy, 239.

Interne staff, 8.

Classes form twice a year. August and February.

Dietetics taught by a graduate nurse (superintendent of nurses, who took a course

Massage this year taught by a graduate nurse (sister) in the institution.

Dressings saved, with the exception of very bad septic cases, washed, and resterilized for half hour at 200° Fahrenheit.

Very excellent training course. Hospital in good condition.

New obstetrical ward, delivery room, and nursery in course of construction.

Metric system not taught or used; will be taught.

Third year classes have two months of daily two hour classes in laboratory work in making tests of urea, alb. sugar. etc., under instruction of pathologist. This is a new idea, introduced since last inspection.

No difficulty in securing applicants with educational requirements.

#### COLUMBIAN HOSPITAL REPORT.

First visit March 22, forenoon; second visit April 1, afternoon (class postponed); third visit April 3, afternoon; fourth visit April 4, afternoon.

Three year course: three months' probation.
One hour daily demonstration by assistant superintendent of nurses for three months; no examinations: study anatomy, bacteriology, general nursing, with ethics, during probationary period.

Total number of pupils, 50.

Vacations, three weeks during second and third years.

Day duty, 8 hours: night duty, 12 hours.

Average daily occupancy, 75; total number of beds. 135.

Interne staff, 3.

Theory of dietetics, by Dr. Wiley, 10 lectures: no dietitian. Affiliate with Bellevue Hospital. New York, for six months to obtain more instruction in medical and surgical cases: three months of the six spent in children's ward for experience

Columbian Hospital will no longer affiliate with Episcopal Hospital after 1st of

April, 1916.

The metric system not used, but taught: a more thorough understanding of same. with examinations, will be started with all the fall classes.

No practical laboratory experience; all theoretical.

Since last inspection Miss Minnegrode has been made superintendent of nurses. She says she has made many changes in the curriculum of the school: most helpful, the six months' nursing course to Bellevue. This, Miss Minnegrove hopes, will register Columbian Hospital Training School.

The new hospital is being used since the last inspection.

No difficulty in securing applicants with educational requirements.

In very good condition at time of inspection.

#### HOMEOPATHIC HOSPITAL REPORT.

First visit March 21, afternoon; second visit March 22, afternoon. Three-year course; three months' probation.

No preliminary course; nurses are placed on general ward duty under instruction of ward supervisor; once a week, classes in demonstration.

Age at entrance, 18 to 35: total number of pupils, 26. Vacations, two weeks first year: three weeks second and third years.

Day duty, 10 hours; night duty, 12 hours.

Total number beds. 72; average daily occupancy, 50 or more.

Internes. 2.

Graduate dietitian: 16 lessons.

The metric system not used, but has been taught for past three years.

Theory and demonstration, 10 lessons, by Dr. Burchell.

No children's ward, with occasional cases in private rooms, mostly surgical, in January. February, and March; 15 private children's cases: surgical.

Miss Aldridge says she has difficulty securing nurses having the educational require-

Soiled dressings are not saved.

Massage taught by Miss Lippett.

No new ideas introduced since last inspection.

Hospital in good condition.

Respectfully submitted.

# REPORT OF THE BOARD OF FLOUR COMMISSIONERS.

Washington, D. C., October 2, 1916.

Gentlemen: Reporting for the board of flour commissioners, I respectfully beg to state that the board has not been called upon during the year to decide any cases of disputed quality on flour.

Yours, truly,

RALPH L. GALT.

The Commissioners of the District of Columbia.

191

# REPORT OF THE DEPARTMENT OF WEIGHTS, MEASURES, AND MARKETS.

Washington, October 10, 1916.

Gentlemen: I have the honor to submit the following report of the operation of the Department of Weights, Measures, and Markets for the fiscal year ending June 30, 1916:

### WEIGHTS AND MEASURES DIVISION.

The department has, during the last fiscal year, exercised closer supervision over weights and measures in the District than ever before. Dealers generally have shown a disposition to cooperate with the department, and very little friction has resulted from our efforts. Each scale in the District is inspected twice a year, and so-called surprise inspections are made from time to time, and the number of these is gradually being increased. Test purchases for the purpose of ascertaining whether correct weights and measures are being given have been made frequently, and every complaint of short weight or measure which has been made has been promptly investigated.

On account of the insufficient number of inspectors it has been impossible to do the work in as thorough and systematic manner as has been desired, but with two additional inspectors, which have been provided by Congress, it is believed the force will be reasonably adequate for the present and the work can be carried on in a more

thorough manner than heretofore.

Numerous complaints have reached this office regarding alleged short measure of gasoline, but it has been found on investigation that comparatively few of them are well founded. The department during the latter part of the year began testing the gasoline measuring pumps in use in the District. This work had not been done before, but will be prosecuted until all such pumps have been given a thorough test and sealed by one of our inspectors. In the future each pump will be tested and sealed once a year.

It is the intention to take up during the coming fiscal year the work of testing all druggists' prescription scales and jewelers' scales in the District. This is a field which has not been covered before on account of insufficient force, but which is, nevertheless, of great

importance.

It has been the policy of the department to use warning and corrective methods in cases of short weight or measure wherever it was believed such a course would cure the evil. Prosecutions have not been resorted to except where it was believed the public interest demanded. Nineteen prosecutions were instituted during the year and the fines and forfeitures amounted to \$375.

#### THE MUNICIPAL MARKETS.

The municipal markets serve a double purpose. They provide means whereby producers and dealers may secure, at a nominal rental, a place to sell their products, and thus enable the consumers to purchase the necessaries of life at a lower price than they could otherwise do.

The Farmers' Produce Market (now known as the Haskell Produce Market) especially meets a very definite need of the truckers and farmers adjacent to Washington. While this market is now crowded, and it is often found impossible to accommodate all who come, it is believed that when the new shelter which has been provided for is

finished, the accommodations will be adequate.

Conditions at the Fish Wharf and Market have steadily improved since control of the property was taken over by the District, and when the new building at that point, for which an appropriation of \$185,000 has been made, is completed, the possibilities of the market can be fully developed, and trade which has been going away from Washington for want of facilities will be brought back. This project should prove not only a source of convenience and pride to the people of the District of Columbia, but should also be a paying investment.

Conditions at the Eastern. Western, and Georgetown Markets have not been entirely satisfactory during the year. It has required considerable effort to keep the stalls rented, due, it is believed, partially to the fact that a great many hucksters operate in the District, and to the further fact that needed repairs have not been made. While these markets have been kept in a cleanly and sanitary condition, they should be made more attractive in appearance.

#### LUMBER AND WOOD.

During the year 6,968,664 feet of lumber were inspected and graded, and 415,790 feet condemned. The gross fees collected by the inspector amounted to \$2,238.64; expenses, \$749.53; net fees retained by the inspector for services, \$1.489.11.

The wood inspectors reported 16.762\(^3\) cords of wood measured and graded, gross fees collected, \\$1,508.60\; expenses, \\$139.80\; net fees

retained for services, \$1,368.80.

#### RECOMMENDATIONS.

The following recommendations are submitted for consideration:
1. Congress should be requested to pass a law fixing the standard weight of bread manufactured for sale, sold, or offered for sale in the District of Columbia at 16 ounces per loaf. The practice of raising the price of bread by reducing the weight of the loaf is contrary to the principles of fair dealing, and can not be justified. The purchaser of a commodity has a right to know when the price is advanced or lowered and what he is getting for his money.

- 2. Steps should be taken to provide for placing the wood and lumber inspectors on a fixed salary, and have the fees collected for their services turned over to the Collector of Taxes to be deposited in the Treasury, as is now the case with fees collected by the division of weights and measures. The practice of allowing public officials and employees to retain the fees they collect as compensation for services is fundamentally bad, and should not be authorized under any circumstances.
- 3. Congress should be requested as early as practicable to pass a comprehensive weights and measures law for the District of Columbia, which will meet the needs of the present time. The laws now in force have been passed at various times, and many of them are obsolete and unsuited to present-day business methods.

4. The horse-drawn vehicles now provided for the inspectors in the weights and measures division should, in the interest of economy and efficiency, be supplanted by motor vehicles at the earliest date

possible.

5. An appropriation should again be requested in the forthcoming estimates for repainting and making other necessary repairs to the Eastern and Western Markets. These buildings are valuable pieces of property, and, so long as they are used as markets, should be kept in a first-class state of repair.

GEO. M. ROBERTS,
Superintendent Weights, Measures, and Markets,
District of Columbia.

The Commissioners of the District of Columbia.

# ANNUAL REPORT OF THE MAJOR AND SUPERINTENDENT OF THE METROPOLITAN POLICE DEPARTMENT.

Washington, D. C., July 1, 1916.

The Commissioners of the District of Columbia.

Gentlemen: I have the honor to submit herewith my report of the operations of the Metropolitan police department of the District of Columbia for the fiscal year 1916, together with recommendations and an estimate of the amount required for the conduct and support of the department for the fiscal year beginning July 1, 1917, and ending June 30, 1918.

Respectfully,

RAYMOND W. PULLMAN, Major and Superintendent.

In the administration of the police department during the fiscal year 1916, the constant effort has been to gain maximum efficiency and to meet new and increasingly complex police problems with a police force which is smaller than it was 11 years ago. The District of of Columbia with its area of nearly 70 square miles and more than 510 miles of opened streets is perhaps the only community in the United States in which the number of police has been reduced as the city has built up and increased in population.

The police force, which includes 715 men, exclusive of the street railway crossing officers to whom Congress gave pension and other privileges in the 1917 appropriation act, is smaller to-day than it was in 1905 when 718 men were assigned to the same duties, and 20 less

than it was in 1912 when the number was 735.

Washington requires more policemen in proportion to population than a commercial city of the same size, because of the very fact that it is the Nation's capital. Besides performing the usual police service necessary in any city of more than 360,000 people, the Metropolitan police of the District of Columbia give protection to the White House and the White House grounds, and give special attention to streets on which are located the many public buildings, containing valuable supplies, collections, and records. Embassies of all the foreign nations and residences exceeding in size and grandeur those of any other city of its size in the United States, as well as congested sections in which the poor live, are located within the National Capital and to give all of these proper police protection the most careful work is demanded. The men of the department have responded to their duties with a fine spirit despite the increasing amount of work without an increase in number of men on the force and they have striven steadily to handle every police problem with intelligence, courtesy, and dispatch.

The 1916 report of the major and superintendent of the Metropolitan police department of the District of Columbia covers the first fiscal year of administration of the department under its present head. Last year's report covered the work of the department during a nine months period before the retirement of Maj. Richard Sylvester and three months under the present major and superintendent.

# CHANGES IN PERSONNEL.

The fiscal year ending June 30, 1916, was one during which few changes were made in the personnel of the commissioned officers of the force. The two important promotions made were brought about when a vacancy in the position of assistant superintendent was created by the death of Inspector Robert H. Boardman, who was Chief of Detectives in the Metropolitan police department for 17 years.

Inspector R. B. Boyle, who had given splendid service to the department for a period of 42 years, was promoted from the rank of inspector to the rank of inspector and assistant superintendent, and Detective Sergeant Clifford L. Grant, who had been detailed for eight years with the United States district attorney, was promoted to the

position of inspector and chief of detectives.

#### ADMINISTRATIVE CHANGES.

There have been a number of administrative changes made after a careful study of the department's needs and thorough consideration of the best methods to get maximum efficiency in the administration and work of the force. Some of the principal changes which have been made in the administration of the department during the year 1916 and in the last months of the previous fiscal year were:

1. Giving increased attention to traffic problems in streets, working to prevent accidents, and holding monthly meetings of all men engaged in regulation of traffic for the study of uniform methods of

work and study of traffic problems.

2. Permitting each and every man on the force to confer with the head of the department concerning any matter of interest which he might wish to lay before the major and superintendent.

3. Reviving weekly conferences with commanding officers of precincts, and including in these conferences for the first time the

inspectors and lieutenants.

4. Inaugurating monthly meetings of sergeants for the purpose of discussing sergeants' duties in connection with various problems, and particularly methods of strengthening the work of supervision of patrolmen.

5. Reducing and doing away with numerous details of men engaged on inside work in various departments of the District government. Each change was made after careful consideration and after it was decided by the head of the department and approved by the District Commissioners that the services of the men were needed more in patrolling the streets than on detail assignments.

6. Adoption of new style overcoat for the winter, similar to the overcoat worn by the men on the forces of New York, Philadelphia,

and virtually all of the larger and progressive cities.

7. Development of methods and procedure, by which more effective administrative control and increased efficiency in the work of the department may be obtained.

8. Working out a system of reports on each and every assignment given in the detective bureau, so that permanent record may be

kept of work done and action taken on every case, and doing away entirely with the old haphazard system in the department of trusting to a man's memory when information is called for on a case at any time.

9. Reviving revolver practice in the department in order to prevent danger of accidents sometimes caused by inaccurate shooting when men are untrained or out of practice in the use of the revolver.

10. Inaugurating a course of instruction in first-aid work, in order to give each man on the force information on the case of an injured

person during the time of wait for an ambulance.

11. Giving to the men information on methods of keeping well and improving their condition of health, and planning for annual athletic carnivals and field games.

#### PENSION AND SALARY LEGISLATION.

Although the size of the force was not increased, the Metropolitan police department was fortunate in receiving more consideration from Congress during the fiscal year 1916 than ever before in its history. In the last annual report of the major and superintendent three important pieces of legislation were recommended. Request was made first for the consideration of a new pension law providing an adequate pension fund and doing away with the use of police-court fines as a source of revenue for the fund, on the theory that a policeman should not have even the remotest financial interest in any arrest and the fine resulting therefrom.

The legislation second in importance was a substantial increase in the salaries of precinct commanders, their lieutenants, and sergeants.

The third important recommendation was for the amalgamation of the metropolitan police force and the crossing officers' force, the latter men formerly having no pension privileges of the Metropolitan

force, nor chances of promotion.

The major and superintendent's recommendations for the three above important pieces of legislation and a number of others were approved by the Board of District Commissioners and incorporated in their annual estimates. No board of commissioners had ever in recent years worked before Congress for an increase in the salaries of commissioned officers and sergeants. Bills covering the legislation desired were reported out of committees in both Houses of Congress. The rush of legislation toward the end of Congress made it appear desirable to put the bills on as amendments to the District appropriation bill, and at the close of the fiscal year on June 30 prospects for their passage by Congress were exceedingly good.¹

The readjustment of salary amendment provided for increases for all of the commissioned officers except the two highest in rank, for the precinct sergeants, and to the 24 detective sergeants gave the regular private's salary of \$1,200 plus \$480, which is exactly double the extra compensation formerly given to the men in the detective bureau and engaged in the prevention and detection of crime. The increases provided were as follows: Inspectors from \$1,800 to \$2,000; captains from \$1,500 to \$2,000; lieutenants from \$1,320 to \$1,600; sergeants from \$1,250 to \$1,400; detective sergeants from \$1,440 to \$1,680.

¹ The District appropriation bill, containing provisions for an adequate pension fund, increased salaries, and amalgamating the crossing police force with the metropolitan force was passed by Congress and the bill was signed by President Wilson on Sept. 1, 1916.

#### CRIMES.

The test of the efficiency of any police department is in the apprehending of criminals who have committed felonies. During the last fiscal year there has been an increase in the number of persons arrested and held where felonies or serious crimes have been charged, 1,969 cases of this kind having been made in 1916, as compared with 1,699 in 1915, and 1,192 in 1914.

The police department was perhaps more fortunate in apprehending murderers in the fiscal year 1916 than it was in any similar period in its history. There were committed in the District of Columbia during the year 24 murders. One murderer committed suicide. For 22 of the crimes arrests were made of the persons held guilty for the offense charged. In the twenty-fourth murder the department made the arrest of the man held responsible for the crime by the coroner's jury, but the grand jury did not consider the evidence sufficient to indict. Besides clearing up 23 of the 24 murder cases, the department arrested one man who had been indicted for murder committed in 1912.

Of the 24 murders, 4 of the persons killed were white and the persons held guilty for the crimes were the same color. Two colored men were held guilty for the murder of white men and one white man for the murder of a colored man. The murderer of one colored woman is unknown, and in the remaining 16 cases both the person killed and the person held guilty of the crime were colored.

#### TOTAL ARRESTS MADE.

The total number of arrests for all offenses in 1916 was 39,377 against 37,219 in 1915. Of this number 54.50 per cent were white as against 52.39 per cent in 1915, and 45.50 per cent were colored in 1916 as against 47.61 per cent in 1915.

An encouraging increase was made in the percentage of convictions, showing that the police are using greater care in getting evidence and are not making arrests except when they have the best information that the laws have been violated. Of the 39,377 arrests made in 1916, the percentage of convictions, exclusive of those held for investigation and as witnesses, was 91.77, as compared with 89.79 in 1915 with arrests numbering 37,219.

The percentage of acquittals was only 4.89 as compared with 5.66 in 1915, and the percentage of cases nolle prosequied was only 3.34 as compared with 4.37 in 1915.

The following is a classification of those charged under the law:

White	21,462
Colored	17,915
Male	35,402
Female	3, 975
Read and write	37, 377
Unable to read and write	2,000

#### LOSSES AND RECOVERIES.

Members of the police department were also successful in recovering a larger percentage of stolen, lost, or mislaid property than they have been in recent years.

During the fiscal year 1916, property to the value of \$336,067.34 was reported stolen, lost, or mislaid, and of this amount \$204,846.97 was recovered. In addition, however, there was recovered by the department property to the value of \$89,255.39 which had been lost or mislaid, but which had not been so reported to the police. Property to the value of \$5,410.34, which had been stolen in other jurisdictions, was also recovered in the District of Columbia by the department, making the grand total of property recovered during the last fiscal year \$299,512.70, out of \$336,067.34 reported stolen, lost, or mislaid.

In addition to this amount there came into the possession of the police department property to the value of \$1,388.57 which was used as evidence in the several courts in the District of Columbia, \$3,417.41 belonging to persons alleged to be of unsound mind, and \$7,051.98 the value of property belonging to the estates of deceased persons dying in the District of Columbia and which was taken in charge by the members of the police force, making the grand total of property delivered to the chief and property clerk in accordance with law \$311.370.66.

#### GAMBLING LAW ENFORCEMENT.

The police in all precincts have been persistent in their efforts to break up professional gambling and vice in all its forms. The work against perhaps the most dishonest form of gambling, handbook making, however, has been somewhat retarded by the delay in the presentation of cases in court. While the police department has no control over cases after an arrest is made, naturally it is very much concerned in the prompt prosecution of cases, because only by bringing violators of the gambling laws to justice can there be effected any deterrent on this kind of violation of the code.

In the latter part of the last fiscal year and during the fiscal year 1916, the police department and the Department of Justice agents made 67 arrests of handbook makers. In only 15 cases has evidence been presented to the grand jury and indictments secured. Only one of the large number of cases made has been ignored by the grand jury and one nolle-prossed. In 5 cases the men guilty of violation of law have received suspended sentences.

It is believed that during the coming fiscal year it will be possible to get prompt prosecution after arrests have been made by the police department so that the community will receive a greater benefit from the handbook investigations, which are conducted by the bureau of investigation of the United States Department of Justice and the

Metropolitan police department in cooperation.

The importance of work against handbook makers who persist in violations of the law in practically all communities of the United States is that all the chances are against anyone but the bookmaker winning in this particular form of gambling, and the swindle is made complete in many cases by the makers of handbooks "welching" or refusing to pay bets when money is won. Many of the precinct commanders have also done excellent work in making arrests of persons guilty of violation of laws covering other kinds of gambling, including craps, cards, baseball pools, and forms of violation of the lottery laws.

The members of the police department continued to give strict attention to the enforcement of all laws regulating vice. The work

formerly covered by the vice squad has been broadened in its scope and put in charge of a lieutenant, whose duties hereafter will be covered as "special investigations." It is the duty of this officer to investigate and verify all information coming into the department relating to the violation of either vice or gambling laws or illegal liquor selling, and to work with other members of the force in enforcing the law. This lieutenant and whatever assistants he may have to help him will cooperate with precinct commanders and officers in the various precincts, either assisting commanders to gather evidence and make arrests in cases, or himself initiating investigations and calling upon the precinct commanders for men to assist him in completing or gathering evidence and making arrests.

During the fiscal year 1916, in the enforcement of the vice laws, officers of the department, including those specially detailed in such work, made arrests in which 565 persons were held on the charge of fornication and convicted and fined or who forfeited collateral, as against 594 in the previous year. During the same period 64 persons were arrested and held for the grand jury on the charge of committing adultery, which is a felony in this jurisdiction, as against 39

persons arrested and held in the preceding fiscal year.

#### MOUNTED SERVICE.

The officers mounted on motorcycles and bicycles have continued their work of enforcing the speed law during the past fiscal year and attempted in every way possible to check reckless driving of auto-

mobiles and to prevent accidents.

The most dangerous type of reckless driver, the man who is guilty of running an automobile while drunk, is being curbed by the revocation of his license. During the fiscal year 23 persons arrested for driving an automobile while under the influence of intoxicants had their licenses revoked. This action had to be taken in order to prevent accidents and to prevent drivers from killing themselves or others when they were not in condition to handle a machine of any kind, especially an automobile.

The traffic regulations in Washington have been enforced liberally, and in cases of technical violations of the law officers have issued warnings instead of taking citizens to court. In cases of persistent violation, however, or reckless driving which might have resulted in injury to a pedestrian or other driver, arrests have been made to the number of 11,046 as compared with 7,615 in the previous year. The increase of 3,431 traffic cases is due to the increase in the number of motor vehicles in the District of Columbia and also to the fact that the police department had its motorcycle equipment increased from 8 to 18 machines.

With the fast motorcycles it has been possible to arrest many drivers who could not have been caught by officers mounted on bicycles. A number of cases of speed arrests have been made of motorists running from 40 to 55 miles an hour. Of course, reckless drivers at this speed would never have been apprehended by men mounted on anything but a motorcycle or in another automobile. The added motorcycle equipment in the department was made possible by the provision in the appropriation bill for the fiscal year 1915–16, which provided that men might be mounted either on motorcycles or horses at an additional compensation of \$240 per annum A

number of men formerly mounted on horses took advantage of this provision and the number of privates on the force mounted on horses

was decreased from 41 to 27.

At the present time there is mounted on horses 1 inspector, 4 captains, 1 lieutenant, 8 sergeants, and 27 privates. These men present a splendid appearance either at the head of large parades or on the mounted beats in the suburban sections of the District.

#### LECTURES ON POLICE WORK.

While the Metropolitan police department does not have the advantage of a central station with training-school facilities, there has been introduced during the past fiscal year some features of the training-school plan as worked out in the more progressive police departments of large cities. Reference is made to giving the men the benefit of lectures on police cooperation with other city departments, on general police administration, and on the relation between the police and the

public in America and in foreign countries.

Raymond B. Fosdick, author of European Police Systems, who has perhaps given closer study to police administration, both in Europe and America, than any other authority in this country, accepted an invitation to deliver a series of lectures to the Washington police in January last, and these were listened to with great interest by offiers in all branches of police service and by representatives of the board of commissioners, United States district attorney's office, corporation counsel's office, and by the officials of the Bureau of Investigation of the United States Department of Justice.

Others accepting invitations to deliver lectures before the Washington police included Hon. Louis Brownlow, commissioner of the District of Columbia; Hon. John E. Laskey, United States district attorney; and heads and representatives of various departments of

the District government.

#### STREET TRAFFIC.

Attention is called to the need for the creation of the position of traffic captain, to be in command of the traffic branch of the police department along with a lieutenant and three traffic sergeants, in line with the organization of traffic work in other cities.

The great increase of vehicular traffic on the streets of Washington and the increase of complex traffic problems makes the creation of a

traffic branch of the police department more and more urgent.

Traffic problems have increased during the year as the ownership of automobiles has increased. Streets in several sections of the city which were used very little are now important traffic ways. Traffic conditions in the streets can be improved by further cooperation of the police and members of the Engineer Department. The study of the distribution of traffic and the study of engineering problems which will make traffic flow easier becomes more and more important.

Better distribution of traffic will be brought about in some sections when there is a further extension of modern roadways and in other sections by the widening of streets. This latter engineering problem presents itself in a number of the downtown streets where the roadways are very narrow and the pavements are the same width as they were 20 or 30 years ago when there was a wide parking space

used as a front garden. These front spaces have in many cases been paved over and become part of the sidewalk, making the pavement in many instances unnecessarily wide. Fortunately Congress has appropriated for widening two of the congested downtown streets during the coming fiscal year.

Traffic will also run more smoothly when corners are cut at less acute angles. At the present time large machines have to use up entirely too much space in order to make a corner and in this way the danger of accidents is increased. The policy of rounding off corners has been approved by the Engineer Department and it is understood that future changes in the curb will incorporate this improvement.

For one year the police department has experimented with the various types of traffic semaphores such as are used in New York, Detroit, and other cities which are foremost in working out traffic problems, and several months before the close of the fiscal year the major and superintendent worked out a standard semaphore, combining in its thought all the good features of the various semaphores used in other cities, along with the umbrella, which is a piece of traffic equipment distinctive of Washington and which protects a man from the hot rays of the sun or from rain and snow.

One of the most important features about this Washington standard semaphore is its light. This city is the first to use on traffic semaphores the green and red "spheroidal" lens similar to the ones used in railroad signal lights. This lens, as contrasted with the old-style optical or "bulls'-eye" lens, is far more efficient and throws a clear light at an angle of 90 degrees, whereas with the old "bulls'-eye" lens, especially in bad weather, a motorist often could not tell the color of the signal shown unless he was directly in front of the lens. The "spheroidal" lens used on the Washington standard semaphore shows the red or green "stop" or "go" light for pedestrians as well as for vehicular traffic.

## TWO LARGE PARADES HANDLED.

During the year the police department was called upon to handle two large parades. The first of these was on September 29, 1915, when the Grand Army of the Republic held its forty-ninth annual encampment and fiftieth anniversary of the grand review in Washington. The second large parade held during the year was the preparedness parade, on June 14, 1916, in which, for the first time in the history of the National Capital, the President of the United States marched on foot the entire route from the Peace Monument to the White House.

The public-order work and the protection of the large crowds was handled with ease by the police, there being not a single serious accident on either occasion nor any other circumstance to prevent the smooth working out of the police plans made for the events. Thefts and complaints of all kinds reported to the police were below normal during the days on which both parades were held. To give the crowds the best police protection, the Metropolitan police had the cooperation of all of the eastern police departments, who sent their best detectives to assist local men.

To help out in the public-order work during the Grand Army encampment week, uniformed police from another city were secured for the first time, Baltimore sending over for four days a picked company of 100 men, with officers. A unique feature of the police work for the preparedness parade was the use of three troops of United States Cavalry, detailed to the police department by Secretary of War Newton D. Baker. The Navy Department, through the courtesy of Secretary Josephus Daniels, also cooperated with the police department, and detailed a company of picked men from the United States Marine Corps. Both the cavalrymen and marines gave splendid service in working with the police.

## ANNUAL AUTOMOBILE LICENSES.

One of the most needed pieces of legislation at the present time is a law providing for the annual licensing of automobiles. At the present time they are numbered serially, starting with No. 1, issued

on October 8, 1907.

Many of the cars for which licenses were given 3 to 10 years ago are now out of commission and the number tags of them are sometimes used illegally. These so-called "dead numbers" cause endless amount of confusion to the police in tracing lost and stolen cars, and also are an incentive to some persons to indulge in certain dishonest practices. such as selling Maryland tourists coming into Washington on Sundays

license tags which will carry them through the day.

Up to the present time Maryland is the one State of the Union which has not extended reciprocal courtesies to the licensed automobile drivers of the District of Columbia. Touring parties coming from Baltimore and other Maryland cities have been "held up" a number of times by persons on the outskirts of the city who have convinced drivers that the old tags could be used legally and have sold worthless dead numbers to car owners who have failed to secure District licenses.

For the benefit of the automobile owners of both Maryland and the District it is hoped that reciprocal relations between that State and the District of Columbia, so far as licenses are concerned, will soon be established, as has already been established with every other Common-

wealth.

An annual automobile license will make it possible to find lost and stolen cars in perhaps one-half the time which is now taken. Much time is now consumed in looking through many old numbers in the records in finding the owner of a car or in finding the number where an owner's name is known, and he has, as is frequently the case, forgotten his number.

It is also recommended that annual license be made to apply to motorcycles as well as to automobiles and that motorcycle numbers should be arranged horizontally instead of vertically, as is at present the plan, and that both automobile and motorcycle number tags be flooded with light at night and that the figures be shown

as through a transparency.

# TALKS TO SCHOOL CHILDREN.

During the past fiscal year Washington became the second city in the country to inaugurate a series of talks to school children by policemen, having for the purpose the teaching of lessons in the observance of laws and regulations, making for better citizenship, and in teaching lessons on accident prevention. Many thousands of children were reached during the year by Officer William S. Shelby, who was assigned to the work, and plans will be made for continuing the talks during the next school term. For a number of schools moving pictures were made use of to help in teaching lessons in accident prevention, and "safety-first" films were shown before large groups of children in moving-picture theaters, where they were escerted under the supervision of their teachers or principals. Cooperation of the school authorities, particularly the superintendent of schools, Mr. E. L. Thurston, and the assistant superintendent, Mr. S. E. Kramer, helped greatly in making the work successful.

There were also inaugurated during the latter part of the last school term a series of talks in schools on water safety, swimming, and saving lives. This work started with talks in the classrooms, followed by dry-land instructions in swimming and was completed by demonstration in the water at the Municipal Bathing Pools, where many classes were instructed by Officer F. J. Brunner, and where they were instructed in various phases of water-safety work.

Because of the fact that there are from 50 to 100 per cent more persons killed by accidental drownings each year than there are killed by automobiles on the streets, it is believed by the police department that the time has come for a campaign to promote water safety and to caution persons against carelessness on the water and to check, so far as is possible, loss of human life by drowning. During the fiscal year 1916, 29 people met death by accident in the water as against 19 who were killed in automobile street accidents. During the previous year exactly twice as many persons were drowned by accident as were killed on the streets in automobiles, 32 losing their lives in the water as against 16 meeting death in automobile accidents.

Washington is one of the few cities of the country which is checking both drowning and automobile accidents as the population increases, the number of each kind of accidents varying slightly and increasing or decreasing only three to five each year. By doing everything possible to check reckless automobile driving, the police department hopes that it will be possible to continue to keep accidental deaths from motor vehicles down to 20 or less a year. The rapid increase of motor vehicle traffic, however, makes the prevention of traffic accidents more difficult each year and makes it the duty of each and every driver to observe traffic regulations and to use more and more caution.

## RED CROSS AND POLICE COOPERATE.

The campaign for teaching water safety is largely the result of the cooperation given to the police department by the American Red Cross Society, through the courtesy of Maj. Robert U. Patterson, United States Army, director of the Bureau of Medical Service, who has on two occasions sent to Washington Prof. Wilbert E. Longfellow, who has worked with members of the police department and taught them the principles of life-saving in the water and first-aid work.

The police department also had the cooperation of the American Red Cross Society in teaching the members of the department the principles of first aid. The organization sent to this city Dr. Matthew J. Shields, who took the men through a thorough course in first-aid work. Since the teaching of first-aid and water-safety work to the

men, on testimony of physicians at hospitals and others who have attended patients, the police department has saved eight human lives from either gas poisoning or drowning, who without prompt firstaid treatment would have had only the slightest chance to survive.

#### SAFETY-FIRST EXPOSITION.

The Washington police department was the only department of the municipal government which participated in the safety-first exposition which was held in the foyer of the new Museum Building from

February 21 to February 26, 1915.

This exhibition of safety-first equipment used in the Federal Government and in the traffic branch of the police department was attended by more than 30,000 persons during the week, including the President of the United States, members of his cabinet, and many persons interested in preventing accidents and conservation of human life.

On the closing day of the exhibition an illustrated safety-first talk before school children was given under the auspices of the police department before a special meeting of the Grover Cleveland School public forum, which met in the large auditorium of the National Museum. The meeting was attended by the President's daughter, Miss Margaret Wilson, Hon. Franklin Lane, Secretary of the United States Department of the Interior, Commissioner Louis Brownlow, officers of the Metropolitan police department and other departments of the District and Federal Government.

# WORK OF PHARMACY INSPECTOR.

Special attention is called to the report of the inspector of pharmacy, which is printed in detail on another page. The duties of the officer assigned to the position of inspector of pharmacy are considered of the utmost importance, particularly those covering that part of his work which has to do with the enforcement of the laws relating to the regulation of the sale and use of habit-forming drugs.

#### REGULATION OF FTREARM SALES.

In the work of crime prevention, nothing will help the police department more than the enactment by Congress of a law placing a further restriction on the sale of firearms and dangerous weapons. Many crimes result from persons purchasing revolvers and shooting others while still in a fit of passion. Recommendation is made that the commissioners propose the enactment of a law which will restrict further the sale of firearms.

The suggestion is made that a law which would make it necessary for every person to make written application to a dealer for a purchase of a firearm, and that delivery not be made for 10 days to 30 days, giving the police department time to inquire into the character of the prospective purchaser and giving time for the purchaser to lose his fit of passion if he wishes to obtain the revolver to harm anyone instead of for the protection of his home.

A recent picture of every person purchasing a firearm or other weapon should be furnished the police department, and legitimate

owners of revolvers would not be harmed if a step further in the law were taken and the name of every person owning a firearm in the District of Columbia were registered, along with the name and number of the weapon. Even such a law would be far less drastic than the Sullivan law which is operative in New York.

#### NEED FOR NEW HOUSE OF DETENTION.

The Board of Commissioners approved the major and superintendent's recommendation that new quarters in a larger and more sanitary building be secured for the house of detention used for juvenile prisoners. The old building on Eighteenth Street below New York Avenue NW., which has been leased for more than 16 years by the department, is entirely unfit as a place to detain children. At the close of the fiscal year the department has exceedingly good prospects of leasing a fine, centrally located building to be remodeled and used for a new house of detention. The principal difficulty has been to obtain a suitable building for a rental which the department is able to pay under the current appropriation.

#### PHYSICAL FITNESS.

A inovement was begun in the department during the year to awaken the men to an interest in their physical well-being and in the benefits of proper exercises. A policeman's work gives him much exercise in the legs but little in the body muscles, resulting in superfluous flesh, which has made the fat policeman the butt of cartoonists for many years. Police physicians in all sections of the country are impressing the men with the fact that to keep well means that they must keep themselves physically fit and free of superfluous fat. A system of physical exercises for policemen, for practice at home or anywhere in his leisure moments, has been devised. At the end of the fiscal year plans were being considered for an annual athletic carnival to be held in the early fall. The interest of the men in games and running races was evidenced by the large number of men who volunteered to take part.

## CHANGE IN UNIFORM.

One of the changes made during the year which has meant much for the comfort and welfare of the men was the adoption of the modern winter overcoat, such as is worn by the uniformed forces in the police departments of New York, Philadelphia, and other large cities. The old type winter overcoat was of the belted pattern type with heavy skirts, which gave little protection in cold weather and which has no provisions for a side revolver pocket. The new pattern overcoat is loose, of military cut, and has side pockets for a revolver. It is altogether more comfortable and gives the men better protection in cold weather than the type of coat formerly used for many years in this department. The new overcoat is worn without the old-time belt, which was often caught hold of by ruffians and the policeman put to a disadvantage. The new style of slit side pocket also gives the patrolman a chance for instant withdrawal of his revolver without the necessity of losing time in lifting a heavy skirt and reaching to his hip pocket, which was necessary with the old style coat.

# MEN GET NEW SHIELDS.

New shields were provided for members of the force during the year. Careful study was given to the design, because it was the desire of all to retain both the general appearance, size, and shape of the old badge, which has been the insignia of office for Washington policemen for more than half a century, and at the same time to provide a more modern shield, with distinct, cut-out numbers and city designation of "D. C." under the words "Metropolitan police."

## COOPERATION WITH OTHER CITIES.

The Metropolitan police department during the last fiscal year did perhaps more work in cooperation with, and in the interest of, other departments than ever before. The members of the department were particularly successful in making arrests of criminals for out-oftown jurisdictions, 161 such arrests having been made. One hundred and nineteen persons were arrested in outside police jurisdictions for the Washington department.

To those who are interested in the welfare of the police department and of the men, attention is invited to the estimates in details on another page. Among the most important is the explanation of the need for a central down town police station, for the reduction of the period in which a man may earn the salary of a third-class private from eight to five years, provision for increase in the number of lieutenants and sergeants, and for increase of pay of a number of employees who have small salaries but important duties.

Attention is also called to the detailed crime statistics following this text, especially the tables showing the work of members of the detective bureau, classification of crimes, and the reports of the various precincts.

#### CREDIT TO MEN.

In all that has been accomplished during the past fiscal year, credit and honor should go to each and every man in the department who has striven to give the best that is in him in performing any duty assigned, to the men who protected the good name of the department by taking care of themselves and have kept their records clear, and to the men who have the intelligence to know that it is team work which counts more than individual efforts. Without knowing it, perhaps, the majority of men on the Metropolitan police force of the District of Columbia have bettered their own records and helped the department by following out the motto, "He profits most who serves best."

#### ESTIMATES FOR FISCAL YEAR 1918.

Major and superintendent.	\$4,000,00
Assistant superintendent, with rank of inspector	2, 500, 00
3 inspectors, at \$2,000 each	6,000.00
11 captains, at \$2,000 each	22,000.00
Chief clerk, who shall also be property clerk.	2, 500.00

In 1895 the salary of the chief an property clerk was increased from \$1,800 to \$2,000 per annum. The property clerk during this year receipted and cared for 2,354 lots of property at an estimated value of \$26,037.10. During the fiscal year just ended 3,927 lots of property

were delivered to him, the estimated value of the same being \$311,370.66. When the responsibility that attaches to this office is considered, a proper encouragement for painstaking en 'eavor prompts the proposal for an increase in his pay of at least \$500 per annum. Ite is bonded to the commissioners, and must stand between the public and the police department in the disposal of all lost, stolen, and abandoned property coming into the possession of the department, he being held strictly accountable therefor by the commissioners. In addition to his duties as property clerk he is charged under the law with the general supervision of the clerical work of the department, keep and issue all supplies, keep all records, prepare pay rolls, and the quarterly and annual reports. He is further charged with the custody of all badges, batons, revolvers, and equipment carried on the headquarters returns, as well as the stationery and supplies necessary for the current use of the department. He was appointed Aug. 23, 1893.

\$3,600,00

2 clerks, stenographers, at \$1,800 each. There is a constantly increasing need of high-class stenographers who are able to report trial board and retiring board proceedings, to take statements made by prisoners who have committed serious crimes, to take dying declarations, statements before the United States district attorney, and inquests. The volume of work at police headquarters at the present time is not only entirely too great to be handled by the number of stenographers now employed, but it is impossible to get the type of stenographers with reporting ability for the salaries now paid. If two clerks at \$1.800 each per annum could be obtained, all of the stenographic reporting could be handled with greater accuracy and dispatch than is now possible. If these clerks can not be provided, it is suggested that an appropriation be asked so that the services of stenographic reporters may be obtained at any time they are needed.

Clerk and stenographer. Clerk, who shall be assistant property clerk..... 3 clerks, at \$1,000 each.....

1,500,00 1, 200, 00 3,000.00 2,880.00

4 surgeons of the police and fire departments, at \$720 each..... Additional compensation for 30 privates detailed for special service in the detection and prevention of crime, or so much thereof as may be necessary.....

14,400.00

In the matter of additional compensation for privates detailed for special service in the prevention and detection of crime it might be state i that the present provision is for 24 men to be assigned from the regular force to this expert work. Three members of this assignment, however, can not take part in the regular work of the detective bureau because of the detail of one man with this extra compensation to the White House, and the detail of two members to the office of the United States attorney, where their services are required in investigating cases to be submitted to the grand juries and the courts. It is desirable that the pharmacy inspector, as well as the hack inspector, be made a member of the detective bureau, and report directly to the inspector of detectives, and the extra compensation should be given to him because his work is considered as belonging to the detective bureau and because he is require! to work long and irregular hours during both the day and night in the performance of duty. The special force detailed to the detective bureau is further reduced in cases of illness and when officers take leaves of absence to which they are entitled, so that it has been frequently necessary to detail a number of privates to assist the detectives who do not receive the additional compensation, although performing the same duties, and, therefore, the increase of six men in the number receiving additional compensation is recommende !.

Additional compensation for one inspector or captain, detailed for special service in the detection an prevention of crime .....

18 lieutenants, one of whom may be harbor master, at \$1,600 each..... At this time there is a lieutenant at each of 10 precincts, one at the substation in Tenley, I assigned to the detective bureau at night, and I in charge of the harbor precinct, which leaves I precinct, the sev-

480,00 28, 800, 00 enth, in charge of an acting lieutenant during the night. The appointment of an additional heutenant at this precinct is considered a necessity.

Three sergeants are now detailed as inspectors to supervise the working of the force in the various precincts. For want of higher authority these sergeants are not officially regarded as they should be by members of the force, and it is therefore recommended that 3 more places as lieutenants be fixed.

The officer now in charge of the detail to enforce the antivice and antigambling laws has the rank of sergeant, and in order that he may have proper authority over those assigned to duty with him it is recommended that provision be made for his promotion to a lieutenancy. 54 sergeants, one of whom may be detailed for duty in the harbor patrol,

514 privates of class 3, at \$1,200 per annum.....

The above number of privates of class 3 must be provided for under the operation of existing law.

85 privates of class 2, at \$1,080 per annum.

Under the automatic system of promotion the above number of

In order to keep up the present complement of the force, 41 privates should be provided in this class, but recommendation is made for an increase of 121.

The District of Columbia is, perhaps, the only community in the United States in which the police force has been reduced as the city has increased in population. The police force to-day, which includes 715 men, exclusive of the street railroad crossings officers, is smaller than it was 11 years ago when 718 men were assigned to the same duty, and 20 less than it was in 1912, when the number was 735.

In order to handle properly the many police problems in the 11 precincts and the harbor precinct, and to provide a detail of 20 men for the new precinct which is to be established between the ninth and tenth precincts, an increase of 121 privates in the force is considered necessary, the increase to be distributed as follows:

First precinct.	6
Second precinct	7
Third precinct.	5
Fourth precinct	12
Fifth precinct	12
Sixth precinct	7
Seventh precinct	8
Eighth precinct	10
Ninth precinct	10
Tenth precinct	10
Eleventh precinct	6
Harbor precinct	2
New precinct	20
Detective bureau.	6

This increase of men will help to make it possible to give better police protection in all precincts and will also help to meet the problem of handling the great amount of increased vehicular traffic, due to the increased ownership of motor vehicles during the past 10 years. In no instance has an increase been asked in any precinc of more than 12 men. This is small considering the fact that the duty of the

\$75,600.00

616, 800.00

91, 800, 00

145, 800.00

121

140, 000. 00

men will cover the entire 24 hours, which will mean that the number of men on the street in any one of the 8-hour tours will not be increased by more than 4 men. The beats in many of the precincts are entirely too large and can not be covered properly by one man as is now necessary with the inadequate force. Persons look for better police protection and better police service in the National Capital than in any other city, and there are many special problems, such as the protection of increasing number of residences and apartment houses, of the embassies, and the thorough patrol in the vicinity of public buildings, which makes it necessary for the metropolitan police to give much service which is not demanded elsewhere.

The following amendment to existing law is recommended:

All original appointments of privates shall be made to class 1, and promotions shall be made from class 1 to class 2 in order of appointment to the force after 3 years' service as privates of class 1, and from class 2 to class 3 after 2 years' service as privates of class 2, in all cases where the conduct and intelligent attention to duty of any private shall justify such promotion.

Amount required to pay salaries of privates of class 2 who will be promoted to class 3 and privates of class 1 who will be promoted to class 2 during the fiscal year 1918.

6 telephone operators, at \$900 each.

The operations of these men are such as to require uninterrupted attention to the telephones, public and police, and keeping a clerical record in detail of all that transpires, and, in my judgment, \$900 per approximately the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the countr

annum would be a just pay for them.

16 janitors, at \$600 each...

For a long while there has been felt the need of 2 more laborers (janitors, as they are called). At the present time, restricted as we are to 1 janitor at each precinct, it is impossible to keep the increasing amount of equipment used in traffic work, that used in roping Pennsylvania Avenue on occasions of large parades, and that at head-quarters, in proper shape. These men would also be required to assist the janitors of the various station houses whenever there was special work to be done, and if provision was made for them the department will be greatly benefited.

1 clerk.
1 messenger
Inspector mounted on horse or motor vehicle.
See note below.

55 captains, lieutenants, sergeants, and privates mounted on horse or motor vehicle, at \$330 each.....

The increase in the cost of maintaining motorcycles and the keeping of horses has convinced many of the men on the force that the amount of compensation allowed is inadequate. The men who were mounted on motorcycles July 1, 1915, still have their machines in fairly good working order, but the depreciation is very great after the first year. While the motorcycle men have not, up to the present time, made as much complaint of the insufficient allowance as have the horse-mounted men, yet they will as soon as the time comes within the next year when they will be obliged to procure new machines of the standard quality necessary to meet the requirements for police traffic work.

Washington is one of the few cities of the country which does not provide horses and motorcycles for its men engaged in traffic work. At the present time the department owns only 3 machines, the largest amount of work which is being performed by men assigned to duty on motorcycles being done by the 15 privates, who receive the extra compensation of \$20 per month and who are required to purchase and maintain their own machines. Even in the first year's ownership the men have found the margin to be very close, and in some instances the damage to the machine and the maintenance cost combined have far exceeded the extra compensation allowed. Men who are mounted on horses find that not only is the forage increasing in cost, but it becomes harder and harder each year to secure horses which come up to the standard at prices which obtained several years ago. In some cities where horses are provided the cost of forage

\$1,778 66 5,400.00

9, 600, 00

700.00 600.00 330.00

18, 150, 00

An increase of \$10 per month is asked in the pay of each of the five matrons. This increase is consilered necessary in view of the constant increase in the cost of living and also as a fair compensation for these ent ployees of the department who to day have an increased amount of work to do for the reason that they possess police powers and must render police service when called upon.  2 police women, at \$100 each.  TRAFFIC BRANCH.  1 captain.  1 captain.  2 sergeants, at \$1.400 each.  The traffic problems in Washington are growing so rapidly that it is impossible for them to be handled either by the officers who are responsible for them to be handled either by the officers who are responsible for the prevention and detection of crime in the various precincts or to be taken on as extra duty by officers responsible for their work at police head quarters.  There should be in Washington a traffic captain of police, responsible to the major and superinter ent for the regulating of traffic in all sections of the city, and be should have detailed to him I lieutenant and 3 sergeants, whose tours of duty should be designated by the major and superintendent.  Washington, at the present time, is not able to organize a traffic squad similar to that do other cities, for the reason that the traffic men have not been brought together rule one head to work out uniform methods of solving the many and varied problems this subject presents, and to increase the efficiency of the force in this particular, the establishment of this branch of the service is earnestly recommended.  3 special agents, at a salary not to exceed \$6 per diem.  The police department finds itself greatly handicapped in working on cases of a certain kind, because the members of the small force of detectives and most of the experienced patrolmen are known to the criminals being watched. This is rarticularly true in regard to complaints relative to handbook making and other forms of gamblers, has been compelled to call upon the United States Department of Jus	and maintenance alone runs from \$28 to \$34 per month, far exceeding the amount allowed by the Washington department for maintenance where the men have to purchase their own mounts.  64 lieutenants, sergeants, and privates, mounted on bicycles, at \$50 per annum  24 drivers, at \$900 each.  An increase of \$5 per month is asked in the pay of the drivers employed by the department. The present salary is \$840, and will therefore be increased to \$900. The increase is considered necessary because of the increase in cost of living, together with the fact that the uniforms worn by these men have to meet a higher standard than	\$3, 200. 00 21, 600. 00
l captain	matrons. This increase is considered necessary in view of the constant increase in the cost of living and also as a fair compensation for these employees of the department who to day have an increased amount of work to do for the reason that they possess police powers and must render police service when called upon.	
l captain	מיטיא מיעד מיטיא מייע	
ble to the major and si perintem'ent for the regulating of traffic in all sections of the city, and he should have the authority to call upon the precinct officers to cooperate with him. This is the plan in operation in most of the large cities of the country, who have either a deputy commissioner, an inspector, or captain assigned to the work. To assist this captain in the si pervision of traffic throughout the 24 hours he should have detailed to him I lieutenant and 3 sergeants, whose tours of duty should be designated by the major and superintendent.  Washington, at the present time, is not able to organize a traffic squad similar to that of other cities, for the reason that the traffic men have not been brought together under one head to work out uniform methods of solving the many and varied problems this subject presents, and to increase the efficiency of the force in this particular, the establishment of this branch of the service is earnestly recommended.  3 special agents, at a salary not to exceed \$6 per diem	1 lieutenant. 3 sergeants, at \$1,400 each The traffic problems in Washington are growing so rapidly that it is impossible for them to be handled either by the officers who are responsible for the prevention and detection of crime in the various precincts or to be taken on as extra duty by officers responsible for their work at police headquarters.	1,600.00
the several departments of the General Government may be entitled to like information from time to time as is accorded police departments of various municipalities privileged to membership therein	ble to the major and si perinten'ent for the regulating of traffic in all sections of the city, and he shorld have the authority to call upon the precinct officers to cooperate with him. This is the plan in operation in most of the large cities of the country, who have either a deputy commissioner, an inspector, or captain assigned to the work. To assist this captain in the si pervision of traffic throughout the 24 hours he should have detailed to him I lieutenant and 3 sergeants, whose tours of duty should be designated by the major and superintendent.  Washington, at the present time, is not able to organize a traffic squad similar to that of other cities, for the reason that the traffic men have not been brought together under one head to work out uniform methods of solving the many and varied problems this subject presents, and to increase the efficiency of the force in this particular, the establishment of this branch of the service incarnestly recommended.  3 special agents, at a salary not to exceed \$6 per diem.  The police department finds itself greatly handicapped in working on cases of a certain kind, because the members of the small force of detectives and most of the experienced patrolmen are known to the criminals being watched. This is particularly true in regard to complaints relative to handbook making and other forms of gambling, illegal lievor selling, and alleged violations of the antivice law. In investigating handbook cases the department, being without men who have not been "incovered" or made known to the gamblers, has been compelled to call upon the United States Department of Justice, which has cooperated in investigating cases and assisted in the arrest of law violators.  To aid in the superior of the National Bureau of Criminal Identification.

#### MISCELLANEOUS.

Fuel..... 81.0 0.00 Repairs and improvements to police stations and grounds..... 7, 500, 00 In order to change the heating plans in some or the older station houses this slight increase is recommended. For miscellaneous and contingent expenses including purchase of new wazons, rewards for fugitives modern revolvers maintenance of card system, stationery, city directories, books of reference periodicals, telegraphing, telephoning, photographs, printing, binding, gas, ice, washing, meals for prisoners, furniture and repairs there o, beds and bed clothing, insignia of office purchase of horses, horse and vehicle for superintendent, bicycles, motorcycles, police equipments and repairs to same, harness, forage, repairs to vehicles, van. patrol wagons, motor patrol, and saddles, mounted equipments, purchase of car tickets, and expenses incurred in prevention and detection of crime, and other necessary expenses..... 40, 000, 00 Of this amount a sum not exceeding \$500 may be expended by the major and superintendent of police for prevention and detection of crime, under his certificate, approved by the commissioners, and every such certificate shall be deemed a sufficient voucher for the sum therein expressed to have been expended: Provided. That the War Department may, in its discretion, furnish the commissioners, for use of the police, upon requisition, such worn mounted equipment as may be required. In view of the advance in cost of practically all supplies used by this department, \$40,000 is thought to be a fair estimate of the amount to be required under this head. The words "purch se of car tickets" have been added to enable the department to provide transportation for messenger service, which will not amount to more than \$25 per Flags and halyards..... 100.00 10,000.00 Maintenance of motor vehicles, or so much thereof as may be necessary... During the fiscal year 1916, 7 motor patrol vehicles were maintained by this department (6 patrol wagons and 1 touring car) at a cost of \$5.831.78, or at the rate of \$833.11 per car. With the increase in the cost of supplies, the item of gasoline at this time being double the price formerly paid, considering the depreciation in the machines now in use and the fact that 10 motor-driven vehicles will be in the service of the department in the coming year (2 having already been delivered and 1 more to be purchased), it is believed that the expenditure for the maintenance of these vehicles will be at least \$10,000. 3, 250, 00 Additional motor vehicles..... \$1,250 of this amount is desired for the purchase of a new touring car to be used by the detective bureau. The car now in use was purchased in September, 1914, but due to mechanical defects is so rapidly deteriorating that it can not give good service for more than 8 or 12 months longer. The remaining \$2,000 of this amount it is recommended should be put into stock Ford touring cars, with regular bodies, to be assigned to the 3 precincts and 1 substation which up to the present time have not been given a patrol wagon. It is believed that the stock Ford touring car will give better service and be very much more economical than heavy patrol wagons which have been purchased heretofore in accordance with the appropriation acts. Progressive police departments in most cities are doing away with the patrol wagon because of the excessive first cost and maintenance. The light touring car is amply sufficient for all purposes, inasmuch as the average haul of prisoners in the patrol wagon at the present time is less than 2. In the great majority of runs only I prisoner is carried. For the erection of a station house on the site to be purchased in the suburban section of the District between the ninth and tenth pre-32,500.00 This appropriation is asked so that this section of Washington may

be provided with a station building similar to that in the fifth and tenth police precincts. The appropriation for these buildings was

\$30,000 and \$29,000, respectively. The increase in the cost of building materials in recent years suggests that a slight increase be allowed for the cost of the proposed new building.

For the reconstruction of cell corridors and the making, erecting, and placing therein modern locking devices in the seventh and ninth precinct station houses.

\$10,000.00

9,000,00

The department long since entered its protest against the maintenance of antiquated quarters for prisoners in the several station houses, and urgently renews its recommendation for the enlargement of the window spaces and the erection of up-to-date steel cages, together with the latest sewer connection and safety appliances, in the above stations. This has already been done in the first, third, fourth, sixth, and eighth precinct station houses, and Congress at its last session provided funds to be expended at the second precinct station house.

#### HOUSE OF DETENTION.

To enable the commissioners to provide transportation, including purchase and maintenance of necessary horses, wagons, and harness, and a suitable place for the reception, transportation, and detention of children under 17 years of age, and, in the discretion of the commissioners, of girls and women over 17 years of age, arrested by the police on charge of offense against any law in force in the District of Columbia, or held as witnesses, or held pending final investigation or examination, or otherwise, as follows:

2 clerks, at \$1,600 each. 2 drivers, at \$900 each. 1 hostler.	1, 800.00
6 guar's, at \$600 each	3, 600. 00 1, 800. 00
1 motor station wagon.  Miscellaneous expenses, including rent, fuel, gas, ice, laundry, meals,	
and other necessary expenses	
	14, 400. 00

At the present time there is used at the House of Detention a station wagon and a van. Three horses have to be maintained for the use of these vehicles. In the interest of economy it is proposed that horse-drawn wagons be done away with and that a low-priced motor car be purchased and that the number of drivers made necessary by the 2 horse-drawn vehicles be reduced from 4 to 2. The salary of each of the 4 drivers at the present time is \$600, and if a motor-drawn vehicle is installed the men should be given the same rating and salary as drivers of other motor-drawn vehicles in the department.

#### HARBOR PATROL.

2 engineers, at \$1,000 each	2,000,00
2 firemen, at \$600 each	1, 200, 00
l watchman	600.00
2 deck hands, at \$600 each	1, 200, 00
Fuel, construction, maintenance, repairs, and incidentals.	2,000,00
1 gasoline launch	2,000.00
	, , , , , , , , , , , , , , , , , , , ,

The great increase in the use of the river by canoeists and motor boats during the summer makes better protection of the water front and constant patrolling of the waters necessary. At the present time the principal part of the equipment of the harbor precinct is needed in the work along the commercial water front, while the upper river from the Aqueduct Bridge to the Little Falls, where 80 per cent of the people using the river congregate during the spring, summer, and fall months, the only patrol service which can be carried on is by the use of a small converted bateau, which does not meet the needs of the service. During the past summer 2 young men were drowned

because this converted bateau with its old engine was unable to reach them.

A new launch, similar to the modern one now used in patrolling the commercial water front, is badly needed, and this small appropriation is asked to provide for this construction and equipment.

#### CENTRAL STATION.

One of the greatest needs of the department at the present time is a large central station, which will be used not only as the home of the first precinct in the down-town section of the city, but also by the detective bureau, which now occupies 10 rooms in the District Building, and also would include quarters for a training school for recruits coming on the force. At least half of the space occupied by the record rooms and offices in the administrative branch of the police department could also be transferred to the new central station, provided a site could be secured which is in immediate proximity to the

District Building.

At the present time the police department utilizes 20 rooms in the District Building, having an area of 9,848.55 square feet. More space is badly needed, particularly for cell rooms, 2 small witness rooms, and a bedroom for the members of the detective bureau who are on extra duty at night. At the present time the lack of space makes it necessary to put the beds in one corner of the print shop, which is an undesirable arrangement, but is the only thing which can be done with the present quarters. It is considered of the utmost importance that the site for the central station should be immediately adjacent to the District Building, because the duties of the officers of the police department are such that they are required to make frequent visits to the various offices of the District government.

Should appropriation be made for a central station, provision should also be made for the sale of the present site on which the first precinct station stands, for the reason that this ground would no

longer be needed for police purposes.

The Metropolitan police department is now handicapped because it has not satisfactory quarters in which to train new appointees to the force, nor is there a room large enough to be used satisfactorily as a drill room and gymnasium in which the men can keep themselves physically fit.

The following is a list of rooms now occupied by the detective bureau, by police headquarters, and by the first precinct station, in which work is carried on which could be satisfactorily transferred to a new central station:

Besides the 17 rooms in the central station needed to accommodate the work now carried on in the District Building and 19 rooms in the first precinct needed for precinct purposes, the following should be provided for in the new central station: One room for chauffeurs, 1 room for patrol-service men, 4 witness rooms, 1 drill hall and gym-

nasium, 1 locker room, 2 training-school rooms, 3 small rooms for matron and fe rale prisoners, 2 rooms for offices of police surgeons and for examination of applicants and members of the force, making a total of 51 rooms.

It is believed that a building of this size should be located on a site not less than 7,500 feet in area and not exceeding 10,000 square feet.

It is estimated that for a building containing 51 rooms \$225,000 should be requested, and that for the purchase of a site of not less than 7,500 square feet nor more than 10,000 square feet \$40,000 should be requested.

Contingent expenses.

#### DEATHS.

1. Robert H. Boardman, detective bureau, appointed December 8, 1886; died July 26, 1915; cause of death, chronic Bright's disease.

2. Charles C. Pearce, seventh precinct, appointed September 1, 1890; died January 27, 1916; cause of death, suicide by shooting.

2. William G. Davis, fourth precinct, appointed June 14, 1902;

died April 17, 1916; cause of death, suicide by shooting.

4. Thaddeus Davis, second precinct, appointed September 10, 1902; died May 6, 1916; cause of death, organic disease of the heart.

#### ROBERT H. BOARDMAN.

Washington, July 27, 1915.

GENERAL ORDERS, No. 48.

The major and superintendent announces with sorrow and regret to the members of the force and employees of the department the sudden death of Inspector R H. Boardman, assistant superintendent of this department, which occurred at his late residence, 1315 R Street NW., Monday, July 26, 1915, at 4 45 o'clock a m. In the death of Inspector Robert H. Boardman the Metropolitan police depart-

ment loses one of its most efficient, conscientious, and loyal workers, and the city of

Washington one of its best citizens.

During his 24 years' service in the detective office of the police department, Inspector Boardman has not only become the most popular official among the police of Washington, but his success in apprehending criminals wanted elsewhere and his effective cooperation with the police departments of other cities have made him one of the best known chiefs of detectives in the United States.

Inspector Boardman has literally given his life to the service. He has worked early and late, and has refused to absent himself from office even for a day. At intervals of 10 days to two weeks since I have come into office I have tried to persuade him to cease working nights, but he has persisted in coming back to the office

after the close of the ordinary day's work.

As recently as Friday last I urged him to take a vacation and get a rest. I ut he raid that he felt well and would not take an outing this year, other than a few days' fishing late in the fall Ffforts on my part to persuade him that his greatest duty to the department, as well as to himself and family. was to care for his health and conserve his strength were unavailing, and yesterday I discussed further with Mr. Hart, his clerk, some other means by which we could urge him to go off and enjoy a

As one who has lived in Washington practically the whole of my life, I have been deeply appreciative of the excellent service which the inspector and assistant super-

intendent of the department has given the community.

As a coworker with Inspector Boardman during the past four months I have grown to love him and to value his service more than I did before coming into the depart-

He has given to this city the very finest type of police officer—kindly, courteous, efficient, and loval.

He will be greatly missed by all of us.

Out of respect to his memory a detail of 2 lieutenants, 2 sergeants, and 48 privates will report to Capt. C. E. E Flather for duty as escort for the remains at the above number on Wednesday, July 28, 1915, at 2.15 o'clock p. m.

> RAYMOND W. PULLMAN, Major and Superintendent.

#### PENSIONED.

- 1. Enoch N. Burgess, eleventh precinct. Pensioned December 1, 1915.
- 2. Joseph A. Hall, seventh precinct. Pensioned December 16, 1915.
  - 3. Silas D. Lewis, harbor precinct. Pensioned October 1, 1915.
  - 4. Lawrence J. Quill, tenth precinct. Pensioned January 1, 1916. 5. Frederick Schultze, ninth precinct. Pensioned December 16,
- 1915. 6. Frank M. Tompkins, fourth precinct. Pensioned June 1, 1916.

#### RESIGNATIONS.

- 1. William G. Curd, second precinct. Resigned November 7, 1915.
- Willie S. Fones, third precinct. Resigned January 24, 1916.
   James E. Gordon, third precinct. Resigned December 10, 1915.
- 4. William W. Wetherpee, sixth precinct. Resigned December 16, 1915.

#### DISMISSAUS.

1. Clauddis L. Burton, second precinct. Removed March 29, 1916, for neglect of duty and conduct prejudicial to reputation, good order, and discipline of force.

2. Richard M. Canady, seventh precinct. Removed August 15, 1915, for conduct prejudicial to reputation, good order, and discipline

of force.

- 3. Athol H. Ellis, second precinct. Removed April 15, 1916, for conduct prejudicial to the reputation, good order, and discipline of
- 4. Louis C. Freewalt, fourth precinct. Removed March 15, 1916, for failing to promptly serve a warrant, and conduct unbecoming an

#### HEALTH RECORDS OF MEN.

During the fiscal year 1916 the total amount of time lost by members of the force because of sickness, and in a few cases because of injury, was 8,511 days, as against 9,155 days in 1915. The value of time lost in salaries to the department was \$27,932.43, as against \$29,632.26 during the previous year. The total salaries paid to members of the force for the fiscal year 1916 was \$897,750.72, which shows that the amount of time lost by sickness was 3.10 per cent of the total amount appropriated for salaries. The percentage of salaries tost through sickness and injuries during the previous year was 3.42 per cent.

During the year there were 58 men who exceeded 30 days sick leave, against 79 exceeding 30 days in 1915. Sixty-five men lost from 21 to 30 days, against 52 in 1915. One hundred and forty-one men lost from 11 to 20 days, against 112 in 1915. Two hundred and nineteen men lost from 1 to 10 days, against 236 in 1915.

A perfect health record, with not a single day lost, is credited to 232 members of the force, against 236 who had a similar record for 1915.

It is hoped by all that the work of the board of surgeons in instructing the men in the care of their health during the coming year and increased attention to their own physical welfare on the part of members of the force will cut down the excessive loss of time and money caused by the many cases of preventable diseases.

Time lost on account of illness or injuries from July 1, 1915, to June 30, 1916.

Since the operation of the Harrison narcotic law, approved December 17, 1914, all of our prosecutions for illegitimate use and traffic in narcotic drugs have been drawn

under its provisions with very good results.

We were gradually cutting down the nefarious traffic and use of these drugs, but were dealt a hard blow in the decision of the United States Supreme (ourt, June 5, 1916, sustaining the action of the United States court for the western district of Pennsylvania in quashing an indictment under section 8 of this law against Jin Fluey Moy. on the ground that the statute did not apply to the case.

This decision practically nullifies the language of section 8 of the law, which declares

it unlawful for any person not authorized to have narcotic drugs in his possession.

The Supreme (ourt considered that the act was a registration and revenue act, not a police measure, and that the general words "any person" did not mean any person in the United States, but must be confined to the class of persons with whom the act previously had been purporting to deal; in other words, a person who does not import, dispense, manufacture, deal in, produce, or distribute the drugs can not be convicted of violating the Harrison law merely because he has possession of some of the drugs.

The real effectiveness of the law is much restricted by this decision.

The far-reaching language of section 8 of the law, with which this decision deals, has aided materially in the restraining of illicit traffic and use of narcotic drugs throughout the country, and much of the good work accomplished since the enactment of the law will go for naught unless some correcting measures are enacted in the near future.

Twenty of the prosecutions under the Harrison law in this jurisdiction were drawn under section 8 and will necessarily be quashed by the rendering of this decision.

The effect of the decision is already clearly visible. The physicians are bolder in prescribing drugs for addicts; the drug peddler, invariably an addict, is getting his supplies under the guise of seeking treatment for the cure of drug addiction—sometimes from two or three physicians at the same time and frequently under an assumed

Recently we arrested a man and his wife, both drug addicts, who were getting large supplies of morphine from several physicians located in different jurisdictions. Investigation disclosed the fact that they were traveling from one jurisdiction to another, undoubtedly making their living by trafficing in narcotic drugs. The wife was convicted on two counts of dispensing morphine. At the same time the husband had a quantity of morphine in his possession, and all circumstances pointed to him as the master mind, carefully guarding himself against the clutches of the law. But having no sales of the drug against him we were compelled to release him, which action was certainly a travesty of justice.

It is alarming to note the terrible evils of the drug habit, and almost impossible to estimate its enormous proportions, as it is fostered in secrecy, and its responsibility for a large portion of the crimes against the community. The illegal traffic and use of narcotic drugs can not be eradicated by the mere regulation or prevention of open sales. The very essence of it is secrecy and it is only by arbitrary measures that we

may hope to cope with the situation.

The provisions of our local pharmacy law are not adequate for the suppression of this dangerous traffic, and the United States Supreme Court held that the Harrison law

was a registration and taxing act and not a police measure.

In view of these facts. I recommend that we appeal to Congress for a local law that will cover the shortcomings of the pharmacy and Harrison laws, making any violation of the same an indictable offense, with a maximum penalty \$2,000 fine or five years, or both, in the discretion of the court, with the following provisions transcribed in

legal form:
That it shall be unlawful for any person, by himself or by his servant or agent or as the servant or agent of any other person or of any firm or corporation, to sell, furnish, dispense, give away, distribute, or have possession or control of any coca leaves, opium, Indian hemp, loco weed, canabis indica, chloral hydrate, any compound, salts, derivative, or preparation containing any of the same or any synthetic chemical used as a substitute or a preparation containing the same, hypodermic syringes or needles, opium pipe or paraphernalia for preparing for use of smoking opium. Such possession or control shall be sufficient evidence for conviction, after which all exhibits used as

evidence shall be destroyed by the property clerk of the police department.

That the possession or control of any of the prohibitive drugs or articles shall not apply to druggists, physicians, dentists, or veterinarians in pursuit of their lawful professions, nor to patients or their attending nurses under the immediate treatment of the physician prescribing the drug, nor to certain Government employees, exempted

under the Harrison law, in pursuit of their lawful business.

That any of the prohibited drugs or articles may be dispersed by druggists to druggist, physicians, dentists, veterinarians, or Government agents who are lawfully engaged in making purchases for Government institutions on authorized order forms, when in pursuit of their lawful business, or on a prescription, when written in good

faith by a physician, veterinarian, or dentist.

That no physician shall self, dispense, give away, or prescribe any of the prohibited drugs for any purpose whatsoever except for the case of drug addition, injury, disease or deformity, and in the treatment and cure of drug addition each dose of narcotic drugs shall be administered by the attending physician or a competent attending nurse; in no case shall any narcotic drug or drugs be placed in the passession or control of an addict, nor in the treatment of an addict shall the amount prescribed or administered exceed 5 grains for the first 24 hours; each succeeding day the amount shall be diminished, and in no case shall the period for giving narcotic drags exceed 10 days.

That any physician attempting to treat or cure drig addition shall report in writing over his signature to the major and superintendent of police, within 24 hours after the first treatment, the true name and address of the person under treatment, the name of the drug to which he is addicted, the kind and quantity of narcetic drugs used in his treatment, and at the termination of the period for giving narcetic drugs he shall report in the same manner the condition of the patient and the kind and amount of

narcotic drugs used each 24 hours during the treatment.

That every physician shall keep a complete and accurate record of all prehilited drugs used, giving the date, name, and address of every person he treats, the kind and amount of drug used, and shall also ascertain from a person applying for treatment for drug addiction if he is receiving or has had treatment for the same purpose from any other physician. If he finds that he is under the care of another physician, he shall refrain from giving any of the prohibited drugs.

The record of physicians' transactions in narcotic drugs and the treatment of drug

addicts shall be open to inspection by a duly authorized officer of the law.

That no person shall seek to procure or receive treatment for drug addiction while getting treatment for the same from any other source.

That no person shall make any fraudulent representation so as to evade or deleat

the restrictions herein imposed.

That any physician, dentist, druggist, or veterinarian convicted of violating any of the provisions of this act may be debarred from further practice by the revoking of his license.

We have experienced much trouble with persons who claim to be chiropodists, chiropractors, mechano therapists, osteopaths, and other similar occupations which are not regulated by law nor have standing in the medical profession. It is true that they do not protess to prescribe medicine, but they do practice many branches of the medical science, and we have convicted several of them for overstepping their bounds by slipping in a little medicine and surgery occasionally.

They establish themselves on prominent avenues and streets, in well-appointed offices, put up alluring signs with "Doctor" preceding their names, all of which inspires confidence, too often misplaced, on the part of the sufferer applying for treatment, as it is possible for any person, without a knowledge of medicine or any of its

branches, to pursue the same course if he is able to fit up an office.

Only a short time ago a man who claimed to be an osteopath was treating a lady suffering from paralysis. After several months' treatment she developed pneumonia. He continued the same treatment, according to his statement before the coroner's jury. She died in about three days under the osteopathic treatment. The osteopath called on a physician, who treated her several months previous to this time, for a death certificate but was refused. The case was referred to the coroner, who ordered an inquest. The osteopath in giving testimony before the jury displayed little knowledge of what his well-appointed office and sign indicated.

It is apparent that this woman was deprived of professional attention at a critical time, when it might have saved her life. The husband of the deceased was much surprised when he discovered that the osteopath was not a member of the medical

profession.

All of the within-mentioned practices are good in certain cases, when applied

scientifically.

Every person before attempting to practice should be required to pass an examination measuring up to an established standard by the board of medical supervisors of the District of Columbia. As our present law does not regulate this, I recommend that the law regulating the practice of medicine be amended, making it unlawful for any person to attempt to or treat another person in any of the branches of medicine or surgery or in any disease, injury, or deformity, for a fee, gift, or consideration of any

kind, or publicly professing so to do, without a license from the board of medical supervisors of the District of Columbia.

I renew my recommendation of previous years that suitable books be provided for the recording of poison sales, as the records of such sales in many instances are very

poorly kept, due to the absence of a uniform poison register.

I also recommend an amendment to the pharmacy law requiring that each record of a poison sale be numbered consecutively, that the label on container of poison sold bear record number of sale, and that each purchaser of poison, except on physicians' prescriptions, of a character and quantity that would cause death if taken internally, shall be personally well known to the dispenser, and shall be accompanied by an adult, who shall also state what purpose the poison is to be used for, and who shall also be well known to the purchaser and dispenser.

Since December 23, 1915. Private Harry Evans has ably assisted me in my work,

his attention to duty and intelligent activity being commendable.

Respectfully submitted.

R. A. SANDERS,

Private, Metropolitan Police, Inspector of Pharmacy, etc.

Maj. R. W. Pullman, Superintendent of Police.

## REPORT OF BOARD OF POLICE AND FIRE SURGEONS.

Washington, D. C., July 1, 1916.

Sir: The board of police and fire surgeons submits the following summary of work in the police department in three of the four surgical districts for the fiscal year ended June 30, 1916. No report for the fourth district is at this time available, as the surgeon in that district has been called out with the National Guard of the District of Columbia for service on the Mexican border. His report will be submitted as soon as received.

Admitted to sick report (cards issued). Under treatment, but not on sick report.	1. (	061

S. L. M. C.	044	1133

Identifications made:	1916.	1915.
By the finger-print method	175	130
By the Bertillon method	87	48
Photographs with Bertillon measurements and finger prints forwarded to		
the National Bureau of Criminal Identification	228	383
Identifications made by the national bureau of photographs forwarded.	29	15
Photographs with Bertillon measurements forwarded to other jurisdic-		
tions	676	453
Identifications made by other jurisdiction of photographs forwarded	30	14
Records of criminals furnished other jurisdiction	49	33
Records of criminals furnished courts in this jurisdiction	354	383

Of the unknown dead, one was identified in New York City through our photograph,

and body claimed by relatives.

It is believed that the identification of unknown dead might be made more probable and the efficiency of the department in other respects increased if a uniform method of describing a person be adopted. With reference to this I would suggest that the members of the department be provided with pads (pocket size) having a printed form to be filled out when a person is reported missing or wanted. If this is not found practicable, a card with the necessary data printed thereon could be furnished.

practicable, a card with the necessary data printed thereon could be furnished.

In addition to photographing scenes of crime, a survey was made in each case, which proved of great value to the prosecution. In one instance, where the defendant was indicted for murder in the first degree and there were no eyewitnesses, the measurements and photographs taken disproved the statement made by the defendant on the

witness stand, and he was found guilty as indicted.

On numerous occasions during the year the department received requests from the district attorney's office for records of prisoners charged with serious crimes, such as housebreaking, grand larceny, depredation, etc., where this bureau had not received any finger prints from the station making the arrest and therefore was unable to positively connect the prisoner with any previous record he may have had. It is believed that finger prints could properly be taken in all cases involving moral turpitude, and I would suggest that an order be issued to the precincts to that effect; also that the instructions previously furnished as to how prints should be taken be strictly complied with.

Fred Sandberg, Private, Class 3.

Maj. R. W. Pullman, Superintendent of Police.

#### REPORT OF CASUALTIES AND ACCIDENTS.

WASHINGTON, D. C., July 1, 1916.

THEODORE DELAVIGNE,
Private, Metropolitan Police.

Maj. RAYMOND W. PULLMAN, Superintendent Metropolitan Police.

#### REPORTS OF CHILD-LABOR INSPECTORS.

WASHINGTON, D. C., July 1, 1916.

Sir: I have the honor to submit herewith report as private detailed as inspector of child labor for the second district, which embraces all of that territory east of Georgia Avenue and Seventh Street west, for the fiscal year ended June 30, 1916.

I have visited all places of business in the second district where child labor is employed, serving notices and explaining the law to the employers. I have frequently at irregular intervals visited all such places by day and night with a view to prosecu-

tion if any were found violating the provisions of the law.

I have been constantly in touch with the authorized deputy of the superintendent of public schools, who makes a record of the name, residence, and place of employment of each person applying for a permit for a child to work. After obtaining the above information I would visit the location named and all other places where children are likely to be employed, and I have been able to keep in touch with all places where children under 16 years of age have been employed during the past year.

The records show a total of 304 places of business employing 358 children under the

age of 16 years to June 30, 1916.

During the fiscal year ended June 30, 1916, 46 places of business discontinued the

employment of child labor.

There were 79 special permits issued by the Commissioners of the District of Columbia for children to engage in theatrical performances.

Permits and badges to the number of 251 have been issued to white boys under the age of 16 years as newsboys and street venders, and 127 permits and badges have been issued to colored boys for the same period, making a total of 378.

Age and schooling certificates have been issued to the number of 505 to white chil-

dren and 57 to colored children, making a total of 562.

Special permits to the number of 101 have been issued by the judge of the juvenile court. Hon, J. Wilmer Latimer, for minors between the ages of 12 and 14 years, as provided for in section 1 of an "Act to regulate the employment of child labor," approved May 23, 1908.

I have warned 68 small boys found engaged in the street trades, explaining the law to them and their parents and soliciting the cooperation of their parents in regulating

child labor.

Fifteen complaints have been examined, investigated, and adjusted.

There were 668 cases investigated and adjusted for the authorized deputy of the superintendent of public schools.

During the past year I have prosecuted 83 violations of the law, as follows:

Charge.	Sentence sus- pended.	Training		Unoffi- cial pro- bation.	Total number of cases.	Total amount paid.
Violations of the child-labor law by employing minors under the age of 16 years without permits. Violations of the child-labor law by minors under the age of 16 years engaging in street trade without permits.	4		14	60	18	\$95
street trade without permits				62	62

Total	17

In conclusion, I recommend the following amendment to section 15 of the "Act to regulate child labor in the District of Columbia," approved May 28, 1908:
In section 15 in lieu of "ten o'clock p. m." insert the words "eight thirty o'clock p. m.," which would make that section read as follows:
"Sec. 15. That no child to whom a permit and badge are issued as provided for in

the preceding sections shall sell or expose or offer for sale any newspapers, magazines, or periodicals, or goods, wares, or merchandise of any description whatever after eight thirty o'clock in the evening or before six o'clock in the morning."

I also recommend that an amendment be inserted in the police regulations which would prohibit any junk dealer from buying junk of any description from any child under the age of 17 years.

Respectfully submitted.

J. E. PETERSON. Private Class 3.

Maj. R. W. Pullman, Superintendent of Police.

Washington, D. C., July 1, 1916.

Sir: I submit the following report for the first district, embracing the territory west of Georgia Avenue and Seventh Street west, for the fiscal year ended June 30, 1916:

My records show a total of 329 places of business, employing 389 children under the

age of 16 years.

I have visited the places of business in my district where children are employed frequently during the day and night, serving notices and explaining the law to such employers as did not understand the same, and have also visited these places at irregular hours and unexpected intervals.

I have held conferences from time to time with the corporation counsel upon all

matters relating to the child-labor law.

I have kept in touch with the authorized deputy of the superintendent of schools, who has kept a record of the names, residences, and places of employment of each person applying for a permit to work. This information, together with my visits to places where children are likely to be employed and information secured through complaints, has enabled me to keep in touch with all children under 16 years of age who have been employed during this fiscal year.

I have made 521 investigations for the authorized deputy of the superintendent of

The records show that 37 special permits have been issued by the commissioners to enable children to engage in theatrical performances; 101 special permits have been issued by the judge of the juvenile court under the provisions of section 1 of the statute; 910 age and schooling certificates (414 male white, 56 male colored, and 91 female white and I female colored) have been issued by the authorized representative of the superintendent of schools to children between the ages of 14 and 16 years, and 378 permits and badges (251 white and 127 colored) have been issued by this officer to children between the ages of 10 and 16 years under the provisions of section 12 of the statute, making a total of 1,078 permits, certificates, and badges issued during

Seventeen complaints were received, investigated, and adjusted to the provisions

of the law.

I have prosecuted 136 cases (131 coming directly under the provisions of the child-labor law and 5 miscellaneous) as follows:

Selling on streets without badges	115
Employing without permit	16
Disorderly conduct	1
Petit larceny, shop!ifting	4
Number of convictions	
Number of children taken to parents.	71
Amount of fines imposed	\$110

I submit the following amendments to the child-labor law:

Section 11, line 3, after the word "sale" insert the words "or distribute." Section 12, line 3, after the word "sale" insert the words "or distribute."

These changes are recommended for the purpose of extending the law to cover those boys who are engaged by the newspapers for the purpose of distributing the papers to customers.

Section 15, line 4, strike out the word "ten" and insert in lieu thereof the words

"eight-thirty.

This change is recommended for the reason that in my opinion, as well as in the opinion of the persons connected with work among the juveniles of this city, it is considered inadvisable to permit boys under 16 years of age to be on the streets alone during the late hours of the evening with the excuse that they are engaged in a legitimate trade of selling newspapers, etc., while in reality they are using this excuse to cover attempts to solicit money by means of begging.

It is also recommended that efforts be continued to secure the enactment of a penalty

for violation of sections 11 and 12 of the statute.

It is recommended that proper legislation be enacted or the p-lice regulations amended so as to provide that no child under the age of 16 years be permitted in any room or place of business in which is kept or operated any billiard table, bagatelle table, shuffleboard, jenny lind table, pool table, or any table upon which legitimate games are played.

It is also recommended that proper legislation be enacted or the police regulations amended so as to provide that no child under the age of 16 shall be permitted in any theater or other place of public amusement in which burlesque performances are

conducted.

CHARLES C. ESTES, Private. Class 3.

494

Maj. R. W. Pullman, Superintendent of Police.

## REPORT OF THE HACK INSPECTOR.

Washington, D. C., July 1, 1916.

Sir: I have the honor to submit herewith my report as hack inspector for the fiscal year ended June 30, 1916:

100 COUCO (CO (CO)	
Vehicles licensed during year:	
One-horse.	130
Two-norse.	7
Automobiles (for hire)	282
Sight-seeing automobiles	42
Jitney busses	30

Applications for driver's license—	
Investigated and approved during year	35
Investigated and disapproved during year.	8
Investigated and disapproved during year. Disapproved but issued by board during year.	6
Licenses revoked by commissioners during year	3
Licenses issued during year	13
Vehicle inspections	25
Hack-stand inspections	25
Wagon-stand inspections. 1, 09	95
Wagon-stand inspections. 1, 09 Complaints relative to hackmen received, investigated, and acted upon. 3	37
Articles of property recovered.	4
Value of property recovered	05
Vehicles condemned.	5
Jitney bus lines approved.	17
Jitney bus lines now in operation	2
Sight-seeing stands approved during year	33
Sight-seeing stands disapproved during year	7

The jitney busses, with the exception of two lines which run into Maryland, have failed and gone out of business.

The licensed hacking cars have increased in number from 141 to 282 during the year, due to increased demand, constant supervision, and frequent contact with the

drivers, the majority of whom are known personally to us.

During the year the one-horse vehicles decreased from 170 to 130, due to the inroads made by the automobiles, which indicates that horse-drawn cabs are fast giving way to motor-propelled vehicles. Except for the horse-drawn cabs on the stands at Fifteenth and I Streets, and at Dupont Circle, the cabs are old and secondhand vehicles,

which can not run much longer before being condemned.

The drivers of the so-called "night liners" in many instances are conniving with others in their efforts to defeat and evade the Kenyon law, four of whom are now others in their efforts to deteat and evade the kenyon law, four or whom are now awaiting trial for conspiracy, the case pending for over a year. I feel, however, that as soon as our new hacking regulations become law (which I believe to be something much to be desired) and are printed and distributed in pamphlet form to the police and drivers, so that each and all of them will know just what the law is and what is expected of them, that there will be less cause for complaint from this source.

During the year it became necessary for Private Maurice Collins (who is detailed

to assist me) and myself to make the following arrests:

,	Dismissed.	Personal bonds.	Nolle prossed.	Jail sentence.	Grand jury.	Pending.	Fined and paid.	Amount paid.	Total cases,
HACKING OFFENSES. Failing to wear badge. Loitering on street. Using unlicensed vehicles. Unlicensed drivers. Soliciting. No numbers on lamps. No rate cards in vehicles. No recepticle in vehicle. Over 5 feet from vehicle.	1 1	1 1 5 3					20 3 5 26 5 12 6 1	\$40 ,8 25 84 19 31 12 2 13	25 4 7 32 6 15 7 1
Total	3	17				- 5	83	234	108
MISCELLANEOUS OFFENSES.  No rear light on automobile. Colliding. Intoxication Disorderly Disorderly on street car. Motor running unattended. Failing to obey police. No garage license. No light on District of Columbia number. No operator's permit. Obstructing fire plug Röbbery. Vagrancy. Violating section 312 District of Columbia Code.	1	1		6 2	2	1	1 4 1 1 1 3 1 1	10 20 10 5 	1 7 7 1 1 1 1 1 2 1 1
Total	-			9		1	12	64	30

From the foregoing report (in comparison with the report for last year) it can be seen what the value to the department of an assistant, Private Maurice (ollins, has been; and I wish to commend him in the highest terms for his integrity and active cooperation.

While we have made comparatively few arrests, we have in the majority of instances warned them, and where they have not heeded the warning arrests have followed. The only way to make this work effective is constant supervision and contact with the drivers, and in consequence of our efforts. I feel that we have raised the morale of the drivers of public vehicles far above what it was and wish to commend the

drivers' license law in the highest terms as far as it goes.

On numerous occasions I have received complaints of tourists who have employed drivers of public vehicles to take them to a certain number or hotel, only to find that the driver, being himself a stranger, did not know how to get to the point as requested. As a result of this class of complaints, with the assistance of the major and superintendent of police and Mr. Syme. corporation counsel. I now have a new form of application which requires the applicant to be a resident of the District of Columbia and to be vouched for by three reputable citizens, which will prevent the recurrence of this form of complaint, as well as prevent a driver procuring a license under an assumed name. I would recommend, however, that Congress be requested to make the following amendments relating to public vehicles in the District of Columbia.

1. That Public Act No. 354. of January 29, 1913, be amended so as to make drivers' licenses begin July 1 and expire June 30 of each year, charging 10 cents per month for fractional parts of an unexpired fiscal year. As the law now stands, it is practically

impossible to know when they begin or expire.

2. To provide a penalty for anyone employing unlicensed drivers to drive public

vehicles.

3. To change the wording of the second paragraph of Public Act No. 354 to make

it read as follows; ...,

"In the District of Columbia no person other than the motorman in actual charge of a street car shall engage in driving or operating any passenger vehicle without a license."

As the law now stands a street railway company could operate a jitney buss line or other public vehicles without the drivers being licensed, and this paragraph is

capable of a construction as class legislation.

4. To amend paragraphs 12 and 13 of section 7 of the act of July 1, 1902, so as to require all livery stables and garages (where their vehicles stand in front of hotels, clubs, wharves, and other public places) to pay an additional \$6 or \$9 per year, according to the class of vehicle, and to be subject to all the hacking regulations and laws as now in force, or which may hereafter be enacted into law, provided that it does not conflict with any owner of livery stables or garages who are complying with paragraph 11 of this law as now in force. Under the present construction of the corporation counsel, all taxicab companies are operating without a license, and there is not a week passes that I do not have complaints pertaining to this class of vehicles which stand alongside of hacking vehicles having to pay \$6 or \$9 per annum, while these horse and automobile vehicles from the livery stables and garages have drivers over whom we have no control, being unlicensed vehicles.

5. That the first line of paragraph 11 of section 7 of the act of July 1, 1902, be amended

to read as follows:

"That proprietors, owners, or drivers of hacks, coaches, or omnibuses"-

As the law now stands, the drivers of vehicles, in some instances, who are not under the public utilities commission have been arrested for hacking without a license. We are unable, however, to hold the driver under the law as it now stands, and the owner, on claiming that the driver was hacking without his knowledge or consent, gets the case dismissed.

6. That the so-called guides of the District of Columbia be required to procure a license under a similar law as Public No. 354 of January 29, 1913, for the following

reasons:

There are thousands of tourists coming to our city every year, only to meet these irresponsible guides at the prominent points, who, having no license, charge what they please, take them to public vehicles which they will engage at a cut rate and then charge the tourist above the legal rate and pocket the difference.

At this time anyone can have a badge made and he is a guide, regardless of who or

what he is, there being no law in the District of Columbia applying to guides.

I feel that our visitors should be afforded every protection within our power to give them.

7. To amend the laws pertaining to public vehicles so as to provide that the assessor, or his agents, the back inspector or his assistants, shall inspect vehicles applying for

license, see that they are safe and sanitary and that they have proper lamps, etc.: and if they are approved, that the officer making the inspection shall affix on the inside a receptacle, to be furnished by the assessor and approved by the major and superintendent of police, in which the driver's identification card shall be at all times, so as to be in full view of the passengers: and that no license shall be issued to the owner of a vehicle until after such inspection.

8. To enact a law to protect the drivers of public vehicles from unscrupulous persons who engage their vehicles and then refuse to pay therefor. Although this seems to be in the nature of false pretenses, the court has ruled that the driver must obtain his redress through civil action, which, in the majority of cases, is impossible.

O. H. Coffin, Detective Sergeant.

Maj. R. W. Pullman.
Superintendent of Police.

## REPORT OF THE PAWN INSPECTOR.

Washington, D. C., July 1, 1916.

Sir: I have to submit my report of work performed by the pawn inspector's office

during the fiscal year 1915-16.

During the past year this office was still handicapped in its work through the elimination of the pawnbroker from its jurisdiction. The absence of the pawnshop has encouraged the small licensed dealer in secondhand property, pool-room proprietors, saloon keepers, owners of Greek cook shops, etc., to carry on a clandestine pawnbroking business. Convictions for such violations of the law are difficult to secure, because written acknowledgments of transactions are never given and competent witnesses are unwilling to testify in court.

A small amount of stolen property was recovered in a pawnshop located in contiguous territory (mostly through the courtesy of the broker who depends entirely upon

Washington patronage).

Biweekly trips to the Alexandria police department were made during the year by Private M. E. Horne in order to copy from the records of that department all articles taken in by Alexandria brokers and dealers. Considerable stolen property was located in this manner—some for other police departments. The greater part of recoveries, however, were made from the local dealers in secondhand property.

Table showing comparative monthly recoveries, 1914–15 and 1915–16.

Month.	Local dealers.		Alexandria (Heidenheimer).			End. Va. ning).	Located for other departments.		
	1914–15	1915–16	1914-15	1915–16	1914–15	1915-16	1914-15	1915–16	
July August September October November December January	679.00 1,213.25 698.00 869.00 1,087.50 763.00	570.80 547.00 1,109.00 818.50 1,488.00 464.00	216.70 90.00 15.00 100.00		\$60.00 125.00	157.00 45.00		\$1,300.00	
February March April May June	1,250.50	1,041.75 535.15 786.50 723.00 558.60	375.00 150.00 195.00 100.00 335.00	50.00 60.00	95.00 100.00	125.00 418.00 107.00 210.00	34.00		
Total	10,718.40	9,711.80	1,408.70	3,450.00	714.00	1,277.00	89.00	1,300.00	

Total amount recovered, 1914-15, \$12,841.10; 1915-16, \$14,548.80.

This table compares favorably with the average recoveries from dealers by other police departments. Philadelphia, for instance, with a population of 1,549,000 and over 100 pawnshops under police control, shows an annual recovery of about \$45,000 worth of stolen property through its pawn inspector's office.

The record system installed in your pawn inspector's office has no superior in any other police department: it has been commended for efficiency by every expert

investigator.

I wish to call your attention to my previous recommendations for legislation to be enacted in order to curb the ever increasing evil of promiscuous buying of second-hand personal property, especially junk and automobile accessories, by unscrupulous licensed dealers. A ready market for such articles has fostered depredations on private property and the rifling of automobiles, as shown by the records of this department.

There were 222 licensed dealers in secondhand property in this city at the end of the fiscal year 1914-15. This number has grown in the past fiscal year to 277, an in-

crease of 55 dealers.

Table showing relative increase in dealers required by law to report, during the past fiscal year.

Dealers in	Number of dealers, 1914–15.	Increase during 1915-16.	Total. 1915-16.	Percent- age of increase.

While business licenses are issued primarily for revenue of the city government, the necessity of authorized, proper control, and the limitation of certain kinds of business for the benefit of the commonwealth should not be overlooked or neglected. Therefore that part of my recommendations suggesting legislated authority to the commissioners to limit the number of "junk" licenses and to correspondingly increase the license fee (in order to avoid any loss of revenue to the District of Columbia) must seem reasonable. In fact, such course would meet with the approval of the better class of dealers and would eliminate the unscrupulous and undesirable kind.

In order to have dealers keep the proper record and make the required exact descriptive report, it is necessary to exercise constant and vigilant supervision. Convictions for violations can only be secured in aggravated cases, as the courts are inclined to be very lenient with dealers brought before them. Numerous daily visits of inspection, as well as of instruction, are made necessary by the fact that many violations are due to the ignorance of dealers, a large percentage of whom can not read nor write the English language. Other frequent visits to such places of business were made (often in company of the complainant) for the purpose of locating and identifying stolen property.

The duties performed by the pawn inspector's office are in the greater part in the nature of detective work, and I have frequently been called upon to act in the capacity of detective. In addition, my knowledge of the German and French languages has enabled me to be of service to the department as interpreter and translator.

Very respectfully,

GEORGE WECH, Pawn Inspector.

Maj. R. W. PULLMAN, Superintendent of Police.

# REPORT OF THE CHIEF ENGINEER OF THE FIRE DEPARTMENT.

Washington, July 1, 1916.

Gentlemen: I submit the following report of the transactions of the fire department during the fiscal year ended June 30, 1916:

During the year 734 bell alarms of fire were received, an increase of 49 over the preceding year. The local alarms received numbered 606, a decrease of 134 from the number received during the preceding year. Of the 1,340 alarms received, 130 were false, an increase of 34 when compared with the fiscal year 1915. The number of false alarms has increased within the past few years, notwithstanding the vigilance of the police department, the offer of rewards for convictions in such cases, and the severe punishment meted out in the police court for such offenses. No remedy has yet been suggested which has proven capable of preventing the evil. During the year four convictions were secured, and the guilty parties either fined or sentenced to imprisonment, the small number of convictions being due to the difficulty of obtaining evidence sufficient to establish responsibility for the offense.

During the year 21 fires of suspicious origin were made the subject of investigation by the fire department with the cooperation of the police force. Arrests were made in a few cases, but sufficient evi-

dence could not be secured to obtain conviction.

Fires of incendiary origin numbered 47, and in all cases where sufficient evidence was obtainable, arrests and prosecutions were brought about, one incendiary being sentenced to six years in the penitentiary

and one case being still pending.

The total estimated loss for the year was \$444,825, covered by an insurance of \$6,184,467. The loss for the preceding year was \$496 less than the loss for the fiscal year 1916. Twenty-four fires occurred where the loss was exceptionally large, 18 of them requiring the sounding of additional alarms. The loss these 24 fires alone occasioned amounted to \$302,624.

## FIRE PREVENTION.

The fire-prevention work under the supervision of the fire marshal has progressed most satisfactorily. The force available for this work is, however, limited; but it is hoped that in the near future this branch of the fire department will be provided with the force and means necessary to extend its activities, both by means of educational and inspection work.

#### DISCIPLINE.

During the year the discipline of the department was maintained at its usual high standard, but four dismissals from the force being necessary. Disciplinary measures of a minor nature numbered 43.

## PENSIONS.

During the year the following pensions were granted:

Mrs. Georgetta Savoy, widow of A. Savoy, granted \$40 per month,

to begin July 9, 1915.

Mrs. Bertha Young, widow of T. C. Young, granted \$35 per month, and each of her three children granted \$5 per month until they reach the age of 16 years, to begin December 29, 1915.

Mrs. Ida J. Offutt, widow of J. M. Offutt, granted \$35 per month, to

begin May 5, 1916.

Mrs. Annie L. Hopkins, widow of Capt. C. W. Hopkins, granted \$40 per month, and each of her two children granted \$5 per month until they reach the age of 16 years, to begin April 22, 1916.

## NEW APPARATUS.

During the year there were purchased and placed in service two two-passenger automobiles, one for use by the first battalion chief and one for use by the superintendent of machinery. A two-passenger automobile already in the department received a general overhauling, and is now in use by the fourth battalion chief. The deputy and battalion chiefs are now all provided with motor vehicles.

The department also received two two-wheel tractors, which were installed on engines numbered 3 and 9, and two motor-propelled combination chemical and hose wagons for service with the said engines. These chemical and hose wagons are equipped with booster

pumps.

A motor pumping engine, and a motor-propelled combination chemical and hose wagon, for which appropriation was made and order placed during the fiscal year ending June 30, 1915, were received, and will be placed in service in the new engine company (No. 28), quarters for which will shortly be completed.

#### HORSES.

During the year the fire department has purchased 28 horses; 38 have been condemned and transferred to other departments of the District service; and 1 was sold. The District veterinarian reports that of the 204 horses at present in the department, 175 are in good condition, 17 are in fair condition, and 12 are in bad condition and will be disposed of as soon as may be practicable.

#### BOARD OF FIRE SURGEONS.

A detailed statement of the work of the board of fire surgeons will be found in Appendix 3 of this report.

#### DEATHS.

On July 9, 1915, Driver E. J. Byrns died by his own hand in the quarters of No. 11 Engine Company. He was appointed a member of the fire department on October 2, 1897; was promoted to assistant driver on March 2, 1899, and was promoted to driver on July 1, 1902.

On April 21, 1916, the department lost Capt. C. W. Hopkins of No. 15 Engine Company. He was appointed a member of the fire department on June 1, 1892; was promoted to tillerman on July 1, 1895; and on January 1, 1898, was promoted to captain, which position he filled until the day of his death.

During their service in the fire department these men so conducted themselves as to merit the esteem and good will of all their

fellowmen, and their comrades in the service mourn their loss.

## PENSION LEGISLATION.

The efforts of the commissioners and the fire department have been continued in an exceedingly vigorous manner to secure the enactment of an adequate pension law. I feel that it can be safely said that the prospects of success during the present session of Congress are very bright, and I again express the hope that the passage of this law will be secured with the consequent relief of our present pensioners and the provision of a satisfactory standard of pensions with ample funds therefor.¹

#### SALARIES.

The salaries of the fire department's force are at present below the average salaries paid the firemen of other municipalities, and a provision for the proper compensation of the members of the department will be included in the estimates when forwarded to the commissioners.

In connection with this item I invite attention to the fact that while the wages of mechanics, laborers, and other classes of workmen have been increased from year to year to correspond with the increased cost of living, and the hours of labor and the general working conditions of such men, respectively, reduced and improved, the salaries of firemen in the city of Washington have remained practically the same for over 10 years, and the hours of duty continue excessive—firemen being required to remain on duty 21 hours each day with the exception of every fifth day.

The commissioners are urged to give favorable consideration to

the salary increases referred to.

### CONCLUSION.

In conclusion, I wish to express my appreciation for the efficient manner in which the officers and members of the fire department have performed their duties during the year. I also desire to thank the various departments of the District government for their cooperation with the fire department for the public welfare.

To the commissioners I express my sincere thanks for the hearty support which they have accorded me in my efforts to uphold the

efficiency and reputation of the fire department.

F. J. WAGNER, Chief Engineer.

The Commissioners of the District of Columbia.

¹ Pension legislation, as recommended and approved by the Commissioners of the District of Columbia, was enacted on Sept. 1, 1916. See sec. 12 of the District appropriation act for the fiscal year ending June, 30, 1917.

## APPENDIX 1.

## REPORT OF THE FIRE MARSHAL.

Washington, July 1, 1916.

FRANK J. WAGNER,

Chief Engineer, Fire Department, District of Columbia.

I submit herewith the report of the transactions of the fire marshal's office for the

fiscal year ending June 30, 1916:

During the year there were 1,340 alarms of fire received and investigated, a decrease of 87 from the preceding year. Of these alarms, 734 were bell alarms, an increase of 49 over the preceding year, and 606 were local alarms, a decrease of 134 from the preceding year. The bell alarms caused an estimated loss of \$423,304, covered by an insurance of \$3,703,195, and the local alarms caused an estimated loss of \$21,521, covered by an insurance of \$2,472,272.

The total estimated fire loss for the year is \$444,825, a fraction under 7 per cent of the total insurance of \$6,184,467. This loss is an increase of \$496 as compared with

the loss for the preceding year.

There were 18 fires for which extra alarms were sounded and 6 single-alarm fires where the loss was in excess of \$5,000. These alarms were as follows:

Sept. 23, 1915: Box 46, 12.55 a. m., for the burning of a lumber shed with considerable lumber stored therein, and a carpenter shop and storage building on United States reservation, occupied by the quartermaster's department, engineer depot, United States Army, Washington Barracks, foot of Four-and-a-half Street SW.; estimated loss  Dec. 31, 1915: Box 982, 3.51 a. m., for fire which destroyed the 2-story frame and adventors we should be street by the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the street of the stre	\$8, 167
dwelling and contents No. 4604 Jay Street NE., Deanwood, D. C.; estimated loss.	5, 500
Jan. 11, 1916: Box 8119, 5.22 p. m., fire in two 3-story frame dwellings, Nos.	0,000
1729-31, Mount Pleasant Street NW.; estimated loss	6, 111
Feb. 13, 1916: Box 124, 12.30 p. m., fire in a 3-story brick building occupied as a floor-covering warehouse and a second-hand clothing store, No. 639 D Street NW.; estimated loss	11,000
Creek Ford Roads NW.; estimated loss.  Apr. 11, 1916: Box 323, 6.39 p. m., fire in a 1-story brick garage and stable, badly damaging 6 automobile trucks, rear No. 2122 I Street NW.; estimated	6,000
loss	5,000
wer	41,778
701 1	•

This loss of \$41,778, added to the loss of \$263,846 due to the other 18 fires for which extra alarms were sounded, makes a total estimated loss of \$305,624. Deducting this extraordinary loss, there remains an estimated loss of \$139,201 for the other 1,316

I give below a list of fires for which extra alarms were sounded and assistance called for:

Aug. 31, 1915: Box 128, 9.01 p. m., followed by second alarm at 9.10 p. m., fire in 4-story brick building, furnishing store, and hotel supply house,	\$1, 300 ⁻

During the year the fire department was called upon to respond to fires in Maryland and Virginia to the number of six. Valuable assistance was rendered in each case. The total losses from these fires amounted to \$20,550. The most important of these fires were the burning of a two-story frame dwelling on January 4, 1916, Silver Springs, Md., estimated loss \$5,200; and a fire which destroyed four 2-story frame buildings on June 12, 1916, Beltsville, Md., occupied as a general merchandise store and dwelling, estimated loss, \$15,000. The loss for the four other fires amounted to but \$330. These losses are not credited to the fire loss in the District of Columbia.

#### FIRE LOSS.

The loss for the fiscal year, when compared with the loss during the preceding year, shows an increase of but \$496, despite the heavy losses incident to extra alarm fires, especially that in the Southern Railway Building, which in itself resulted in an estimated loss of \$125,000. The loss due to 18 extra alarm fires and 6 of the larger first alarm fires is \$302,624, while the loss for the other 1,316 fires is but \$139,201.

This showing evidences clearly the efficiency of the inspection force in causing the removal from mercantile houses, hotels, apartment houses, office buildings, public halls, and theaters, of all materials and conditions liable to cause or promote the

spread of fire.

One of the results of the efforts of the fire prevention force has been to secure the installation in all the larger mercantile establishments of baling presses for the waste paper accumulating therein.

The baling of this material and its prompt removal can not but greatly lessen the

danger from fire.

#### FALSE ALARMS.

During the year 130 false alarms were received, an increase of 34 over the preceding year. In such cases it is extremely difficult to secure sufficient evidence to establish the guilt of those suspected of committing the offense. The following is a summary of arrests and convictions of those who were charged during the year with sending in false alarms of fire:

Daniel Coates, age 11 years, and Robert Green, age 7 years, both colored, were arrested for sending in a false alarm from box 327 on August 7, 1915, and were held for the action of the juvenile court.

James Temple, age 17 years, Raymond Johnson, age 17 years, and Wilber Jackson, age 17 years, all colored, were found guilty of turning in a false alarm from box 72, on

August 9, 1915, and fined \$50 each or 30 days in jail.

John McCormick, age 22 years, white, suspected of having turned in a false alarm from box 732 on October 7, 1915, was committed to jail pending examination into his mental condition.

Daniel Dyson and LeRoy Bush, colored, were found guilty of sending in false alarm from boxes 53 and 519 on December 5, 1915, and were sentenced to jail for one year.

William Webster, age 57 years, white, was arrested on suspicion of having sent in a false alarm from box 951 on December 6, 1915. The case was, however, dismissed in the police court.

Clarence Brewer, age 18, colored, was arrested on suspicion of having turned in false alarms from boxes 217 and 275 on January 7, 1916. He was proven guilty, and fined

\$25 in each case.

Philip Myers, age 22 years, Eugene Rupple, age 19 years, and Louis Malone, age 18 years, white, were arrested on suspicion of turning in false alarms from boxes 682, 233, 824, 284, 655, and 654, on February 22, 1916. Louis Malone was convicted and fined \$150; Philip Myers was fined \$150; and Eugene Rupple forfeited collateral in the sum of \$150.

John Pranke, age 54 years, white, was found guilty of sending in false alarms from boxes 282 and 264 on June 26, 1916, and was sentenced to six months in jail.

#### CAUSES OF FIRE.

During the year the greatest number of fires resulted from the following causes:

Automobiles, backfiring in
Chimneys, defective
Chimneys, soot in
Gas jets igniting lace curtains. 13 Gasoline. 41
Ashes, hot
Incendiary
Matches, careless use of
Matches, children playing with
Matches, rats gnawing
Matches, sparks from 29
Smoking, careless
Spontaneous combustion
Stoves, overheated
Suspicious

Of the 41 fires caused by gasoline, 11 were due to its use for domestic purposes, and 11 to its careless handling and use. Four casualties occurred from the use of gasoline, none of which, however, resulted fatally.

## INCENDIARY AND SUSPICIOUS FIRES.

During the year the fire marshal's office, with the aid of the police department, investigated 2I fires the origin of which was regarded as suspicious. We were unable, however, to obtain sufficient evidence in these cases to warrant action by the courts.

Of the 47 fires of incendiary origin we were able in the following two cases to have

arrests made:

Ernest Reed, colored, age 33 years, convicted of setting fire to a livery stable, rear of 312 and 314 B Street SW., on September 11, 1915. He was sentenced to six years in

the penitentiary.

George Williams, colored, was arrested on suspicion of having set fire on February 7, 1916, to a newly completed building. He was held for the action of the grand jury, and placed under \$3,000 bond, on the charge of arson and larceny. The case has not yet been tried.

## STORAGE AND SALE OF EXPLOSIVES.

Due to the safe and sane celebration of the Fourth of July, the day was again observed without the fire department being called upon to extinguish a fire caused by the use of fireworks. Neither were there any persons injured from the use of fireworks on that day.

The regulations prohibiting the storage, sale, or setting off of fireworks in this city except by special permission of the commissioners, has undoubtedly contributed' extensively to the lessened number of casualties and the diminution in fire loss.

Forty-four applications were received and acted upon for the storage, sale, and

transportation of explosives. All were approved.

#### INFLAMMABLE OILS.

From the beginning of the license year, November 1, 1915, to the close of the fiscal year, 1,338 applications for the storage and sale of kerosene were received, a decrease of 62 as compared with the previous year. A few cases were held in abeyance until the applicants were in a position to comply with the regulations. In no instance, however, was it necessary to reject an application.

With a view to determining whether the kerosene oil stored and sold in the District of Columbia exceeded the maximum degree of inflammability, various samples were taken during the year and subjected to test. In no case was the oil found in

violation of the regulations.

For the storage and sale of gasoline 578 applications were received, an increase of 54 over the number received during the preceding year. It was necessary to reject several applications, owing to the inability of the applicants to comply with the

regulations.

On March 15, 1915, the commissioners amended article 2, section 5, of the police regulations, by adding additional sections 5a to 5h, which apply particularly to the methods of handling gasoline upon the public highways and in the interior of buildings; for providing certain fire protection in garages, and in dyeing and cleaning establishments. During the year the following prosecutions were brought for violation of these regulations:

George W. Free, driver for the Columbia Oil Co., charged with handling gasoline

in open cans, forfeited \$2 in court.

John O'Ragan, manager for the National Auto Supply Co., charged with handling

and selling gasoline from an open-tank wagon, forfeited \$5 in court.

Guy H. Shawen, driver for the Penn Oil Co., charged with handling gasoline in

open cans, forfeited \$5 in court.

#### INSPECTION OF THEATERS.

During the theatrical season 13 theaters were in operation, licenses being issued for such operation on the basis of reports submitted by the fire department after a thorough inspection and test of the fire equipment and appliances. The regular weekly inspection of theaters, the testing of all scenery to be used, and the testing of scenery used in public halls, in order to determine whether or not it has been treated with a fire-resisting solution, were maintained as in previous years.

Motion-picture theaters and open-air motion-picture parks are governed by rigid

The present method of licensing operators of motion-picture machines is extremely unsatisfactory, and should be discontinued. The method is to issue such licenses solely as the result of a written examination, the questions for which are of such nature as to prohibit their frequent change. There is, therefore, the constant liability of the dissemination of the nature of such questions among motion-picture operators generally, with the resultant likelihood of such information being communicated to prospective applicants for license.

A bill providing for a licensing board to pass upon the qualifications of applicants for motion-picture machine operators' licenses, for the purchase of the necessary machine or machines to permit of a practical demonstration of the ability of applicants, and to provide a fee for such licenses, has been submitted to Congress by the commissioners, and its enactment into law is most earnestly recommended

During the fiscal year one person, the manager of the Chelsea Motion-Picture Theater, was prosecuted for operating a motion-picture machine without a license,

and forfeited \$5 in the police court.

Seventy motion-picture theaters and 21 open-air motion-picture parks have been examined, and the issue of licenses therefor approved. Regular inspections, both during the day and night, are made of these places of amusement.

On March 19, 1916, Isadore Levy, aged 18 years, white, was arrested for impersonating an inspector of this department, and held under \$3,000 bond. The case is

still pending.

### INSPECTION OF MERCANTILE HOUSES.

The number of inspections of mercantile establishments, hotels, apartment houses, office buildings, yards, sheds, cellars, etc., made by this office during the year was 30,658, an increase of 3,526 as compared with the previous year. This increase in the number of inspections was due to the detail of Pvt. C. B. Lanahan for duty on the inspection force, and the further detail of Pvt. W. A. Bryarly for temporary service.

The force of this office has investigated 251 complaints from different sources in

addition to the regular inspection work mentioned above, the majority of such complaints coming from dwelling houses of which no regular inspection is made.

The education of the public generally of the danger from fire is becoming more and more apparent, and I am glad to report that in not a single case was it necessary for the department to resort to the courts in order to secure the removal of inflamma-ble or combustible material. To the public generally the thanks of the fire marshal are extended for their cooperation in his efforts to reduce the danger from fire to a minimum.

### RECOMMENDATIONS.

The limited number of inspectors provided for this office considerably handicaps the force in its efforts to visit and regularly inspect the various buildings in the District of Columbia, and results in considerable overtime being demanded of the present employees. It is recommended that the force provided for this work be increased by two.

One thousand six hundred and twelve buildings coming under the purview of the fire-escape regulations were inspected by the fire marshal's force during the year. One additional inspector should be provided for this work so that such inspections could be made at least twice a year, in order to see that fire escapes are kept unobstructed, drop ladders in proper order, fire gongs in condition for service, and extinguishers properly charged and in their proper locations.

It is recommended that some provision be made whereby street car transportation could be furnished the inspectors of this office when visiting the various theaters at

night, while in civilian clothes, for the purposes of inspection.

Owing to the fact that no clerical force has been provided for this office it is necessary to detail one inspector for such work, notwithstanding the fact that his services are urgently needed in regular inspection work, and at times in connection with the preparation of monthly reports, the filing of fire records, the compiling of data for the annual report, etc., it is sometimes necessary to detail as many as three inspectors for office duty. In the absence of a clerk the fire marshal is required to personally interview every caller, regardless of whether or not the nature of the business is such as could not have been attended to by a clerk. It is recommended therefore that at least one clerk be provided for the fire marshal's office.

The energetic and efficient services rendered by the deputy fire marshal and the inspectors of this office—their faithfulness and loyalty having been demonstrated warrant me to renew my recommendations for increases in their salaries from their present meager amounts, and I urge that this matter be given your serious and favor-

able consideration.

### CONCLUSION.

I wish to express to you my sincere appreciation for the many courtesies and unconditional support accorded me in my efforts to sustain the standing and reputation that this office has gained.

To my assistants, the deputy fire marshal, and the corps of inspectors, my thanks are hereby tendered for the able and conscientious manner in which they have performed their duties, and the moral and physical support rendered me in the conduct of this office.

> P. W. NICHOLSON, Fire Marshal.

### APPENDIX 2.

# REPORT OF THE SUPERINTENDENT OF MACHINERY.

Washington, D. C., July 1, 1916.

TO CHIEF ENGINEER, FIRE DEPARTMENT:

I submit the following report showing work done at the department repair shop for the year ending June 30, 1916.

During the year I have inspected and tested all new apparatus, appliances, and hose received by the department, and recorded the results of such inspections. I have made 411 inspections and tests of all apparatus, hose, and boilers in service, and have made recommendations for condemnation of such as was unfit for further service.

I have examined all members for promotion to service on steam fire engines, automobile hose wagons, automobile trucks, and tractor-drawn apparatus, to determine their fitness for such work, and have given instructions in handling apparatus and

operating apparatus of the department.

The following apparatus were given a general overhauling: Engines 3, 4, 9, 18, 20, 24, and 25; hose wagons 5, 13, 16, 18, and 27; trucks 7 and 12; chief's automobile, fourth battalion. New boiler placed in No. 20 engine and new inner and outer tubes in engine No. 18.

During the year 502 new and repair jobs, including appliances and equipment made at the repair shop, have been completed under my supervision, and I have also

supervised 87 repair jobs in the local shops.

 $\overline{\mathbf{1}}$  have attended all special calls for fires during the year, and all members of the repair shop under my supervision were called during a conflagation and when needed.

On January 1, 1916, the department received two two-passenger gasoline type roadsters for the use of the first battalion chief and the superintendent of machinery. One two-passenger roadster was given a general overhauling and placed in service for use of the fourth battalion chief.

On January 11, 1916, the department received two tractors, one installed under No. 3 engine and one installed under No. 9 engine. During the same month, on January 26, 1916, two combination and chemical hose wagons with booster pumps attached were received by the department and placed in service—one at No. 3 engine company and one at No. 9 engine. No 3 engine and hose wagon was placed in service April 6, 1916, and No. 9 engine and hose wagon was placed in service March 14, 1916, making two complete motor companies, and thereby eliminating horses in two companies.

On December 7, 1916, the department received one motor combination and chemical hose wagon with booster pump attached, and one motor pumping engine to be

installed, No. 28 engine company, when completed.

During the year 28,000 feet of 2½-inch Nobby Jacket brand, cotton-covered, rubber-

lined hose was purchased and distributed to various companies.

The water tower was damaged while in service on April 24, 1916, at a fire sounded from box No. 186, and is being given a general overhauling at the fire department repair shop.

Five pieces of apparatus was damaged while responding to alarms of fire, during the year, and wrecking apparatus were found necessary to convey same to the fire

department repair shop for repairs.

Four life guns have been installed in truck companies Nos. 1, 2, 3, and 4, so that life lines may be thrown over the high buildings to facilitate the work of saving lives.

Grether hand searchlights have been purchased and placed in service for the use of the chief's and various companies to eliminate the constant danger of gas explosions, which could not be overcome by the use of oil and gas lamps.

Owing to the available space for storage in the new repair shop, many appliances and accessories have been purchased and made for the immediate use of the depart-

ment and stored in the storeroom for emergency.

I recommend that a fore-and-aft compound engine of not less than 350 indicated horsepower with surface condenser be purchased and installed on the fire boat, to replace the present single-cylinder, high-pressure engine. The present engine develops but 300 indicated horsepower, and in breaking solid ice does not give power enough to force the boat to the top of the ice. I further recommend that the feed lines be changed so that the power engine and the large fire pumps can be fed by independent feed lines.

I respectfully recommend that the salary of the assistant superintendent of machin-

ery be increased from \$1,200 to \$1,400 per annum.

Accompanying this report are tables showing the number of feet of hose in each company, all apparatus, repairs to apparatus, and work done in the department.

I desire to take this opportunity to thank you for the cooperation and assistance rendered me, and highly commend the members of the fire department repair shops for their assistance rendered me in connection with my work.

T. M. Robinson, Superintendent of Machinery, Fire Department, District of Columbia.

### APPENDIX 3

Washington, D. C., July 1, 1916.

Sir: The board of police and fire surgeons submits the following summary of work in the fire department in three of the four surgical districts for the fiscal year ended June 30, 1916. No report for the fourth district is at this time available, as the surgeon in that district has been called out with the National Guard of the District of Columbia for service on the Mexican border. His report will be submitted as soon as received.

Admitted to sick report (cards issued)	173
Under treatment but not on sick report	308
House visits.	627
Office visits	1,375
Applicants examined	190
Applicants accepted	29
Pensioners examined.	38

H. W. LAWSON, Secretary Board of Police and Fire Surgeons.

Frank J. Wagner, Chief Engineer Fire Department, District of Columbia.

### APPENDIX 4

Washington, July 1, 1916.

To CHIEF ENGINEER, DISTRICT OF COLUMBIA FIRE DEPARTMENT:

I submit the following report relative to the horses of the fire department during the fiscal year ended June 30, 1916.

There have been purchased 28 head, 38 horses have been condemned and trans-

ferred to other departments of the District service, and 1 was sold.

There at present 204 horses in the fire department. Of these 175 are in good condition, 17 in fair condition, and 12 are in bad condition and will be disposed of as soon as possible.

The general health of the fire department animals has been good, and only the

usual amount of sickness and injury has been incurred during the year.

C. B. Robinson, V. S., District Veterinarian.

### APPENDIX 5

### UNIFORMS.

On November 9, 1915, the commissioners issued the following order amending the rules and regulations of the fire department in so far as they relate to uniforms:

Ordered, that the rules and regulations governing officers and members of the fire department of the District of Columbia are hereby amended as follows:

Add the following section to Article I, and change the numbers of the sections now in Article I to conform therewith:

### ARTICLE I.

### CHIEF ENGINEER AND ORGANIZATION.

Section 1. The uniformed force of the fire department shall consist of the chief engineer, deputy chief engineer, battalion chief engineer, fire marshal, deputy fire marshal, inspectors, captains, lieutenants, superintendent of machinery, assistant superintendent of machinery, sergeants, engineers, assistant engineers, pilots, marine engineers, assistant marine engineers, marine firemen, drivers, assistant drivers, privates of class No. 2, and privates of class No. 1.

Add the following to be designated Article XXIV:

### ARTICLE XXIV.

### UNIFORMS.

Section 1. The chief engineer shall, upon order from the Commissioners of the District of Columbia, biennially enter into contract with such person, firm, or corporation, as may be designated by the commissioners for the provision of uniforms and caps for the officers and members of the fire department of the District of Columbia, and said uniforms and caps shall be of such style, quality, and price as the commissioners shall from time to time fix and determine.

SEC. 2. The officers and members of the fire department shall purchase their uniforms, parts of uniforms, and caps, from the person, firm, or corporation with whom contract has been entered into by the chief engineer. All orders for uniforms, parts

of uniforms, or caps shall be made as hereinafter in this article set forth.

Sec. 3. A committee on police and fire department uniforms, consisting of the purchasing officer of the District of Columbia as chairman, and one officer and one private from the police department and one officer and one private from the fire department, to be appointed by, and to serve during the pleasure of, the commissioners, shall from time to time as may be necessary, prepare specifications for police and fire department uniforms, solicit bids thereon, and recommend to the Commissioners of the District of Columbia award of contract therefor.

SEC. 4. The officer and member of the fire department appointed to serve on the committee on police and fire department uniforms, shall constitute an inspection board, and such board shall perform such duties as may from time to time be designated by the Commissioners of the District of Columbia and the chief engineer

of the fire department.

SEC. 5. The inspection board shall semiannually inspect all uniforms, parts of uniforms, and caps then being worn by the officers and members of the fire department; condemn any found unsuitable for further wear; and direct the wearer thereof

to replace all so condemned by proper new uniforms, parts thereof, or caps.

All orders upon the contractor for uniforms, parts of uniforms, or caps, issued as the result of the semiannual inspections of the inspection board, and all orders for uniforms, parts of uniforms, or caps in addition to the same which any officer or member may desire to purchase, shall be upon a form prescribed by the said board, and each such order shall be approved by the board or one member thereof.

SEC. 6. The inspection board shall inspect all uniforms, parts of uniforms, and caps delivered to the officers and members of the fire department by the contractor, and reject such as may be found not in accordance with the specifications therefor; and direct the alteration of such as may be found to be of improper fit. The rulings of the inspection board as to uniforms, parts of uniforms, or caps shall be final

of the inspection board as to uniforms, parts of uniforms, or caps shall be final.

Sec. 7. In making payments for uniforms, parts of uniforms, and caps each officer and member of the fire department shall deal directly with the contractor. Where the amount is more than \$20, payments will be made in not more than four equal monthly installments: where the amount is more than \$10 but not more than \$20, payments will be made in not more than three equal monthly installments; where the amount is more than \$5 but not more than \$10, payments shall be made in not more than two equal monthly installments; where the amount is \$5 or less than \$5, the same shall be settled in one payment. All payments for uniforms, parts of uniforms, or caps to begin on the 1st day of the month following the date of delivery and acceptance of the uniforms by the inspection board.

SEC. 8. The inspection board of the fire department shall keep a record showing

the following:

(a) All uniforms, or parts of uniforms, or caps inspected.(b) All uniforms, or parts of uniforms, or caps ordered.

(c) All uniforms, or parts of uniforms, or caps returned to the contractor for alteration.

(d) All uniforms, or parts of uniforms, or caps rejected.

And shall submit to the chief engineer at the close of each fiscal year a report showing in detail their work during the year, which report shall be forwarded to the Commissioners of the District of Columbia for their information.

Sec. 9. Each officer and member of the fire department shall, before leaving quarters in uniform for any purpose whatever, report to the officer in charge of his station, and it shall be the duty of the said officer in charge to see that the said officer or member leaving quarters presents a proper appearance, and that his uniform and all parts thereof are in proper condition for his appearance in public; i. e., that his shoes are properly blacked and shined; clothes properly pressed and clean; and face properly shayen.

Sec. 10. All officers and members of the fire deapretment shall wear their full uniform when going to or returning from meals, and on occasions of all details unless specifically excused by the chief engineer, and no officer or member shall, when in uniform, wear other than black shoes. Every officer and member when appearing in public in uniform shall have his coat completely buttoned and fastened, unless otherwise authorized by the chief engineer.

SEC. 11. No officer or member of the department shall place or carry any bulky article or package in any pocket of his uniform in such manner as to interfere with

the neat and tidy appearance thereof.

When in uniform hands shall be kept out of pockets.

SEC. 12. Any officer or member of the fire department who is proven guilty of having appeared in public, in uniform, in a condition contrary to the rules and regulations herein set forth, shall be subject to discipline therefor; and if it be shown that the officer in charge of his station permitted such officer or member to leave quarters in such condition, the said officer in charge shall also be subject to discipline for neglect of duty.

Sec. 13. The officer in charge of any fire station shall promptly report to the chief engineer any officer or member under his command who may appear without the proper uniform, provided that such officer or member has had sufficient time in which to procure the same, or with a borrowed uniform at inspection or elsewhere.

Sec. 14. No officer or member of the fire department, unless on department business, shall wear the fire department uniform, or any part thereof, at any place of amusement, ball, party, or public assembly of any character.

The present inspection board, appointed under these regulations, is composed of

Capt. John H. Virnstein and Sergt. Charles W. Gill.

The report of the inspection board follows.

Washington, July 1, 1916.

FRANK J. WAGNER,

Chief Engineer, Fire Department.

In compliance with orders promulgated for the guidance of the uniform committee in respect to uniforms contracted for and received by the members of the fire depart ment, District of Columbia, we submit for your consideration a report for the fisca year of all uniforms, parts of uniforms, caps, and shirts received and inspected by the uniform committee.

Winter uniforms were furnished by Snellenberg & Co. and summer uniforms were furnished by S. N. Meyer, which were submitted to the Bureau of Standards for test. The report of the bureau was very carefully considered and all materials were found to comply with specifications, and the uniforms were accepted by the committee, subject to further consideration in reference to fit.

The new uniforms were installed in the department and each uniform was inspected and all alterations and defects were noted and referred to the respective representatives of the contractors for attention and alterations necessary to insure proper fit, which the committee inspected when finished. To attain this end 350 alterations of trousers and coats were found necessary in outfitting the men in winter uniforms, and 425 alterations were necessary to complete the summer uniforms; 489 caps were inspected; 110 passed inspection, and 379 were rejected. Each member was required to have three shirts in proper condition, and 698 shirts were ordered by the committee.

In concluding our report we wish to extend to the chief engineer and the commissioner our appreciation and thanks for their cooperation with us in our efforts to make

the personnel of the fire department the best uniformed in the country.

C. W. Gr., JOHN H. VIRNSTEIN, Uniform Committee.

¹Designed by T. M. Robinson, superintendent of machinery, District of Columbia fire department.

### DESCRIPTION OF FIRE BOAT "FIREFIGHTER," 1916.

The boat was built by the Harlan & Hollingsworth Co., Wilmington, Del. Length over all, 101 feet; length at load water line, 95 feet; beam, 23 feet 6 inches; draft, 9 feet; displacement, 130 tons; single screw. Speed, 12 miles per hour. The power engine is a single-cylinder high-pressure noncondensing engine.

The fire appliances consist of the following: Two duplex fire pumps, 17 by 11 by 10 inches, with a displacement of 3,000 gallons of water per minute for each pump. The pumps were built by the Blake Pump Co., Cambridge, Mass. One monitor on forward deck throws streams 2 to  $2\frac{1}{2}$  inches. One monitor on engine-room roof throws streams from 2 to  $3\frac{1}{2}$  inches. Two turret nozzles on pilot house, one on the port and the other on the starboard side, throw streams from  $1\frac{1}{2}$  to 2 inches. Two turret nozzles on engine-room roof, one on the port side and one on the starboard side, throw streams from  $1\frac{1}{4}$  to 2 inches.

The boat is equipped with 14 connections for 21-inch hose, so that fire can be

fought for a distance of 2,000 feet or more ashore.

The said boat is also constructed for use as an ice breaker.

Mrs. Minnie Gordon, white, age 38 years, sprained left ankle while descending stairs and escaping from fire in a two-story frame grocery store and dwelling, No. 1146

Twenty-first Street NW., December 20, 1915, box 315.

Charles A. Crown. white, age 40 years, was slightly burned about face and head at fire in a three-story brick dwelling, No. 1114 Monroe Street NW., December 23, 1915, box 815.

Robinson Melton, colored, age 27 years, was burned on face and hands while cleaning auto engine by the ignition of gasoline while striking a match to smoke, in a twostory brick garage, No. 303-307 Sixth Street NW., December 23, 1915, box 184.

J. L. Alderton, white, age 35 years, was slightly burned about face and hands in endeavoring to extinguish a fire in a two-story brick dwelling. No. 121 E Street SE., December 30, 1915, box 519.

Frank A. Clark, white, age 50 years, was slightly burned on hands in extinguishing fire in a two-story brick dwelling, No. 35 Florida Avenue NW.. No. 12 Engine Company on local, December 31, 1915.

January, 1916.—Frank McCormick, white, age 29 years, was burned on left hand and was overcome by smoke in endeavoring to extinguish fire in a three-story brick

apartment house, No. 21 Grant Place NW., January 1, 1916, box 164.

Harvey Young, white, age 53 years, was badly burned on hands while extinguishing fire in a two-story frame dwelling, No. 2223 H Street NW., January 16, 1916,

John Rogers, white, age 23 years, was slightly burned on right hand.

H. Furneyhough, white, age 24 years, was slightly burned on right hand.

Both of the foregoing were burned at a fire caused by the burning of an automobile

truck in front of No. 625 G Street NW., January 20, 1916, box 123.

F. P. LaForge, white, age 33 years, had the drum of his right ear bursted and was cut on arm by flying glass in an explosion of chemicals in the Bureau of (hemistry, Department of Agriculture, No. 216 Thirteenth Street NW., No. 13 Engine Company on local, January 20, 1916.

Robert Main, white, age 39 years, was found dead, having been suffocated by smoke, caused by smoking in bed in a house boat at foot of Thirteen-and-a-half and

Water Streets SW., January 23, 1916, No. 13 Engine Company on local.

Mrs. Sarah Scott Turner, white, age 81 years, was suffocated by smoke at fire in a three-story brick, Milton Apartment House, No. 1729 H Street NW., January 24, 1916, box 329.

George H. Boston, colored, age 100 years, was bruised on right leg by falling from a second-story window during a fire in a two-story frame dwelling, No. 330 Bryant

Street NW., January 26, 1916, box 8112.

February, 1916.—Robert Cook, colored, age 16 years, was slightly burned on face at fire in a two-story brick dwelling, No. 2322 Sixth Street NW., February 14, 1916, box 822.

Mrs. J. B. Townsend, white, age 30 years, was slightly burned about face and head at a fire in a three-stery brick dwelling, No. 1139 Ninth Street NW., February 15,

1916, No. 2 Engine Company on local.

James E. Beardsly, white, age 35 years, was slightly burned on left arm while trying to extinguish a fire in a three-story brick tea and coffee store and dwelling, No. 815 H Street NE., February 29, 1916, box 653.

March, 1916.—Mrs. John Cook, white, age 60 years, was badly burned on legs and

back, caused by her nightgown catching on fire by coming in contact with a gas heater in a three-story brick dwelling, No. 110 East Capitol Street NE., March 1, 1916, box 636.

John A. Bresnahan, white, age 10 years, received a fracture of collar bone, caused by running into rear right fender of first battalion chief's automobile while the chief was responding to an alarm of fire in a two-story frame dwelling, No. 18 Pierce Street

NW., March 14, 1916, box 62.

Helen Johnson, colored, age 4 years, was fatally burned all over her body, caused by her clothing catching on fire by coming in contact with a hot stove; died, from burns received, a few hours later in Children's Hospital.

Florence Johnson, colored, age 24 years, was badly burned on hands in extinguish-

ing fire on the person of Helen Johnson.

The two foregoing were burned in a two-story frame dwelling, No. 31 F Street NW.,

March 17, 1916, box 168.

Betsy Smith, age 89 years; Rose Bell Johnson, age 5 years; Howard Mead, age 3 years; and Chester Taylor, age 4 years; all colored, were overcome by smoke at a fire in a two-story frame dwelling, No. 1052 Twenty-first Street NW., were taken to the Emergency Hospital, where they revived, March 21, 1916, No. 2 Truck Company on local.

Mrs. Martha Randall, colored, age 54 years, was fatally burned on upper portion of body and face by clothing igniting from a stove, and died, from burns received, several hours later on same day in Casualty Hospital; accident occurred in a two-

story brick dwelling, No. 1232 Walter Place SE., March 24, 1916, box 545.

Mrs. M. L. Jefferies, colored, age 32 years, was slightly burned on face and hands at fire in a two-story brick dwelling located at Sixth and Howard Streets NW., March 29, 1916, No. 24 Engine Company on local.

Harry Toliver, colored, age 34 years, fractured left arm and shoulder by being caught under a falling retaining wall in alley between Twenty-fourth, Twenty-fifth, Philip's Court, and H Streets NW., March 30, 1916, No. 2 Truck Company on local.

April, 1916.—Henry F. Morgan, white, age 23 years, was burned about face at fire

April, 1916.—Henry F. Morgan, white, age 23 years, was burned about face at fire in a one-story brick garage in rear No. 1131 Twenty-first Street NW., April 11, 1916, No. 1 Engine Company on local.

Dr. John Van Schaick, white, age 42 years, was slightly burned on left hand while trying to extinguish fire in 2 two-story brick stables located in rear 1413-1415 Massa-

chusetts Avenue NW., April 15, 1916, box 148.

Frank T. Ippolito, white, age about 45 years, crossing policeman at Seventh and F Streets NW., had his skull fractured by being struck by Deputy (hief A. J. Sullivan's automobile while responding to a fire in a two-story brick cigar store and dwelling, No. 1004 Seventh Street NW., April 22, 1916, box 269.

Albert Denham, white age 19 years, was slightly burned on hands in trying to extinguish a fire in a three-story brick bicycle store and dwelling, No. 427 Tenth

Street NW., April 26, 1916, box 134.

May, 1916.—William Birdsall, jr., colored, age 3 years, was found under bed in room where fire originated in an unconscious condition, was taken to 6 asualty Hospital, where he revived, he having been overcome by smoke; died seven days afterwards from pneumonia; fire occurred in a two-story brick dwelling, No. 149 L Street SE., May 12, 1916, box 54.

Herman Spitz, white, age 50 years, was hadly burned on face, arms, and legs at fire in a two-story brick stable and storage building located in rear of No. 414 Eleventh

Street SE., May 15, 1916, No. 8 Engine company on local.

Daniel Thompson, colored, age 38 years, motion-picture operator, was badly burned on face and hands while operating a motion-picture machine, caused by film backing up in machine and not being taken up properly in lower magazine: was burned in the one-story brick (helsia motion-picture theater, No. 1913 M Street NW., May 21, 1916, box 39.

William W. Wood, age 35 years, and Mason Hammell, age 35 years, both white, were overcome by fumes of ammonia, caused by the blowing out of cylinder head of ice engine, were rescued by members of No. 3 Truck Company, and taken to Emergency Hospital, where they revived; accident occurred in a two-story brick provision house, No. 940 Louisiana Avenue NW., May 27, 1916, No. 3 Truck Company on local.

Blanche (lark, colored, age 33 years, was slightly burned on right hand while extinguishing a fire in a two-story frame dwelling, No. 200 R Street NW., May 31,

1916, box 284.

June, 1916.—Edward Ulle, white, age 50 years, was burned on hands and face.

Samuel Bell, white, age 19 years, was cut on right arm by glass.

Both of the foregoing were injured at a fire which destroyed 4 two-story frame buildings, occupied as a general merchandise store, and dwellings, located in Beltsville, Md., on June 12, 1916. No. 24 Engine Company on local.

Earnest Palbock, white, age 51 years, was slightly burned on left hand at fire in a two-story frame fruit store and dwelling, No. 1219 Good Hope Road SE., June 24, 1916, box 91.

### REPORT OF THE BOARD OF TRUSTEES OF THE PUBLIC LIBRARY.

Washington, October 9, 1916.

Gentlemen: For several years the library trustees have earnestly contended that the basic support of the library is and has long been inadequate, and have urged a maintenance appropriation approximating \$100,000 to equip and sustain it like other American libraries of its class.

Year before last the trustees asked a library appropriation of \$99,820. The appropriation in response was \$72,100. Last year our estimate was \$101,920, reduced at the suggestion of the commissioners to \$92,080, and eliciting in response an appropriation of \$79,060. This year our estimate is \$102,280. Will not the commissioners recommend and Congress appropriate the full amount of the estimates, thus adequately meeting the library's actual needs and putting it approximately upon the appropriation basis of other American libraries in cities approximating Washington in population?

### WASHINGTON'S COMPARATIVELY MEAGER LIBRARY OUTLAY.

Under any test that can be applied Washington's library maintenance is inadequate compared with that of other libraries of its class. The comparison is unfavorable to Washington (1) in the aggregate amount of library appropriation, (2) in per capita library expenditures, and (3) in percentage of total municipal expenditures applied to library purposes.

(1) A statistical table prepared by the librarian and printed in his report to the trustees, herewith submitted, shows that of 31 American cities nearest to Washington in population (all over 200,000) 22 have (1915–16) larger library appropriations than Washington, and only 9 have less. Among the cities smaller than Washington that have larger library appropriations are Minneapolis, Kansas City, Seattle, Louisville, St. Paul, Oakland, and Portland, Oreg. The library appropriations for Minneapolis, Seattle, and Portland were each more than twice as much as that of Washington. The census bulletin concerning the finances of cities for 1915 makes practically the same showing. Of the 28 cities other than Washington recognized by the census as having over 200,000 population only eight have smaller library appropriations.

### LOW PER CAPITA LIBRARY EXPENDITURE.

(2) The same statistical table also shows that out of 31 cities above 200,000 in population in 1915-16 other than Washington, 24 have a higher per capita expenditure for public libraries than has Washington, and that the average per capita library expenditure in these

cities is 29.9 cents, as against 21.2 cents for Washington. Thus the average per capita library expenditure in these cities is 8.7 cents per capita more than that of Washington. An addition of 8.7 cents per capita to the public library expenditures of Washington last year would have meant \$31,666. That sum added to the actual expenditures last year of \$77,337 would have given the library a total of \$109,003, a sum in excess of the estimates submitted by the library trustees to the commissioners last year (\$101,920) and this year (\$102,280).

Practically the same showing to the disadvantage of Washington is made by a comparison of the census figures of library per capita expenditures in 1915 in the 29 cities over 200,000 in population. Twenty-one of these cities showed larger per capita expenditures for libraries than Washington and seven showed less (United States Census Bureau Bulletin: Financial Statistics of Cities for 1915).

### DISCREDITABLY SMALL PERCENTAGE OF LIBRARY OUTLAY.

(3) The Census Bureau in its bulletin entitled "Financial statistics of cities having a population of over 30,000 in 1915," compares in detail the municipal expenditures of the 204 American cities having over 30,000 population. These cities are divided into five groups—(1) over 500,000 in population, (2) between 300,000 and 500,000 in population, (3) between 100,000 and 300,000, (4) between 50,000 and 100,000, (5) between 30,000 and 50,000.

The percentage of total expenditure of general departments outside of public-service enterprises under the library head in these five groups is as follows: First group, 1.2; second (Washington's group), 1.3; third, 1.4; fourth, 1.3; fifth, 1.5; total average for the 204 cities, 1.3. Washington's percentage of library expenditure was 0.7, or a little more than one-half of the average library expenditure of all

American cities and of its own special group of cities.

In the 9 cities of Washington's class (between 300,000 and 500,000 in population), only one city—San Francisco, 0.7—has as small a percentage of library expenditure as Washington. Buffalo's percentage (1.2) is 71 per cent more than Washington's. Los Angeles' and Cincinnati's (1.3) are 85 per cent more. Milwaukee and Newark (1.4) have 100 per cent more. Minneapolis (2.5) and Seattle (2.7) have between 250 and 300 per cent more. All of these cities except Minneapolis and Seattle are larger than Washington. The cities approximating Washington in size, but smaller, are Jersey City, 1.6 library expenditure; Kansas City, Mo., 1.8; and Indianapolis, 1.4.

There are 62 cities in the United States having over 100,000 population. Of these only 4 have smaller library expenditure percentages than Washington. There are 204 cities in the United States, including Washington, with over 30,000 population, and of these only 17 have a smaller percentage of library expenditure than Washington.

Washington's percentage of library expenditure is far exceeded not only by such cities as Buffalo, Minneapolis, Cleveland, and Detroit, but by Kalamazoo, Terre Haute, West Hoboken, Oshkosh, Joplin, and Perth Amboy.

### WASHINGTON ABNORMALLY LOW ONLY IN LIBRARY EXPENDITURE.

There is no other item of municipal expenditure in this comparison which makes so discreditable a showing for Washington. The Washington percentage of expenditure as compared with the average of all of the 204 American cities is, for instance, a little less for the fire and police departments and for sanitation and more for highways; much more for charities, hospitals, and corrections, and less for schools. But in none of these cases is the difference extraordinarily great. It is only in respect to library maintenance that Washington enjoys the discreditable distinction of assigning to this important educational function only seven-thirteenths of the average percentage of total municipal expenditure that is assigned by all other American cities, and less than half the average percentage of the group of cities between 30,000 and 50,000 population, including Oshkosh and Kalamazoo. It is in respect to library maintenance alone that only 17 out of 204 American cities fall below it in percentage of expenditure.

The suggestion of these figures is that the Washington library expenditures could be doubled and then not exceed the average percentage of library expenditures in all American cities. If the trustees' estimates for 1918 were approved and appropriated in full, Washington's library expenditure would fall considerably short of being as large a percentage of the total municipal expenditure on general departments as that of the average American city.

### LIBRARY'S INCREASING WORK AND PUBLIC USEFULNESS.

If the growth of the library's usefulness as measured by book circulation had been as slow and as feeble as the increase of library maintenance there would be less ground of complaint of inadequate support. But while the appropriations for the library, originally based on an inadequate foundation, have increased, especially of late years, only slightly until last year's encouraging start in the right direction, the library's work and public usefulness have wonderfully expanded.

In last year's report we summarized the library's progress of 11

years under the present librarian, as follows:

The record of the library's work for the past year makes a striking showing whe n compared with that of 11 years ago, when the present librarian began his period of service. During that period the distribution agencies have increased from 2 (the central library and one social settlement) to 166. The book stock has increased from 64,473 volumes to 179,183 volumes, or 178 per cent. The home circulation of books, one of the best indications of the work of a public library, has increased from 278,178 volumes to 802,998 volumes, or 188 per cent. In the same period the percentage of fiction in that circulation has been reduced from 84 to 55. That result has been accomplished by constantly increasing the emphasis placed on the study and reference work of the library, including especially the development of the separate industrial arts division, which ministers to a large number of business men, engineers, and mechanics. The largest growth during the 11-year period was made in the library's work for children. More than one-third of the library's circulation is now of children's books; the increase in that use in 11 years has been from 48,278 volumes to 302,510 volumes, or sixfold. This use is made not only through the children's room at the central library and the Takoma Park branch, but especially through the library's cooperation with the schools. From a school collection of 10,943 volumes more than 140,000 volumes were circulated into homes through 367 classrooms in 108

school buildings. Other points in last year's library record include the holding of 97 public meetings and lectures in the assembly room, with 11,924 auditors, and 244 meetings of small organizations in study rooms; the circulation of 93,745 mounted pictures into schools and homes for use in teaching geography or illustrating the reading of historical, literary or artistic subjects, and the publication in the interest of the development of the study and extension work of the library of a monthly list of new accessions, an educational bulletin to promote the cooperation of school and library, a social service bulletin to promote sociological study and numerous reference lists paralleling lecture and study courses. Thus the library has become not only an educational institution that effectively supplements all formal school work but also

a vital social aid in the community.

In the 11 years from 1904, the first full year the present central building was occupied, the congressional appropriations for library maintenance have increased 95 per cent and the total library expenditures 60 per cent; but in the corresponding period the book stock has increased in volume 178 per cent and the home circulation has increased in volume 188 per cent. The work done has increased much more than twice as fast as the means provided for doing it, and in very recent years, until the 1915 appropriation, there has been almost no increase of maintenance and development provision at all. During these 11 years there has been not only this wonderful increase in the quantity of library work but as notable an improvement in its quality. The fiction percentage of the books circulated has been decreased by 29 per cent. This vast increase in general circulation and this heavy decrease in percentage of fiction circulated suggest in combination the scope of the library's helpful activities, the wide sweep of its school work, of its industrial department, and other branches of practical instruction, and mental broadening and uplift.

The record of the last year tells the same story of a constantly expanding volume of good work well done by an almost stationary force. There has been almost a 10 per cent increase in the library work and during the year more than 35 per cent of the underpaid force have resigned.

The wide scope of the library's work and the details of its activities are interestingly shown in the librarian's report to the trustees,

which is attached to and made a part of this report.

The trustees acknowledge with grateful and hearty appreciation the action of Congress at the last session in making general increases in the salaries of the junior professional staff of the library, hitherto shockingly underpaid, and in creating three new positions. Will not Congress apply this year the same equitable treatment to the higher salaried members of the library staff, who are correspondingly overworked and underpaid and who are equally efficient and deserving?

There is the same need this year as last year for the new positions and the increases of salaries in old positions which the trustees then urged and which were not granted. The reasons for these increases in salaries, in number of employees, and in library equipment are itemized and set forth in detail in the notes accompanying the estimates for 1918 which are submitted as part of this report.

### INCREASE OF LIBRARIAN'S SALARY AN URGENT NEED.

In urging the necessity for radical increases in the salaries of the professional staff of the library, foremost place should be given to our recommendation for the payment of an adequate salary to our highly efficient chief librarian. Dr. Bowerman has just completed 12 years of service here, during which time he has literally transformed the library. He has increased the quantity and quality of its service manyfold. In spite of the handicap of meager salaries paid to his professional staff, he has inspired his assistants with his own earnestness, zeal, and spirit of high and disinterested endeavor. Through Dr. Bowerman's efforts our local library has been made to

rank in the quality of its service with the foremost public libraries of the country. Dr. Putnam, Librarian of Congress, whose opinion is recognized as that of an expert, has given it as his opinion that our library under Dr. Bowerman's librarianship has become "the most intelligently active for its size and constituency that I know of within the entire country." Dr. Bowerman's standing as a chief librarian has been recognized by his appointment for several years as chairman of the committee on library administration of the American

There has been no change in the librarian's salary since July 1, 1909. when it was increased from \$3,250 to \$3,500. The library trustees have been on record since 1908 as recommending that the salary be made \$5,000. Until it is so increased it can not be regarded as commensurate with the high quality of the service rendered by Dr. Bowerman, and not till then will it be put on a par with salaries paid to chief librarians of other municipal libraries of equal rank. This is evident from the following comparative figures: The chief librarian of the New York Public Library receives \$10,000 per year; the chiefs of the circulation and reference departments of the New York Public Library each receives a salary of \$5,000; the chief librarian of the Brooklyn Public Library, \$9,200, assistant librarian, \$4,000; Chicago, \$8,500; St. Louis, \$8,000; Boston, \$6,000; Cleveland, \$8,000; Pittsburgh, \$6,000; Detroit, \$4,500; Buffalo, chief librarian, \$5,000, and vice librarian, \$3,000; Los Angeles, \$4,500; Milwaukee, \$5,000; Newark, \$7,000; Seattle, \$5,000; Kansas City, \$5,000; Rochester (a very new library), \$4,000; St. Paul, \$4,500; Providence, \$4,500; and Springfield, Mass., \$5,000.

That there should be some increase in the librarian's salary has been recognized by the action of the House Committee on Appropriations in recommending two years ago and again last year an increase from \$3,500 to \$4,000; in both cases, however, this proposed increase was lost by the raising of a point of order on the floor of the House. For the coming year we earnestly recommend that the long overdue increase in the librarian's salary be made, and that a full rather than a partial measure of justice be done to him and to the library by increasing his salary to the figures urged by the library trustees for so many years. We can not afford to lose Dr. Bowerman. Such an event is not at all unlikely unless we are able to pay him a more

adequate salary.

Library Association.

Every time the trustees make a fresh canvass of the subject of salaries of chief librarians of municipal libraries we find that whereas the salary of our librarian has remained stationary for the last seven years, not only are the salaries elsewhere larger than the salary of our librarian but that they are constantly advancing. For example, in the last two years the salary of the chief librarian of Chicago has been increased from \$8,000 to \$8,500; the librarian of St. Louis has had his salary increased from \$7,000 to \$8,000; Cleveland's librarian from \$7,000 to \$8,000; Detroit's from \$4,000 to \$4,500; Buffalo's from \$4,000 to \$5,000; Milwaukee's from \$4,000 to \$5,000; Newark's from \$6,000 to \$7,000; Kansas City's from \$4,500 to \$5,000; and Providence's from \$4,000 to \$4,500. The work of our library and our librarian's responsibilities and the value of his services have increased fully as much as they have in these other cities, where the librarians' salaries have shown such notable advance.

Last year's appropriations for the library indicated an intelligent appreciation of some of the library's vital needs and sympathetic interest in its welfare. But until the library's entire working force and its equipment are systematically rendered adequate we must continue to emphasize before succeeding Congresses the fact of Washington's comparatively meager library outlay and the special items in respect to which this inadequacy is most conspicuous.

The table of estimates with which our report concludes expresses the conviction of the trustees as to the provision justly to be made to put our library on approximately the same basis of maintenance as that prevailing in other American library-supporting cities. In support of our contention that adequate maintenance of the library is found in the figures of the estimates and not in the figures of past appropriations, we have compared the maintenance of the Washington library with that of other cities by every conceivable method of measurement, and the result is in every case the same—to demonstrate conclusively the soundness of this contention.

### PUBLIC LIBRARY ESTIMATES FOR 1917-18.

The Public Library estimates for 1917–18 as submitted by the library trustees to the Commissioners of the District of Columbia, with notes explanatory of the different items, are as follows:

### Estimates for 1917-18.

	Appropria- tion, 1917.	Estimate, 1918.
LIBRARY AND BUILDING FORCE.		
Librarian.  NOTE.—The trustees have for many years been recommending that the salary of the librarian be increased to \$5,000. This sum is required to make the salary commensurate with the services rendered and to put it on a par with the salaries paid to chief librarians of other municipal libraries of equal rank.	\$3,500	<b>\$5,000</b>
Assistant librarian  NOTE.—By reason of the inadequacy of the present salary the library has lost a succession of efficient assistant librarians. The present incumbent is very competent. Such frequent changes lower the efficiency of the service	1,500	2,000
Chief, circulating department.  NOTE.—This officer has charge of more than 20 assistants required to handle the large circulation of adult books from the central library and has supervision of the high-school and settlement stations and the picture collection. These large responsibilities require better compensation.	1,200	1,500
Director of children's work Children's librarian. Assistant in charge of school work Note.—The work with schools has so increased that the home circulation through them (170,000 volumes per year) is considerably greater than that of the public libraries of many of the smaller American cities. The increase is in accordance with the salary originally estimated as requisite.	1,500 1,000 1,000	1,500 1,000 1,200
Librarian's secretary.  Takoma Park branch librarian Chief, order and accessions division.  Note.—The volume and complexity of the book-order work require an adequately paid chief having a business ability and knowledge of books, their prices, etc.	1,000 1,000	1,000 1,000 1,200
Reference librarian.  Note.—It is impossible to get and retain a strong person, well equipped with education and training for the salary new paid.  Chief, industrial division	1,000	1,200
Note.—The success of this division during 9 years and the importance of the service justify and require a well-educated and trained chief. The work is suffering from the failure to make this provision long estimated for.		1,200

### Estimates for 1917-18—Continued.

	Appropriation, 1917.	Estimate, 1918.
LIBRARY AND BUILDING FORCE—continued.		
Director of library training class.  Note.—The library has for the past 12 years conducted a class for training junior assistants. During that time hundreds of persons have applied for admission, more than 200 have been examined for entrance, and more than 100 have taken the course, now 8 months long. The work of conducting		\$1,200
100 have taken the course, now 8 months long. The work of conducting examinations and of giving instruction has been borne by a very much overburdened staff. In view of the low salaries paid and consequent resignations, the class is essential. Junior members of the staff would also profit by urther instruction in library methods. A well-equipped instructor is much needed.	,	
Assistant in charge of periodicals Assistant in charge of binding. Note.—This work requires good judgment, a critical knowledge of methods	\$1,000 1,000	1,000 1,000 1,000
and materials, a high degree of accuracy and initiative. Assistant. 6 assistants, at \$840 each.		
7 assistants, at 840 each.  Norr.—An additional assistant of this grade is needed in the industrial division.		5,880
6 assistants, including 1 for Takoma Park branch, at \$720 each. 7 assistants, including 1 for Takoma Park branch, at \$720 each. Nort.—The arctitional assistant is needed in the work with schools.		5,040
3 assistants, at \$600 each 3 assistants, including 1 for Takoma Park branch, at \$540 each	1,800 1,620 540	1,620
Chief, catalogue division  Note.—The volume and grade of the work that is being done require an officer of high technical skill and good administrative ability to cope with it. At least 14 cataloguers holding subordinate positions in local libraries receive as much as or more than the estimated salary. There is at present no specific provision in the law for such an essential officer.		
Classifier Shelf lister Note.—An expert, accurate to a high degree, is needed to maintain the	900	900 840
	840 720 1,200	840 720 1,200
Shell fist, an essential record. Cataloguer. Do. 2 cataloguers, at \$800 each. Stenographer and typewriter. Note.—The increase in correspondence makes an additional stenographer necessary. One of sufficient skill can not long be retained at \$720. Stenographer and typewriter.	1,200	900
Stenographer and typowriter.  Attendant. 2 attendants, at \$720 each  Note.—The increasing work of the circulating department demands an additional attendant of this grade.	720 720	720 1, 440
tional attendant of this grade. 6 attendants, at \$600 each 5 attendants, at \$540 each Collator	3,600 2,700 540	3,600 2,700 540
tional attendant of this grade. 6 attendants, at \$500 each. 5 attendants, at \$540 each. Collator. Shelf curator and head page. Note.—A man is needed who will be able to maintain discipline in the constantly changing force of pages, inspect their work, fix responsibility, and keep it with a foregrade.		900
it up to standard. 3 messengers, at \$600 each. 10 pages, at \$420 each 3 andrors, at \$480 each Janitors at Takoma branch Engineer Fireman Workman Ubraw	1,800 4,200 1,440 360	1,800 4,200 1,440 360 1,200
Engmeer Fireman Workman Library guard 2 cloak-room attendants, at \$360 each. 6 charwomen, at \$240 each.	1,200 720 600 720 720	720 600 720 720
	1,440 54,060	1,440
Total for salaries	27,000	01,130
For substitutes and other special and temporary service, at the discretion of the		
librarian.  For substitutes and other special and temporary service, including the conducting of stations in public school buildings, playgrounds, social settlements, and in other suitable agencies at the discretion of the librarian.	1,000	3,000
possible to open a number of library stations in suburban schools and in the new playground buildings and to conduct stations in several social settlements. In this way library facilities could be extended to families not now		
reached.  For extra services on Sundays, holidays, and Saturday half holidays  Note.—It has long been desired to circulate books for home use from the central library on Sundays. That could be done with the suggested increase.	2,000	2,500

### Estimates for 1917-18—Continued.

Note.—The expanding work of the library brings a constantly increasing flood of books to the bindery. For maintenance, repairs, fuel, lighting, fitting up buildings, lunch-room equipment: purchase, exchange, and maintenance of bicycles and motor-delivery vehiles, and other contingent expenses. For mintenance, repairs, fuel, lighting, fitting up buildings, lunch-room equipment; purchase, exchange, and maintenance of bicycles and motor-delivery vehiles; also traveling expenses of librarian incidental to the acquisition of books by purchase, gift, or exchange, in studying other library systems, and in attending library association meetings, at the discretion of the board of library trustees; and other contingent expenses.  Note.—The library trustees believe that it would be of great advantage to the library to be able from this fund to send the librarian to visit the important book markets, to study the workings of other libraries, and to attend important professional meetings. Respectfully submitted on behalf of the board of tibrary trustees.

Theodore W. Noyes, President of Library Trustees.

### REPORT OF THE LIBRARIAN.

Washington, October 2, 1916.

GENTLEMEN: I have the honor to submit my report on the work of the Free Public Library during the fiscal year ended June 30, 1916,

covering the twelfth year of my service as your librarian.

Heretofore the report submitted to the library trustees has consisted of a statement by the librarian describing the year's work in considerable detail. Appended to the librarian's report have been fuller statements and statistical tables by heads of divisions of the library service. This year, however, brief statements by heads of library divisions have been incorporated into the body of the librarian's report. Appendix matter, therefore, consists almost entirely of statistical tables.

In spite of an increase in the work of the library of 11 per cent in 1915, Congress provided for no enlargement of the library staff for the fiscal year 1916. Instead of showing stationary library work that ought in reason to result from such a condition this report shows an increase of nearly 10 per cent in work accomplished, as measured by the home circulation of books. In the face of the need of an increase in force commensurate with these large yearly increases in the work, again the library entered another year with a stationary staff, with which it seemed as though it would be obliged somehow to struggle through, had not the appropriation bill for the fiscal year 1917 become a law on September 1, two months after the beginning of that fiscal year. The new appropriation act has happily given small increases in salary to nearly all of the greatly underpaid junior members of the professional staff and has increased the force by 3 persons, instead of by 14 as called for in the library's estimates as submitted to the District Commissioners.

### CIRCULATION AGENCIES AND WORK; REGISTRATION.

The library utilized in serving the 364,000 residents of the District, besides many District persons domiciled in Maryland and Virginia, 181 different agencies. This number was 15 more than were used in 1915. These agencies included the following: The central library; the Takoma Park branch library; 9 stations, 5 conducted in social settlements by volunteers and 4 conducted by assistants paid by the cooperating institutions; 7 public high school libraries; 5 stations in grammar-school buildings, 3 conducted at the expense of parents' associations and 2 conducted by the staff of the Takoma branch; 118 grammar schools; 10 playgrounds; 14 home-library groups, and 16 miscellaneous agencies. In addition withdrawn books were sent as permanent transfers to 20 charitable and correctional institutions for the reading of their adult and child inmates.

The figures of home circulation for the year were 880,043 volumes, as compared with 802,998 in 1914-15, an increase of 77,045 volumes, or a gain of 9.6 per cent. In addition 110,930 pictures were lent for home or school use, an increase for the year of 17,185, or a gain of 18

per cent.

The distribution of these 880,043 volumes was accomplished by the following agencies: Central library, 559,730; Takoma Park branch, 38,434 volumes (including 6,069 through two school stations); deposit stations and other outside agencies, 61,699 volumes; high schools. 13,614 volumes; 3 school stations, 12,436 volumes; graded schools,

playgrounds, and home libraries, 173,285 volumes.

The total number of registrations for the year was 16,850, as against 17,125 for the previous year, a decrease of 275. The registered card holders now number 49,448, as against 47,244 the previous year. The decrease of 92 in the adult department may be attributed to the registration of few foreigners and the transfer of 94 borrowers from the central library to the Takoma Park branch. The juvenile department records an increase of 48, Takoma Park a decrease of 216, and one deposit station a decrease of 15. Teachers' cards in active use number 1,174; student privilege cards, 681. There were 225 teachers' cards issued to normal-school pupils. The privilege of drawing books on \$5 deposits was granted to 91 strangers. number of men registered in the adult department was 43.5 per cent and the women 56.5 per cent of the total. Included in the adult registration are 1,386 minors over 16 years of age. (From the report of Miss Grace B. Finney, chief, circulating department; for statistics see pp. 32-41.)

### ADULT CIRCULATING DEPARTMENT.

A steady increase in all activities, including number of books issued, pictures circulated, etc., with a corresponding increase in the clerical work of the department, prevented any variation or extension of To keep abreast without serious embarrassment, hours at the information and open-shelf room desks were shortened and departmental staff meetings omitted. The total circulation of books by the adult department, including 7 high schools, 9 stations, and 3 other agencies, was 458,762, an increase of 24,568 over last year. were issued from the desks of the adult department, central library, 383,449 books (fiction 236,695, nonfiction 146,754), as against 377,419

for the previous year, an increase of 6,030.

There is need for an enlarged staff if the public is to be served expeditiously, if it is to be interested and held. Pressure of work is often so intense as to decrease the efficiency of the assistants and prevent them from giving the public the service of which they are capable. Enlarged quarters are needed for an open-shelf room, where individual work can be conducted among boys and girls over 16 years of age, in addition to giving assistance to adult readers. Lack of a separate fine arts department has been felt for several years. Additional assistants with broad educations and with special knowledge of the literature of the arts would be the necessary adjuncts to such a department, which would broaden still more the educational work of the library. (From the report of Miss Grace B. Finney, chief, circulating department; for statistics see pp. 32-36.)

#### TAKOMA PARK BRANCH,

The circulation of 38,434 volumes from the Takoma Park branch and two school stations is an increase of 5,219 volumes over the year 1915. There were 609 registrations, a decrease of 215 from last year. The actual number of borrowers is 2,444. The net strength of the Takoma book collection is 5,222 volumes. During the year the central library lent the branch 1,111 volumes, most of which were special requests. Of the 79 periodicals on file more than half the number have been placed here through the kindness of Dr. George H. Heald, editor of Life and Health.

Lists have been made, and a larger amount of reference work has been done in both adult and juvenile departments. The Brightwood, Brightwood Park, and the Takoma Park public schools were visited by the branch children's librarian, who also conducted 40 story hours at the branch and at the Woodburn School, with a total attendance

of 894.

The average daily attendance of 110 shows a slight increase over 1915. Thirty-six meetings were held in the library, two illustrated lectures were given, and five flower exhibits attracted 1,254 people to the branch. (From the report of Miss Rebecca P. Warner, librarian Takoma Park branch; for statistics see pp. 34–35.)

#### DEPOSIT STATIONS AND OUTSIDE AGENCIES.

A circulation of 61,239 books, an increase of 19,117 over last year, from nine deposit stations, conducted with one exception by volunteers, and from three other agencies receiving from 50 to 100 books a year, is due to the spirit and enthusiasm of the librarians, several of whom worked hours overtime to accommodate borrowers obliged to wait in line past library hours. The hearty cooperation of resident workers at social settlements in keeping order and good humor in waiting lines proved great factors. Larger results could be obtained if it were possible to place all stations under the direct supervision of library assistants, with closer relations between the central library and stations. A progressive improvement in the quality of books read at social settlement stations, where librarians have prac-

tically no time for individual attention, is noteworthy.

The circulation of 16,674 at social settlements, in the southwest section of the city, where the total hours open were only 312, points to the need for additional hours of opening there. As few of the borrowers are ever transferred to the main library unless there is change of residence to the northwest section, the establishment of a branch library in the southwest would reach a large population not now able to enjoy library privileges. Unwillingness to visit social settlements, no suitable clothes, and lack of car fare to come to the central library are reasons given by many for their failure to use the library. Taking the present record as a basis, with a branch open daily there would be circulated at least 150,000 books yearly to persons in the southwest whom the main library never sees. (From the report of Miss Grace B. Finney, chief, circulating department; for statistics of stations see p. 36.)

#### THE INFLITENCE OF THE WAR.

The influence of the world war was felt in all branches of the circulating department. Few foreigners registered. The books in all modern languages circulated, except Spanish, showed a decrease. For Spanish books there is a constant demand, due to the stimulation of trade with South American countries. A special war collection of books covering all sides and phases of the question showed a circulation of 10,144. Books on diplomatic and international relations, economic conditions, naval and aerial warfare, and preparedness formed a large part of this collection. Duplication was necessary to meet the demand for late books and for books on military training. infantry drill, and field-service regulations, caused by the formation of military training camps and by circulars issued by the War Department recommending a reading list for applicants for admission to these camps. Teachers and pupils drew largely from the European war collection of pictures for use in connection with lessons about European countries. (From the report of Miss Grace B. Finney, chief. circulating department.)

#### REFERENCE AND INDUSTRIAL DEPARTMENTS.

Several new projects have been carried out in the reference department during the past year, notwithstanding the fact that the department has been without a head since November, 1915, and that the number of assistants remained the same. The work with schools began with a rush the latter part of September and continued steadily through the year. The routine work has been carried on, and in addition everything possible has been done to supply the requests of the users of the room. Several bibliographies have been made, the one on Florence in particular being extensive. To the equipment of the room there have been added a new case for current periodicals and a revolving map rack, both of which are much appreciated. (From the report of Miss Katharine K. Patten, acting reference libra-

rian; for statistics see pp. 36-37.)

The industrial department closes its ninth year of separate existtence with a record for home circulation nearly three times that of nine years ago; the staff available for this work has remained practically stationary during this time. The department now has 12,500 volumes, all on open shelves. The new and present-day subjects have been given special consideration by prompt purchase of available material. A year ago there was reported a gain of 8.74 per cent over the previous year; the past year showed a gain of 3.43 The vertical file is constantly in process of addition and per cent. The trade catalogue collection, which is a unique feature of the department, has been renewed and largely increased. large amount of reference work done here is of an extremely practical character and reaches a large number of professional men as well as business men and mechanics. It is to be regretted that it is necessary to mark time, so to speak, when the field of service is large and much progressive work could be done except for lack of proper provision for the needs of the work. (From the report of Miss Ruth H. Todd, chief, industrial department; for statistics see p. 37.)

## CHILDREN'S DEPARTMENT.

The children's department has subjected itself to fresh examination this year to see what it is actually doing and what more it could do as a part of the public educational system better to prepare children for citizenship.

The task was found to be threefold—to supply those books that best help the children to form high ideals and to convert them into action; to make such books accessible through extension work to the children who can not come to the library; and to assist children who do

come in using them to the best advantage.

It is believed that the standard of book selection is high, and that through the cooperation of other agencies working with children the library is able to reach a larger number each year. The record is as follows: 148,000 volumes circulated from the children's room, a gain of 10 per cent over last year; 168,000 volumes through the school division, a gain of 20 per cent; 17,000 volumes through other agencies, a gain of 35 per cent; an actual gain of 45,000 volumes circulated last year through all children's department agencies, or 16 per cent; 110,000 volumes gained in two years, or 50 per cent. This was done with only one addition in the staff of the children's department, with

assignment to the school division.

Despite this showing of advance it is possible to do very little in the way of personal direction of the children's reading. Repeated experience shows us how rich in results this personal work with the children is, and members of the staff are trained in the knowledge of juvenile books and in the educational motives underlying the work for this specific purpose, yet often it is necessary to leave the children to untrained, inexperienced students and pages in order that the staff may attend to the insistent details of routine work. Such an arrangement is of course the direct reverse of the proper one, but can not be remedied until the staff is increased, and it will take several additional people before we can give the children the personal attention they should have. There is special need of an extra reference assistant and a story-teller and club worker who can direct the children through small groups. Plans are definite for these additional helpers, and a constant effort is made to lop off every effort which does not justify itself in results for the labor involved. (From the report of Miss Clara W. Herbert, chief, children's department; for statistics see pp. 38-40.)

#### WORK WITH SCHOOLS.

Washington has 70 square miles of children. It has one main library, centrally located, and one branch remotely situated to reach these 65,000 children. The only possibility until we have branches of reaching them with books is through the schools which are so placed as to be within reach of each District child. The teachers in the Washington schools, being progressive, realize the crying need of the children for books and can and do act as distributers. Last year we circulated 170,000 volumes through 116 schools. This is 20 per cent more than in 1915 and 60 per cent more than the circulation of two years ago; yet our force is just the same. The vital service that we have given here and there is reported among the teachers, and

fresh calls come. The school division of the library should be able to answer these calls, to visit schools for consultation and supervision; but time, energy, and funds were inadequate for last year's demands. Help is necessary if the school work is to hold its ground. No method could be so economical as ours, and yet Washington, which is in a class by itself in its lack of branch libraries, is from limited funds not even fully able to use this cheaper method. (From the report of Miss Louise P. Latimer, supervisor, work with schools; for statistics see pp. 40–41.)

#### LECTURE-HALL AND STUDY-ROOM USE.

The record of 87 meetings held in the lecture hall shows a decrease of 10 from the previous year; recorded attendance at such meetings of 12,118 is an increase of 194. In the study rooms and children's room 43 organizations held 280 meetings with a recorded attendance of 3,456, an increase of 325. The opening of the lecture hall on Sundays to the Grover Cleveland Community Forum for 11 meetings and to the Woman's Single Tax Club for one Sunday meeting brought to the library 3.717 persons. There were 7 lectures on first aid given by Dr. M. J. Shields to 663 members of the Metropolitan police department. Two foreign societies, the German Readers' Club, and the Scandinavians of the city held meetings, the latter to celebrate the adding of a collection of Scandinavian books to the library. The influence of the war was noticeable in the meetings held by the Anti-War League, League for World Peace, Rational Defense League, and Washington Peace Society. Other organizations meeting at the library devoted one or more meetings to lectures on democratizing the Army, national defense, peace, preparedness, etc.

The study clubs are becoming more diversified each year. A growing tendency among several of them is to have subjects discussed by prominent lecturers at monthly and bimonthly meetings held in the smaller study rooms, in addition to the lectures given in the assembly hall. Among such clubs may be mentioned the Anthropological Society, Anti-War League, Capital Poultry and Pigeon Association, Society for Philosophical Inquiry, and Woman's Single Tax Club. (From the report of Miss Grace B. Finney, chief, circulating department; for table of organizations holding meetings in lecture

hall and study rooms see pp. 41–44.)

#### PICTURE COLLECTION AND EXHIBITIONS.

The mounting of 3,921 pictures during the year increased the collection of mounted pictures to 38,620. The number of unmounted pictures added has been much larger. The picture post cards in the collection now number 3,886; they are frequently borrowed for use in card projectors and stereopticons. The circulation of 110,930 mounted pictures shows an increase of 17,185. Requests were received from 496 teachers, representing 126 grammar, 7 high, 2 normal and 16 private schools, 5 colleges and universities, and 42 Sunday schools. Miscellaneous calls are becoming more diversified. Numerous calls from lecturers, art and literary clubs are regularly received. Lecturers, artists, and a scene painter have found in our collection the material required for illustrating books and for painting a theater curtain.

Costume pictures furnished designs for French and children's fancy dress balls given for the benefit of war sufferers. Pictures of foreign and oriental scenes were borrowed for use in designing tableaux given by the American Bible Society at Convention Hall. The Shakespeare tercentenary created a demand for Shakespearean pictures to be used in public and private school pageants. Pictures were loaned to Westhampton College, Richmond, Va., for a college

pageant and to the president of an art club in Ohio.

One of the most popular library exhibits in the exhibition cases was the display of 200 Shakespeare pictures. Through the efforts of Mr. Joseph L. Wheeler, formerly assistant librarian here, this library was the first to receive the traveling exhibit of 30 colored photographs sent out in August by the officials of the Panama-Pacific Exposition. The European war furnished the subject for an exhibit of 150 colored pictures of the places on the battle fronts. The Washington Society of the Fine Arts lecture courses did not furnish topics suited for exhibitions. The rapid making of history, numerous items of interest about men and women of local and world-wide fame, and other interesting current events necessitated weekly or biweekly changes of pictures on the wing frames. The United States Biological Survey bird-arrival bulletins, and corresponding bird pictures, were shown during the spring months.

The increased activities of the picture collection and exhibitions point to the need for more space for the accommodation of patrons who tax the picture room to its utmost capacity during certain hours of the winter months. The growing demand for consultation and study of art books in connection with pictures in the room emphasizes the need of a separate fine-arts department in charge of an enlarged and expert staff, as outlined in last year's report. (From the report of Miss Grace B. Finney, chief, circulating department; for

statistics see p. 44.)

## ACCESSIONS-PURCHASES, TRANSFERS, AND GIFTS.

The net strength of the library's collection on June 30, 1916, was 185,136 volumes. The accessions numbered 20,225 volumes, including 15,471 purchases, 1,807 gifts, 2,622 copyright transfers from the Library of Congress, and 355 serials bound. The number of volumes withdrawn was 14,302, so that the net increase was only 5,953 volumes, a smaller number than in former years. The total expenditures for books were \$11,992.63, the average cost per volume being 77½ cents. The book fund is still inadequate, in view of the necessity for buying many duplicates to provide for the steadily increasing circulation, for replacing books which wear out, and for buying the new nonfiction of merit, for which there is a continued demand.

Among the gifts received during the year were 833 volumes of recent publications from the Evening Star Newspaper Co., 7 autographed books from Mr. George Iles, a valuable collection of numbers of periodicals from the Cosmos Club, and a large gift of pamphlets and newspapers relating to Washington from Mr. W. V. Cox. (From the report of Miss Emma Hance, chief, book-order department; for statistics, see p. 45; for list of donors and their gifts see pp. 48-52.)

#### CATALOGUE DEPARTMENT.

The figures submitted this year by the catalogue department compare favorably with those of last year. The total number of volumes classified and catalogued was 16,967; the number shelf listed was 20,274. On account of resignations and sickness there has not been much opportunity for completing work already mapped out. Several important pieces of re-cataloguing have been finished, however, and preliminary work was started on the analysis of the reports of the Smithsonian Institution for 1903–8, but owing to the death of one of the senior cataloguers this had to be postponed. An interesting feature of the work for the coming year will be the revision of the children's catalogue, using as a basis the "Subject headings for juvenile catalogues," by Miss Margaret Mann.

The comparison of the subject headings of the library catalogue with those of the new edition of the American Library Association list has been completed, resulting in the addition of many new head-

ings and a general revision of the old ones.

To meet the needs of Scandinavian readers, a small number of books in Swedish, Norwegian, and Danish were purchased last year. Since then the collection has been considerably augmented by the addition of 442 copyright transfers from the Library of Congress, making in all about 500 volumes. As printed cards were available for practically all the titles, the process of cataloguing was made easy and expeditious. The library is very much indebted to Mr. Carl E. Andreen and Mr. Harold W. Foght for their generous cooperation.

The formation of the District Orchestra during the year bids fair to increase the circulation of musical scores, and in consequence a special effort was made to complete the cataloguing of all orchestral and chamber music on hand. (From the report of Miss Julia H. Laskey, chief, catalogue department; for statistics, including inventors.)

tory records, see p. 46.)

#### BINDERY DEPARTMENT.

The fourth year of direct management of the library's bindery has brought new problems for solution. With fewer people to do the work and with the same appropriation, which had proved inadequate when prices were normal, it became necessary to readjust the general The marked advance in prices of materials was scheme of labor. anticipated, on the bulk of the purchases, by placing the major part of the orders for manufacturing stock early in the fiscal year. durability and economy of leather for books in constant service are now indorsed by leading librarians, and it is with keen regret that we abandon the use of leather, which war prices have put beyond our means, except for a possible fifth of our output. The purchase of red rope paper in sheets in place of rolls for the purpose of reinforcing magazines and pamphlets is worthy of mention. The usual amount of attention has been given to improving methods and adapting processes to special types of work.

There have been several notably large gifts of magazines received, and valuable exchanges have also been effected with both libraries and magazine dealers, enabling us to complete important sets of

periodicals.

The operating expenses of the plant, consisting of labor and materials, show a balance of \$371.76, in comparison with the cost of the same product under former contract prices, or a profit of S+ per cent

on the sum expended.

The work accomplished has been encouraging, but the number of books needing attention before they are available for use is constantly accumulating. The investment in book stock, thus lying idle, is the direct result of the inadequacy of the binding fund. Less than  $2\frac{1}{2}$  cents per volume is allowed for the maintenance of the present collection in good condition and for the binding of all magazines and other material received in unbound form. With less than \$1,000 available each year for binding materials the situation is serious. (From the report of Miss Elizabeth P. Gray, supervisor of binding; for statistics see p. 47.)

## PERIODICALS, PUBLICITY, AND CORRESPONDENCE.

At the central library 449 different magazines and newspapers are regularly on file; including duplicates, 604 periodicals are received; of this number 164 come as gifts. At the Takoma branch 24 period-

icals are received by paid subscription.

Insufficiency of staff made it almost impossible to prepare and print the usual multigraphed book lists heretofore issued in large numbers. It has also been found necessary to suspend the publication of the Educational Bulletin and the Social Service Bulletin. The Monthly Bulletin of new books has, however, been published regularly, thanks to the Sunday Star, in whose columns the book lists originally appear. As in former years the library has distributed many publishers' lists of books possessed by the library. Many copies of the list "Books Boys Like Best", issued by the Boy Scouts of America, were also distributed. Generally speaking, however, the library has been forced to suspend or reduce its publicity activities, in part because of lack of force to prepare material and of funds for printing, and in part because it lacks sufficient staff to handle the "new business" that such advertising would produce.

Records of outgoing mail matter show a total of 44,907 pieces. This total includes 5,186 dictated letters, 3,631 stenciled letters, 3,416 other sealed communications, 25,624 post-card notices, and 7,050 other

items, chiefly library publications.

#### LIBRARY STAFF.

The resignations of employees last year numbered 27 out of a total regular staff of 76, or more than 35 per cent. This number included 11 from the professional and administrative staff, 14 messengers and

pages, and 2 janitors.

The resignations from the professional staff included several who had been with the library for many years. Of these the most regretted is that of Miss Grace E. Babbitt, for many years reference librarian, who was obliged to retire on account of ill health. She is much missed by a large number of readers who highly esteemed her because of her pleasant personality and the efficient help and guidance they always secured from her. The library has, unfortunately, been forced to accustom itself to losing its assistant librarian every few years.

Although it was not unexpected that such a well-equipped man as Mr. C. Seymour Thompson would be called elsewhere to become a chief librarian, his loss is none the less keenly felt. The library's record of five different assistant librarians in less than 12 years is too high and points to the need for an increase in the salary of the position to reduce the number of such trying and wasteful changes.

This is a good opportunity to express appreciation of the fine esprit de corps and the high general level of efficiency of the library staff. After many years of effort the trustees and librarian finally secured from Congress general increases in the salaries of the junior professional staff of the library. These increases, though small, will give much encouragement to a staff hitherto shockingly underpaid, and will, it is hoped, reduce the economic pressure against which all members of the staff were obliged to struggle. It is hoped also that the relief afforded will somewhat reduce the resignations from the staff. It may be found, however, that the cost of living, which is advancing so rapidly, has more than outstripped the increases in salary, included in library estimates for several years and only now granted.

The librarian and five other members of the staff attended the annual conference of the American Library Association, at Asbury Park, N. J., in June. Mr. Thompson represented the library at the midwinter meeting of the A. L. A. Council. The librarian and assistant librarian (Mr. Thompson) continued to serve respectively as chairman and member of the committee on library administration of the American Library Association. The librarian is also a member of the committee on Federal and State relations of the A. L. A.

#### TRAINING CLASS.

At the close of the school year 1914-15, the word "training" was substituted for "apprentice" to define the character of the class. Although the work of the class has been kept very practical and its sole object has been the preparation of students for positions in this library, yet during the past year more emphasis has been placed on theory and on such instruction as would fit the student for future professional development than was done under the old plan, which concerned itself primarily with mastery of processes through "learning by doing." The work of the year has grouped itself under three heads, (1) practice in the routine of the various departments, (2) instruction in the evaluation of books, and (3) such lectures as would help to put the student in touch with general professional problems, with local conditions, and those world movements through which civilization is at present passing. As a help to a better understanding of the latter, a series of lectures on the development of Europe, given by Miss Ruth Putnam, was invaluable. The library is also indebted to the following for excellent talks: Mr. H. H. B. Meyer, of the Library of Congress; Miss M. P. Farr, Miss Eunice Oberly, Miss Clara W. Hunt, of Brooklyn, on various types of library work; Dr. W. S. Ufford and Mrs. J. P. S. Neligh on local civic conditions; Miss J. B. Silvester on health; Miss Anna Seaton-Schmidt on France and its art, and Mr. John H. Sherman on personal efficiency.

The class consisted of 12 persons, of whom 10 completed the course. With this class the course was lengthened to eight months. (From the report of Miss Clara W. Herbert, director of training class; for

#### ESTIMATES FOR MAINTENANCE EXPENSES.

Estimates for maintenance expenses of the library for the fiscal year 1917–18, as adopted by the library trustees and forwarded to the Commissioners, appear in the trustees' report, pages 12–14. They are there arranged, as required by law, in the order of the current appropriation act. The same items, rearranged to conform to the divisions of the library service, follow:

## MUNICIPAL LIBRARY EXPENDITURES AND SERVICE.

The publication of a comparative table of municipal library expenditures and service of all American cities above 200,000 population has come to be a regular feature of these reports. Such tables have also shown by computations for each city the per capita expenditures, the expenditures per volume circulated, together with totals and averages. Heretofore the population figures have for the most part been the official estimates of the United States Census Bureau, furnished to the library in advance of publication. This year such estimates were not furnished in time for use in compiling the table. Instead, the population figures used have been those of the World Almanac or estimates supplied by the municipal librarian of the city concerned. In such cases as Cincinnati and Portland, where the libraries serve the entire county, the population figures of the county are used. Omaha appears in the table for the first time, its population having passed the 200,000 mark by the annexation of territory.

The figures for maintenance and home circulation have all been derived from current annual library reports or from correspondence with librarians. They represent, for the most part, the calendar year 1915, but in several cases they include fiscal years ending as late as June 30, 1916, the period covered by this report. As heretofore, the figures for expenditures include not only those from taxes and appropriations, but also those from income from endowments and all other sources. An attempt has been made to exclude all extraordinary expenditures, such as those for sites, buildings, and other

similar betterments.

Although the fairness of doing so may be questioned as applied to a comparative table, yet last year, and again this year, the very large expenditures of the New York Public Library on its reference department (\$617,704) have been omitted, and the expenditures of that library for its circulation department only are given. Had that large sum been included, the New York Public Library's expenditures would stand at \$1,437,181, the per capita expenditures for the population served 47.3 cents, and the expenditures per volume circulated circulated 13.8. The municipal library expenditures for Greater New York would, with this big reference item included, reach a total of \$2,138,645; the per capita expenditures would figure out 40.6 cents, and the expenditures per volume circulated would be 12 cents.

In the following table the cities are arranged in the order of their

populations in 1910.

Municipal library expenditures and circulation, per capita, 1915 or 1916.

Cities (ranked census estimates).	Popula- tion, 1915 or 1916.	Expenditures, 1915 or 1916.	Per capita expendi- tures.	Home circulation, volumes.	Expen- ditures per vol- ume cir- culated.	Per capita circu- lation.

12 Combining figures of Public Library and Public School Library.

The foregoing table includes, with Washington, 32 cities. It will be seen that the per capita municipal library expenditures of Washington in 1916 of 21.2 cents were exceeded by 24 cities, that 7 cities spent less per capita, and that the average expenditure was 8.7 cents more than that of Washington. An addition of 8.7 cents per capita to the public library expenditures of Washington last year would have meant \$31,666. That sum added to the actual expenditures last year of \$77,337 would have given the library a total of \$109,003, a sum in excess of the estimates submitted by the library trustees to the commissioners last year and this year.

The table also gives evidence of the economical administration of this library. Its expenditures of 8.7 cents per volume circulated are nearly 2 cents per volume under the average of 11.6 cents for the 32 cities, including Washington. Incidentally it may be remarked that whereas the average for all cities above 200,000 has fallen sixtenths of a cent from last year (from 11.2 cents to 10.6 cents) the expenditures here have fallen eight-tenths of a cent (from 9.5 cents to 8.7 cents). Only 6 cities spend less per volume circulated than does Washington. It is believed that the average here is too low. The increases in the junior salaries effective for the coming year will

no doubt show an increase in this average, as it should.

This library's per capita circulation of 2.42 is below the average of 2.8. It is exceeded by 21 other cities. Even without the establishment of much needed branch libraries, the average here is rising by reason of the large circulation (170,000 volumes) through the school deposit collections. But the average for all cities above 200,000 is increasing more rapidly than is the local rate of increase. In other words, Washington, in its public library book circulation, although it is rapidly and steadily increasing, yet relatively speaking it is falling behind in the procession of municipal libraries in cities of its class. Its showing is especially poor when comparisons are made with such cities as Portland, Oreg., with a per capita circulation of 5, with Minneapolis, 4.18; with Seattle, 4.2; and with Louisville, 3.91. Until this library has a system of branches, properly supported and with more adequate support for the main organization and for other extension work, it will not be able to take the rank that the municipal public library of the National Capital should occupy—that is, become a model in its support and in the amount and quality of its service.

#### LIBRARY EXTENSION POSTPONED.

With the beginning of the school year the new Park View School will be opened. This model school building, planned not only for school purposes but to be a community center, has a large library room designed to accommodate a branch public library to serve the neighborhood. Except that the room is on the second floor, it conforms in other respects with the ideas expressed in the resolution adopted by the library trustees in 1912 and later adopted by the board of education by which it was proposed that new school buildings hereafter built in sections not otherwise supplied with public library facilities should be "provided with library rooms having outside entrances convenient to the street" and with the idea of conducting branches of the Public Library in them.

It is a matter of much regret not only to the citizens of the Park View region but even more, if possible, to the library management, that the plea presented by the Park View Citizens Association for a branch in the new school building had to be denied. This was absolutely necessary since the resources of the main library both in books and in service are still so inadequate that they could not be weakened as they would of necessity be by the occupation of an additional field.

The work of the main library has so increased during the past year that it has been necessary to discontinue for the coming year the station conducted with success for several years at the John Eaton School, Cleveland Park. A number of other applications for library service, including one from the Rhode Island Avenue Suburban

Citizens Association, have also had to be denied.

In spite of the postponement of library extension there is nevertheless reason for congratulation in the action taken by Congress in granting the earnest pleas of the library management to the extent of increasing all of the salaries of the junior professional staff. Is it too much to hope that this action may be taken as sufficient indication of the appreciation of the needs of the library service on the part of appropriation committees so that at the coming session of Congress the remainder of the present program for adequate library maintenance may be adopted, including an enlarged staff, better payment for administrative officers and senior assistants, and more money for books?

To the trustees for sympathetic interest and unfailing support in all efforts to advance the welfare of the library I offer my cordial thanks.

Respectfully submitted.

George F. Bowerman, Librarian.

The Trustees of the Free Public Library.

## LIBRARY STATISTICS ACCORDING TO FORM ADOPTED BY THE AMERICAN LIBRARY ASSOCIATION.

Annual report for year ended June 30, 1916. Name of library: Public Library of the District of Columbia.

Population served (latest statistics or estimate—state which): 363,980 (United States Census Bureau estimate).

Terms of use—Free for lending; free for reference. Total number of agencies: 181.

Consisting of: Central library, 1; branches (how many occupy separate buildings), 1 (in its own building); stations, 14; other agencies (subdivide: schools, clubs, etc.; also state number of schoolrooms and collections); schools. 125 (940 collections sent to 405 classrooms in 118 schools); home libraries, 14; playgrounds, 10; miscellaneous, 16.

Number of days open during year (central library): 362. Hours open each week for lending (central library): 72. Hours open each week for reading (central library): 79.

# SUMMARY OF RECEIPTS AND EXPENDITURES.

The library is supported principally from congressional appropriations, which are disbursed on pay rolls and vouchers audited by the District of Columbia Auditor. A complete statement of library receipts and expenditures would therefore combine these appropriations with the funds controlled by the library trustees. Appropriations revert unless expended within the fiscal year, so that there are no balances from them to carry forward. The following summary combines receipts and expenditures from appropriations and from the desk and donation funds.

Receipts.		
Congressional appropriations:		
Central library and Takoma branch—	\$47 TOO OO	
Salaries, regular roll. Salaries, Sunday and holiday roll.	2, 000, 00	
Salaries, employment of substitutes	1, 000.00	
Books	8, 500.00	
Dinding	4 500 00	
Contingent expenses.	9, 000.00	
Total congressional appropriations		\$72, 100.00

# AUDIT BY FINANCE COMMITTEE OF LIBRARY TRUSTEES.

We, the finance committee of the board of library trustees, hereby certify that we have had the accounts of the treasurer of the board audited, so far as the same relate to the desk fund and the donation fund, including the Henry Pastor Memorial fund and the Woman's Anthropological Society fund, receipts and disbursements, and find that all the receipts have been collected and accounted for; that the disbursements are represented by canceled checks and vouchers, and that the same are correct. We also certify that the balances shown by the report of the treasurer correspond to the balances in bank.

CHARLES J. BELL,

Chairman.

JOHN B. LARNER,

For Finance Committee.

The Board of Library Committee.

Washington, D. C., October 9, 1916.

I hereby certify that I have audited the desk fund and donation fund accounts of the Public Library and find that the revenue to which the library is entitled from these accounts has been collected and accounted for; that the disbursements from said funds have all been accounted for; and that the balance shown by the report of the treasurer has been verified and that the amount thereof is on deposit in bank, as of July 1, 1916.

A. S. VIPOND, Auditor.

FINANCE COMMITTEE, PUBLIC LIBRARY TRUSTEES.

# APPENDIX.

The Public Library of the District of Columbia was created by act of Congress approved June 3, 1896, as follows:

AN ACT To establish and provide for the maintenance of a free public library and reading room in the District of Columbia.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That a free pullic library and reading room is hereby estal lished and shall 'e maintained in the District of Columbia, which shall eithe property of the said District and a supplement of the public educational system of said District. All actions relating to such library, or for the recovery of any penalties lawfully established in relation thereto, shall elevable in the name of the District of Columbia, and the commissioners of the said District are authorized on lehalf of said District to accept and take title to all gifts, equests, and devises for the purpose of aiding in the maintenance or endowment of said library; and the commissioners of said District are further authorized to receive, as component parts of said library, collections of books and other pullications that may le transferred to them.

SEC. 2. That all persons who are permanent or temporary residents of the District of Columbia shall be entitled to the privilege of said library, including the use of the looks contained therein, as a lending or circulating library, subject to such rules and

regulations as may e lawfully esta lished in relation thereto.

Sec. 3. That the said library shall le in charge of a oard of li rary trustees, who shall purchase the looks, magazines, and newspapers and procure the necessary appendages for such library. The said oard of trustees shall le composed of nine members, each of whom shall le a taxpayer in the District of Colum ia, and shall serve without compensation. They shall le appointed by the Commissioners of the District of Colum ia and shall hold office for six years: Provided, That at the first meeting of the said oard the members shall le divided by lot into three classes. The first class, composed of three mem lers, shall hold office for two years: the second class, composed of three mem lers, shall hold office for four years: the third class, composed of three mem lers, shall hold office for four years. Any vacancy occurring in said oard shall be filled by the District Commissioners. Said oard shall have power to provide such regulations for its organization and government as it may deem necessary.

SEC. 4. That the said oard shall have power to provide for the proper care and preservation of said li rary, to prescribe rules for taking and returning ooks, to fix, assess, and collect fines and penalties for the loss of or injury to ooks, and to establish all other needful rules and regulations for the management of the li rary as the said loard shall deem proper. The said board of trustees shall appoint a li rarian to have the care and superintendence of said li rary, who shall be responsible to the fourd of trustees for the impartial enforcement of all rules and regulations lawfully established in relation to said li rary. The said li rarian shall appoint such assistants as the board shall deem necessary to the proper conduct of the li rary. The said oard of li rary trustees shall make an annual report to the Commissioners of the District of Colum is relative to the management of the said li rary.

Colum ia relative to the management of the said li rary.

SEC. 5. That the said library shall 'e located in some convenient place in the city of Washington, to 'e designated 'y the Commissioners of the District of Colum! ia upon the recommendation of the trustees of said library: Provided, That in any municipal 'uilding to 'e hereafter erected in said District suita ly provision shall 'e made for said li rary and reading room sufficient to accommodate not less than one

hundred thousand volumes.

#### RULES AND REGULATIONS.

The following are the regulations for the organization and government of the board of library trustees of the Free Public Library and reading room in the District of Columbia, constituted by act of Congress approved June 3, 1896:

ARTICLE I. The Loard of trustees shall hold regular meetings on the second Friday

of each month, at an hour and place to be designated by the trustees.

ART. II. The president of the oard may, and on request of three mem ers shall, call a special meeting, of which three days' notice in writing, and specifying the object of the call, shall be given. No other than Lusiness relating to such specified o ject shall be transacted at such special meeting.

ART. III. At the regular meeting in January of each year, which shall 'e called the

annual meeting, the officers of the oard shall be elected, except the librarian.

ART, IV. Notices of all meetings shall; e mailed to every mem er of the loard three days previous to the time of such meetings.

ART. V. Four mem'ers of the board shall constitute a quorum.

ART, VI. The officers of the loard shall consist of a president, a vice president, a secretary, and a librarian, who shall also act as treasurer and assistant secretary of the board. At each annual meeting the oard shall elect | y | allot from its own num er a president, a vice president, and a secretary, who shall hold their offices for one year and until their successors are chosen. A majority of the votes cast shall elect.

ART. VII. Any vacancy occurring in these offices shall e filled at any regular meeting or at a special meeting called for the purpose, y election, as aforesaid.

ART. VIII. At the regular meeting in June of each year the loard of trustees shall elect by viva voce a librarian to serve for the fiscal year eginning with the 1st day of July subsequent to said election. It shall require a majority of the whole I oard to elect a librarian, and he shall at all times le su ject to removal for cause ly a twothirds vote of the whole oard of trustees.

ART. IX. It shall be the duty of the president to preside at all meetings of the board, to appoint all committees not otherwise provided for, and to sign all papers communications, and instruments which may require his official signature. He shall also, in conjunction with the librarian, prepare for the consideration and approval of the loard, at its Octo er meeting of each year, the annual report of the board required by the organic act. He shall exercise a general supervision over the affairs of the li rary and shall e ex officio a mem er of all committees.

ART. X. In the a sence of the president, the vice president shall preside at all meetings of the board, and shall generally discharge all duties of the president in case of the latter's absence from the city or inability to act, or in case of a vacancy occur-

ring in the office of president.

ART. XI. The duty of the secretary is to keep a neat, exact, and permanent record of the meetings of the loard, to have the custody of the records and general papers of the board, and to perform the other functions usual in his office. The duty of the librarian as assistant secretary of the 'oard shall le to keep the formal minutes of the meetings of the board under the supervision of the secretary, and to prepare the same in form for submission to the secretary, and, in the absence of the secretary, to act as secretary of the board. The duties of the librarian as treasurer of the loard shall le to keep the financial account of the li`rary, and to lay I efore the I oard at each regular meeting a statement of the amount in the treasury to its credit. He shall have the custody of all moneys and accompanying papers of the loard, and shall deliver the same to his successor upon the termination of his term of office. All payments of any sums in the custody and control of the oard shall 'e made by checks of the li rarian, countersigned by the president of the loard. He shall give and to the loard in the penal sum of \$2,500 for the faithful performance of his duties in connection with the custody and dispursement of money.

ART. XII. The duties of the librarian shall be as follows: To take charge of the library and reading room, and he shall be responsible for the care and safety of the books and other public property contained therein to submit to the board of trustees, and to the proper committees, measures for securing the proper management and fullest efficiency of the library and reading room; to obtain for the library public documents of all kinds, as well as the publications of libraries, library associations, and other bodies whose proceedings and reports may afford information of value to the board or the users of the library; to keep carefully arranged for the use of the board lists of new books and publications, both American and foreign; to prepare for the use of the board lists of books and periodicals required to complete sets, to fill out such departments as are deficient, and to supply the place of books which have been lost; to keep a list of all books and publications donated to the library, stating the name and residence of

the donor and date when received; to classify and arrange all books and publications as soon as received, and to keep the same catalogued according to such plan or plans as may be approved by the board; to report promptly all flagrant cases of theft, mutilation, or injury of books and periodicals; to be responsible for the preservation of order in the rooms, and to be present, so far as may be practicable, in the library during library hours; to exercise control over the library and reading room, and all employees of the board, and to promptly report to the trustees any delinquency on the part of the employees; to keep exact and detailed accounts of all moneys received from fines and other sources, and report the same monthly to the board at the regular meeting; to submit monthly a report of all books added to and loaned by the library; to prepare and submit to the board an annual report, giving a full account of the working of the library during the fiscal year; to discharge such other duties as fall within the province of librarian and may from time to time be prescribed by the board.

ART. XIII. The standing committees of the board shall be as follows, each consisting of three members, to be appointed by the president: A committee on books, on

finance, on employees, on buildings, on rules, and on bookbinding and printing.

ART. XIV. Unless otherwise ordered, to the committee on books and the librarian shall be referred all matters relating to the selection, purchase, and exchange of books and periodicals, the sale and exchange of duplicates, and of all old magazines and papers not kept for filing and binding; and said committee shall make written recommendations to the board as to all matters referred to it. It shall be the duty of this committee to examine from time to time the books in the library, and to temporarily, pending the order of the board, exclude from circulation any and all books which it may deem offensive to good morals, and promptly after such action report the same to the board for its action. No purchase of books or periodicals to an amount exceeding \$100 shall be made except by authority of the board—entered upon its record—and all purchases made under this rule shall be reported to the board at its next meeting.

ART. XV. Unless otherwise ordered, to the committee on finance shall be referred all matters relating to the library funds and all claims, and it shall audit all accounts, including the report of the librarian, provided for in Article XI, and if such claims, accounts, and reports are correct certify them to the board, and in any event report

thereon with their recommendation.

ART. XVI. Unless otherwise ordered, to the committee on employees and librarian shall be referred all matters relating to the appointment, control, and remuneration of employees of the library, who shall report thereon to the board for its action; and all matters relating to the appointment, control, and remuneration of the librarian shall be referred to said committee for its report to the board for its action thereon.

ART. XVII. Unless otherwise ordered, to the committee on buildings shall be referred all matters relating to the rental, construction, alteration, repair, furnishing, heating, and lighting of the building and branch buildings to be used for the purpose

of the library for its report and recommendation.

ART. XVIII. Unless otherwise ordered, to the committee on rules shall be referred all matters relating to the rules for the government of the board, and to the same committee and the librarian shall be referred all matters relating to the government of the library and its employees, who shall promptly report thereon, with recommendations for the action of the board.

ART. XIX. Unless otherwise ordered, to the committee on bookbinding and printing shall be referred all matters relating to the binding and repair of books, the arrangement, printing, sale, and disposition of catalogues and finding lists, and statistics of circulation, and all matters relating to stamps, plates, labels, printed forms used in the library, and publications or printed matter issued by authority of the board, for its report and recommendation.

ART. XX. In addition to the above, such special committees may from time to

time be appointed as the board at its regular meeting shall direct.

ART. XXI., All reports of the committees shall be in writing and signed by the proper committee. A majority of any committee shall constitute a quorum thereof for the transaction of business.

ART. XXII. The order of business at regular meetings of the board shall be:

Call of roll.

(2) Reading of the minutes.

(3) Reports of officers.(4) Reports of standing committees. (5) Reports of special committees.

(6) Reading of communications. Presentation of claims.

(8) Election of officers, when proper. (9) Unfinished business.

(10) New business.

ART. XXIII. No money in the hands of the treasurer of the board shall be drawn from the treasury unless by special authority of the board, except in the case of the

purchase of books, not exceeding \$100 in value, as provided in Article XIV.

ART. XXIV. None of these regulations shall be amended until the said amendments have been proposed in writing to a regular meeting of the board, whereupon the succeeding regular meeting shall act upon such amendments, and a majority vote of the whole board of trustees shall be required to adopt such amendments.

# REGULATIONS FOR USE OF LECTURE HALLS.

The public use of the library's lecture halls shall be confined to such free public lectures and discussions as are clearly designed to foster interest in education, literature, history, art, science, and general civic improvement and the like, and the books in the library relating thereto. All such public lectures and discussions shall be nonpartisan, nonsectarian, and popular in scope, and general public attendance shall be invited by advance announcements and invitations through the local press. It is not designed to use the lecture halls for meetings of private organizations or for lectures or discussions that are likely to attract few auditors or to provoke controversy.

Applications for permission to use the lecture halls shall be addressed to the board of library trustees in writing and shall set forth the facts concerning the nature of the proposed lecture or discussion and pledges that these rules will be fully complied with. Each application must, before consideration by the trustees, bear the indorsement of the librarian that the hall is free for the date specified, and that the proposed use seems to conform with the purpose of these rules. Such applications shall be acted upon by the board at regular meetings on favorable report from the committee on building. In emergency cases, however, where a lecture hall is needed in advance of the next meeting of the board the president is authorized to grant the requested permission if the written application for such use is presented in due form, with the unqualified indorsement of the librarian and at least the chairman or the acting chairman of the committee on buildings.

In addition to the strictly public use of the lecture halls by outside organizations, the librarian is authorized, at his discretion, to grant the nonpublic use of the lecture halls or other suitable library rooms to the District of Columbia Library Association and to organizations and groups of public-school teachers, and to use any of the library rooms for invited audiences, in cases where the meetings are directly conducted by the library as part of its educational work. Such meetings would include the readings

and entertainments for the blind, children's story hours, etc.

## REGULATIONS FOR USE OF STUDY ROOMS.

Resolved, That it is declared to be the policy of the library trustees to confine the public use of the library's study rooms to the use by individuals or groups of individuals as places of quiet study. That in accordance with this policy the librarian is authorized to assign such study rooms to individuals, committees, or clubs for limited periods in order that such individuals, committees, or clubs may better avail themselves of the resources of the library by having books, periodicals, etc., sent to such study rooms on request. That such study rooms shall not be used by clubs having a regular order of business or any programs that are not closely connected with the study of the books and periodicals of the library.

#### LIBRARY RULES.

ARTICLE 1. The central library shall be open for the delivery and return of books and for reading and reference every week day from 9 a. m. to 9 p. m., July 4 and December 25 excepted. The central library shall be open for reading and reference

every Sunday from 2 to 9 p. m.

ART. 2. All persons who are permanent or temporary residents of the District of Columbia, including as temporary residents those who have regular business or employment in the District, shall be entitled to the privileges of the central library or of any branch library, including the use of books contained therein, as a lending or circulating library, by signing the proper application and agreement. Applications must be signed in person at the library and must be renewed every three years.

ART. 3. Minors under 18 years of age will be required to furnish the written consent

and guaranty of parent, guardian, or some person satisfactory to the librarian.

ART. 4. Temporary residents not owning real estate or regularly employed or doing business in the District of Columbia shall furnish a guaranty of some resident satis-

factory to the librarian, or shall, at the discretion of the librarian, make a deposit of \$5, this sum to be increased if, in the opinion of the librarian, the value of the books borrowed exceeds that sum. On surrender of cards issued on such deposits, the sums so deposited shall, after deducting unpaid charges or cost of replacing books lost or

damaged, be refunded.

ART. 5. Each person entitled to draw books from the library will be supplied with two cards inscribed with his or her name, residence, and register number. On the green card two books (other than fiction) may be taken out at a time. On the white card one book (either fiction or nonfiction) and a magazine may be borrowed. These cards must be presented whenever a book is taken, returned, or renewed. If lost, cards will be replaced upon payment of 10 cents after seven days. Immediate notice of a change of residence must be given at the library. The registered holder of a card is in all cases responsible for books drawn by means of the card, by whomsoever presented, and for all charges accrued on the same. Books and magazines may not be transferred from one reader's card to another. No card shall be lent outside the household of the holder. Both reader's card and book are stamped with the date they are due.

ART. 6. Very popular books and current magazines are called "Seven-day books," and are so designated by a notice on the inside and outside covers. These books may be retained seven days and may not be renewed. Other books may be retained two weeks and may be renewed once for two weeks unless reserved by other persons.

or more volumes of the same book will be considered as one book.

ART. 7. Books may be renewed by mail by sending the reader's card (on which the book was drawn), the author and the title of the book, and the call number, which will be found on the pocket on the back cover of the book. A self-addressed stamped envelope should be inclosed for the return of the cards. Books may not be renewed by telephone. After one renewal a book may not be taken out again by the same borrower or by any other member of the same household until it has remained on the library shelves for 24 hours.

ART. 8. Any book in the library (except fiction and seven-day books) may be reserved by the payment of 2 cents. Pay duplicate copies of new fiction may also be

ART. 9. Books of reference and those deemed by the library committee or librarian unsuitable for general circulation shall not be loaned for home use except upon special permission of the committee or librarian. Such books will be designated in printed catalogues by the abbreviation "Ref." and in card catalogues by the words "Refer-

ence book, does not circulate," stamped on the face of the card.

ART. 10. A charge of 2 cents a day for each book will be made for books kept overtime. No charge will be made for days on which the library is not open for the circulation of books for home use. Borrowers must take notice of the expiration of the time allowed. After due notice has been sent by mail, if the book is not returned, a messenger will be sent for it, who shall have authority to collect the amount incurred and an additional fee of 20 cents for such messenger service. No claim to exemption can be established because of failure of any notice to or from the library. No book will be delivered to persons allowing such charges to remain unpaid. Whenever a borrower will not pay such charges as may be against him his guarantor will be held responsible.

ART. 11. Books are not to be exchanged the same day they are taken out, unless

mistakes have been made by the library attendants.

ART. 12. If any borrower lose or materially injure a book, paper, or magazine belonging to the library, he shall pay the cost of replacement. If the book so lost or injured be part of a set, he shall pay for the entire set if single volumes can not be bought separately, and may thereupon receive the remaining volumes as his property. book retained for more than four weeks shall be considered lost, and the person detaining it shall, in addition to accrued fines, pay the full cost of replacing such book.

ART. 13. A neglect to comply with any of these rules shall work a forfeiture of the

privileges of the library.

ART. 14. Teachers' cards may be issued on which 10 books relating to their work in school may be drawn at a time and retained 28 days without renewal. Normal-school students' cards may be issued on which 5 books (other than fiction) relating to their work in school may be drawn at a time and retained 28 days without renewal. Books issued on teachers' and normal-school students' cards are subject to recall if required by other readers.

ART. 15. The librarian may at his discretion cause to be issued special privilege cards entitling readers who satisfy him of their need for such special privileges to 10 or more books other than fiction and recent purchases for use in pursuing courses of reading. Such privileges may be withdrawn at any time at the discretion of the librarian.

ART. 16. Works of special rarity and value shall be consulted only at the discretion of the librarian.

ART. 17. The readers' card must be surrendered at the library when the holder ceases to be a resident of the District of Columbia.

ART. 18. No library book or periodical shall be removed from the library buildings

without formal record. ART. 19. All books and periodicals belonging to the library may be used in the library buildings by any suitable person, in such places and under such conditions as

may be prescribed by the officer in charge of the reading room or of the department to which the book belongs. In all cases such books, periodicals, and other works must be returned to the desk before the borrower leaves the room where they are used.

ART. 20. The use of inks is not permitted in the reading rooms. Writing in books or marking the same is strictly prohibited under penalty of the law.

ART. 21. No dogs or other animals shall be permitted in the library buildings. ART. 22. The use of tobacco or the eating of viands of any kind, and all conversation or other conduct inconsistent with the quiet and orderly use of the library, are prohibited in all parts of the library buildings.

ART. 23. Men and boys shall remove their hats and remain uncovered within the

buildings.

ART. 24. These rules may be amended by a vote of a majority of the trustees at any regular meeting of the board.

## SECTION 849. UNITED STATES REVISED STATUTES.

Stealing or injuring books, and so forth.—Any person who shall steal, wrongfully deface, injure, mutilate, tear, or destroy any book, pamphlet, or manuscript, or any portion thereof belonging to the Library of Congress, or to any public library in the District of Columbia, whether the property of the United States or of the District of Columbia, or of any individual or corporation in said District, or who shall steal, wrongfully deface, injure, mutilate, tear, or destroy any book, pamphlet, document. manuscript, print, engraving, medal, newspaper. or work of art, the property of the United States, shall be held guilty of a misdemeanor, and on conviction thereof shall, when the offense is not otherwise punishable by some statute of the United States, be punished by a fine of not less than ten dollars nor more than one thousand dollars, and by imprisonment for not less than one month nor more than one year, or both, for every such offense.

# REPORT OF THE BOARD OF CHARITIES OF THE DISTRICT OF COLUMBIA.

To the Congress

(Through the Commissioners of the District of Columbia):

In accordance with the provisions of act of Congress approved June 6, 1900, the Board of Charities has the honor to submit its sixteenth annual report, the same being for the fiscal year ending June 30, 1916.

One change has occurred in the personnel of the board. The term of office of Mr. Emile Berliner expired June 30, 1916, and because of ill health Mr. Berliner requested that he be not considered for reappointment. Mr. D. J. Kaufman was appointed by the President to fill the vacancy created by the expiration of the term of office of Mr. Berliner.

The present membership of the board is as follows:

	j. e: Ju	l'er <b>m</b> xpires ne 30—
D. J. Kaufman John Joy Edson. George M. Kober. George E. Hamilton. John Van Schaick, jr		2101

# Officers.

John Joy Edson	President.
George M. Kober	Vice President.
George S. Wilson	Secretary.

## Standing committees.

On medical charities	George M. Kober, Chairman.
On child-caring work	John Van Schaick, jr.
On child-caring work	John Van Schaick, jr., Chairman.
	George E. Hamilton.
On reformatories and correctional institutions	George E. Hamilton, Chairman.
	D. J. Kaufman.
On miscellaneous institutions	D. J. Kaufman, Chairman.
	George M. Kober.

The president of the board is ex officio a member of all standing committees.

# ACTIVITIES OF THE YEAR REVIEWED.

In presenting a brief review of the work of the various institutions and organizations under the supervision of the board, the subject is considered under four general heads representing the work assigned to the four standing committees. The several branches of the work are considered in the following order: (1) Reformatories and correctional institutions; (2) medical charities; (3) child-caring institutions; (4) miscellaneous institutions.

# I. Reformatories and Correctional Institutions.

#### WORKHOUSE.

Much has been said in former reports of recent years relative to the organization and development of the District of Columbia workhouse at Occoquan, Va., and it is unnecessary to repeat in detail the infor-

mation given in recent reports covering this subject.

The past year has been marked by further development and improvement along many lines. Additional land has been reclaimed; roads and grounds have been improved; and additional buildings have been erected. A commodious storehouse for the handling of goods received and shipped has been erected at the wharf, and a large commissary building has been completed. From this commissary are now issued the supplies for all departments of the institution.

#### FOOD PRODUCTS.

The market value of farm products raised during the year was \$7.793.68. In addition, there were produced dairy products to the value of \$6,751.34; pork to the value of \$3,736.32; eggs and poultry to the value of \$1,639.21; fruits and berries to the value of \$832.71. The total estimated value of food products was \$20,753.26. Nearly all of the food products were consumed at the institution. Butter and eggs to the value of \$948.08 were shipped for use at the Tuberculosis Hospital.

# PRODUCTS OF INDUSTRIAL PLANT.

There were shipped to the District of Columbia 2,537,414 brick and 7,976 yards of crushed stone for use in public buildings and works. The total value of products shipped from the institution for the use of other departments of the District government was \$27,954.69. It is to be noted, of course, that not only are most of the food products consumed at the workhouse, but that during this period of development much of the brick and stone produced is used for buildings and roads at the institution, and much of the labor of the prisoners is utilized for the reclamation of land, erection of buildings, grading of railroad, building of highways, and other work of improvement and development.

During the past year a very considerable amount of labor of inmates has been utilized in work upon the tract of land purchased for a reformatory. It has required very considerable labor to erect temporary buildings, lay water and sewer mains, and do other work in preparing for the reception of prisoners at the new institution.

As time goes on and the land is gradually reclaimed and the plant more fully developed, a larger part of the labor of the inmates will be available for agriculture and manufacturing, and the earnings of the institution may be expected to become a substantial offset against the cost of maintenance. Whether the institution may ultimately become self-supporting is for the future to determine. It will depend not wholly upon the ability of the prisoners to produce, but to a very considerable degree upon the ability to find a sufficient market at reasonable prices. The matter of earnings and possible self-support, however, must always be held secondary to the matter of proper care. and discipline of the prisoners. Our experience thus far warrants

the confident belief that the new method of treatment, whereby wholesome employment in the open air is substituted for confinement in cells will prove not only more economical from a financial standpoint, but of infinitely greater advantage in the reformation of the prisoners.

INDETERMINATE SENTENCE AND PAROLE.

As pointed out in previous reports, the greatest handicap at present in the work of reformation is the system of short, definite sentences now prevailing, by which system it frequently results that the same prisoner is committed as many as four or five times within a single year. That is, commitments of 10, 15, and 30 days, with repeated offenses against the law leading to new commitments often a few days after discharge from the institution, render it well-nigh impossible to accomplish much in the way of permanent reformation.

There should be substituted, in our opinion, for the present system what is known as the "indeterminate sentence and parole system," whereby those persons guilty of repeated offenses would be sentenced to a maximum term of, say, two years, and during that period would be subject to parole upon record of good conduct at any time prior to the expiration of the maximum period. Such a system would not only obviate the necessity of frequent arrests and new trials, and thus eliminate a source of annovance and expense to the community, but would afford a substantial hope of reformation of many prisoners, whereas little permanent good can be expected from the shortterm commitments of 10, 15, and 30 days. Under the system of indeterminate sentence and parole, it would be possible to keep prisoners until there was evidence of substantial reformation; at the same time it would enable the parole authorities to release prisoners as soon as it appeared that they were likely to abstain from further offenses. It would, of course, be necessary in this connection to have competent parole officers who would have supervision of the prisoners upon their release until the expiration of the maximum sentence.

#### COMMITMENTS SHOULD BE MADE DIRECTLY TO THE WORKHOUSE.

A further change in the law—one that we have heretofore recommended and now most earnestly urge—should be made in order to provide for direct commitment of prisoners to the workhouse and avoid the necessity of sending them through the Washington Asylum and Jail, as is necessary under the present law. Prisoners are now committed to the Washington Asylum and Jail, and from that institution transferred to the workhouse upon order of the Commissioners of the District of Columbia. While this arrangement was satisfactory and convenient during the period of organization of the new institution, it is no longer necessary. The proper arrangement would be to give the court authority to commit directly to the workhouse, and the jail should be used merely as a place of detention for prisoners awaiting trial or other disposition by the court.

## NUMBER OF PRISONERS.

There has been no marked change in the number of prisoners at the workhouse in recent years. The number of commitments for the year ending June 30, 1916 was 6,458 as compared with 6,472 during the preceding year. The daily average population for 1916 was 634, while for the preceding year it was 622. Of the total number of prisoners committed during the year, 3,837, or considerably more than half, were committed for terms of 30 days; 11 were committed for terms between 30 and 15 days; 765 for terms of 15 days; and 42 for terms of less than 15 days; while 1,803 were committed for terms of more than 30 days.

#### REFORMATORY.

As indicated in speaking of the workhouse, much labor of the workhouse prisoners during the past year has been utilized in working upon the reformatory tract. Temporary buildings for the accommodation of 200 reformatory prisoners have now been almost completed, and the institution may be opened for the actual reception of prisoners within the next few weeks. The temporary buildings are of brick and concrete foundation with wooden superstructure. They were built of brick made, and lumber cut and sawed, by the prisoners on the reservation. It is proposed that the permanent reformatory buildings be erected by the reformatory prisoners, such prisoners being housed meantime in the temporary buildings now almost completed. The temporary buildings are of the dormitory type exclusively. There are no cells. It is proposed to receive at the institution in the first instance prisoners with comparatively short terms to serve or those who for other reasons may be regarded as reasonably safe prisoners—that is, those who have no special motive for attempting to escape.

A provision of law enacted in the last District of Columbia appropriation bill, provides that hereafter prisoners convicted of crime in the District of Columbia may serve their sentences either in the penitentiary or in the reformatory of the District of Columbia; and further, that the Attorney General, upon request of the Commissioners of the District of Columbia, may transfer District of Columbia prisoners from the penitentiary in which they may now be serving sentence to the reformatory of the District of Columbia.

The penal commission is now considering plans for permanent structures. It is proposed to arrange these buildings in such manner that the different grades of prisoners can be properly classified and segregated. The relative proportion of prisoners to be housed in dormitories and in cells will probably be determined in some degree by experience. It it proposed to begin with not to exceed 200 prisoners and to receive additional prisoners from time to time as the institution is prepared for their reception. It is hoped that the experience in dealing with prisoners during the years of construction will aid in determining in what degree cell houses and other methods of close supervision may be necessary.

The proposition to provide for all long-term prisoners committed from the District of Columbia at this institution is an undertaking of even greater importance than the organization of the workhouse. The establishment of the workhouse farm marked a new epoch in dealing with misdemeanants. The establishment of an institution for long-term prisoners along the lines of treatment introduced at Occoquan will be watched with the greatest interest and is destined

to have a far-reaching influence upon the whole question of treatment of prisoners throughout the entire country. The actual planning of this institution and the manner of its organization is still in the hands of the penal commission and does not come strictly within the purview of this board; but our interest in the matter has been most vital, both by reason of the fact that the president of this board is a member of the penal commission and the fact that the work of development carried on at the reformatory site thus far has been carried on by the prisoners from the workhouse. Certain joint services for both institutions, such as power plant, industrial railroad, and commissary building have been proposed and in part installed. Just how far the two institutions may be subjected to a joint management and control has not been definitely determined.

The indeterminate sentence and parole system, need of which has been pointed out in case of the workhouse, is of even greater importance in dealing with the class of prisoners that will come to the The system of indeterminate sentences, with the reformatory. hope of release on parole as a result of good conduct, is now well-nigh universal at the various State penal institutions. The need for such a system would seem to be even greater at an institution where it is proposed to introduce a method of treatment which grants to prisoners a much greater degree of liberty of movement than the system of confinement in cells. The indeterminate sentence and parole system furnishes a strong motive for good conduct on the part of the prisoners, because the length of stay at the institution may be materially shortened by release upon parole as the result of good conduct. The system would therefore very greatly lessen the danger of escapes, as it would in a large measure remove the motive for escape.

JAIL.

The population at the jail remains substantially the same as during the preceding year, the daily average number of prisoners being 253 as compared with 258 for 1915. The number of prisoners showed a marked decrease toward the close of the year, however, the number present on June 30, 1915 being 273 and on June 30, 1916, 196. It is to be hoped that the criminal courts may be able to hear cases more promptly than has frequently been the case in the past, so that the number of prisoners being held at the jail awaiting trial may be as low as possible.

#### NATIONAL TRAINING SCHOOL FOR BOYS.

The average number of boys at this school during the year was 396 as compared with 364 during the preceding year. Of this number 274 were District of Columbia boys and 122 United States boys. This school is one of the best equipped of our local institutions for reformatory work and affords opportunity for valuable training in industry and agriculture. Instruction is given in the elementary academic branches, in manual training, and in agriculture and horticulture.

## NATIONAL TRAINING SCHOOL FOR GIRLS.

The daily average number of girls at this school for the past year was 74 as compared with 80 the preceding year. As indicated in our

last annual report, important plans for the reorganization and conduct of this school have been considered by the board of trustees, and many of these plans have been put into operation during the past year. Since the completion of the new cottage the school is able to receive both white and colored girls. For many years it had

not been possible to receive white girls.

A marked change in the conduct of this school is manifest during the past year, particularly in the matter of discipline. There is a manifest change of attitude in the relation of teachers and employees toward the girls, and the discipline, while apparently more effective, is less rigorous than has heretofore been the case. Many changes in methods of handling the girls, in the way of granting greater freedom, the introduction of rewards for good conduct, and in other respects are evident. Systematic physical training has also been introduced and an effort is being made to properly direct the play and recreation of the girls. A more optimistic attitude toward these girls is evident on the part of the administration. It is hoped that experience will prove that these girls will respond encouragingly to the more liberal and progressive methods of discipline and instruction.

# II. MEDICAL CHARITIES.

# MUNICIPAL HOSPITAL.

In renewing the estimate for the building of the municipal hospital, we are constrained by a sense of duty to urge immediate and favor-

able action on the part of Congress.

The failure of appropriation for this hospital at the last session, in view of the peculiar stress of positive need, was unfortunate and to be deplored. From its organization the board has endeavored to impress upon Congress the necessity for a municipal hospital, a necessity made more acute by the insufficient, insanitary, inconveniently located buildings and equipment now used in the care of the indigent sick.

As far back as 1900 a recognition of need and condition prompted Congress to authorize and appropriate for a site for a municipal hospital to be selected and purchased by the Commissioners of the District of Columbia, and accordingly a tract of 32.5 acres of land at Fourteenth and Upshur Streets was purchased and plans for buildings prepared, and this tract was in 1907 enlarged by an additional purchase of 3.5 acres.

In 1906 the Tuberculosis Hospital was appropriated for and built, but the construction of the main municipal hospital has not been authorized, although each year urged upon Congress by this board, and by every successive board of District Commissioners.

In view of the statements contained in past annual reports, it is unnecessary for us to dwell upon existing conditions and to enlarge upon the need for a municipal hospital in the District of Columbia.

Realizing and recognizing the urgency of this need, we ask, first, that a sufficient appropriation be made to build a municipal hospital, and second, that this municipal hospital be located upon the site long ago selected and above referred to. This site was carefully selected, and in its selection all of the elements of judicious determination entered and controlled the choice of the commissioners. It was

located not only to meet well all present needs, but to care for the future growth and development of the city. It is high, healthy, central, convenient of access from all sections, close to street railways, and desirable from every point of view that could enter into the loca-

tion of a municipal hospital.

This board is aware of the fact that the citizens in the locality have and are opposing further hospital construction on the site referred to, but it would seem to us that these objections should be considered with regard, first, to the needs of the indigent, and second, with regard to the reasonableness of the grounds upon which they are based.

That the existing asylum hospital is inadequate, insufficient, inconvenient in location, and unhealthy in its surroundings, can not be denied. Its further continuance as a hospital is a wrong to the indigent, a detriment to the city, and a reproach to the Government.

To build the hospital on the site at Fourteenth and Upshur Streets is more economical and more easy of accomplishment than upon a site yet to be purchased, and the great public need involved in this question should outweigh neighborhood objection to hospital location.

But upon what sound basis does this objection rest? In the years intervening between the original purchase and the purchase of the additional land, the values in property had increased, as is evidenced by the greater price paid for the additional land. Since the purchase of that site for hospital purposes, a use well known in the community, real estate values have increased in the neighborhood and resident occupation has grown wonderfully, and this notwithstanding that the most objectionable part of a municipal hospital—the hospital for the care of tubercular patients—has been for a number of years located here and in operation.

The grounds are sufficiently large to contain a hospital surrounded on all sides by a park, which would prevent it from being a detriment or even an annoyance to the surrounding population, much of it coming to the neighborhood after the site had been purchased and the

use of that site proclaimed.

Again, would it be possible to acquire a like tract of land in any central or convenient neighborhood without incurring similar

objection?

In other cities municipal hospitals are located centrally, are built up around, and are accepted without objection, and the sentiment against hospitals, because of modern methods and modern direction, is steadily decreasing, and such hospitals are found, as stated, in the

midst of residential and business centers of many cities.

Believing that the present distressful conditions will continue indefinitely, unless the appropriation is made to build the hospital upon the site referred to, we earnestly renew our recommendation for an appropriation to build upon the site which, sixteen years ago, was wisely selected by the Commissioners of the District of Columbia and approved by the judgment of Congress.

## WASHINGTON ASYLUM.

The old Washington Asylum Hospital continues to perform an absolutely necessary service in a manner most creditable, considering the adverse physical conditions. We have submitted an estimate of

\$7,500 for a hospital kitchen at this institution and \$1,500 for its equipment. We feel impelled to submit this estimate because of the almost impossible conditions now obtaining. In a very small and poorly equipped kitchen the cooking is now being done for about 300 inmates and employees. If an appropriation for the erection of a new municipal hospital is made immediately this estimate for a kitchen might be omitted, but if there is to be any further delay in the erection of the new hospital, we urge the importance of the immediate appropriation of funds for a new kitchen at the present plant.

#### TUBERCULOSIS HOSPITAL.

The daily average number of patients at the Tuberculosis Hospital for the past year was 140, as compared with 124 during the preceding year. The population of this hospital has constantly increased since it was opened eight years ago. The most marked increase is shown during the past three years and is apparently due to the more general education of the public relative to the treatment of the disease. The doctors and visiting nurses who render aid to the indigent sick report that it is much less difficult than formerly to induce patients to go to the hospital. Hence we find an increased population in the hospital concurrent with a decrease of tuberculosis in the community. The institution is therefore rendering a constantly increasing service to the community by providing humane and efficient care for patients who, if allowed to remain in their homes and to go at large in the community, would be prolific sources of infection for others.

# III. CHILD CARING.

# BOARD OF CHILDREN'S GUARDIANS.

We again call attention to the importance of an adequate force of placing and investigating officers for the Board of Children's Guardians. A substantial increase in the working force of this board has been provided within the past three or four years as the result of additional appropriations. The force, however, is still inadequate for the task of proper placement and supervision of the large number of children committed to the guardianship of the board. We have submitted estimates, therefore, for further additions to this force and urge upon Congress the importance of the appropriations requested.

The total number of wards of the Board of Children's Guardians on June 30, 1916, was 1,928, as compared with 1,860 on June 30, 1915, an increase of 68. Of the 1,928 wards on June 30, 1916, 1,587 were permanent wards and 341 temporary; while on June 30, 1915, there were 1,677 permanent wards and 183 temporary. In other words, there is shown during the year an increase of 68 in the total number of wards, the number of permanent wards showing a decrease of 90, while the number of temporary wards increased 158. Two years ago the number of temporary wards was only 72. The great increase in the number of temporary wards in recent years is due to the policy of the juvenile court in making temporary rather than permanent commitments in most instances. One important result of the increase in temporary commitments is an increase in the expenditures of the Board of Children's Guardians for board for children. temporary wards can not readily be placed in free family homes but must usually be placed in boarding homes and institutions, because they must be returned to the court at the expiration of the term of

commitment. Permanent wards, on the other hand, can frequently be placed in free family homes where they will not be a source of expense to the community other than the expense of supervision. The expenditures for board of children, therefore, in recent years have increased much more rapidly, comparatively, than the number of children under care.

#### INDUSTRIAL HOME SCHOOL.

Attention is again called to the need of providing a new plant for this institution. If authorization were granted, in accordance with recommendations already submitted, for the sale of the present plant and the purchase of land and erection of buildings on a suitable site in the country, it is believed that the money obtained from such sale would be sufficient to purchase land and erect suitable buildings on a proper site where sufficient land can be obtained for agricultural and horticultural purposes. Because of the crowded condition of the school the board has submitted this year an estimate of \$25,000 for an additional cottage, which is urgently needed. We submit this estimate reluctantly because we do not believe that further permanent improvement should be made on the present site, and if the legislation requested authorizing the transfer of the school is enacted it would be unnecessary to make the appropriation for the cottage. We earnestly urge upon Congress, therefore, favorable consideration of this recommendation.

The average number of children cared for during the year was 144 as compared with 143 the preceding year. There can be practically no increase in the population of the school until additional accommo-

dations are provided.

# INDUSTRIAL HOME SCHOOL FOR COLORED CHILDREN.

The daily average number cared for at this school during the year was 92 as compared with 76 in the preceding year, an increase of 16. No further increase in the population is possible at this school unless additional buildings are erected. We have submitted estimates for three additional cottages which would accommodate an increased population of about 60. The school is crowded at all times and the Board of Children's Guardians has a large number of colored boys who need the training and discipline of this school, but it is impossible to receive them at present. They are consequently boarded in private homes or in institutions at Government expense and without the advantages that would come from the discipline of such an institution as The school is well conducted under the present administration and it should be enlarged to meet the demands upon it.

We also submit estimates for a cottage for the superintendent and

for a new barn, both of which are very greatly needed.

## CARE OF THE FEEBLE-MINDED.

One of the most urgent needs of the District of Columbia at the present time is that proper provision be made for the care of the feeble-Following the census of the feeble-minded of the District made by the Children's Bureau, showing a total number of approximately 800 such persons reeding supervision, a bill (H. R. 13666) was prepared by a subcommittee of the special citizens' committee on the care of the feeble-minded, and introduced in the House of Representatives by Representative Tinkham, of Massachusetts. A hearing

on this bill was given by the House Committee on the District of Columbia on May 4, 1916. There was a large and representative attendance upon this hearing sufficient to tax the capacity of the large committee room. Most of the larger and more important social agencies in the District of Columbia were represented. The project was earnestly presented and not a single voice was raised in opposition.

The bill provides, in brief, for the establishment of a home and school for feeble-minded to be located on a tract of land of not less than 1,000 acres in extent and to be built on the cottage plan. It further provides for a legal method of commitment and detention of feeble-minded persons and for suitable methods of instruction and employment. The board earnestly urges upon Congress the importance of early consideration and favorable action upon this bill. A postponement of action on this matter means not only hardship and even disaster to many of this unfortunate class, but entails a serious menace to the community because of the rapidity with which these people tend to reproduce their kind.

# IV. MISCELLANEOUS INSTITUTIONS.

#### HOME FOR THE AGED AND INFIRM.

An appropriation of \$26,000 was made in the last District appropriation act for the erection of an additional dormitory for colored women at this institution. Owing to the fact that the bill did not become a law until September 1, the building will not be available for use during the present winter. It is planned to erect a building that will accommodate from 60 to 65 inmates and thus afford accommodation in this department sufficient for many years to come. The building will be constructed in harmony with existing buildings and in accordance with the original plans of the institution.

An estimate of \$3,000 is submitted for the erection of a chapel and assembly hall. This institution has now a population of approximately 350, and there is no place other than the dining room where inmates can be assembled for religious services or for entertainment. With the small appropriation requested, the administration would be able to erect a building which would cost under contract at least twice that amount. This is because the administration is most successful in the utilization of condemned building materials, which are collected from various buildings in other parts of the District.

An estimate of \$2,500 is submitted for the renewal of the heating system. Many of the original steampipes have disintegrated because of the excessive moisture in the ground in which they are laid, and it is necessary to renew these pipes and install them in suitable conduits. An estimate of \$1,000 for renewal of roofs is also submitted. The limited amount of the original appropriation for buildings necessitated the employment of tin roofs and these have been a source of constant worry and expense because of the necessity of frequent painting and repairs. It is proposed to substitute asbestos tile, thus affording a practically permanent roof. A small estimate of \$850 is submitted to extend the fire mains in accordance with the recommendation of the fire department, and an item of \$500 for the purchase of material and erection of piggery. Also an item of \$450 for the purchase of a small power boat for towing scows. The institution could utilize a large amount of street sweepings for fertilizer if it had the means of moving loaded scows from Washington to the institution, and this

could be accomplished by the small boat which it is requested be

provided.

An important estimate is submitted for the purchase and installation of two electric generators. Attention has been called to this matter for several years past. The old generators which were installed when the buildings were erected are no longer in condition to furnish reliable light, heat, and power service. For several years there have been frequent breakdowns and an excessive amount of repairs has been necessary. This institution, located at a remote point in the country, is dependent for both light and power upon its own plant, and even a temporary breakdown is a source of serious inconvenience. The plant also furnishes heat and light for the Industrial Home School for Colored Boys located on the same reservation.

#### MUNICIPAL LODGING HOUSE.

We are pleased to report an appropriation of \$40,000, made in response to an estimate submitted last year, for the purchase of land and erection of a new building for the municipal lodging house, to take the place of the present dilapidated, insanitary structure which has been used for many years. The commissioners have advertised for sites and several parcels of land have been offered, from which it is believed a suitable site can be selected. It is hoped that work upon the building will be begun at an early date and that it will be ready for occupancy within the next year.

#### INSANE.

The daily average number of District insane in the Government Hospital for the Insane during the year was 1,643 as compared with 1,591 during the preceding year, an increase of 52. This includes both indigent and pay patients. The amount of money collected by the District of Columbia as reimbursement for the care of pay patients, from their estates, families, or friends, was \$17,870.13. The

daily average number of pay patients was approximately 74.

The arrest and commitment of nonresident insane persons to the hospital for the insane entails a considerable burden upon the District of Columbia. The agents of the board have continued their activity in the investigation of these cases of nonresident persons, and during the year have succeeded in having taken from the list of those chargeable to the District of Columbia a total of 89 patients. Of this number 86 were returned to their friends or the places of their legal residence as provided in the statute; while two others were found to be proper charges against the Federal Government as members of soldiers' homes and were transferred to the soldiers' home roll; and one was transferred to the Navy roll.

The number of persons taken from the list of those chargeable to the District of Columbia as the result of our investigations since 1901

is as follows:

1901 1902 1903 1904 1905 1906 1907	33 96 78 84 71 66	1911. 1912. 1913. 1914. 1915.	90 83 92 103 100
1908 1909	67		

The number of persons deported as compared with the number admitted since 1905 is as follows:

	Ad- mitted.	De- ported.		Ad- mitted.	De- ported.
Year ending June 30—  1905. 1906. 1907. 1908. 1909. 1910.	384 347 327 316 309 317 330	60 54 65 63 55 83 82	Year ending June 30—Contd. 1912 1913 1914 1915 1916 Total	391 375 432 389 443	70 66 95 93 86

Number of deportations 20 per cent of number of admissions.

As shown by the figures submitted in our report last year, the estimated saving represented by the deportation of nonresident insane persons since 1905 is in the neighborhood of \$1,500,000.

#### MOTOR AMBULANCES.

We have submitted an estimate for \$4,650 for the purchase and equipment of three motor ambulances to be used in the transfer of indigent patients to and from the hospitals and other institutions. It is proposed to substitute this service for the horse-drawn ambulances now in use. We urgently recommend favorable consideration of this estimate. The sick and infirm should be transported as quickly and comfortably as possible, and this can not be done with the present equipment of horse-drawn vehicles. We have reduced by \$2,100 the estimate as compared with the amount requested previously for this service. We have made this reduction because we feel that experience has demonstrated that a light motor vehicle gives reliable service for work in a city such as Washington, and the cost is substantially less than that for the heavier type of vehicle.

The detailed statement submitted with the estimate shows that not only would these vehicles afford a more efficient and humane service, but would at the same time result in actual economy.

Formal estimates for the year 1918 are herewith submitted, together with the report of the secretary containing sundry information and statistical tables and reports of the various institutions subject to our supervision.

The board acknowledges the courtesy and cooperation of the officers and representatives of the various institutions and organizations subject to our supervision, and expresses its appreciation of the hearty cooperation and support it has received from the Commissioners of the District of Columbia.

Respectfully submitted.

### REPORT OF THE SECRETARY.

Gentlemen: I have the honor to submit herewith sundry statements and statistical tables relating to the work of this office and the various institutions subject to its supervision during the year ended June 30, 1916, as follows:

1. A series of tables showing the number of free patients admitted to the various hospitals subject to our supervision. These tables are arranged by months and summarized for the entire year. They show the number of persons admitted, classified by sex and color; also the daily average of free patients maintained in the various hospitals and the average number of days that each patient was maintained.

2. A statement in reference to the work of the physicians to the poor, showing the number of persons treated by these physicians during the year and the number of families represented; and a table showing the number of visits made, office consultations held, and the cost of the service, including cost of medicine and physicians' salaries.

3. A statement in reference to the work of the ambulance service, setting forth the number of calls responded to and the nature of the

service rendered.

4. A statement in reference to the transportation of paupers, showing the number of instances in which transportation was granted. The cost of this transportation is borne in part by the appropriation and in part by relatives and friends of the beneficiaries.

5. A statement in reference to the work of the deportation of nonresident insane chargeable to the District of Columbia, together with a table showing the number of District indigent patients cared for at

the Government Hospital for the Insane.

6. Tables covering all the institutions subject to our supervision, as follows:

(a) Finances.—These tables show the receipts of the various institutions from all sources and the disbursements for all purposes.

(b) Movement of population.—These tables show the number of persons admitted and discharged during the year and the daily average population of each of the institutions.

(c) Comparative population table.—This table shows the daily average number of persons cared for by the various institutions and organizations for each year from 1903 up to the present year.

(d) This table shows the per capita cost per day, classified by items,

at each of the institutions.

Respectfully submitted.

GEO. S. WILSON, Secretary.

The Board of Charities of the District of Columbia.

Tables showing the number of free patients admitted to and the daily average present in the 12 hospitals under the supervision of the Board of Charities during the year ending June 30, 1916.

#### PHYSICIANS TO THE POOR.

Medical service to the poor in their homes has been rendered during the year by physicians to the poor to 3,596 persons, as against 3,535 the preceding year. Free medicine is also furnished to persons treated by them, through arrangements with druggists located in various sections of the city.

The physicians to the poor have again had the cordial cooperation of the nurses employed by the Instructive Visiting Nurse Society. These nurses care for cases brought to their attention, and their services have been of the highest value. The nurses are supported by the Instructive Visiting Nurse Society without aid from the city. The city furnished necessary supplies, such as bandages and dressings.

Summary of work of the physicians to the poor for the year ending June 30, 1916.

Number of persons treated by physicians to the White

### TRANSPORTATION OF PAUPERS.

The work of the transportation of paupers was carried on in a manner similar to that of the preceding year, careful inquiry being made in all cases presented to us. In making investigations of applicants for transportation, nearly all of whom are nonresident persons, we have had the hearty cooperation of organized charities in other cities and have been materially assisted by the police department. As a result of this system we have eliminated many fraudulent applications, and consequently have been able to assist more adequately all genuine cases. We have strictly followed the rule of sending dependent persons through to their destinations, thus avoiding the hardships entailed upon destitute persons sent to intermediate points where application must be made anew to the authorities for transportation toward their homes.

The number of persons for whom transportation was issued during the year was as follows:

Males, white. Females, white. Males, colored. Females, colored.	$\frac{52}{19}$
Total	298
Number sent free. Where part or all was paid.	188

### DEPORTATION OF NONRESIDENT INSANE.

During the year ending June 30, 1916, as a result of our investigations, 89 persons were taken from the list of those chargeable to the District of Columbia. Of this number, 86 were returned to their friends or the places of their legal residence, 2 were transferred to the Soldiers' Home roll, and 1 to the Navy roll.

# REPORT OF WASHINGTON ASYLUM AND JAIL.

#### PRINCIPAL OFFICERS.

Louis F. Zunghan. Superintendent. W. G. Land. Dentity Superintendent J. A. Gannon, M. D., Vishing Physician, Harry Spengre, M. D., Rosident Physician.

W. G. McCarfhy, Clerk.
M. V. Healy, Superintendent of Nurses and Training School.
A. B. Slaymaker, Pharmacist.

#### REPORT OF THE SUPERINTENDENT.

Gentlemen: In many annual reports have we clamored for a new municipal hospital. The Commissioners, the Board of Charities. Members of Congress, representative societies and individuals. familiar with our needs, have for 16 years presented the matter to Congress for favorable consideration and action. During the past winter the appeal to Congress was very strong, but it is the old story-nothing done, and conditions as hopeless as ever. The hospital has been growing in population steadily and rapidly, and practically nothing has been done to provide for this increase, excepting in so far as old buildings could be utilized and made habitable. In 1885 the hospital average was 68; in 1901 it had risen to 95; in 1915 it reached 198. There are proper accommodations for only 175, and yet at one time the population went to 263. Wards at times have been so overcrowded with beds and patients that it has been difficult for the nurses to move about and properly wait on the sick. Basement rooms too have for years been used to make room for patients who could not be accommodated in the regular wards. The hospital kitchen was designed to prepare food for about one hundred patients and employees but often had to provide for from three to four times this number. With no proper or adequate facilities for the classification of different units it has been found necessary to care for mental, alcoholic, and dope cases in the same wards; medical and surgical cases in others; and this in some wards regardless of color. Such a condition is not only deplorable, it is pitiful. Other hospitals have splendid buildings and equipment; why should this hospital, one of the largest in the city, caring for the most dependent classes, not have proper consideration and adequate care?

During the past year we have treated 2.981 patients in our wards; of these 1,452 were white and 1.529 colored. In addition many were treated in the jail department. The number of births in the maternity ward was 87, including 6 stillbirths, an increase of 33 over the previous year. The number of deaths was 271, as against 304 in 1915, when our population was somewhat larger. Of the deaths 12 occurred within 24 hours after admission and 25 within 48 hours after admission. The highest population for any one day was 228 and the lowest 115. The daily average was 179, as against 198 in 1915. Of the 2,981 patients admitted during the year, 1,556 were received on permits issued by the Board of Charities, 578 were brought in by the police department, 274 were transferred from the District jail, 91

were admitted through the superintendent of the hospital. The emergency cases numbered 283. Nearly all of those brought in by the police were mental suspects or cases of acute alcoholism or the

drug habit.

Our psychopathic ward, the old almshouse building, has been overcrowded much of the year. In this building we treated during the year 735 mental cases, of which number 309 were transferred to the Government Hospital for the Insane. In the same wards we treated 518 cases of acute alcoholism and 39 cases of morphinism. It is all wrong to treat this variety of cases in the same wards. Alcoholics should be treated in an inebriate asylum; the most of them on an indefinite sentence to the District workhouse, where, in addition to adequate treatment they could be given plenty of work, which is so essential in bringing about a physical restoration. A strict enforcement of the pharmacy law will gradually reduce the number of victims of the drug habit.

If there are to be further delays in securing a new hospital, then our efforts should be concentrated on getting an immediate appropriation for a psychopathic ward. The plans are ready. There

is here a necessity that should not be made to wait.

We have an excellent training school for nurses connected with the hospital. The growth of the hospital called for a larger number of nurses than we needed a few years ago. The appropriation of \$3,000 made in past years to pay the wages of pupil nurses is no longer adequate, and we therefore recommend that for next year this sum be increased to \$4,000. The proper housing of our nurses is another problem. We need them, but we must crowd them.

The new X-ray and pathological laboratories, installed last year in an old brick building, have been of great benefit. The X-ray department, aside from its immediate uses to the hospital, has been of service to the police and fire departments of the District by agreeing

to do their X-ray work for the cost of necessary material.

I call special attention to the following recommendations which deserve consideration:

1. That the compensation of three assistant engineers be increased

from \$600 to \$720 per annum each.

2. That the compensation of three graduate nurses be increased from \$480 to \$540 per annum each.

3. That the appropriation of \$3,000 per annum to pay the wages of

our pupil nurses be increased to \$4,000.

4. That the compensation of the head laundryman be increased from \$600 to \$720 per annum.

5. That the appropriation of \$45,000 for maintenance be increased

to \$50,000 next year.

6. That \$7,500 be provided for a hospital kitchen and that \$1,500 be added for kitchen equipment. This sum is small, as we intend to do most of the work of construction with prison labor.

7. That for repairs to buildings \$3,000 be appropriated instead of

\$2,000, because the old buildings need many repairs.

8. That provision be made for a stenographer and typewriter, at \$720 per annum, to attend to the keeping of records, correspondence, and reports. The recommendations for increases in pay of certain employees are important and necessary, because living expenses have increased to such an extent that some of them can scarcely maintain themselves on the present wage.

#### DISTRICT JAIL.

During the fiscal year ending June 30, 1916, there were committed to the District Jail 8,927 prisoners, or 230 less than in the preceding vear. Of this number 6,458 were transferred to the District Workhouse at Occoquan, a decrease of 3. We also transferred 330 prisoners to the penitentiaries at Atlanta, Leavenworth, Moundsville, and Baltimore, an increase of 80 for the year. One prisoner died and one escaped. At the beginning of the fiscal year 1916 we had 273 prisoners in jail, as against 254 for the corresponding time in the preceding year. The daily average population of the jail was 252.63, as against 258 last year. The highest number on any given day was 370, and the smallest number 176. Twenty-eight prisoners were transferred from the jail to the Government Hospital for the Insane. and 137 were transferred to the Washington Asylum Hospital for mental observation or for hospital treatment. The daily average cost of food was \$0.166; the daily cost of maintenance was \$0.259; and the daily cost of maintenance with salaries was \$0.52.

The jail is in excellent condition. The prison locks have all been put in good condition and plenty of paint and whitewash used to

make it thoroughly sanitary.

The new kitchen installed within the year is very complete in its equipment and makes it possible to prepare the food with greater economy and better service.

It is gratifying to know that the criminal cases in the last year have been disposed of by the courts with greater dispatch than for several years past, so that the average of our grand jury cases has

been kept lower.

The number of pieces laundered during the year was 227,549; of this number 48,480 were laundered by hand. The number of articles made in the jail for the hospital department was 2,744, and for

the jail department 1,447.

I wish to emphasize again the importance of the indefinite sentence in place of the fixed sentence, especially for recidivists; a larger use of the suspended sentence for first offenders, and sentence without fine for chronic misdemeanants. In addition to this there should also be a well-organized agency to look after discharged prisoners.

In closing, I wish again to urge an adequate appropriation for a

new municipal hospital.

Respectfully submitted.

L. F. ZINKHAN, Superintendent.

The Commissioners of the District of Columbia.

Report of dead wagon for fiscal year ended June 30, 1916.

Bodies collected from all sources and delivered to the morgue, 1,100.

Bodies carried from the morgue to the crematory: Adults, 140; infants, 161; still-births, 258. Total, 559.

Thirty-nine 6-foot coffins were furnished, 4 of which were buried in the potters' field. Forty-seven 2 and 3 foot coffins were furnished, 35 of which were buried in Mount Olivet.

#### REPORT OF VISITING PHYSICIAN.

# Board of Commissioners of the

DISTRICT OF COLUMBIA, Washington, D. C.

Gentlemen: I herewith transmit the annual report of the Washington Asylum Hospital for the year ending June 30, 1916. This report was compiled by Dr. Harry Spigel and A. B. Slaymaker, both of the house staff.

The total number of patients treated at the hospital was 2,981, which is 122 less than were treated in the preceding year. The lowest number of patients on any one day was 115 and the highest

number on any one day was 228.

I directed your attention in my last yearly report to the fact that the highest number of patients that the hospital can accommodate comfortably is 175 and where this number is exceeded cots must be placed in the corridors and in the basement, and the wards are so crowded that the patients are prevented from obtaining the necessary number of cubic feet of air space which are required by good hygiene; the nurses can pass between closely approximated beds only with difficulty and their work in caring for the unfortunate patients is hampered.

It is unnecessary for me to state here the many reasons why a new municipal hospital is absolutely necessary because your recommendations to Congress during the year just past indicate that you appre-

ciate fully the importance of this matter.

The wisdom of the Board of Commissioners in appointing a large and efficient attending staff becomes more apparent as time goes on. I can say without fear of successful contradiction that the patients sent to the Washington Asylum Hospital receive medical attention which is surpassed by no institution and equaled by few earing for charity patients in this city. It is no uncommon occurrence to have six physicians studying and consulting over one charity case. The benefit to the patient and to medical science is difficult to estimate.

The pathological laboratory report, which is appended, indicates the care which is exercised in the studies of patients here. During the year a total of 4,572 pathological examinations were made, which included lumbar punctures; stomach contents: Wassermann's, Widal's and other advanced pathological research, which should make us proud of the laboratory facilities afforded the charity patients. The pathologist is doing excellent work.

The report of the X-ray department, which is attached hereto, covers the seven months which remained in the year after the X-ray equipment was installed. The X-ray department has been a great assistance in clearing up doubtful conditions and in the treatment of diseases which would be hopeless if it were not for the X-ray

apparatus.

There have been 291 surgical operations performed at the hospital during the year and the results have been surprisingly good when we consider that the general run of operative material is below par and that the majority of patients which fall into this class are sent here because other hospitals do not care to risk long convalesence.

I ask your attention to the report of the superintendent of nurses and to her recommendation that the number of pupil nurses be increased and that the appropriation for pupil nurses be increased from \$3,000 to \$4,000 for this purpose. The duties of pupil nurses at this hospital are not easy and the number of patients that an individual nurse can properly care for is limited. The number of pupil nurses at present is inadequate and I therefore strongly recommend that the number be increased.

The second recommendation of the superintendent of nurses deserves consideration. Charge nurses are graduate nurses, and graduate nurses' compensation in ordinary work is \$1,200 per annum; institutional work is steady employment, and we can obtain competent graduate nurses at half this amount. Competent graduate nurses are in great demand and the salary of all graduate nurses, except the superintendent of nurses, should be placed at \$600 per annum.

The psychopathic department is growing very rapidly and shows a total of admissions for the year of 735 mental cases. This does not include the alcoholics and drug addicts which are to be found in the general report.

The greatly increased number of patients and the many prescriptions which have to be compounded and the ointments and lotions and the regular ward drugs which must be prepared by the phar-

macist (who must also act as clerk at present) has all he can possibly attend to in performing the duties of pharmacist. Our correspondence with the courts and the different police precincts in the city, the jail, St. Elizabeth's Hospital, the Board of Charities, and the other departments of the District government, and the many case histories, reports and papers which must be made out properly and filed render the employment of a clerk, who should be a stenographer, an absolute necessity. I urgently recommend that a clerk who is a stenographer be employed at a compensation of \$720 per annum for this purpose.

I desire to express my appreciation to the honorable Board of Commissioners of the District of Columbia for their interest and cooperation in the successful conduct of the Washington Asylum

Hospital.

Recapitulation: First, build a new hospital. Second, increase pupil nurses' appropriation from \$3,000 to \$4,000. Third, make salary of all graduate nurses \$600 per annum. Fourth, appoint a hospital clerk at \$720 per annum.

Respectfully.

J. A. Gannon, M. D., Visiting Physician.

#### PHYSICIANS.

Consulting staff.—Drs. George Tully Vaughan, surgeon; Walter D. Webb, surgeon; George M. Kober, hygiene and dietetics; William A. White, alienist and neurologist; I. S. Stone, gynecology; Louis Lehr, genito-urinary; S. B. Muncaster, diseases of the eye; John Moran, obstetrics; J. J. Richardson, ear, nose, and throat; John Hunter

Selby, roentgenologist.

Attending staff.—Drs. W. M. Barton, chief of medicine; Murray Russell, Harry A. Ong, and J. Lawn Thompson, internal medicine; Roy Adams and Thos. S. Lee, diseases of the heart and kidneys; D. Percy Hickling, John J. Madigan, and John E. Lind, mental and nervous diseases: John Foote and J. J. McCarthy, diseases of children; J. Russell Verbrycke, gastro-enteric; C. Augustus Simpson and Wm. Hemler, skin diseases; Leon Martell, W. P. Reeves, Robt. Y. Sullivan, and Joseph D. Rodgers, gynecology; John Constas, J. C. Blackistone, and James J. Mundell, genito-urinary diseases; S. Logan Owens and Edwin Larkin, orthopedics; Prentiss Willson and Thomas F. Lowe, obstetrics; Chas. Healy and Wm. Cornwall Davis, diseases of the eye; James Moser and R. R. Walker, ear, nose, and throat; F. E. Duehring, anethesist; R. E. Le Comte, pathologist; George J. Schirch, roentgenologist.

Resident staff.—Drs. James H. Allen, resident physician; Joseph E. Campbell, first assistant to the resident physician; Harry Spigel, second assistant to the resident physician; J. M. Ladd, interne; G. S. Reiss, interne; E. V. Chadwick, interne; A. B. Slaymaker, pharma-

cist.

# REPORT OF THE LABORATORY.

Dr. J. A. GANNON,

Visiting Physician, Washington Asylum Hospital.

DEAR SIR: The following is a report of the laboratory for the year ending June 30, 1916.

Respectfully.

#### REPORT OF ROENTGENOLOGIST.

# Dr. J. A. Gannon,

Visiting Physician, Washington Asylum Hospital.

Dear Sir: I herewith respectfully submit the report of the X-ray department of the Washington Asylum Hospital for the year ending June 30, 1916.

As you know, this department was not operative until December, 1915, and the work done since that date has been quite satisfactory. The total number of cases, including the police and fire departments, work—diagnosis, treatments, etc.—is 101.

Very truly,

# George J. Schirch, M. D., Roentgenologist.

# Report of X-ray division for the year ending June 30, 1916.

Ankle. Elbow. Femur Foot. Forearm	2 1 1 2 3	Shoulder Stomach Teeth Thorax	8 3
Hand Head Hip Humerus. Kidneys. Knee	2 3 2 3 6 2	Total. Radiographs of policeRadiographs of firemen. Ward cases. Plates showing negative results. Number of X-ray treatments.	9
Lower leg	3	Fluoroscopic examinations	20

NOTE.—X-ray division was not opened until December, 1915, and so the above report covers 7 months instead of 12. On account of lack of apparatus, X-ray treatments were not given until June, 1916.

# REPORT OF SUPERINTENDENT OF NURSES.

# Mr. L. F. ZINKHAN,

Superintendent Washington Asylum and Jail,

Washington, D. C.

DEAR SIR: I have the honor to submit herewith the following report of the Capital City Training School for Nurses, attached to the Washington Asylum Hospital, for the year ended June 30, 1916.

The practical and theoretical work of the pupil nurses has been satisfactory, but we find, owing to the limited number of pupil nurses, the long hours of duty, and character of the work, that many of the nurses are obliged to seek our infirmary because of illness during

To meet this condition I earnestly recommend that we increase our number of pupil nurses from 24 to 30, and that an additional appropriation of at least \$1,000 be asked for this purpose.

I desire further to earnestly recommend that each charge nurse receive \$600 per annum instead of \$480 as at present.

LECTU	URERS.

Note.—Arthur Jones, colored male, was convicted in criminal court of murder, first degree, Dec. 17, 1915, and sentence commuted by the President of the United States to life imprisonment, Mar. 9, 1916; transferred to Atlanta, Ga., Apr. 1, 1916.

# REPORT OF THE SUPERINTENDENT OF THE DISTRICT OF COLUMBIA WORKHOUSE.

Occoquan, Va., June 30, 1916.

Mr. George S. Wilson,

Secretary, Board of Charities, Washington, D. C.

Sir: I am submitting to you, for the consideration of your board, our sixth annual report, for the fiscal year ending June 30, 1916.

For the year ending June 30, 1915, 6,472 prisoners were committed to this institution, and for the year ending June 30, 1916, 6,458 prisoners were committed. The average population of the institution for the fiscal year ending June 30, 1915, was 621.74. The average population for the year just closed was 634.14.

The health of the institution for the year has been very good, no

epidemic of any character having developed.

Much progress has been made in the cleaning up of additional land for agricultural purposes, and the coming year will show a decided increase in the amount of agricultural products raised.

The year has been quite a successful one in all our departments, as can be seen from the tables submitted, showing actual work done. I deem it unnecessary to elaborate in this report upon the various industries that we have started at this institution, for the reason that in our report for June 30, 1915 a very detailed description of each department was given. Therefore, I feel it is unnecessary to fill up our report with a repetition of this matter.

#### PRESENT APPROPRIATIONS.

Our appropriations for maintenance, fuel, oil, repairs, and construction, and for fuel for maintenance, and repairs to buildings are sufficient, and it will not be necessary for us to ask any increase in these funds.

#### RECOMMENDATIONS.

I desire to recommend that a committee from the engineer department be selected for the purpose of investigating the necessity and advisability of procuring, by purchase or condemnation, cer-

tain water power located just west of our reservation.

One of the very heavy overhead expenses that we have or will have in the operation of the District of Columbia Workhouse, the men's reformatory, and the women's reformatory for light, heat, and power, will be our fuel bill. With the purchase of this water power, this overhead expense can be saved, and I recommend that an appropriation of \$1,000 be secured for the purpose of employing an expert to report to the commissioners details looking to a recommendation to Congress that this water power be secured.

In our last report we asked Congress for a fund to build an additional cow barn and four silos. This fund was not allowed. I urge

that we again ask for an appropriation of \$4,000 for the building of

this barn.

The barn and silos are very much needed. We had forage enough raised this year to fill at least four silos, and we had but two to fill. Therefore, we have experienced quite a waste in the forage raised, for the reason that we did not have sufficient silo capacity to take care of same.

The municipal architect has prepared plans, which have been approved by the penal commission, for a chapel and amusement building for the District of Columbia workhouse, and I recommend that an appropriation of \$2,500 be secured for the purpose of build-

ing this.

We have now completed a wharf about 800 feet long, on the banks of Occoquan Creek. It is necessary that we be provided with a locomotive crane on a four wheel truck for unloading coal, fertilizer, and supplies that come from Washington, and I recommend that an appropriation of \$6,000 be secured to purchase this machine.

#### FEMALE DEPARTMENT.

No material changes have taken place in the female department this year. The number of commitments to the institution for the year was 1,051, and the commitments for the preceding year was 899.

The health in this department has been good during the year. Very little trouble has been experienced from the standpoint of discipline. The fact that the women have the freedom of the buildings and access to fresh air and sunlight, and are where they can see nature in all its beauties, helps very materially in discipline, without the use of the old-time methods of punishment that are so often found in the handling of women.

There was but one attempt to escape during the year in this depart-

ment, and it was not successful.

The plan that has been adopted by the penal commission and the commissioners for providing an institution for women some distance from the present workhouse is a splendid move, and when completed we will have a better opportunity to classify the women and to do more work along lines of schooling and reformation than is being done now. We hope that in about two years the scheme as outlined by the commissioners will be in practical operation.

#### RELIGIOUS SERVICES.

Since the beginning of the first of this fiscal year Mr. W. E. Edgin, who has been selected as the assistant superintendent for the reformatory, has acted as our religious instructor at the District of Columbia Workhouse, and has held very successful meetings each week during the year.

In addition to the work of Mr. Edgin, the Rev. M. J. Gallagher, of the Roman Catholic Church in Washington, has held regular meetings the first Sunday of every month at the institution, and his services have been much appreciated by the management and the

inmates of the institution.

It is our purpose in our religious instructions in the future to occasionally give to the inmates stereopticon lectures upon subjects that

will interest them. As soon as our new chapel building is completed, so that it can be used, there can be additional good accomplished along lines of religious instructions, and the giving of entertainments that will help materially in the reformation and education of those sent to us.

Statement of appropriations made for District of Columbia Workhouse, 1909-1916, inclusive, expenditures therefrom, and balances unexpended June 30, 1916.

### REPORT OF MEDICAL OFFICER.

District of Columbia Workhouse, Occoquan, Va., June 30, 1916.

Mr. W. H. WHITTAKER,

Superintendent District of Columbia Workhouse, Occoquan, Va.

Sir: I herewith submit my annual report for the year ending June 30, 1916. The general health of the inmates has been good. The sanitary condition of the institution is excellent.

Attached you will find tables showing number of patients treated in hospital, number of deaths and causes.

Respectively submitted.

F. W. HORNBAKER, M. D. Physician in Charge.

### DISPENSARY.

Number of minor treatments, 4,260; number of cases in which medicine was given, 3,987.

### HOSPITAL.

Number of minor treatments, 846; number of cases in which medicine was given, 1,336.

### DEATH REPORTS.

Register No.	Cause.	Date.
25149 25435	Diabetes, heart disease, and typhoid fever. Heart disease, broncho-pneumonia, and pulmonary tuberculosis. Acute nephritis. Heart diseasedodo	May 5, 1916

### INDETERMINATE SENTENCE.

I want to again urge that the indeterminate sentence and parole law be adopted for this institution as quickly as possible. The fact that prisoners are sent to this institution on a sentence of 30 or 60 days and are expected to be benefited is nothing more than a farce, and I trust that we will not be compelled to go along in this way very much longer.

With an indeterminate sentence for the workhouse, where men will be sent to us for not less than 60 days or for more than two years, great good can be accomplished in their reformation. I hope that we may be able to secure this law in the next regular session of Congress.

For your help, and that of the commissioners during the year, I wish to extend to you my sincere thanks. Without your undivided support and encouragement, it would have been impossible for us to accomplish what we have in organizing and directing this institution.

To those assistants who have been loyal during the year I wish to extend my thanks, for without the undivided assistance and loyalty of employees in an organization of this kind it would be almost impossible to accomplish results satisfactory to the taxpayers.

Respectfully submitted.

W. H. WHITTAKER, Superintendent.

### SECOND ANNUAL REPORT OF THE DISTRICT OF COLUMBIA REFORMATORY.

LORTON, VA., June 30, 1916.

Mr. George S. Wilson,

Secretary, Board of Charities, Washington, D. C.

Sir: I herewith submit for the consideration of you and your board and the Commissioners of the District of Columbia the second annual report of the District of Columbia Reformatory, located near Lorton, Va.

We have had for this year an appropriation of \$15,000 for development work. Much progress has been made considering the size of our appropriation. We have graded a mile and a quarter of the railroad leading from Occoquan Creek to the building site of the new institution.

Temporary quarters will have been completed by October 1, with sufficient capacity to house 200 inmates and 15 officers. This building will include suitable sleeping quarters, dining room, kitchen, bathroom, and clothing rooms. In addition, a stable for housing 20 head of horses will be ready by October 1.

It is our hope that by October 1 the law will be such that we will be able to have transferred to this institution 200 prisoners from the United States prisons at Atlanta, Ga., and Leavenworth, Kans. As soon as this transfer is made and the appropriations granted that we have asked Congress to give us we will be in position to push work on the railroad and on the construction of permanent buildings.

The 1st of July, 1915, I recommended the appointment of Mr. W. E. Edgin as overseer and my assistant for this new institution, and he has been actively engaged in assisting to clear up the temporary and permanent sites and other development work as provided

for by the appropriation of \$15,000.

More than 3,000 feet of 8-inch water main has been laid from the workhouse tract to the site where temporary buildings are now being constructed, which will give us ample water facilities for the new institution. In addition to this, wells have been dug on the site that

will give us suitable water for drinking purposes.

During the year the superintendent of construction, under the direction of the municipal architect, has prepared plans for the temporary buildings as well as plans for the permanent buildings to be used in the housing of our female prisoners. These plans have all been approved by the penal commission, and we will be ready to commence the building just as soon as Congress provides the appropriations which the commissioners have asked them to grant us.

The first work that should be done, however, after our new appropriations are granted is the completion of the railroad from the wharf on Occoquan Creek to the R. F. & P. Railroad near Polick. With the completion of this railroad we will have ample transportation facilities for getting material from our brick plant and stone-crushing plant to the permanent sites for the new institution.

Without this railroad it would be an almost endless job for us to attempt to haul all of our building materials to this site with teams. I estimate that it would require from 18 months to 2 years to fully complete and have in practical operation this railroad. We can in the meantime do considerable development work in putting in our seweys, water lines, and foundation work for the permanent buildings of the new institution.

I feel that until all legislation has been procured that is necessary for the successful operation and administration of this new institution there should be kept before Congress and the public the recommendations of the penal commission that was so successful in filing a report to Congress that brought about this new institution. I feel that we can not say anything that will be of so much assistance in bringing about public sentiment and final legislation that is necessary to be had in the administration of this new institution. I therefore quote from their report as follows:

First. There should be a jail to be used only as a house of detention, never as a place of confinement for those under sentence.

Second. A probation system for those cases which may be safely dealt with

without sending the offender to any place of confinement.

Third. A reformatory for all who must be confined and who nevertheless are hopeful cases.

Fourth. A workhouse for those who must be confined and who are not proper subjects for reformatory treatment, and yet whose offenses are not such as to require that they be sent to a penitentiary.

Fifth. A carefully guarded parole law for prisoners in these various institu-

tions who may safely be released upon conditions.

Humiliating as it may be to confess it, the confession must be made that society is still in a state of siege. The property class, and they comprise the vast majority of our population, live in a state of siege. If we doubt it we have only to notice the bars ond bolts on every hand, the watchman, the policeman everywhere. After 4,000 years of social order of one sort and another, after 2,000 years of Christianity, it is still the fact that those who save must maintain their possession by force or the threat of force. The mailed hand of government is over every house and shop and bank vault in the civilized world and apparently it must be so for centuries to come. The criminal world may be looked upon as practically permanent and certainly we have none more important. What ought to be done to protect the law-abiding part of the community from the part that is disposed to prey upon it? That is the question. Of course, the most desirable thing is to get rid of crime itself, either by transforming the lawbreaker into lawkeeper and law defender or, better still, by preventing the citizen from ever becoming a criminal at all. The possible prevention of crime is a great subject by itself. The possible reformation of the criminal is another.

But the main purpose and object of criminal law we hold to be the welfare and protection of society itself. It is this object which underlies all sound legislation and judgment. It is this which justifies the infliction of punishment which would otherwise be cruel. It is this consideration that compels the judge to turn his eyes away from the suffering of the individual offender, and even from the greater suffering that often falls upon his family and friends, and keep his eyes fixed upon the thousands of innocent people whose safety and security demand that the consequences of lawbreaking should be painful.

We do not believe in taking any attitude toward the violators of law that will lead them to look upon their offenses as trivial, to look upon themselves as victims of oppression, or upon governments as their debtor. But we do believe in taking a passionless, patient, and impartial attitude toward them, making it as easy as possible to do right, as difficult as possible to do wrong, keeping always before their eyes the hope of redeeming themselves and convincing them in every practical way that they are still the makers of their own

destiny. We believe that some way ought to be devised to prevent the return to social life of those who have committed grave crimes and have given no indications of reform. We believe that there should be a rigid separation of those who are awaiting trial from those who have been convicted. We believe that all convicted persons who are able to work should be compelled to work. We believe that those who may be reasonably supposed to be reformable should be treated and employed with that end in view. We believe in the beneficial effects of education upon most of those who are confined in prison. We believe that for certain criminals there should be labor long and severe. We believe that no system of dealing with the criminal classes should ever at any point lose sight of the fact that the criminal is a man. He should never needlessly be degraded, insulted, or abused. We believe that a vital and momentous point of time is when the prisoner is released and turned back upon the world, and that the law should employ all possible agencies to guard and assist him in making a new start. We believe that many who come up for sentence may be wisely put in the watch-care of judicious officers and given one more chance to choose between a life of decency and a life of crime.

When sentence is to be pronounced and it appears to the court that the case may be one calling for the use of the probation system, there should be an officer to whom the matter may be referred by the court and by whom the necessary information may be furnished. Such an officer would investigate the circumstances if they were not fully brought out at the trial (and the most frequent use of the system will be in cases where there has been a plea of guilty and no trial at all), the previous conduct of the person to be sentenced, and all other facts which ought to be considered in determining the question. That question should be whether there is a reasonable probability that, if he should be given another chance under the restraints and encouragement of the probation system, he would never again break the law, but would ally himself permanently with the forces of order instead of becoming their enemy. If the court is convinced that such is the case, there should be at hand a wise and judicious officer in whose watchful care the offender should be placed under prudent restrictions and conditions especially adapted to his case—an officer who will keep in touch with his charge and personify to his mind the kindness and also the severity of the law, an officer to whom reports must be frequently made by the subject, and who will keep the court informed of the subsequent course of the probationer. All this requires careful provisions by statute and a well-planned but not too complex system of procedure. The question whether the probationer has broken the conditions of his release or should, on the other hand, be finally discharged from probation, must ultimately be decided by the court; but the court may be greatly aided and enlightened by the reports and recommendation of such an officer. The officer should be in closest touch with the court and in all respects subordinate to it. In our opinion, he should be appointed by it, and be subject to discharge whenever the court shall feel a want of confidence justifying such action. While some of such officers ought to devote their whole time to the work and be paid a proper salary, provision ought to be made for the employment of unpaid volunteer assistants who will devote a portion of their time or take charge of given cases under the supervision of the chief officer. It is hoped and believed that there will be found not a few tactful and philanthropic citizens —men and women—who will be willing to give a portion of their time to so humane and practical a service. It is easy to see that there would be certain advantages in a common board of probation, having under its observation and subject to its regulating control all probation cases in the District. This we have not overlooked. But we believe that on the whole the advantage of having the probation work of each court done under the supervision of, and fulfillment of the condition imposed by, the court which is responsible for the case outweighs these advantages, and that each court should appoint and control its own probation officers. The general plan of probation work should, however, be laid down by the statute, leaving to the court only the duty and province of applying the principles adapted to the individual case before it.

The probation theory does not tend to minimize the offense. It rather magnifies it by restricting the liberty of the offender, and perhaps for a longer time than if he were confined in prison. It takes away many of his rights. The court prescribes what he may do, where he may go, with whom he may associate, and how he shall conduct himself. It requires him to shun evil companions, to abstain from drink, to keep away from the saloon, to work steadily for the support of those who are dependent upon him. One of the

chief advantages is that it keeps the probationer in right relation to the family; if imprisoned, he is for a time relieved of the obligations to support them and discovers, perhaps, that they can get along without him. Probation lays its hands upon him and compels him to support them. That is the condition of his liberty. In this way it tends to reformation without actual imprisonment. But the system of probation ought not to be considered by itself. It must be considered in contrast with its alternative, imprisonment. Even in institutions where care is taken to separate the beginner in crime from the hardened offender, it is not possible entirely to prevent contact. Some contamination is inevitable. Even at its best, imprisonment is better calculated to develop than to arrest evil tendencies. The man who has been in prison has at least two terrible disadvantages. He comes out with the stigma of the prison, which hinders him from getting employment and heavily handicaps him in his struggle for a living. This stigma attaches to his innocent wife and children as well, who often suffer more than the guilty husband and father. The second is that prison acquaintances constitute an obstacle to a new and respected life. In prison he has come in contact with men who have no desire to reform and who are willing to drag others down to their own level. He can not always avoid 'hem when he meets them out of prison. If they can not persuade him to go with them into new crime, they may keep him in constant fear that they will bring to light the past he is trying to live down. From both of these dreadful disadvantages he may be saved by the probation system. It is worth noting that in the competition between imprisonment and probation, probation has been subjected to tests which have never been applied to imprisonment. It has been demanded that probation should prove that it reforms, but it has never been required of imprisonment that it should show that it has reformed.

Next in order, and not less important, is the need of a reformatory. At present we have none. Another thing which we have been led to conclude from our visitations is that the reformatory should be erected upon a large tract of land belonging to the Government. It should be a farm of at least a thousand acres practically undeveloped. Such a tract could be secured by purchase, possibly in the District of Columbia; if not, then in the State of Maryland or the State of Virginia. The clearing and cultivation of the land itself, with the construction of necessary buildings, would furnish occupation for hundreds of those sent there.

There should be shops, as well, where the men could be taught to use their hands in trades of skill and engage in the manufacture of useful articles. Such articles could be used by the District government in its departments and the whole product thus consumed. Nearly everywhere we went we found that this practice prevailed. In the various correctional institutions articles are manufactured in great variety and in large quantities and are disposed of and used by the municipal and State departments.

There should be classes, too, where at some hours of each day the young men should be taught the rudimentary branches and hear lectures on practical subjects. In some of the best reformatories most of the teachers are found among the prisoners themselves. Those who are competent are selected and

employed for this purpose and take a natural pride in the position.

With such a place to send to, there should be carefully framed laws regulating the length of the term and making it to correspond with the progress of the sentenced person. He should be able to shorten his sentence by faithful work and obedient behavior. It should be possible for him to work out his own salvation-if not without fear and trembling, yet without a doubt that honesty, industry, and a willing disposition would receive their reward. one thing important above all other is that he should feel and know that he is being dealt with according to just and settled practices, so that the time of his release is measureably in his own hands. In these reformatories the inmate soon learns that he is hedged around by a well-nigh inflexible system. When he goes wrong, it is charged against him; when he does right, he receives credit. He comes to look upon it as impersonal and its results as attributable to his own folly or good sense. Such a lesson is in itself invaluable. When a prisoner incurs a penalty he is reminded that it is his own doing; when he secures a benefit he is not permitted to thank any officer as for a favor, but is reminded that he has earned it, and it is his. The system thus cultivates and fosters a manly spirit of independence. Provision should be made at the reformatory for the care and custody of female prisoners, of whom there would be in all probability 75 or 100. They could be employed in kitchen and laundry work and should be trained to useful service in various lines.

That such men are not fit subjects for a reformatory does not mean that they are not to be treated with any reference to improvement or that they are not to be released sooner by reason of exemplary behavior. Still less does it mean that they have forfeited their right to be treated as men and to receive every encouragement of which they prove themselves worthy. Least of all does it mean that they should be unnecessarily degraded by marks of badges of shame or compelled to look upon themselves as beyond hope. They should not be put in stripes. On the contrary, we believe in stimulating them to selfrespect in all practical ways, and especially by setting apart a substantial portion of their earnings, to be paid to their families; or, for want thereof, to be paid to them on their release. And we believe that their sentences should be somewhat elastic and responsive to their behavior and indications of a change in disposition. For such of them as are illiterate we would have some instruction, and for such as appear capable of mastering a useful trade, implying some skill in handicraft, we would have employment adapted to that end.

One crying evil of the present of dealing with our prisoners is that when they are released from confinement there is little to prevent their going back to a life of crime. It seems absurd that year after year the Govenment should be turning back upon society its avowed and inveterate enemies, yet there is no doubt that this is the case.

Men who have spent their lives in crime, who have deliberately chosen to lead such a life, are released and leave the prison gates with the declared intention of their warfare against the State. One such prisoner appealed to by the warden to change his course replied that he had carefully calculated the chances and had reached the conclusion that he could not afford to give up the trade of crime. "I know," he said, "that I must pass a considerable part of my life in prison, but I shall be able to live upon the fruits of my enterprise while I am out of prison enough better to make up for the time I am confined. On the average, I could have a better time." It ought to be a crime in itself to be a professional criminal. There ought to be a statute defining the offense. It occurs to us that the definition should be "a professional criminal is one who has deliberately chosen to lead a life of crime and who has been more than once convicted of a felony." A person convicted of being a professional criminal ought to be sentenced to prison for life. The question whether he is a professional criminal ought to be determined by the jury under a proper charge in the indictment. It will be necessary to distinguish between professional criminals and habitual criminals, for there are men and women who under the stress of temptation may fall again and again, and again and again repent. Their offenses are usually petty and they have not that expressed determination to get their living by criminal means, which should be held to be a distinguishing characteristic of the professional criminal.

No argument is necessary to show that if the Government could in some way retain its hold upon its prisoners after they are released from confinement it would be a distinct advantage to the public. Everyone knows that when a prisoner comes back to the community he is looked upon with suspicion and often finds it all but impossible to win back the confidence of his fellows. Often it is impossible for him to obtain employment, and necessity itself may tempt, if it does not drive, him to his old course. Something has been done here and there by associations formed to assist and relieve discharged prisoners, but it would be much better and more effectual if it could be supervised by the Government itself and as a part of the prison discipline. When a man has served out his sentence to the limit and is entitled to his discharge he goes out a free man, but if he is released before the end of his term upon his own application, under a parole, with conditions which have been imposed to prevent his falling into evil ways, the situation is entirely different. Then he goes out under the supervision of authority, his whereabouts are known, his subsequent course is followed, he is helped to obtain employment, and if he breaks the conditions of his parole he is brought back to prison. We think that in the case of the parole system, just as in the case of the probation system, the chief argument to be considered in its favor is not the chance that now and then a criminal may be reformed and thereby a philanthropic duty be performed by the State, but that the State will by this means protect itself against the depredations of those who have a tendency toward crime and will be able to strengthen the forces of order at the expense of the forces that oppose it.

Somewhere there should be lodged the authority to decide whether a prisoner who has served a substantial portion of his term may be released upon parole, not merely with advantage to himself but with advantage to the State. This authority should be at liberty to impose such restrictions and conditions upon the freedom and occupation of the paroled prisoner and require from him such reports and proofs of lawful conduct as reason, prudence, and justice may dictate in each case. Such authority should, in our opinion, be vested not in the courts but in the executive department. It is administrative rather than judicial work. It belongs in one view to the discipline of the prison, for

a paroled person is still restrained of his liberty.

Allusion has heretofore been made to the wisdom and justice of setting apart for the benefit of the prisoner's family or for the benefit of the prisoner himself upon his release a substantial part of his earnings. Such a fund as that could evidently be better managed in connection with a parole system than without it. It has sometimes happened, where this plan of paying prisoners a portion of their earnings upon release has been adopted, that large amounts have been paid to the departing convict, who has squandered it all in a single night's debauch. That might be prevented even without a parole system by providing that the funds so reserved should not be paid to the prisoner all at once but in periodical installments. But under the parole system it would be much easier and simpler to control the disposition of such a fund. In some institutions there is reserved for the prisoner only the miserable pittance of 34 cents a day, and out of the small sum accumulated in this manner he must pay for the ticket and suit of clothes which are furnished him when he leaves, United States prisoners are provided with one plain suit of clothes, with 85 in money, and with a ticket to their home or the place of conviction. In other institutions the allowance is so liberal that at the end of a long term men have gone out with \$600 or \$700 of their own. It seems to us it would be at once prudent and practicable to fix an arbitrary amount as the fair price of the prisoner's day's work, and then to charge it against the expense of his maintenance, including therein a round percentage, say 20 per cent, of the total wage as interest upon the capital invested in the plant. Let this fund accumulate during the prisoner's confinement, unless it shall be paid to his family in necessity at home, and be turned over to him in justaliments after his release.

We have found that the parole law has won the favor and support of prison officials generally. The warden of the United States penitentiary at Leavenworth and the warden of the United States penitentiary at Atlanta both bave put themselves on record as believing in the principle and hoping for its adoption. In none of the States where it has been adopted has it been made applicable to murder in the first or second degree. Such cases may best be left

to the pardoning power inherent in the executive.

The question to be determined by the authority vested with the power to parole is not a question which can be determined upon any mere system of marks or bookkeeping in the prison. It goes deeper than that. It concerns the disposition of the prisoner and his whole attitude toward life. The determination of such a question ought not to be left to a single official, but would more wisely he vested in a board so constituted as to insure a conservative and yet an unprejudiced hearing. The case should be heard upon application by the prisoner seeking the parole, which application should be required to be made in a prescribed form. It should have the indorsement of the superintendent or warden of the institution where the prisoner is confined, and the test should be whether there is a reasonable probability that the interest of the public no less than of the prisoners would best be served by his return to the community. The liberation of a prisoner on parole ought never to be confounded with the allowance which is made him by statute on account of his perfect deportment in prison. That allowance, called "good time," belongs to him by reason of his compliance with the rules of the institution.

He may keep all those rules from purely selfish motives and yet be at heart as criminal as ever. Something more than such deportment must be required to convince a parole board that the interests of the public require his release, and yet some such board is the only tribunal which can competently deal with such a question. Certainly the court can not deal with it when it imposes the sentence. No judge, however wise and farseeing, can possibly foretell when, if ever, a point of time will be reached at which the convict may safely be set free. The most he can do is to see that a sentence is imposed which shall be roughly commensurate with the grade of the offense and serve as a proper warning to others.

This class should be completely identified and the justice of their detention fully established. To this end there should be kept and classified the measurements of all sentenced prisoners. Bureaus for this purpose are maintained in many of the States, and are carried on with success. The United States conducts a bureau of criminal identification and exchanges records with officials of State institutions. These records consist of photographs and description cards of the anthropometric system, known as the "Bertillon system," and also what are known as "finger-print records," Since 1895, through the aid of these records, the Department of Justice has successfully identified over 1,900 criminals who have been convicted and sentenced more than once. Such a system would be invaluable in administering the parole law in the District. When a reformatory and a new workhouse shall have been established on the lines here recommended, a parole law should be enacted in accordance with the principles above set forth and should embrace, as we believe, a system of credits to prisoners on account of their earnings.

A large proportion of crimes are committed by the colored people. With substantially one-third of the population they contribute to the various criminal institutions more than three-fourths of the whole number there confined. This fact is not referred to by way of reflection upon the colored people, for whose condition we, as members of the white race, hold ourselves in no small measure to blame, but as a fact necessary to be considered in dealing with the questions before us. It would not be just to the colored race, however, to leave the above statement unexplained. We must take into account not only the number of crimes committed by the respective races, but the character of those crimes as well. When we consult the records of the jail for the past five years we discover several things which ought to be duly weighed by all impartial persons. We find that two-thirds of all the persons committed to the jail are charged with assaults, not including assaults with intent to kill. Of these assaults a very large proportion, in fact more than five-sixths, are committed by colored people. Of all persons committed for fornication seven-eighths are colored. Of all those committed for petty larceny more than three-fourths are colored. Of those committed for larceny from the person, not amounting to robbery, nearly all are colored; that is to say, 29 out of a total of 31. On the other hand, the number committed for grand largery is almost equally divided between the two races. Among those committed for embezzlement there are almost twice as many whites as blacks. Among those committed for obtaining property by false pretenses the whites are nearly three to one. For robbery there were committed 139 whites as against only 80 blacks. Even in murder charges the whites are 34 as against 61 blacks. The fair deduction seems to be that the crimes most common among negroes are crimes of impulse or passion or petty thieving, while those among the whites are crimes of cunning or boldness—the more daring crimes and larger thefts. The criminal instincts of the colored people are such as belong to the childhood of a race rather than such as require planning and deliberation. And yet, strange as it may appear, out of 94 charged with vagrancy 63 were white, and out of 125 charged with being idle and disorderly 92 were white, and out of 44 charged with being habitual drunkards 34 were white. In the workhouse the proportion of blacks is considerably larger than in the jail, being substantially 250 blacks to 150 whites.

To those who believe that the negro is incapable of mechanical skill or ingenuity and unworthy of manual training, the fact that so large a proportion of our prisoners are colored might be an argument against the introduction of varied forms of labor into the reformatory, and, perhaps, an argument against the establishment of a reformatory at all. It is highly probable that a large majority of those who would be candidates for a reformatory in this District would belong to the colored race. Having little doubt upon this point, we have been especially interested to learn, from the experience of other jurisdictions where reformatories have been established, what results have been obtained among negroes, and what we have learned has been decidedly in their favor. In some institutions the most skillful workmen have been negroes, and the . answers from reformatory and prison officials which have been given to our questions upon this subject have been to the effect that shiftless and awkward specimens of these people are transformed by the discipline and training to competent and often to highly efficient workmen. Our investigation has convinced us that it is a mistake to consider the negro race as incapable of mechanical skill and progress. On the contrary, we believe that one of the strongest arguments in favor of the establishment of a reformatory in this

District is that it will serve the purpose of a training for young colored men who otherwise would never receive any discipline or training whatever. Those who can not be successfully employed in tasks requiring mechanical skill may be put to work upon the hand or employed in the heavier forms of labor. The return to daily life of a large number of young colored men who have been so trained in a reformatory that they can immediately command good wages and establish for themselves decent homes will be an example which, in our opinion, will not be lost upon others of their race. It seems little less than a mockery that members of the white race, in control of government, should declaim against the idle and vagrant character of the black race, and yet when members of that race are arrested for idleness and vagrancy or vices and crimes that spring therefrom, that they should be shut up in narrow cells and given no form of labor whatever and almost no exercise. When such men are turned back upon the community, what reason is there to expect that they will be anything but idle and vicious?

I wish to concur in the views of the commission in the recommendations with reference to an indeterminate sentence and parole law. Twenty years' experience in the handling of the class of people who will be committed to the reformatory demonstrates beyond question that the views of the commission as above quoted are practical and should, if possible, at the next session of Congress be enacted into law providing for an indeterminate sentence and parole law for this institution.

Without such a law, making it possible to hold out hope of reward for good conduct to the long-time prisoners who will be sentenced to this institution, the management would not want an impossible task of controlling them under the new methods. In place of physical restrictions we must have a law that will permit us to appeal to the individual along lines of education and trade, and that his release depends upon how quickly he can demonstrate to the management that he is capable of again taking his place in society. Such a law and the proper administration of same will be the means of bringing to a successful and practical termination the views and recommendations of Judge Wendell Stafford and Mr. John Joy Edson contained in their report.

#### RECOMMENDATIONS.

In my estimates to you for the operation of the reformatory for the fiscal year ending June 30, 1918, I deemed it advisable that we only ask for two funds—that of maintenance of the institution and the

other a building fund.

With a building fund of \$25,000 annually for ten years, it has been estimated that this new institution can be completed in all details so far as permanent buildings, sewerage, water, etc., is concerned. The fact that this institution will be constructed entirely with the administrative force and the prisoners who are sentenced to it for confinement, will make it very economical in our methods of building. With the expenditure here suggested of \$25,000 a year, we will have an institution at the end of ten years that will be worth a million and a quarter dollars.

I want to again urge upon your board to recommend to the Commissioners that there be set aside out of our maintenance fund the sum of \$5,000 for paying to the most likely prisoners 50 cents per day, as sentinels and officers in the administration and safe-keeping

of those who are sent to us.

With this provision, we will be able to get along with a very much smaller administrative force, which will mean a low administration expense in the operation of this institution, and, in addition, I believe that this plan will be of great assistance to us in the new methods we propose to use in handling the prisoners of this institution from the standpoint of discipline. I feel very keenly the responsibility in introducing new measures along lines advocated by the penal commission.

I trust that you will give me all assistance possible so that we may be successful, as I believe we will be, in abolishing walls, locks, and bars in so far as 90 per cent of our population is concerned.

We believe that there is a new era coming in the handling of criminals. We believe that the commission that has been studying this proposition for the District of Columbia for the past eight years are right in their ideas and recommendations to Congress, and it will be our effort, during the time that we are responsible for the administration here, to see that these ideas and recommendations are successfully carried forward, for we are in full sympathy with what the thought of the day is upon this question, and it is no better stated anywhere or by any person than we find in the words of Dr. Charles R. Henderson. Dr. Henderson was, before his death, professor of sociology in the University of Chicago.

Shortly before his death, upon the question of the administration

of institutions of this character, he said:

It has long been felt that the prison should never be used for punishment save in the last resort. It is humiliating and lowers self-respect in offenders who are not already degraded and criminal in temper, and a record of even one day in prison makes it more difficult to secure employment and confidence. The tendency of incarceration is to make a sensitive person reckless of public opinion and to induce him to find companionship with those who are enemies of public welfare. Furthermore, during incarceration the income of the family of the prisoner is cut off; the innocent wife and children suffer for the sin of the husband and father, and they also fall in the esteem of their neighbors. The stain of having been only a few hours a "jail bird" can not be washed out.

The aim of all punishment is the protection of society and the reformation of the offender. The criminal is an antisocial person; he lacks self-control; quite

often he is almost wholly destitute of moral ideas. Any method of prison procedure and discipline should take these things into account and should govern

itself accordingly.

It is impossible here to discuss the many aspects of the reformatory process, in which every factor is important—dietary, clothing, uniforms, physical culture, trade training, military exercises, school of letters, lectures, discussions, library, newspapers, entertainments, music, pictures, drama, religious services, moral influences, visits.

The personality of the director and his assistants is the supreme factor in the reformatory process. Methods, devices, systems, are important, but a good superintendent will reform men, even with very imperfect appliances and methods, while if he is a superintendent of the highest he will combine spirit,

system, methods, in the best possible way.

The principal habit to be formed is that of productive industry, for productive incustry is the absorbing occupation of the honest world, and is the primary condition of living a free life in the society of honest citizens. Most of the hours of prison life must, therefore, be devoted to steady, unbroken, useful work, or in training for such work.

I desire to recommend that the law provide for a general superintendent, who is to have the general supervision of the District of Columbia farm and the District of Columbia Reformatory for men and the District of Columbia Reformatory for women, and that compensation for the services of such general superintendent be in the sum of \$4.500 per annum, one-half to be paid from the maintenance fund of the District of Columbia Workhouse, and the other half from the maintenance fund of the District of Columbia Reformatory.

I also wish to recommend that rules and regulations should be prepared and presented to the commissioners for their approval, giving in detail the methods of administration that will govern the general superintendent in directing and controlling the officers and inmates of

these institutions.

I want to again urge upon your board the adoption for this institution of the indeterminate sentence and parole law. Without it the ideas of the commission and the purposes of this administration can not be carried forward successfully, and I trust that in the next regular session of Congress this measure will be passed.

I wish to thank you and your board and the commissioners for cooperation, advice, and support that has been rendered me in this new

work during the past year.

Respectfully submitted.

W. H. WHITTAKER, Superintendent.

### REPORT OF THE BOARD OF TRUSTEES OF THE NATIONAL TRAIN-ING SCHOOL FOR BOYS.

Washington, D. C., September 29, 1916.

SIR: In accordance with law, I have the honor to submit the report of the board of trustees of the National Training School for Boys,

Washington, D. C., for the fiscal year ended June 30, 1916.

The number of boys in the school at the beginning of the fiscal year, July 1, 1915, was 381, and during the year the number received was 270, making a total of 651 for the year. Those received during the year were from the sources following: By commitment from the Supreme Court of the District of Columbia, 8: by commitment from the United States courts outside of the District, 90: by commitment from the juvenile court of the District of Columbia, 133; paroled boys returned, 33; escaped boys returned, 6.

During the year, by discharge and from other causes, there were removed from the school a total of 227, as follows: By order of the board of trustees, 174; by expiration of sentence, 36; by commutation of sentence, 1; recommitted by court, 1; returned to court by order of court, 2; died, 1; escaped and still absent, 12, leaving 424 in the

school June 30, 1916.

Repairs to buildings, walks, roadways, and fences have been made and necessary painting has been done. The farm is reported to be

in good condition and good crops have been gathered.

From the military feature of training in the school an excellent report is given. The boys are divided into two battalions of three companies each, all under charge of the military instructor. A band composed of boys also receives instruction in band music from a competent bandmaster.

The regular Sunday services throughout the year have been held at the school and the ministers who have come with their generous help

in these services merit our sincere thanks.

In accordance with the act approved March 3, 1905, there has been covered into the Treasury to the credit of the United States the sum

of \$310.83, being the net proceeds from the farm and shops.

Of the income of the school for salaries and support of inmates, the sum of \$18,136.10 remained unexpended at the close of the fiscal year, as shown by the report of the treasurer. Of this he has covered the sum of \$18,000 into the Treasury to the credit of the United States.

In accordance with the statement of the treasurer, the expenditures during the fiscal year for support, farm, repair of buildings, and other current needs were as follows:

Groceries	910 OF0 00
Butter, butterine, and cheese	\$10,052.33
Tre	1,398.80
Ice Flour and table meal	534. 20
Flour and table meal Feed	4, 395, 62
Meats	7 744.02
	7,744.02

Medicines, hostatal supplies, medical and dental service. Clothing, dry goods, and notions. Leather and show inclings. Gas. Fuel. Electric current. Hardware and tools. Tableware and houseware. Furniture and turnishings. Books, stationery, printing, periodicals, and entertainment. Farm stock and vetermary service. Farm implements, seeds, and gasoline for farm engines and vehicles. Harness, and repairs to same. Vehicles and repairs, including blacksmithing. Repairs to buildings, fencing, etc. Miscellaneous items, including telephone service, expenses incurred in identifying and pursuing escaped boys, and express charges.	6, 599, 84 2, 955, 88 885, 87 5, 657, 66 1, 224, 01 183, 44 599, 90 642, 60 1, 391, 39
escaped boys, and express charges Compensation for emergency help	1, 515, 46 1, 033, 98
Total	57, 300, 34

There are inclosed herewith as exhibits the annual report of the treasurer of the school, Mr. S. W. Curriden, and of the superintendent, Mr. George A. Stirling, reviewing the year's work in detail.

The annual report of Dr. Guy W. Latimer, physician of the school,

is also inclosed herewith.

With the exception of a number of cases of diphtheria during the winter and some sporadic cases of other ailments, the general health of the school through the year has been as good as could be expected. In connection with this subject, it is to be noted that many of the boys committed to the school are found to be in rather

poor physical condition upon their arrival.

In consequence of the wise system established and the able treatment and care given by the physician of the school, Dr. Guy W. Latimer, and also of the ready and willing services rendered by the officers and employees, what might have been an epidemic of diphtheria was controlled during the past winter. Valuable help was given by Dr. Thomas Parran, who spent some time at the school in perfecting the necessary quarantine system during the outbreak. The efficient professional services of Dr. Lewis Taylor, surgeon: Dr. Hunt, anaesthetist; Dr. Seibert, oculist; and Dr. Sibley, dentist, are also noted with appreciation. Most useful and necessary laboratory work is constantly done by the Public Health Service. To all who have thus so readily and materially aided in keeping up the health standard of the school, the commendation and thanks of the board are cordially given.

The Binet-Simon mental test is now made of boys upon their arrival at the school, and those found to be backward are reexamined.

### NEW BUILDINGS.

In order that further observation and examination can be made in the cases of certain boys who upon the medical examination made upon their arrival show the necessity for segregation, a quarantine annex to the hospital should be built. It is estimated that this

could be done at a cost of \$5,000.

The school is also very much in need of a new family building. There are already far too many boys to a family, and the population of the school year by year is steadily increasing. An additional family building will admit of a more advantageous subdivision of the increasing number of boys than is now possible. The new family building requisite could be constructed for \$10,000.

### CENTRAL SCHOOL BUILDING.

The new central school building will be ready for use this fall. When the increased amount needed for teachers and family officers is appropriated, the services of those specially qualified to give instruction in the several class rooms in this fine building can be secured. The board has had under consideration the question of the enlargement of the course of instruction made possible by the completion of this building. In order that the boys may receive the full benefit of this it will be necessary to employ additional competent teachers whose time can be devoted exclusively to school room instruction. Under the present system the teachers are not only on duty in the school rooms but also do other work, and average 12 hours on duty a day, which prevents their giving their best efforts to teaching. For these reasons we are asking that \$3,880 be added to our teachers' appropriation.

The matter of increasing the scope of the practical and vocational training given the boys that they may be better fitted to secure remunerative employment upon leaving the school is constantly

given careful consideration.

### GENERAL WORK OF THE SCHOOL.

Mr. George A. Stirting, superintendent; Mr. D. E. Roberts, assistant superintendent: and the force of efficient teachers, officers, and employees, have worked harmoniously and for the best interests of the school, and the board desires to record its appreciation of the good work accomplished through their faithful services.

Very respectfully,

William M. Shuster, President Board of Trustees.

The Attorney General, Washington, D. C.

### REPORT OF THE SUPERINTENDENT.

Gentlemen: I submit herewith my report as superintendent for the fiscal year ended June 30, 1916:

Statistics.

Total number of boys received from the opening of the school on Jan. 13, 1870, up to and including June 30, 1916	5, 441 14. 98
Boys in the school June 30, 1915.  Total number received during the year:  By commitment from the juvenile court of the District of Columbia.  By commitment from the Supre.ne Court of the District of Columbia.  8 By commitment from the United States courts  90 By paroled boys returned.  33 By escaped boys returned.  6	381
	410
Total for the year  Discharged, etc., during the year:  By order of the board of trustees, upon honor parole.  By order of the board of trustees, upon special parole.  By order of the board of trustees, upon special parole.  By order of the board of trustees, United States boys paroled.  By expiration of sentence.  By order of the board of trustees, upon age.  By order of the board of trustees, upon age.  By commutation of sentence by the President.  Recommitted to United States penitentiary by court.  1  Returned to court by order of the court  By death.  1  Escaped and still absent.	651
	227

Educational standing of boys when received: Class A—those who could read with ease. Class B—those who could read only with effort. Class C—those who knew only the letters of the alphabet. Class D—those who did not know the letters of the alphabet.	86
Total	231
Never attended school	3

The foregoing statistics give the movement of population during the fiscal year ending June 30, 1916. You will note 231 boys were received from the courts, an increase over the preceding year of 84 boys. The increase in commitment to the

school was from the Federal courts 39, juvenile court 30.

During the year the Binet-Simon test of mentality has been introduced in the school. This test is used universally in schools of this character. Of the 206 boys who were tested by the Binet-Simon gauge, we find 3!½ per cent in a normal condition and 68½ per cent backward or retarded. These examinations were made when boys were admitted to the school. After being in the school six months tests were again made in order that we might determine the results on a pupil in the school. The results of these tests were very satisfactory, showing a marked improvement in the mental condition of the pupil. With our school system reorganized and a full corps of competent teachers installed in the central school building, more individual attention will be given the pupils than is now possible and much better results will be obtained.

The central school building and gymnasium, which has been under construction for sometime, will be finished and will be occupied this fall. It is a beautiful building, located on a very desirable hillside site, with three basement floors, one to be used as a shower bath; the second basement floor room is 120 feet long by 62 feet wide and 20 feet high, with balcony 8 feet high and 16 feet wide. This room will be used for the gymnasium work and recreation, and will be well equipped with gymnasium apparatus and bowling alleys. The third basement elevation room—dimensions of which are 62 feet by 62 feet—will be used for detail purposes. There are two floors above this basement, subdivided into study and class rooms for instruction. All labor pertaining to the erection of this building, which is 215 feet long by 65 feet wide, built of red brick burned on the school grounds and laid in cement mortar, was performed by the boys working in our trades classes.

### REPAIRS.

Buildings, fences, cement walks, and roadways have been kept in good repair. Gutters on buildings and downspouts are constantly needing attention, due to rust causing leaks. The columns on the administration building have been painted and many minor repairs made. Porches on the family buildings have also been painted where necessary. Door and window screens have been kept in repair and new ones made where needed. There is no cessation to repairs where so many buildings are grouped together.

### GRADING.

Many hundred yards of dirt have been moved in order that certain grades may be maintained by filling in low places around the buildings. The rearranging of the road and walkways makes it more convenient and accessible to the school and shop buildings. All labor employed on these improvements was performed by the boys.

#### VOCATIONAL INSTRUCTION.

Vocational instruction teaches a boy concentration of mind as nothing else does, as well as fitting him for work after leaving the school. Boys working in the tailor shop make all uniforms, citizens' suits, and shirts worn by the boys. In the shoe-shop department all shoes and slippers are made and kept in repair. Many other useful trades are taught, such as bricklaying, plastering, carpentering, steam fitting, plumbing, steam engineering and care of boilers, baking, cooking, general blacksmithing, painting and glazing, laundering, farming, horticulture and floriculture, etc.

Boys assigned to the manual-training class are taught not only the rudiments of drawing and the use and care of tools, but to do real work, as the furniture made in this department will compare favorably with that we purchase. A great deal of the furniture to be used in the school building was made in this department.

#### FARM.

The farm is in good condition and is improving every year. The crops have been good, as the crops gathered will show. More land is being put under cultivation each year by clearing out underbrush and removing rocks. Fields which were sowed to alfalfa have proved the experiment worth while, as we have been able to take four cuttings from them in one season. Our herd of graded Holstein cows is improving and will continue, as young cows of our own raising will be added each year. We now have 22 head of young heifers, which gives us more than 50 head of stock. We feel that by having a good herd of milch cows we will be able to give the boys more milk to drink, thereby reducing the cost of maintenance to the Government.

Below is given a tabulated list of farm products, with the value of each, the prices being based on the local wholesale market values submitted by the wholesale dealers at the time the products were used:

Beef, pork, and veal	\$1,494.43	Corn, silage, and fodder
Milk, poultry, and eggs	-3, 195, 24	
Fruits and vegetables.	5,290.25	Total
Hay, straw, and rye	928.004	

#### ORCHARDS.

The old orchard on the farm had become so diseased that we were advised by Prof. Lake, pomologist from the United States Department of Agriculture, to destroy it and locate one elsewhere on the farm. Last spring we set 5 acres to apples and peaches.

#### POULTRY.

The moving of the old poultry house to its present site has proved very beneficial, and the enlargement of this building will give room for 1,000 laying hens. There is no question about its being a paying investment, as the records will prove its value to the school in egg production.

#### MILITARY.

The school draws from a class of boys who have become habitually disobedient and are physically as well as mentally retarded, and whom the public schools have been unable to control. It is of primary importance to instill in their minds the necessity for, and if possible so to train them that they shall acquire the habit of, obedience. Military training is peculiarly well adapted to this end. Instant obedience and execution of commands of a superior in a military organization is a powerful influence on the mind of a boy and a potent factor in his moral uplift. It develops pride in appearance and counteracts the natural tendency toward slovenliness in physical appearance into which many of us fall. It develops the habit of attention, which is so frequently wanting and yet so vitally important to this class. The school is composed of six companies, forming two battalions of three companies each. The companies are officered by boys taken from the ranks on merit and examination by the military instructor.

#### BANDS.

Our bands have been a source of pleasure to us as well as teaching the boys to play some instrument well enough to hold a position in an organized band upon leaving the school. Many boys who have received instruction in band music while here have continued in this work and the reports that come to us are encouraging. Through the Department of Commerce our band was invited to lead that organization in the preparedness parade held in Washington on Flag Day. The reports from the officers of this department were very flattering in regard to the music rendered and the conduct of the boys.

#### MOVING-PICTURE MACHINE.

The moving-picture machine has been the means of imparting useful instruction and clean entertainment throughout the year. Once a week the boys were called together in the assembly hall for instruction and entertainment. These entertainments have been the means of breaking in on the routine life of the school and have been in many ways helpful. The orchestra, composed of officers and boys, adds very much toward making these entertainments pleasant.

#### HOLIDAYS.

The holidays of the year have been observed in succession. The Fourth of July was devoted to athletic sports, and contests among the boys in these games were very spirited and exciting, not only among the contestants, but among the families of which the boys were members. Prizes were awarded to the winners in the various classes.

#### HEALTH.

The year has been one of progress all along the line. We have been blessed in many ways, although we were visited during the year with an epidemic of diphtheria, which caused some inconvenience, owing to the fact that our hospital was not large enough to isolate all cases showing a positive culture. Dr. Guy W. Latimer, school physician, will report in more detail on the health and hospital service of the school.

### SUNDAY SERVICES.

We have had helpful Sunday services throughout the year, and we owe a debt of gratitude to the ministers who have come to us with words of encouragement to help us along the pathway.

#### CONCLUSION.

I desire to express my appreciation to all officers who have been loyal to the school in striving for its betterment in every way and helping those who have come to us seeking help and guidance. I am especially grateful to the assistant superintendent, Mr. D. E. Roberts, for service rendered.

Permit me to acknowledge my indebtedness to the board of trustees for constant advice and encouragement in my efforts to assist in every way possible the boys who come to the school, that when leaving us they may go to the outer world feeling that their stay with us has not been in vain, but that they have learned something worth while.

Respectfully submitted,

G. A. STIRLING, Superintendent.

The BOARD OF TRUSTEES.

### REPORT OF THE SCHOOL PHYSICIAN.

Washington, D. C., September 12, 196.

GENTLEMEN: I have the honor to submit my report as school physician for the fiscal year ending June 30, 1916.

Total number of hospital days during period.	736
Total number at dispensary during period	10.076
Emergency cases	85
Minor operations	50
Major operations	10
Major operations. Average daily number in hospital	20
Cost of medical department.	2, 557, 43
Cost per capita.	\$6.45

There was one death, Raymond Brinkley, who died of cancer of the lung after a lingering illness. Because of so much sickness at this time and the constant day and

night care of this boy, an extra trained nurse was employed for 55 days.

There were 89 cases of diphtheria reported to the health office, only 7 of these showing clinical symptoms of the disease, the others being so-called "carriers." These were detected by frequent "culturing" from the throats of the boys after the clinical cases were found. At the time diphtheria was very prevalent in the city of Washington and surrounding country, and a quarantine of the entire school was established November 22, 1915; and maintained to March 12, 1916. Each family was also isolated from all direct contact with other families. Those officers and boys handling food were isolated and quarantined, and frequent cultures taken from their throats to assure that no carriers were among them. All shops and departments that could be dispensed with were discontinued. All this greatly embarrassed the organization of the school and added greatly to the cost of its operation. For the perfecting of this quarantine I am much indebted to Dr. Thomas Parran, who spent a week of undivided time here. I am also very grateful for the loyal support given me by your board and the cooperation of the officers and employees.

We also had an outbreak of 15 cases of whooping cough. These we isolated for many weeks, but permitted them to go out each day under the care of a special officer to get fresh air, sunshine, and exercise.

There were 7 cases of chicken pox.

There was one case of scarlet fever. This boy came from Atlanta, Ga., suffering from the disease. He was isolated for eight weeks. That we had no other cases

speaks well for our methods of disinfection and isolation.

The number of boys treated at the hospital is large in proportion to our population, but is accounted for by our custom of administering all medicine at the hospital and retaining there any boy suffering from any complaints disqualifying him for the regular performance of his duties.

We have an arrangement with the Public Health Service to do our laboratory work,

and I wish to express my appreciation of their untiring efforts in our behalf.

As each boy is received at the school he is sent to the hospital. A culture is taken from his throat and nose to see if he is a diphtheria carrier; he is kept in quarantine until a negative report is received from the health office. Then I make a complete physical examination of him and note all defects. He is given three doses of typhoid vaccine 10 days apart. He is vaccinated for smallpox. A blood smear is taken for malaria, and a fecal specimen is obtained for hookworm and other intestinal parasites. A blood specimen is also taken for the Wasserman test. A record of these various tests is kept, and those cases reported positive are treated until a specimen is obtained which shows a cure.

A Benet-Simon mental test is made, and those boys found backward are again examined from time to time to ascertain their progress.

The boy is also referred to the dentist, and a record of his findings is kept, and the

defective teeth repaired.

He is also examined by the oculist for eye defects and fitted with glasses or given proper treatment when needed.

I wish to express my gratitude to all my coworkers, and especially to Dr. Lewis Taylor, surgeon; Dr. Hunt, anesthetist; Dr. Seibert, oculist; and Dr. Sibly, dentist.

We need a physical director to instruct those boys who suffer from defects that can be corrected by proper exercise. Merely to tell these cases what to do is not sufficient, but it is necessary to make them do it.every day over long periods of time. The boy who is flat chested from adenoids is only half treated when operated on; he should then be turned over to a skilled director until he is normal.

We are in urgent need of a quarantine hospital where boys can be properly isolated and at the same time given sufficient exercise to maintain their health. Last winter we were compelled to use portions of the assembly hall for this purpose, which place is totally unfitted by reason of the plumbing and construction.

Respectfully,

GUY W. LATIMER, M. D.

The BOARD OF TRUSTEES.

#### REPORT OF THE TREASURER.

Washington, D. C., September 20, 1916.

SIRS: I have the honor to submit this report of my receipts and disbursements for the fiscal year ended June 30, last:

Receipts:  From appropriations—  For salaries and support of inmates.  For extraordinary repairs, fences, and equipment.  For furniture and gymnasium equipment for central school building.  For support of prisoners, transportation of boys to their homes.  For fund for fencing railroad right of way.  For new buildings, including balance of \$1,903.84 last report.  From District of Columbia, under contract with Board of Charities for care of boys committed by District of Columbia courts.  \$64,	 1,500.00 3,000.00 1,000.00 1,000.00
Less deduction of warrants: To Public Printer, annual report. To District of Columbia water department, water pipes.  116.18	64, 365. 28

I have also received from the superintendent of the school during the year, being the net proceeds of the farm and shop, the sum of \$310.83. In accordance with the act approved March 3, 1905, I have covered the same into the Treasury to the credit of the United States.

Very respectfully,

SAML. W. CURRIDEN, Treasurer.

The BOARD OF TRUSTEES.

#### REPORT OF THE BOARD OF TRUSTEES OF THE NATIONAL TRAIN-ING SCHOOL FOR GIRLS.

Washington, D. C., October 5, 1916.

Sir: I have the honor to submit the following report, showing the condition of the National Training School for Girls for the fiscal year ending June 30, 1916, with recommendations.

There were 79 inmates in the school on June 30, 1915. During the year 24 were committed; there were 29 girls paroled, and of these 8 were returned to the school. The number on parole on June 30, 1916, was 78. The number of inmates in the school June 30, 1916, was 77.

The board of trustees are gratified that Congress at its last session made an appropriation for a building for white girls, and although the appropriation was cut down from the amount recommended of \$20,000 to \$15,000, it is hoped that a suitable building or buildings may be erected within the amount appropriated. They are also gratified that an appropriation of \$5,000 was made for the acquisition of additional land, which was much needed. The board again recommends that the salary of the superintendent be increased from \$1,200 to \$1,600, and also that an additional building, to be used by the superintendent for administration purposes, be provided for, and they recommend for this purpose that an appropriation of \$10,000 be made, the amount recommended in the last report, to which reference is made, for the reasons therein stated. Other special appropriations are asked for in the superintendent's report, most of which have been recommended by the board of trustees after careful consideration, and are included in the estimates submitted herewith.

The experiment of granting to the inmates of the school greater latitude and greater freedom has proved to be a success. At first the inmates did not fully appreciate the new privileges accorded them, but when they were impressed with the fact that these privileges would have to be taken away from them if they abused them, they realized their true situation and have acted accordingly. Much praise is due to the superintendent in the accomplishment of these changes of management, and while it has necessarily been a great tax upon her nervous system, yet I feel that too much credit can not be given her for her extraordinary patience and watchful administration in this regard.

The reports of the superintendent and treasurer are attached.

An estimate of the appropriations required for the coming year is herewith submitted, and it will be noted that the board has recommended that the appropriation for groceries, provisions, etc.. be increased from \$13,500 to \$16,500. This increase is necessitated by the increase in prices of provisions for the school and the anticipated increase in the number of inmates when the new building for white children is completed. The bids for provisions for the present year are much in excess of those for the previous year, and some of the dealers have refused to enter into a contract for a whole year on account of the uncertainty of prices in the future.

Respectfully,

CHAPIN BROWN,
President Board of Trustees.

ESTIMATES OF THE NATIONAL TRAINING SCHOOL FOR GIRLS FOR THE FISCAL YEAR ENDING JUNE 30, 1918.

Superintendent. \$1,600; matron, who will act as superintendent in her absence, \$840; treasurer, clerk, and four teachers, at \$600 each; overseer, \$720; two parole officers, at \$600 each; seven teachers of industries, at \$480 each; engineer, \$720; assistant engineer, \$600; night watchman, \$480; two laborers, at \$300 each; in all, \$13,750.

For groceries, provisions, light, fuel, soap, oil, lamps, candles, clothing, shoes, forage, horseshoeing, medicines, medical attendance, hack hire, transportation, labor, sewing machines, fixtures, books, stationery, horses, vehicles, harness, cows, pigs, fowls, sheds, fences, repairs, typewriting, stenography, and other necessary items, including compensation not exceeding \$500 for additional labor or services, for identifying and pursuing escaped inmates and for rewards for their capture, and for transportation and other necessary expenses incident to securing suitable homes for paroled or discharged girls, not exceeding \$150; \$16,500.

For an additional building, to be used by the superintendent for administrative purposes, \$10,000; for screening all of the buildings, \$1,100; painting the buildings, \$2,000; furniture to replace that worn out, \$750; moving-picture machine, \$300; auto truck, \$750; automobile (passenger), \$600; force pump and motor to replace

worn-out pump, \$750.

#### REPORT OF THE SUPERINTENDENT.

June 30 marks the time for a review of the life in the institution for the preceding 12 months.

"Change" has been the keynote—change of policy and practice with most grati-

fying results.

The first and most important aim was to create in each girl a consciousness of the fact that she was designed to fill her own place in the world, and that only her own unwillingness to cooperate with those responsible for her welfare could mar the plan. The amazing realization that these girls felt there was no need for their service demanded a real study as to the best contribution they could make.

The second aim, obviously, was the training necessary to equip her for her serv-

ice ultimately—wifehood and motherhood.

The most valuable and at once the most intangible change has been the "change of spirit." The change from sullen indifference, profane irreverence, and vicious disorder to the cooperative life of a natural school group present a miracle. This change from a destructive to a constructive policy can best be illustrated by the results obtained through minimizing and reorganizing punishments and giving larger liberties and rewards for good conduct.

The way to obtain results is to study each girl as a unit and meet the demands of her individual case. It can readily be seen that such methods tax the present staff to the limit of endurance and ingenuity but are the only possible solution of dealing with these patients. Instead of having locked in rooms 25 to 30 girls daily, our average is 4, and, with the adopted methods, the attendance of men employees to quell riots is eliminated, and law and order, with self-respect, are replacing "no law."

Staff meetings were organized, with "cooperation" the slogan and a determina-

Staff meetings were organized, with "cooperation" the slogan and a determination to make the National Training School for Girls a credit to the Government, the first consideration the welfare of its wards and next the comfort and happiness of its teachers. Changes have been made in the staff only with a view to securing the best-equipped teachers to cope with the needs of the girls. This process is necessarily a slow one, but the changes have contributed largely to the change of spirit which is apparent to all. The experiment of colored teachers is being tried in the preparatory building and in many ways is working well.

The necessity for readjustment in the girl's dining room was evident, and accordingly a division was made, and the honor-cottage girls were provided with their own dining room in the administration building. To accomplish this purpose, it was necessary to sacrifice the superintendent's dining room to the officers and the officers' former dining room for the girls. This change relieved the tension in the large group

and gave more privileges to the honor-cottage girls.

The passageways have been abandoned except in stormy weather, and for all assemblies, daily chapel, etc., the girls pass through the campus, a much-enjoyed privilege.

The innovations which have naturally followed with the change of policy are

most interesting and will be enumerated briefly.

The deplorable fact that there was no available place for the training and care of delinquent white girls in the District of Columbia necessitated the sacrifice of our third building to the accommodation of these urgent cases.

Originally designed for most violent cases of incorrigibility, this building was difficult to adapt to our needs. There was no kitchen, no dining room. The laundry, therefore, had to be used for all three purposes. While making the best of conditions, we will welcome new cottages where these responsive girls may be surrounded with the domesticity their adolescence craves. We all recognize that institutions are not normal and do not present the conditions that 99 per cent will meet outside; but our paramount effort is to create and preserve as much of the small-home atmosphere as is possible among these large utensils, endless corridors, and the inevitable schoolroom. We can not expect reverence for religious service and inspiration for study in the room which must serve such large groups for church, school, recreation, and auditorium for entertainments and concerts. The winter, with its indoor recreation, is dreaded, because the girls must try to dance up and down the aisles, between the rows of school desks, where others are playing games. The construction is such that no moving-picture exhibit can be arranged without alterations. We need an assembly hall.

The equipment of kitchen and dining room for the white girls was done as economically as possible, the many unexpected needs of the institution demanding

many limitations.

The establishment of an officers' dining room in the preparatory building necessitated the purchase of dining-room equipment and, together with opening of white cottage, has increased the cost of maintenance slightly, but makes for efficiency in

the training of the girls and for the comfort of the teachers.

To train these girls for their business of being women we need small cottages, with lawn and flower gardens in front and with sufficient acreage for garden products in the rear, to accommodate a group of 10 girls, a working unit, and the cost of 6 such cottages for care of 60 girls would not exceed, if equal, the cost of an old type building.

The introduction of spiricuals, negro melodies, or jubilee songs into the daily program has been welcomed, and the general singing has been improved greatly and

is a constant source of joy to girls and staff alike.

All extra service performed by the girls, including pressing of garments, needlework, cleaning of shoes, etc., must be arranged for on a business basis in the office, so that the girls may here learn the value of their earning capacity, and the justice of this has appealed to them.

Physical training by a trained teacher has been of greatest benefit. Marching tactics have done much to develop the prompt obedience necessary in large groups.

The proper direction of play and recreation is one of the problems. With the

The proper direction of play and recreation is one of the problems. With the child's mentality and the adult experiences, it is difficult to arouse real play spirit; but with cottage and school songs and cheers and intercottage baseball games, the change on the field can be readily seen.

The system of credits established has worked well, giving the girls daily credits for appearance, conduct, obedience, quality of work, and spirit; has enabled us to give rewards to the highest credit girl in each cottage each week. Trips to museums, Monument, Zoological Garden, and shopping tours have been greatly enjoyed Friday afternoons by these girls. The white girls having maintained a complete honor roll for

one week were given the treat of attending a performance of Polly Anna.

The experiment of long walks in the country for honor girls has been tremendously enjoyed and only once abused, when one of the girls took undue advantage and slipped away through the woods. The unwillingness of anyone of the group accompanying to give information necessitated the withdrawal of all privileges, viz, singing and dancing on the lawns, longer hours of evening recreation, walks to the woods for flowers, berries, ferns, straw rides with supper in the woods, and leaving doors in honor cottage unlocked. This was a sad time for two weeks. All this time was consumed in teaching the so-called honor girls the quality of honor. But when confessions were made by those who assisted in the escape, and they were demoted, the runaway, a sorry spectacle, returned, and the doors again unlocked, it seemed to have been a blessing in disguise.

Our holidays have all been appropriately observed. Every particle of dramatic talent has been used, and is being developed through dialogues, playettes, and historical pageants. Great pleasure has been derived by the planning and construction of costumes, as well as the educational benefit. The large play field is being graded

and the girls have aided in the work.

The agricultural work, which has been definitely planned for this year, was started in May. The late season retarded this to a slight degree. An interesting incident illustrative of the necessity of visualizing for our colored girls any progressive or modern method, follows. Photographs showing girls in similar schools working in garden and field, in bloomer costumes, barefooted and with large hats, failed to arouse any but antagonistic criticisms. The white girls were all eagerness and promptly donned the

bloomers and hats, shedding shoes and stockings and gleefully went to work in the large truck patch east of new building, planting, weeding, hoeing, cultivating, picking cherries and vegetables, and creating general interest in the other group, who followed most eagerly, enjoying the experience fully as well.

The campus is cared for almost entirely by the colored girls, and presents a dignified setting for the school. Honor-cottage girls work certain hours without supervision. In the summertime the academic work is supplanted by the field work, the school-teachers

supervise under the direction of the overseer.

This year we have been dependent upon purchased seeds for flowers and vegetables, and have had accordingly several disappointments, delays, etc. We hope this winter to erect a greenhouse which will give us an early start with plants for beautifying the grounds as well as providing strong young plants for early vegetables, and at the same time an interesting study.

This work out of doors has meant so much to the physical, moral, educational, and spiritual life of our girls. Letters home reveal the interest and delight they are

taking in the real process of living.

In September we began holding our Sunday services out of doors under the great trees that so majestically adorn our grounds. This has been thoroughly enjoyed and

continued as long as the weather permitted.

The services continue as formerly arranged, the first Sunday being board Sunday, when a member of the board of trustees addresses the girls; on the second Sunday an Episcopalian service is conducted by rector of St. Alban's parish; third Sunday, the pastor of the Dumbarton Methodist Episcopal Church; and the fourth Sunday, a priest of the Apostolic Mission conducts mass. At all of these services the girls and the teachers appreciate this ministry of the gospel. When the hours of service permit the superintendent reads to the assembled school on the lawn.

The Sunday morning hours are a great problem. To overcome this a nondenominational Sunday school was organized and volunteers were invited to participate. They came with remarkable regularity to teach these children, and gave them a respite from those who are responsible for them all week. This has been a very satisfactory

arrangement.

The daily chapel with which we begin each day is exceptionally helpful. On Sunday each girl responds to roll call with a verse of Scripture, which she has selected and memorized because of its especial adaptation to her individual need. The reverence and solemnity of this occasion and the reference to the daily chapel services made by these children during the week testify to the change, is a great reward to the workers, and the last answer to the question, "Is it worth while?"

The health of the family has been excellent. We have been fortunate in not needing to occupy the infirmary during the year. There is great need for systematic exami-

nation and care of teeth and eyes; the former is badly needed.

A dental equipment in the infirmary is most important. The present method of taking the girls to the dental clinic is very unsatisfactory, because of the amount of time required of the parole officer, the only possible person to superintend these visits, and the obvious injustice of necessary choice of patients. A very incorrigible girl may need the special attention seriously and yet not deserve the privilege of the outing which is surely considered under the present arrangement.

We have those whose mental capacity will never permit self-control. We recognize that this retardation to our general progress will soon be abolished by the establishment of the colony for the feeble-minded, where permanent custodial care will guard their future welfare and happiness. It will not be ready this fall when one feeble-minded girl will be legally released. With no parents or responsible relations to provide a home, and unfit for parole, how will the District meet its responsibility? Her (and others) poor unbalanced, uncontrolled behavior is no longer the signal for disorder, but rather a sympathy is extended through quiet self-control on the part of the other girls.

The erection of the superintendent's house will afford an opportunity for girls anticipating parole to make the adjustment from a large to a small group before leaving

the institution.

The academic work has been entirely reorganized, and with the cooperation of the assistant superintendent of schools, new textbooks were selected and installed. The courses of study in the hands of young, enthusiastic college women have become vitalized.

Every effort is being made to correlate the school work with the practical activities

of the school.

After careful classification we find the fifth to be the average highest grade among the colored. The adoption of the Lancaster system—i. e., pupil participation in presenting the subjects—has been found to stimulate interest in the two colored divisions.

Among the white girls we have pupils doing eighth-grade work. Reading, spelling, arithmetic, geography, history, composition, hygiene represent the subjects studied.

All girls attend school and all show growth with opportunity. They average 15 hours

academic work weekly.

The household training, no less important, has been furnished through the practical work of the institution. The girls are slowly but surely learning that the common daily tasks are not drudgery but the most essential training they can have to prepare them for self-support.

Blackboards in each kitchen, upon which daily menus and costs of food are placed, have made the preparation of food a personal interest rather than a mechanical operation. Discussion by the "kitchen girls" with the teacher in charge concerning the cost of each meal prepared for a possible future family unit of six, is bound to aid her buying, selection, and value of food in her own future home. Table service, care of

pantry and refrigerator are taught.

In the sewing room the girls are taught not only cutting and fitting of their five dresses each, two morning frocks, two afternoon ginghams, and the Sunday white dress, but all underwear for summer and winter, including necessary making and mending; repairing of the institution linen is included in this course. Great improvement in quality of work is apparent, and no garment can be passed from sewing room without the O. K. of the matron.

In the laundries there has been a distinct advance in standard of the work required. Girls with a desire to specialize in laundry work are being instructed in the conduct of laundries, of which they may become future proprietors. In this as in all other depart-

ments self-control is being developed to the highest attainment possible.

The spirit of efficiency through competitive group work has been found stimulating and "nothing good without labor" is a new motto for the girls of the National Training School. Particular attention has been given to the clothing of the girls. Good sweaters and hats were purchased and the girls placed on parole were furnished a neat outfit, suitable

for the position they will occupy.

New and much needed mattresses were furnished all beds in the two old buildings. China and flat silver for teachers' dining room, and new utensils in both kitchens to replace the very unsightly and unsanitary equipment were purchased. The punishment ward in the third building has been made more practicable by the construction of a separate stairway and entrance. This precludes the usual spectacular exit, and insures absolute isolation, which expedites good conduct.

All the requirements of the fire marshal have been carried out. Modern fire extinguishers have replaced all obsolete type. New nozzles have been attached to all hose. Arrangements have been made for the rewiring of the basement in the administration building. Red lights indicating location of fire escapes have been placed and burn

all night. Fire escapes are kept unlocked during the night.

The roofs have been repaired under special appropriation of \$220, but work had been too long delayed and the preparatory building roof will sooner or later need to be entirely renewed. Our engineers have done much work not covered by the appropriation.

The new record forms are in process of filing and will prove to be a great improvement. In order to deal justly with our wards, we must take into consideration the immediate relatives, and we find ourselves face to face with problems of family rehabilitation, which plays a large part in the regeneration of the delinquent girl. The heredity and environment must be investigated and considered and effort made to improve the home conditions that have sadly failed, both as a background and as a probable future factor when the time for parole arrives. This new method of dealing with delinquent girls has greatly increased the work of the office, as we are endeavoring to file records which will be a real help. This has required more office space, which was secured by cutting the doorway between the old sitting room and an unused room at small cost. This made available two closets, giving ample room for the clerical work. The necessitated transfer of sitting room to the old office room was distinctly favorable, as the only fireplace in the building was already there.

The parole of our girls presents a problem. A definite effort has been made to find suitable homes in the country districts and with good results, only to face the fact that the tame country life does not appeal to our wards and they long for the liberty and license of the old sites. We hope the introduction of farm work at the school will

instill a love of country life when ready for parole.

The home into which a girl is paroled is most carefully investigated, and in order to insure as far as possible the full cooperation of applicants for our wards, we have drafted a set of suggestions concerning her supervision and care in health and sickness, sleeping quarters, wages, and general welfare. These have in each case been accepted as just and fair, and this insures greatest possible care for the girl.

We have girls paroled in former years who are irresponsibly feeble-minded and

should be cared for permanently.

We hope for an additional parole officer, as the hopeless girls on parole create a defiance toward surveillance on the part of a slightly higher type, which is discouraging in the extreme.

The following table will indicate the amount of work necessary to keep these girls employed and living correct lives. The parole report refers to the colored girls only as the white girls have not yet been in the school sufficiently long to receive our training.

Number of girls on parole June 30, 1915	76
Number of paroled girls matured during year. — 21  —————————————————————————————————	2 .
Number of girls on parole June 30, 1916.	78
MOVEMENT OF POPULATION.	
Number of girls in school June 30, 1915.       79         Number of girls committed during year       24         Number of girls sent out on parole       2         Number of girls returned from parole       8         Number of girls sent to hospital.       1         Number of girls returned from hospital.       10         Number of girls escaped from school       5         Number of girls captured and returned       5         Number of girls matured.       126	7
Number of girls in school June 30 1916	77

The superintendent desires to thank the board for the services of an office secretary since May, whose assistance has made possible this increased office work. Her musical ability is a distinct addition to the joys of the institution. This salary of \$30 has been paid out of the maintenance appropriation for additional service and should be provided for in the salary appropriation next year.

I would recommend the increase of the matron's salary from \$50 to \$60, which is small

compared with other institutions.

The necessity for complete screening of all buildings for the protection of health is most emphatically recognized and hereby reported. Through careful management we were able to partly screen the new building with permanent screens and will finish the work during the present summer without additional appropriation, but to have the two old buildings made insect proof will be expensive. The peculiar construction of the windows and exits requires in many instances an entire screen from top to bottom. An estimate secured from reliable manufacturers of screens is for

administration building and preparatory building, \$1,037.57.

The new building now used for white girls should be equipped with small bureaus, likewise the honor cottage for colored girls. A year ago it would not have been possible to recommend the placing of bureaus in this school, but an awakening of the sense of refinement makes this request almost a necessity. Many of the washstands in the preparatory building have long since broken down, and have not been replaced. We tried to build stationary stands but found the wall construction was such that the braces could not be supported without bolts into adjoining rooms; this would not only be unsightly but would require much labor and consequently expense. The present tables in administration building could be used to fill the gaps in preparatory building.

I would recommend a special appropriation of \$500 for the purpose of properly fur-

nishing these 45 rooms.

The condition of the bed springs is such that we should be able to replace many throughout the two old buildings. Various types having been used it is found quite impossible to buy springs to go on otherwise good beds, and it will be necessary to abandon the entire bedstead. One hundred and fifty dollars will be needed for this purpose.

The educational value as well as the entertaining quality of the moving-picture machine for schools and institutions have long since been recognized. Ability to secure films of historical, agricultural, and recreational interest through the various agencies makes the operation of little expense, and the purchase of a machine is

hereby recommended, and an appropriation of \$300 is asked for.

One of the most apparent needs is the proper painting inside and out of the two old buildings. The engineers have steadily been renovating and repairing, but much of the work is of a temporary character. With this obvious need estimates were sought Twelve hundred and seventy dollars will be required for the interior and exterior painting of administration building and \$760 for the outside of the preparatory building and \$220 for the reception room, front hall to third floor, and connecting hall to the school room; \$2,030 in all.

An auto truck for the marketing three times a week would facilitate the work, give the school the benefit of the man's services, and reduce the cost of keeping at least

one horse. A substantial truck will cost \$750.

The men employees have entered into the spirit of progress at the school, and each department is being brought up to a high standard. There is evident a determination to cooperate with the new spirit of the school and now the men are looked upon by the girls as a part of the family life rather than foes and guards.

The engineers have overhauled the boilers and steam line, made many repairs, and with anticipated improvements expect to reduce the coal consumption and eliminate

waste of current.

The boilers were found to be in need of repair, and the most necessary work will be done in July, but absolutely necessary will be the furnishing of new grates, frames and arches for the boilers; a centrifugal force pump and Westinghouse motor to take the place of the worn-out old type cog pump, which is in constant need of repair and wastes current, and must be used twice daily to fill the field tank. The amount necessary for all will approximate \$650.

The new overseer has aided very much in developing all possible on our small

acreage. The potato crop promises to be very large.

A small portable smoke house was erected for the care of hams, shoulders, and sides,

which proved an economical plan.

During the year we planted 3,000 strawberry, 250 raspberry, 50 rhubarb plants; 75 currant bushes, 20 apple trees, 8 pear and 4 peach trees. The small acreage prevented the planting of an orchard that should be a part of this institution.

The farm produced from August 16, 1915, to June 30, 1916, the following:

_				9	
Apples	bushels	27	Onions	bunches	23
Asparagus		91	Parsnips		103
Beets	bushels	34	Peaches	dodo	-i*

Owing to the advances in cost of every line of staples, it will be impossible to maintain any kind of a standard without an increase in the present appropriation of \$13,500 for groceries, provisions, light, fuel, soap, oil, lamps, candles, clothing, shoes, forage, horseshoeing, medicine, medical attention, hack hire, transportation, labor, sewing machines, fixtures, books, stationery, horses, vehicles, harness, cows, pigs, fowls, sheds, fences, repairs, typewriting, stenography, and other necessary items, including compensation not exceeding \$350, for additional labor or sevrices, for identifying and pursuing escaped inmates, and for rewards for their recapture, and for transportation and other necessary expenses incident to securing suitable homes for paroled or discharged girls not exceeding \$150, to \$15,000.

This amount will not permit the purchase of an auto truck nor the bureaus asked for

elsewhere, as the renewal of harness, wagons, and implements must be made, regardless of the granting of the special appropriation for auto. There is much that should be done in the line of equipping the institution to make it at least worthy of its name; hard service is telling upon rugs, furniture, and dining rooms, and much more than amount asked for could be spent in replacing worn-out furnishings.

Respectfully submitted,

Jennie A. Griffith. Superintendent.

The Board of Trustees.

#### THE TREASURER'S REPORT.

Washington, D. C., September 30, 1916.

Sirs: The following report exhibits in detail my receipts and disbursements as treasurer of the National Training School for Girls during the fiscal year ended June 30, 1916:

Total receipts from appropriation:		
For salaries	\$11,880,00	
For maintenance	12 500 00	
For repairing roofs, gutters, and spouting, administration building, preparatory building, male dormitory, and stable.		
building, male dormitory, and stable	220.00	
Total		\$25,600.00

Total disbursements:         \$10,896.99           For salaries.         \$13,449.02           For repairing roofs, gutters, and spouting.         219.90	
Total	\$24,565.91
Balance unexpended	1,034.09

#### Introduction.

Washington, D. C., August 7, 1916.

Sir: I have the honor to submit the annual report of the Freed-

men's Hospital for the fiscal year ended June 30, 1916.

The period covered by this report was an exceedingly busy one. The professional activities were far in excess of those during any previous year of the life of the hospital, while on the administrative side the work was equal to, if not greater than, any previous year. The efforts put forth to operate the hospital were directed along lines that carry a maximum of effectiveness with a minimum of friction. Not how much could be done for the hospital, but how much the hospital could do for the sick within the means provided for care and treatment, was kept constantly in view.

## PATIENTS.

There were 180 patients in the hospital at the beginning of the year, and 3,491, including 281 births, were admitted into the hospital during the year, making a total of 3,671 indoor patients receiving treatment and care, as against 3,535 for the year just closed.

Of the number admitted, including births, 1,756 were District of Columbia indigents, 1,436 were United States indigents, and 299 paid for the services rendered them. A total of 281 births occurred; 16

were pay and 265 were indigent patients.

There were discharged during the year 3,456 patients, of whom 1,481 had recovered from their ailments, 1,451 improved, 228 unimproved, 27 not treated, and 269 died. At the close of the year there were 215 patients remaining. Of this number, 11 were pay, 111 United States indigents, and 93 District of Columbia indigents.

The percentage of deaths from all causes was 7, notwithstanding a large number of patients when received were far advanced in physical decay, helpless and hopeless. In noticing the residences of the deceased, it is observed that the mortality rate of those who came from the States was 4.8 per cent, while it reached a little over 11 per cent of those who came from the District of Columbia.

Kidney and lung diseases were the leading causes of death, the

former being 18 per cent and the latter 12.5 per cent.

It is also noted that 65 per cent of the typhoid fever cases admitted

came from the State of Maryland.

In the surgical service 2,967 operations were performed, or 671 more than last year, taxing the surgical facilities to the limit. The mortality rate in this service was 2.1 per cent, about the same as

the preceding year.

In the dispensary or out-patient department 7,341 were treated as follows: Medical, 2,174; minor surgical, 308; orthopedic, 192; dermatology, 529; pediatrics, 830; eye, 815; gynecology, 724; ear, nose, and throat, 914; neurology, 223; genito-urinary, 556; and tuberculosis, 76. The patients attending these clinics made 13,886 revisits and 1,876 surgical dressings were necessary during the course of their treatment.

## 554 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## Patients admitted each year for the past 42 years.

	Male.	Female.	Male.	Female.	Total.	Eclampsia.	Cæsarean	Podalic v	Lacerations.	Post-partum rhage	Stillbirths.	Twins.	Head.	Breech.	Foot.	Forceps.	Primipara,	Multipara.
July August September October November January February March April May June			15 18 22 6 10 13 19 15 11 17 1 9	13 9 13 14 17 12 15 14 18 4 3 9	28 27 35 20 27 25 34 29 29 21 4 18	i 1	i i 1		10 6 11 7 5 10 13 14 15 10 3 7	2 4 2 2 2 1	2 2 1 2 5 6 5  3 3	1	27 25 35 20 25 25 34 28 28 20 3 18	1 1 1 1 1	1	1 2 1  1	15 11 19 7 15 13 19 14 12 8 1	13 15 15 13 12 11 15 15 17 13 3 8
Total			156	141	297	3	4		111	13	32	3	289	4	4	5	144	150

## Anesthetics, all patients.

•					
	Wh	Thite. Co		ored.	Total.
	Male.	Female.	Male.	Female.	
General: Ether. Chloroform. Chloroform and ether Nitrous oxide and ether Nitrous oxide Ethyl chloride and ether. Local: Cocaine. Cocaine and novocaine. Ethyl chloride. Novocaine. Quinine and urea hydrochloride.	2 8 9	4	489 111 2 23 2 10 52 4 66 27 3	1,020 9 1 38 8 28 43 2 83 12	1, 528 23 3 64 14 38 107 6 158 39
Total	36	14	689	1,244	1,983

The number of operations requiring anesthetics has increased to such proportion as to make it impossible for one person to administer all anesthetics. Frequently it becomes necessary to detail internes to assist in this all-important work, although a practice which is not considered as safe as one in which a skilled assistant is employed.

No change can be made until Congress provides the necessary

relief.

## Pathological and X-ray Laboratories.

#### PATHOLOGICAL LABORATORY.

	1916	1915		1916	1915
Hemaglobin estimates. Widal reactions. Malarial examinations, Examination of sputum. Autopsies	65 4 73	91 110 23 202 23	Museum specimens. Microscopical sections. Wasserman reactions (Noguchi modifications). Urinalyses	35 210 1,174 1,744	26 355 853 2,496

Of the Wasserman's tests 39.26 per cent were positive, 57.43 per cent negative, and 3.31 per cent doubtful.

There were numerous differential counts, blood cultures, fecal, gastric contents, spinal-fluid examinations, bacteriological smears, cultures, and many vaccines made.

X-RAY LABORATORY.

Disease.	,Cases.	Treat- ments.	Cured.	Im- proved.	Unim- proved.	Un- known,
Tuberculous adenitis. Gotters Tuberculosis of skin. Carcinoma breast, postoperative. Carcinoma throat, inoperable. Keloids. Eczema (papular, squamous, seborrheic). Adhesion skull (postoperative). Enlarged thymus.	3 1 9 1	68 11 1 23 3 40 11 3 1	3 2	5 1 2	3 5	1 9 1 1 1 1 1 1 1 1 1 7 1 7 1 7 1 7 1 7

It is indeed interesting to note the good results obtained by the X ray, especially in the treatment of tubercular glands. About 50 per cent of those treated were cured. All were chronic, some post-operative (suppurating), and others inoperable.

RADIOGRAPHS.

	1916	1915		1916	1915

#### NEEDS.

There are certain definite needs of the hospital which have been urgent for several years and which experience of the past year has made more evident than ever. First and foremost is that of a pathological building, the one perhaps more glaringly evident from its direct bearing on the medical and surgical work. The lack of suitable quarters for laboratory study is a distressing drawback to a complete scientific investigation of the diseases of the patients, who expect and are entitled to all the benefits of modern research.

The need for more laundry space is equally as urgent as that for pathological purposes. In providing for one, the other can be easily accommodated. By locating the laboratory building on the west side of the present laundry would give ample and convenient space in its basement for all laundry needs. In this connection, attention is invited to the following provision of the sundry civil act, approved August 1, 1914:

To reimburse the United States the amount due on account of one-half of the per capita cost of maintenance of indigent patients in Freedmen's Hospital from the District of Columbia in excess of the number charged to and paid for by said District during the fiscal year nineteen hundred and six to nineteen hundred and thirteen, inclusive, there shall be transferred from the revenues of the District of Columbia to the United States, beginning with the fiscal year nineteen hundred and fifteen the sum of \$37,996.70, which amount so transferred shall be covered into the Treasury as miscellaneous receipts.

Thirty-five thousand dollars of the money credited to the miscellaneous receipts of the United States Treasury by this act would be sufficient to provide for the foregoing needs. It seems right and just that this sum should be reappropriated by Congress for hospital purposes, inasmuch as the same was earned by the hospital in the treatment and care of the indigent patients from the District of Columbia.

The unkept and unsightly grounds about the hospital can not be utilized for the benefit of the patients until funds are provided for the necessary fencing and beautifying. Legislation should therefore be enacted by Congress authorizing this much-needed improvement.

A ward for the eye and nervous patients is greatly needed.

The following increase in the force of employees would add much to the efficiency of the institution:

A storekeeper	\$1,200
An assistant engineer	1,000
An assistant anesthetist	900
A laborer	300
Two telephone operators, \$300 each	600

The salaries of many of the low-grade positions should be increased so that a higher grade of employees could be had. This would relieve the embarrassing situations which sometimes arise and would add much to the efficiency of the service. The frequent changes in the force of employees are due primarily to inadequate salaries. It is impossible to induce a high-grade employee to remain in the service very long on a low-grade salary.

#### TRAINING SCHOOL FOR NURSES

The training school for nurses was organized in 1894, with a course of instruction covering only 18 months, thus displacing the old-fashioned red-bandana nurse in this institution. In 1895 the course was extended to two years and in 1909 to three years. Since its beginning, 277 trained nurses have graduated, the large majority of whom have succeeded in the practice of their profession in private, institutional, and public-health service.

The graduating exercises were held May 29 instead of May 2, as intended, on account of the prevalence of diphtheria in the hospital.

On this date 14 nurses were graduated, as follows:

#### Graduates, 1916.

Lola Montice Hammie, Washington, D. C. Lucille Bernice Yeatman, Philadelphia, Pa. Nancy Jeanette Minnis, Norfolk, Va. Fannie Geneva Walker, Lockland, Ohio. Carrie Francis Graham, Boston, Mass. Mary Viola Weeks, Norfolk, Va. Josephine Julia Lightfoot, Berryville, Va.

Probationers....

Irene Rhodelia Scott, Atlanta, Ga. Helen Healy Clifford, Martinsburg, W.Va. Georgia Penn Smith, Manassas, Va. Edith Berncenia Gill, Pittston, Pa. Cora Lee Holmes, Norfolk, Va. Louise Veronica Marsh, Norfolk, Va. Charlotte King May, Holton, Kans.

#### Lectures.

The course of lectures was delivered by the	ne following staff:
Gynecology	J. E. H. Taylor, M. D.
Anatomy and physiology	S. L. Carson, M. D.
Hygiene	C. A. Brooks, M. D.
Theoretical nursing	Laura R. MacHale.
Dietetics, practical and theoretical nursing	Emma M. Irwin.
Diseases of the eye	M. O. Dumas, M. D.
Medical nursing	Caryl Burbank, M. D.
Diseases of children	William French, M. D.
Obstetrics	E. D. Williston, M. D.
Materia medica and therapeutics	John W. Mitchell, M. D.
Urinalysis and bacteriology	W. Van Swearingen, M. D.
Neurology	E. C. A. Wilson, M. D.
Ear, nose, and throat	M. O. Dumas, M. D.
Surgical nursing.	William A. Jack, M. D.

#### Textbooks used.

Anatomy and Physiology—Kimber's.

Materia Medica—Foot's.

Theory and Practice of Nursing—Hamp-

Gynecology-McFarland.

Dietetics—Hall.

Bacteriology—Carey.

Fever Nursing—Paul. Obstetrics—Cooke.

Care of Feeding of Children-Holt.

Ethics—Aikens.

First year nursing-Goodnow.

Nurses are required to furnish their own books.

#### Course of instruction.

First year:

Ethics-Five lectures.

Anatomy and physiology—Sixteen lectures, one hour each.

Hygiene—Eight lectures, 1½ hours each.

Bandaging—Two lectures, one hour each.

Practical and theoretical nursing—Two lectures a week, 1½ hours each, from October 1 to May 1.

Second year:

Materia medica—Seven lectures, one hour each.

Bacteriology and urinalysis—Twelve lectures, one hour each.

Medical nursing, including the acute infectious diseases—Eight lectures, one hour each.

Surgical nursing, including anæsthetics—Eight lectures, one hour each.

Dietetics—Ten lectures, one hour each.

Practical and theoretical nursing—One lecture a week, one hour each, from October 1 to May 1.

Third year:

Obstetrics—Eight lectures, one hour each.

Children's diseases, including the feeding of infants—Nine lectures, one hour each.

Diseases of the eye—Three lectures, one hour each.

Diseases of the ear, nose, and throat—Four lectures, one hour each.

Gynecology—Six lectures, one hour each.

Nervous diseases—Eight lectures, one hour each.

Practical and theoretical nursing—One lecture a week, one hour each, from October 1 to May 1.

#### First-year practical demonstrations.

#### [Each lesson one and one-half hours long.]

October:

First lesson—Bedmaking; management of helpless patients—moving, changing, giving baths.

Second lesson—Note taking; pulse, temperature, respiration, mental condition.

Third lesson—The temperature; the thermometer, its use and care; excretions; eruptions.

Fourth lesson—Pulse; quality, rhythm, number, etc.; hypodermic syringe, its care and use.

November:

Fifth lesson—Fomentations; poultices; sand bags; ice cap, its care; ice coil.

Sixth lesson—The hot-water bag or bottle, use and abuse; care of instruments, sterilizing, etc.; care of rubber gloves, methods of sterilizing.

Seventh lesson—Administering of enemata, douches, cantharides, etc.; Murphy infusion.

Eighth lesson—Counterirritations, mustard, cantharides, etc.; physiological action; dry cupping.

Ninth lesson—Hypodermoclysis; intravenous or infusion; preparation of solution; patient, instruments.

December:

Tenth lesson—Positions: Dorsal, Sims, Trendelenberg, Fowler's knee and chest; lithotomy.

Eleventh lesson-Prevention and treatment of bedsores.

Twelfth lesson-Weights and measures, solutions.

Thirteenth lesson—Disinfection of clothing, excreta, sputum, etc.

January:

Fourteenth lesson—Bandages, making and use; material, Esmark.

Fifteenth lesson—Care of patient before, during, and after anesthesia.

Sixteenth lesson—Care of patient before, during, and after operation, and preparation of patient for operation.

Seventeenth lesson—Preparation of room for operation, sterilization, etc.

February:

Eighteenth lesson—Urine analysis, specific gravity, quantity reaction, Fehling's and Heller's tests.

Nineteenth lesson—Contagious-disease nursing, care of convalescents, feeding in particular.

Twentieth lesson—Infant feeding, sterilization, pasteurizing, child's first bath, care of eyes, buttocks, etc.

Twenty-first lesson—Administration of drugs, use and effect.

March:

Twenty-second lesson—Care of the dead.

Twenty-third lesson-Fumigation.

THEORY.

### Course in cooking, theoretical and practical.

IMBOUI.	THATTOAL WORK.
1. Water food	Coffee, tea, barley water, lemonade.
2. Carbohydrates—starch	Gruels, toast, Zwieback.
3. Carbohydrates—cellulose	Cereals and vegetables.
4. Carbohydrates—sugar	Fruits, sirups, jelly.
	Salads, salad dressing, butter, cream.
6. Proteids—milk	Pasteurized, peptonized, koumiss.
7. Proteids—eggs	Cooked in shell, poached, omelets.
8. Proteids—milk and eggs	Custards, eggnogs, egg lemonade.
9. Proteids—meat and fish	Broiling, roasting, meat sandwiches.
10. Proteids—meat	. Beef juice, beef extract, broth.
11. Proteids—gelatin	
12. Review carbohydrates	Sponge cake, ice cream, water ices.

#### REPORT OF THE PRESIDENT.

Washington, D. C., September 23, 1916.

Gentlemen: Many important changes in the work of Columbia Hospital for Women occurred during the fiscal year ended June 30, 1916. The principal event of the year was the occupation of the new hospital, which took place in January, 1916. As soon as the occupancy of the new hospital building was completed the old hospital was removed under the supervision of Mr. Elliott Woods, Superintendent of the United States Capitol grounds and by law charged with similar duties in connection with the Columbia Hospital for Women. The removal of the old building opens a view from the new hospital to the west and allows the proper entrance of light

and air into the new building.

In the new hospital we have found every modern convenience looking to the proper care of the patients and proper surgical atten-The kitchens and dining rooms of the hospital are placed on the upper floor, thus avoiding the discomfort and inconvenience, and possible injury, of the odors from the kitchens and dining rooms. The occupation of the new hospital affords a much larger field of activity to the hospital, the number of beds being practically doubled. It is advisable, therefore, that larger appropriations for the care of indigent patients be made, inasmuch as a much larger number can be provided for. The continual increase in the cost of living also indicates that an additional per diem allowance per patient should be provided. The amount now received for the care of indigent patients is no greater than it was a few years ago, when the cost of food and appliances was from 25 to 40 per cent less than at the present time. An increase in the per diem allowance of at least 25 per cent, and more justly 333 per cent, is a reasonable compliance with the present changed condition.

The medical data in relation to the upkeep of the hospital are contained in the report of the medical superintendent. The financial data in regard to the receipts and expenditures of the hospital are found in the report of the treasurer. It will be noticed that there has been a considerable increase in the deficit of the institution during the year. This was due to the change from the old to the new building. There was a necessary interruption of service and a very marked increase in expenditures. Inasmuch as there was not an immediate noticeable increase in the number of patients, and especially in the number of pay patients, the expenditures of the new hospital far exceeded its revenues in the first few months of its occupation. As the number of patients, and especially pay patients, increased, the revenues gradually approached the expenses. For this reason there was very little increase in the deficit during the last three months of

the fiscal year.

The hospital is fortunate in having received from Congress an additional grant toward its expenditures in the provision that has been made for heating and lighting. These expenditures were formerly borne from the current revenues of the hospital. They are now provided for by direct appropriation of Congress, under the supervision of Mr. Elliott Woods. The deficit which is shown in the financial report of over \$11.000, has arisen gradually during the last few years, due largely to the fact that the cost of supplies has gradually increased while the revenues of the hospital have not

increased until within the last few months. It is only reasonable in this connection that a request be made of Congress to appropriate a sufficient sum to wipe out this deficit and place the financial condition of the hospital at once upon a proper basis. The experience in the management of hospitals in general is that all of the revenues are required for current expenses and for betterments in regard to hospital supplies and the labor and materials necessary to conduct it. It is scarcely reasonable, therefore, to hope that we will have any surplus in the near future sufficient to discharge the indebtedness which has accrued. I urge, therefore, that Congress be requested to appropriate \$12,000, or as much as may be necessary, to liquidate all outstanding obligations against the hospital. Inasmuch as Columbia Hospital for Women is a Government institution, 1 also recommend that the request be made of Congress to pay the salaries of the medical superintendent, the secretary, the treasurer, and the housekeeper. These are direct expenditures of administration which it is proper for the United States Treasury to bear.

I also strongly urge upon the proper authorities to take immediate steps to provide for a nurses' home. We employ now, in round numbers, 50 nurses, and the number will increase as the number of patients increases toward the maximum capacity of the hospital to provide for. A nurses' home capable of housing, at the minimum, 75 nurses is urgently required. The accommodations for There is abundant space the nurses are now wholly inadequate. on the property owned by the United States to erect a modern nurses' dormitory. This dormitory should provide not only the proper living rooms for the nurses, but also an audience room where the lectures before the nurses' school can be delivered. At the present time the nurses are instructed in a small basement room which is not properly adapted in any way to school purposes. An audience room would provide not only for the proper instruction of nurses, but also for religious services, concerts, entertainments, and for the commencement exercises of the school. In the construction of a nurses' dormitory ample provision for such an audience, room is earnestly recommended.

The nurses' dormitory should be provided, also, with an appropriate library and lounge room for the use and comforts of the nurse students. The instruction of young women in the fundamental principles of nursing is a work of the highest significance, not only to the welfare of the hospital but to the welfare of the community. There is a growing need for the services of such instructed persons, and Columbia Hospital should not fail to use every means in its power to do the best work possible along this line. As the medical and surgical opportunities at the Columbia Hospital are of a special character our nurses require additional instruction in other branches of medical science, in order that the graduates may be properly enrolled as eligible for service through all parts of the United States. Other hospitals of the city have been utilized by Columbia Hospital for this purpose. During the past year, however, an arrangement was made with the Bellevue Hospital of New York of a very favorable character. necessary general instruction not provided for in Columbia Hospital can now be given to our nurse undergraduates in one of the best and most extensive hospitals of the country and without expense to Columbia Hospital save the transportation to and from New York. The small salaries which the nurse students receive are paid to our nurses by the Bellevue Hospital during the time of their service. On graduation, therefore, these nurses, so trained, are eligible to registration and service as qualified nurses through all parts of the country.

Inasmuch as the number of indigent patients which can be provided for is largely increased in our new quarters, not only should the per diem allowance for each one be increased, but also the gross sum which is usable for such service should be increased. I recommend, therefore, that in the estimates for the coming year the sum of \$30,000 be requested instead of the \$20,000 which is now available. Columbia Hospital for Women is now in a condition to do better service to the city and to the Nation than ever in its long and useful history. Every possible facility to make that service the best possible is therefore desirable.

Respectfully,

H. W. WILEY,

President.

To the BOARD OF DIRECTORS,

COLUMBIA HOSPITAL FOR WOMEN AND LYING-IN ASYLUM. (For transmission to the Board of Charities.)

### REPORT OF THE TREASURER.

Washington, D. C., July 21, 1916.

Gentlemen: I have the honor to submit the following financial statement showing the receipts and disbursements of moneys on account of Columbia Hospital for Women and Lying-in Asylum, pertaining to the fiscal year ending June 30, 1916.

Financial statement of John D. McChesney, treasurer Columbia Hospital for Women and Lying-in Asylum for the fiscal year ending June 30, 1916.

Items.	Care and treatment of indigent patients under contract with Board of Charities from regular appropriation of Congress.	Pay	Donation from Board of Lady Visitors.	Total.
By balance on hand July 1, 1915	\$24.71	\$207.54	\$400.00	\$632.25
ending June 30, 1916 (June 1, 1915, to May 31, 1916). Received from pay patients during the fiscal year end-	20, 441. 80			20,441.80
ing June 30, 1916 (June 1, 1915 to May 31, 1916)		22, 542.00		22, 542. 00
Received from dispensary patients during the fiscal year ending June 30, 1916 (June 1, 1915, to May 31, 1916).  Received interest on deposits Jan. 2, 1915. \$16.63		52. 45		52. 45

Respectfully,

JOHN D. McChesney,

Treasurer.

To the BOARD OF DIRECTORS, COLUMBIA HOSPITAL FOR WOMEN AND LYING-IN ASYLUM.

#### REPORT OF THE SUPERINTENDENT.

COLUMBIA HOSPITAL FOR WOMEN, July 1, 1916.

Gentlemen: I respectfully submit herewith the annual report, financial and medical, pertaining to the affairs of the hospital for the fiscal year ending June 30, 1916.

The following table indicates the kind and amount of medical work done during the past year, as well as for the preceding 12 years:

	1904	1905	1906	1907	1908	1909	1910	1911	1912	1913	1914	1915	1916
Cases treated Operations (adults)	1,311 602	1, 255 682	1, 275 745	1,300 635	1,403 888	1, 446 792	1, 498 742	1,416 833	1, 614 904	1,557 1,017	1, 401 858	1, 545 1, 079	1,881 1,516
Births, including stillbirths	364	358	363	366	411	414	456	427	456	435	412	459	548
Percentage of deaths (adults): From all causes After operation		2.82 3.12	2.65 3.47	2. 92 3. 17	2.37 2.27	2.91 2.65	2.60 2.66	3. 47 2. 28	2.31 2.10	2.83 1.97	1.40 .93	1.18 1.25	1.51 1.62

During the past year 632 parturient women were admitted, of whom 32 were delivered before reaching the hospital or within 40 minutes afterwards. During the past 9 years there have been admitted 4,373 obstetrical cases, 342 of which delivered themselves en route or a few minutes after their arrival at the hospital.

It is evident, therefore, from our experience here, that an obstetrical hospital should be located centrally, when practicable, and never at a distance in the suburbs, unless the comfort and safety of this

class of patients are to be ignored.

#### TRAINING SCHOOL FOR NURSES.

This unit has performed its functions in a highly satisfactory manner during the year, and particularly during that period when a readjustment of its work to meet the changed conditions incident to the operation of our new hospital became necessary.

Besides this successful accomplishment, the training school has become eligible for registration both in New York and the District of Columbia, through the earnest and persistent efforts of its principal. Its status and prospects have never been, therefore, better than now.

From both an educational and financial standpoint, as well as for efficiency of service, the training school should be enlarged and suitable provision made for a new nurses' home for this purpose. I respectfully recommend and request, therefore, that the necessary steps be taken to accomplish this.

The following nurses were graduated May 25, 1916:

Editha Lois Thurber. New York City.
Ruth Helene Worcester District of Columbia.
Hallie Jeter Crowder Virginia.
Emily Clare Turner Maryland.
Anna Ruby Hurst District of Columbia.
Irva R. Young Maryland.
Caroline Brandruff Moore District of Columbia.
Yates Davis Duke Maryland.
Victoria Ruth Good Virginia.
Frances Barker Turner Maryland.
Florence M. Donnelly Pennsylvania.

#### STATISTICS.

There remained in the hospital June 30, 1915, 98 patients; of these 35 were white and 63 colored. Admissions during the year, including infants and stillbirths, were 1,819 as against 1,514 last year. The total number treated, including infants, was 1,881, as against 1,545 last year; of these 977 were white and 904 colored. Discharges (including stillbirths) and deaths during the year were 1,804, as against 1,485 last year; of this number 921 were white and 883 colored. There remained in the hospital July 1, 1916, 113 patients; of these 67 were white and 46 colored.

In the gynecological division the admissions (including readmissions) were 621, as against 542 last year; in the obstetrical division (including infants, stillbirths, and readmissions), 1,198, as against 972 last year. Number of births in hospital were 262 males and 286 females, a total of 548, as against 459 last year. Infants admitted after delivery, 11 males and 7 females; total, 18. Of the births in hospital, 275 were white and 273 colored. Of the infants admitted, 6 were white and 12 colored.

The results of treatment (including readmissions) have been 1,677 discharged as cured and improved, 42 as unimproved, not treated, and transferred to other hospitals, and 49 died. Of the deaths, 23 were white and 26 colored. There were 36 stillbirths. The number of days' hospital treatment was 31,258, as against 28,342 in 1915. The daily average under treatment was 85.64, as against 77.65 last year. The largest number of patients in the hospital on any day was 121, the smallest number was 48.

Admissions include the following readmissions: Gynecological division, 13: obstetrical division, 52; total, 65.

#### MORTALITY.

The percentage of adult mortality from all causes for the year has been 1.51, and that after surgical and obstetrical operations ex-

clusively has been 1.62.

The adult death rate after operations in the obstetrical division has been 0.67; notwithstanding of the 295 patients operated on 17 were abdominal Cæsarean sections, 1 vaginal Cæsarean section, 1 crainiotomy, and 27 episiotomies, but 2 died. Of the 667 cases admitted and treated, but 3 proved fatal, from the following causes: One hemorrhage and shock, 1 acute yellow atrophy of liver, 1 eclampsia (admitted delivered and unconscious—had 7 convulsions before

and 14 after admission).

The adult death rate after operation in the gynecological division has been 2.17 per cent. Of the 508 patients operated on (1,221 operations) but 11 died. Of the 659 cases admitted and treated but 17 proved fatal, from the following causes: One carcinoma of sigmoid and intestinal obstruction: 1 peritoritis, due to ruptured uterus and exhaustion; 1 bronchopneumonia and exhaustion; 1 pelvic cellulitis and exhaustion; 1 extraperitoneal hematoma, cardiac insufficiency, asthenia, and exhaustion; 1 carcinoma cervix uteri, postoperative shock, and syncopy; 1 septic abortion with hemorrhage and exhaustion; 1 bichloride of mercury poisoning and exhaustion; 1 tuberculosis of left kidney and peritoneum and exhaustion; 1 puerperal septicemia and exhaustion; 1 carcinoma of rectum and exhaustion; 1 pelvic abscess and exhaustion; 1 peritonitis and exhaustion; 1 puerperal septicemia and exhaustion; 1 pelvic abscess, septicemia, and exhaustion; 1 carcinoma of stomach and asthenia; 1 gastric carcinoma and exhaustion.

The mortality rate in the obstetrical division from all causes was 0.45 per cent; in the gynecological division from all causes was 2.58 per cent.

## OUT-PATIENT DEPARTMENT (DISPENSARY).

The dispensary has continued to do excellent work during the year, relieving many who otherwise would eventually have been compelled to seek hospital treatment.

The following is a summary of the work accomplished in the dis-

pensary during the year:

New cases treated during the year	826
Total visits made, including revisits	1.622
Number of prescriptions compounded	973

### RECEIPTS AND EXPENSES.

Owing to the unavoidable increase of our expenses incident to the occupation and operation of the new hospital, without a corresponding increase, for a time, of our revenues from pay patients on which we are and have always been obliged to depend in the absence of a regular hospital fund, as other incorporated hospitals have, our outstanding liabilities were very naturally increased. With an increase in the number of our pay patients which we are now having and which, it is hoped, will continue, we shall be better able to make up the difference between the actual per diem cost per adult to the hospital (\$1.79)

and that received (\$1.20) under contract with the municipality for the service we furnish it in the care and treatment of its indigent To accomplish this I respectfully suggest that suitable steps be taken to induce the municipality to increase its present allowance for this service from \$1.20 per diem per adult and \$0.40 per diem per infant to \$1.50 and \$0.50 per diem, respectively. While this will be \$0.29 per adult day and \$0.10 per infant day less than it actually costs us for this service, still it will assist us in part to make up the difference from the pay-patient fund, which fund should really be applied to the comfort and convenience of the pay-patient class. We can not raise our present room rates without danger of losing to other hospitals with lower rates the patronage we now have and that which we hope to get; neither would it be wise or really economical to impair our hospital efficiency by any further reduction in our pay roll, which is already below the average wage scale and number of employees. Moreover, an increase in the contract rate for the service furnished the municipality, and which has remained the same here for the past 15 years, notwithstanding a regular increase in the cost of material and labor of all kinds, is not only just and reasonable but consistent with the practices on other lines of work throughout the country.

The following table indicates the percentage of benefit (hospital days furnished) the municipality has received from us for its indigent cases during the past 10 years and the percentage it has contributed to our operating expenses during that period:

	1907	1908	1909	1910	1911	1912	1913	1914	1915	1916	Aver- age.
Patients: Free (per cent) Pay (per cent) Operating expenses: Free (per cent) Pay (per cent)	70	70	71	69	64	74	71	68	66	67	69

#### ESTIMATES.

The following estimates are respectfully submitted:

Very respectfully,

J. O. SKINNER, M. D., Superintendent.

The Board of Directors, Columbia Hospital for Women.

### REPORT OF THE TRAINING SCHOOL FOR NURSES.

SIR: I have the honor to submit the following report of the Training School for Nurses of Columbia Hospital, for the year 1915-16:

There are at present in the school 43 pupil nurses and 5 probationers. Of these 43 nurses 6 are at Bellevue Hospital for a course of 6 months' training, 3 months of medical and 3 months of pediatrics with lectures: 3 are at the Emergency Hospital, but for these we have an exchange.

There are—

Seniors.	- 8
Intermediates	
Juniors	
Juniors	10
Probationers	Э

Eleven nurses were graduated, of whom 8 are still in the school. There have been 141 applications for admission to the training school, 28 of whom were admitted and 24 accepted. One interme-

diate nurse and 1 junior resigned. Three pupils have undergone operations and with these exceptions the health of the pupils has been excellent.

The number of pupils now in the school is too small to give satisfactory service, and I hope that it will be possible soon to increase the number sufficiently to maintain the high standards for which Columbia Hospital has always been noted. The school has been tentatively registered in the District, but now we have obtained an affiliation with Bellevue Hospital, New York, which renders our school eligible for registration without question, and which I hope will prove of great value to both hospital and nurses.

Through the generosity of the late board of lady visitors we have been able to make a beginning on a reference library for the training school, and the value of these books has already been more than demonstrated, since they are in constant use by the pupils. A set of anatomical charts has also been given by the same board, which facili-

tates the work of teaching materially.

There have been daily classes and lectures during the school term. We are very greatly in need of proper practical instruction in dictetics and of a place in which such instruction could be given. This most important branch of our nurses' work has not been as thorough as it should have been, and I hope some better arrangement can be made for the ensuing year, a hospital dictitian being most desirable from

the patients' standpoint.

Specializing by pupil nurses from January 11 to April 1 has been 148 days, at \$3 a day. Each pupil has a certain amount of this work, which, in my opinion, is given in her senior year, enables her to see just what the work of a special nurse is and accustoms her to the requirements of that branch of nursing during her training, and which is of advantage to her, if not overdone, as well as being of great pecuniary value to the hospital. It would have been possible for the pupils to have done much more specializing than they have but that the reduction of the force of nurses for purposes of economy has left the school with barely sufficient nurses to do the general work of the hospital, with no allowance for isolated cases, illness among the nurses, of specializing of private patients, and this shortage will be difficult to overcome, since the nurses who left the school are experienced women, and their places could only be filled by the untaught probationers who must serve many weeks in the wards before they are really of service, and who require time taken from the head nurses and graduates to instruct them in their new duties.

There have been employed since coming into the new hospital 80

graduates for special cases, giving a service of 955 days.

The calls for nurses from the registry continue, and the nurses seem to be always in demand and acceptable to both doctors and patients.

The old obstetrical division has been partially renovated to serve as a home for the increased number of nurses added from time to time, and who had been quartered in the old building when the nurses' home had been filled to more than its capacity. These quarters, while serving our purpose for a time, are not desirable, and we are greatly in need of an adequate nurses' home, providing proper living facilities, as well as lecture rooms, demonstration rooms, infirmary, storerooms, etc., and all the equipment necessary for the conduct of a first-class training school, such as we should be able to maintain in connection

with the modern and beautiful building which has replaced the old Columbia.

I wish to extend my thanks to the members of the visiting staff for their interest in the school both in giving the lectures to the pupils and in caring for them during illness, to the members of the late board of lady visitors whose assistance has been a great help and inspiration to me during my time here, and whose interest in the welfare of the nurses has been so substantial and helpful; to the nursing staff and hospital staff for their loyal and unfailing support, and to the medical superintendent for his unvarying and kindly interest and help.

Respectfully submitted.

LUCY MINNIGERODE, Superintendent of Nurses and Principal of the Training School.

To the Superintendent of Columbia Hospital.

LIST OF MEMBERS OF THE TRAINING SCHOOL (JUNE 30, 1916).

Graduating class still in school: Clare Turner, Anna R. Hurst, Irva Young, Carolina Moore, Yates Duke, Victoria Good, Frances Turner, Florence Donnelly. Senior class: Ruth Adams, Julia Luck, Ella MacLeod, Elma Jarrett, Milta Fordyce, Helen Courtrite, Miriam Yerkes, Ola Agee, Edna Langslow, Mary E. Grigg, Nancy Kirby, Ruth Ford, Abigail Fitz Hugh, Ettie Moore, Della Yarus, Ruth Honodel. Intermediate class: Evelyn Brewer, Kathleen Gott, Hester Allnutt, Lucy Maley, Julia Hale, Laura Troup, Catherine Beall, Bertha Bradshaw, Addie Wolford, Miriam Doudna, Annie Keyes, Mary Payson, Estell Veazie, Myrle Miller, Blanche Peters, Bessie Gill, Ethel Vaughn. Junior class: Thelma Montague, Elsie Carey, Elizabeth Marshall, Margaret Watkins, Viriginia Shutt.

#### LIST OF PREVIOUS SUPERINTENDENTS OF NURSES.

1893, Miss Georgina F. Pope. 1894–1897, Miss Ella Underhill.¹ 1898, Miss Kate L. Davis. 1899–1903, Mrs. Ella D. Cumberland. 1904–1908, Miss Georgina Daly. 1909-1911, Miss Edmonia P. Gilmer. 1912-13, Miss Mildred F. Codwise. 1914, Miss Cornelia F. Meade, acting. 1915, Miss Lucy Minnigerode.

#### REPORT OF PRESIDENT.

To the Board of Directors of the Children's Hospital:

It becomes necessary to call your attention to the serious condition that confronts the Children's Hospital in the matter of income for its maintenance.

The amount appropriated by Congress—65 cents a day for each patient sent by the Board of Charities, not to exceed \$14,000 for the year—had been exhausted before the 1st of May, leaving two months during which patients continued to be sent, which humanity demanded we should receive, but for whom we received no money from the District for their support.

Every effort was made to cut down expenses, but with the exception of dispensing with the services of an orthopedic nurse it was impossible to further reduce expenditures without a corresponding reduction of the character of the service rendered, and this was not

deemed advisable.

As some step was imperative to raise money to meet the deficit we were facing, it was decided to issue a circular appealing to the generous citizens of Washington for help, and this circular was issued on the 27th of June last.

I desire to invite your attention to the most excellent work done by the diet kitchen in cooperation with the Children's Hospital, without practically any expense to us. Mothers are instructed, both at the hospital and at their homes, in preparation of food for infants and young children.

I submit the following reports, which show in detail the work of the hospital for the past year, for the consideration of this board: The treasurer, the medical staff, the board of lady visitors, the superintendent of the hospital, and the treasurer of St. Mary's Guild.

Very respectfully,

Willard H. Brownson, President Children's Hospital. TREASURER'S REPORT FOR THE YEAR ENDING JUNE 30, 1916.

### REPORT OF THE MEDICAL STAFF.

To the Board of Directors of the Children's Hospital, D. C.:

I submit herewith the following report, prepared by the resident physician, in which will be found a statement of the work of the hospital during the past year.

The pay ward has been well patronized by the patients of numerous physicians not officially connected with the institution. The staff has also sent many patients and their parents to this ward.

We are pleased to state that the scientific work of the pathological department, under the supervision of a skilled bacteriologist and pathologist, has increased the

efficiency of the various departments of medicine.

The work of the special service for the treatment of infantile paralysis is worthy of the highest praise. The nurse assigned to that duty has skillfully and faithfully followed the orders of the surgeons and her work has shown the wisdom of continuing the treatment of this deserving class of helpless children. Unfortunately the service of this nurse had to be dispensed with owing to lack of funds.

The infants' welfare station of the Washington diet kitchen has done marvelous work during the year. Here daily conferences are held, accurate observations are

taken, milk is dispensed to infants, and instruction is given to mothers, under the supervision of a physician, who is assisted by the nurse in charge of the station.

The staff again thanks the Washington diet kitchen for this valuable adjunct, and hopes for its continued success.

Samuel S. Adams, A. M., M. D., Chairman.

#### REPORT OF BOARD OF LADY VISITORS.

To the President and Board of Directors of the Children's Hospital:

I have the knoor to submit the following report of the work done by the board of

lady visitors of the Children's Hospital during the past year.

Through the summer, owing to generous contributions, the children enjoyed ice

cream every Sunday, and also on other occasions.

An appeal was made in November for new sterilizers and new lighting apparatus for the operating room, the old ones being no longer available. The money was quickly raised and both improvements were installed in a short time and found to be very satisfactory.

On Thanksgiving Day the hospital was most generously remembered, many gifts of

money and provisions being received.

The Christmas contributions were also large and from many sources, which added

much to the happiness of the day for the children.

The January ball was the most beautiful one in the history of the hospital, giving the fine result of \$5,591.04. Mrs. Horace Westcott was the chairman of the ball committee, and thanks are due to her and the other members of the committee for their faithful and untiring work in making the ball a brilliant success.

In March the board suffered a great loss in the death of its president, Mrs. F. B. McGuire, who for 46 years was devoted to the interests of the hospital, giving her personal service in all details of the work. The following resolutions were passed by the board of lady visitors:

"RESOLUTIONS ON THE DEATH OF MRS. M'GUIRE, MARCH, 1916.

"Whereas in the wisdom of our Heavenly Father it has been deemed best to call into the higher life the presiding officer of our ladies' board of the Children's Hospital, Mrs. Frederick B. McGuire: Be it

"Resolved, That by the death of Mrs. McGuire the hospital has lost one of its oldest and most faithful friends and supporters, one who for the last 7 years, as president of the ladies' board and member of the executive committee, has given almost all her time and strength to the furtherance of its interests in every department, zealously cooperating with the board of directors in their efforts to meet the increased expenses incident upon the enlarged capacity of the new buildings and always ready to welcome suggestions for the extension of its usefulness. Coming into the work in its earliest days, Mrs. McGuire became a member of the ladies' board at its first meeting, and from that day on so long as health permitted was unremittingly active in everything pertaining to the advancement of the hospital: Therefore,

"Resolved, That the ladies' board desires hereby to express the loss which the hospital has sustained, its deep appreciation of the long years of service rendered by Mrs. McGuire, and to extend to her family its sincere sympathy in their bereavement.

"Resolved, That these resolutions be spread upon the minutes of this meeting and a copy thereof transmitted to the family."

Among the notable gifts to the hospital made during the year was the library given by the Cavalry Baptist Sunday School as a memorial to Mrs. Elizabeth Hoeke.

Thanks are due to St. Mary's Guild for many generous contributions received by the hospital through the past year; also to the Georgetown center for sewing and to the National Plant, Fruit, and Flower Guild for many things that have brought com-

fort and pleasure to the children.

The interest of the hospital in the Infant Welfare Center of the Washington Diet Kitchen Association, established under its roof, led to the cooperation of the board of lady visitors in many details connected with the work, because of a conviction that the preservation of the health of the infants cared for at the center has a direct bearing upon the hospital's interests.

The first vice president, Mrs. Gale, consented to act as president to fill out the unex-

pired term of office left vacant by the death of Mrs. McGuire.

We desire to thank all kind friends who have done their share, great and small, toward bringing more comfort and happiness to the suffering children, and we hope that this interest will continue through the coming year.

Respectfully submitted.

ESTHER D. HAMMOND, Secretary.

Treasurer's Report, Board of Lady Visitors, July 1, 1915, to June 30, 1916.

#### SUPERINTENDENT'S REPORT.

To the Board of Directors of the Children's Hospital:

I herewith respectfully submit the forty-fifth annual report of the work of the

Respectfully submitted.

Nine thousand eight hundred and twenty-six children have received treatment in the various departments of the hospital; 1,256 children occupied beds in the hospital; of these 1,256 cases occupying beds, 1,161 left the hospital cured or improved, which is proof conclusive that the hospital is successfully filling a great need; 7,131 have received attention in the dispensary; 525 infants have been enrolled in the welfare station; 914 received treatment in orthopedic dispensary; 1,291 visits made by the social worker; 772 visits made by the orthopedic worker; 1,985 visits made by the infant welfare nurse.

The usefulness of the hospital during the past year has been greatly crippled by the quarantining of the hospital by the board of health; otherwise, as the results show,

the work done has been most satisfactory.

The great need of a detention ward is thus strongly emphasized, to protect patients already in the open wards from possible contagion from newly admitted cases who may have been exposed in their homes.

Our surgical service was greatly benefited by a complete new set of sterilizers and modern lighting of the operating rooms, generously given by the board of lady visitors.

#### SCHOOL OF NURSING.

The following six nurses were graduated on May 23, and received the diploma of the school: Sara Hart Horner, Virginia; Mary Emily Thornhill, Virginia; Gertrude Egerton Brown, Virginia; Kathleen Lechlider, Virginia; Lucy Mildred Stiver, Pennsylvania; Nellie Proctor, Maryland.

## REPORT OF GEORGE WASHINGTON UNIVERSITY HOSPITAL.

THE STAFF OF THE GEORGE WASHINGTON UNIVERSITY HOSPITAL AND DISPENSARY.

Physician in chief, Sterling Ruffin, M. D. Pediatrician in chief and associate physician, George Nicholas Acker, M. D. Associate physicians:

Buckner Magill Randolph, M. D. Coursen Baxter Conklin, M. D.

Surgeon in chief, William Cline Borden, M. D.

Associate surgeon, Charles Stanley White, M. D.

Orthopedic surgeon, Aurelius Rives Shands, M. D.

Genito-urinary surgeon, Francis Randall Hagner, M. D.

Associate genito-urinary surgeon, Homer Gifford Fuller, M. D. Gynecologist in chief, John Wesley

Bovèe, M. D. Associate gynecologist, Gideon Brown Miller, S. B., M. D.

Obstetrician in chief, Huron Willis Law-

son, M. D. Assistant obstetrician, Elijah White Titus, M. D.

Associate pediatrician, Edgar Pasqual Copeland, M. D.

Dermatologist in chief, Henry Crècy Yarrow, M. D.

Associate dermatologist, Randolph Bryan Carmichael, M. D.

Laryngologist, Charles Williamson Richardson, M. D.

Ophthalmologists: Daniel Kerfoot Shute, M. D.

William Kennedy Butler, M. D. Associate laryngologist and ophthalmologist, Edward Grant Seibert, M. D.

Radiographer, Walter Hibbard Merrill, M. D.

Pathologist, Oscar Benwood Hunter, M. D.

Director of the clinical laboratory, Frank Adelbert Hornaday, S. B., M. D. Anesthetists:

Charles Wilbur Hyde, M. D. Cline N. Chipman, M. D.

Resident physician, Paul Stirling Putzki, M. D.

Associate resident physicians: Eric Steele Green, M. D.

Carroll E. Bingman, M. D. Edward Raymond Hunter, M. D.

Thomas Creasy Bost, M. D. Pharmacist, Simon Gerber, Phar. D. Superintendent of nurses and principal of the Training School for Nurses, Mary Winifred Glascock, R. N.

Superintendent of the hospital, John Bruce Copping.

#### DISPENSARY.

Physician in chief, Sterling Ruffin, M. D. Gynecologist in chief, John Wesley Bovèe, M. D. Surgeon in chief, William Cline Borden, M. D.

Obstetrician in chief, Huron Willis Lawson, A. M., M. D. Director of the dispensary, J. Irving Sloat, M. D.

### General medicine.

Attending physicians: Buckner Magill Randolph, M. D. William Cabell Moore, M. D.

William Johnston Mallory, M. D.

Attending physicians—Continued. Robert S. Trimble, M. D. Albert Elwood Pagan, M. D. Walter Ashby Frankland, M. D.

## General surgery.

Attending surgeons:

Truman Abbe, M. D. Edmund Thomas Murdaugh Frank-lin. M. D. Attending surgeons—Continued. John Potts Fillebrown, M. D.

### Genito-urinary diseases.

Genito-urinary surgeon, Francis Randall | Attending surgeons—Continued. Hagner, M. D.

Attending surgeons: Homer Gifford Fuller, M. D. Adam Kemble, M. D. J. Irving Sloat, M. D.

Gynecology.

Attending gynecologist, Daniel LeRay | Attending gynecologist, Albert Elwood Borden, M. D.

Obstetrics.

Obstetrician in chief, Huron Willis Law- | Assistant obstetrician, Elijah White son, M. D.

Eye, ear, throat, and nose.

Laryngologist and ophthalmologist, Edward Grant Seibert, M. D.

Assistant laryngologist and otologist, Albert Perkins Tibbets, M. D.

Neurology.

Neurologist, Harry A. Bishop, M. D.

Radiography.

Electro-therapeutist and radiographer, Walter Hibbard Merrill, M. D. Radiographer, John Hunter Selby, M. D.

Dermatology.

Attending dermatologist, Charles Augustus Simpson, M. D.

Pathology.

Pathologist, Oscar Benwood Hunter, M. D

Laboratory.

Director, Frank Adelbert Hornaday, M D

Very respectfully,

ARTHUR T. BRICE, Treasurer.

Washington, D. C., July 1, 1916.

#### REPORT OF THE SUPERINTENDENT.

Gentlemen: I hereby respectfully submit the following report of the work done for the fiscal year ending June 30, 1916. Before doing so there is one sad occurrence which must be noted. Our director of the dispensary, Dr. Ernest F. King, passed away June 8, 1916, after a short illness. Suitable resolutions were adopted by the

staff and Emergency Hospital Club.

Heretofore it was customary and all institutions followed alike the compiling of statistics giving the amount of work done for each fiscal year. I believe that this is more or less obnoxious to the public, in whose hands the annual report should come, so I am changing the old custom this year and giving merely a synopsis of the number of cases treated in general. Being concise, as you will observe, it can be read at a glance without pondering over terms with which the laity is entirely unfamiliar. I have, therefore, the honor to append the amount of work done for the fiscal year ending June 30, 1916.

Before closing I wish to express my sincere thanks to my coworkers in the institution, namely, the superintendent of nurses, the assistant superintendent of nurses, the chief operating room nurse and her assistant, the chief nurse of the dispensary and emergency department, the staff of internes, the pharmacist, the accountant, the chief engineer, and all others who have aided me in making the first year of our life in the new institution a great success.

To the members of the board of directors and the attending staff for the confidence reposed in me I extend many thanks.

Respectfully submitted.

HARRY S. LEWIS, M. D., Superintendent.

Summary of work done at the Central Dispensary and Emergency Hospital for the fiscal year ending June 30, 1916.

To the Board of Directors,  July 17, 1916.
CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.  GENTLEMEN: The following report of the training school is presented:
Number of pupils in training Aug. 15, 1915       20         Number of probationers in training Aug. 15, 1915       9         Number of nurses taking postgraduate courses       2         Number of pupils admitted during the year       32         Number of graduates       12         Number of pupils who resigned       8         Number of pupils in training July 13, 1916       38         Number of probationers in training July 15, 1916       5         Total number of nurses in training       43         Number of app@ications received       125         Number of circulars sent out       110         Number of probationers admitted       32

The exercises of the second graduating class was held May 4, 1916, at Rauschers. The expenses incurred were donated by the ladies' board and Mr. Woodbury Blair, and Mr. Gude kindly furnished decorations.

The hospital offers every advantage for the education of the nurses in the wards, operating room, emergency room, and dispensary, with a four months' course at Columbia Hospital.

Class resitations, practical demonstrations by the superintendent and assistant superintendent of nurses, and regular courses of lectures by the superintendent of the hospital, attending physicians, and surgeons are given throughout the year in the various subjects that should form part of the knowledge of a trained nurse.

various subjects that should form part of the knowledge of a trained nurse.

A course in massage was given by Miss Louisa Lippett. The services of a graduate dietitian has been obtained and a special course in dietetics will be given to each pupil

The present nursing staff consists of the following:

The state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the s

## ANNUAL REPORT OF THE LADIES' AUXILIARY BOARD.

The BOARD OF DIRECTORS, EMERGENCY HOSPITAL.

Gentlemen: The Ladies' Auxiliary Board of the Emergency Hospital submits the following report of its work for the past year. At the November meeting the balance on hand in the treasury was found to be so small that the immediate needs of the hospital were largely supplied by generous donations from the members of the board and by the proceeds of two entertainments. The net proceeds of a bridge party arranged by Mrs. Morgan and Mrs. Richey was spent by Mrs. Morgan in equipping the hospital with some necessary linen.

The proceeds of a concert given by Mrs. Eustis for the benefit of the hospital was used in placing linoleum in the halls. In addition there have been the following generous contributions:

Mrs. Brownson, \$100.

Mrs. Rollins Morse, \$150.

Mrs. Goddard, to supply 2 dozen napkins, \$40.

Mrs. Mills, for 18 bedside trays, \$100.

Mrs. Salisbury, for painting the kitchen and the diet kitchen, \$137.56.

Mrs. Boynton, 1 enamel table for diet kitchen.

Mrs. Warren, Mrs. Blair, Mrs. Morse, Mrs. Littaner, Mrs. Lee, Mrs. Russell, I dozen tray cloths each.

Mrs. Blair, gingham for children's bibs. Mrs. Rollins Morse, 2 dozen glasses.

Four flower urns for the front of the hospital costing \$20 each: Mrs. Ritter, 2; Mrs. Gaff, 1; Mrs. Frazer, 1.

Mrs. Harlow, \$25 for Christmas dinner.

In addition to the above, the board has bought for the hospital the following articles:

60 shawls.	2 radiator brushes.
50 flower vases.	1 very large trash can.
20 bolts of diaper.	12 cocoa, salt, and flower canisters.
36 metal trash baskets.	1 glass water pitcher.
24 pairs men's slippers.	10 standard bedside lamps.
24 trays for private rooms.	Metal soap dishes and plate covers.
42 yards piqué.	1 white enamel kitchenette for diet
1 dozen thermos decanters.	kitchen.
50 nickel towel racks.	Candles and candlesticks for private
10 dozen sherbet glasses.	rooms.
2 clocks.	10 dozen tray cloths.
	·

The usual sum has been appropriated by the board for cleaning and special sums designated for the dance for the graduating nurses and for planting and caring for the grounds during the summer. A small sum was also expended for printing a constitution for the ladies' board and for putting up towel racks.

Respectfully submitted.

MAUD HARLOW, Secretary.

### REPORT OF PRESIDENT.

Washington, D. C., September 30, 1916.

To Board of Charities of the District of Columbia:

The Eastern Dispensary and Casualty Hospital, which is situate 700 to 708 Massachusetts Avenue NE., through its board of directors, has the honor of making the report for the year ending June 30, 1916.

Accompanying this is the report of the president of the medical staff; report of the superintendent; report of the board of lady managers, showing receipts and expenditures and balance on hand, donations to the lady managers; report of the treasurer, showing receipts and expenditures for the year. In this report you will note that the expenditures exceeded the receipts. The treasurer's report proves that although the hospital received money from private cases and donations of the lady managers it does not receive enough money to pay the running expenses.

The board has practiced the strictest economy in the purchase of supplies and equipment and in having repairs made to the building.

This year there were 2,279 more emergency cases treated than during the year 1914-15 and 604 more ambulance calls were made.

The space in our present building is inadequate for the number of patients treated here each year, and although plans have been drawn and bids taken on a new and much more up-to-date building on which work was to have been started in the spring of this year, the board could not see its way clear to let this contract because of the lack of funds.

Through the board of directors of the Eastern Dispensary of the District of Columbia I request that in your estimates to the second

session of the Sixty-fourth Congress you put in an item for \$20,000 per year for maintenance and \$50,000 to be used for the erection of a new building, plans of which have been made.

Yours, very truly.

EASTERN DISPENSARY AND CASUALTY HOSPITAL, By Thomas W. Smith, President.

## REPORT OF PRESIDENT OF MEDICAL STAFF.

OCTOBER 1, 1916.

MY DEAR MR. PRESIDENT: In presenting the annual report of the Eastern Dispansary and Casualty Hospital for the fiscal year ending June 30, 1916, I can only reiterate many of the statements made in previous years.

We are doing a splendid work; giving the public a prompt emergency service and the dependent poor a medical and surgical attention that is expressive of the character

of our charitable institution.

Regardless of the fact that expenditures have been doubled during the past year and our capacity for caring for hospital cases has much increased, our limitations

are more keenly felt than at any previous time.

With the increased cost of caring for patients it becomes more evident that the hospital can not exist on Board of Charity work, even with an equal amount of pay work. We have enlarged the attending staff in order to bring more private work to the hospital and we are at capacity limit much of the time. Nevertheless, the cry for more pay cases and more money for running expenses and needed improvements continues. The medical staff will continue to do all in its power to not only carry on and elevate the standard of work, but it is evident to most of us that we need great help at this time in a financial way that can come only from a charitably inclined public and friends of the institution.

Respectfully submitted.

N. P. BARNES. President Medical Staff.

T. W. SMITH, Esq. President Board of Directors, Eastern Dispensary and Casualty Hospital.

### REPORT OF SUPERINTENDENT.

To the Board of Directors,

Eastern Dispensary and Casualty Hospital.

Gentlemen: The annual report for the year ending June 30, 1916, is herewith submitted.

Since the last annual report we find that the work here has increased materially;

so much so that the present accommodations are inadequate in every way.

Not only are the wards overcrowded and inconvenient, but the number of private rooms are not sufficient in number to supply the demand. Both pay and charity patients who should have been taken care of here have had to be referred to other hospitals, and the care of cases which have been treated here has been with an unnecession. sary amount of labor owing to the lack of space and inconvenient arrangement of building.

The nursing staff has increased in number and efficiency, but the limit has been reached in numbers with the present arrangement of the nurses' home. It will be necessary for this building to be enlarged before there can be an expansion of the training school and before a larger number of patients can be cared for. This fact

should be considered in connection with the proposed new hospital.

I wish to extend our grateful appreciation to the many triends who have contributed

so generously to the welfare of the hospital during the past year.

To the board of directors who have given so freely of their time and interest, I

earnestly bespeak a continuance of the same during the coming year.

Respectfully submitted.

EDITH L. CORBETT, Superintendent.

## ANNUAL REPORT OF BOARD OF LADY MANAGERS.

## Mr. T. W. Smith, President.

Dear Sir: The work of the board of lady managers increased a great deal during the past year. The many patients coming to the hospital means that there is great need for a large supply—sheets, pillowcases, blankets, gowns, all kinds of towels, spreads, etc.—and it is the work of our board to supply these wants as far as possible. During the past year we laid in a splendid supply, but much more is needed. Our linen shower, annual luncheon, rummage sale, Thanksgiving letters, benefit, and the musical and dansant were all very successful, for which we thank the public heartily for their great help in the past. We also gave a complimentary dance to the graduating

1,374.15

class of nurses at Terrace Inn during the past winter which was enjoyed very much

by the class and their friends.

We are a little disappointed that ground has not been broken for the building of the new hospital. We had great hopes that by the new year we would at least see the foundation laid, and, oh, how much we need it. Could not the medical staff, board of directors, board of lady managers, young ladies' guild, nurses, and all connected with the hospital do very much better work if they had up-to-date methods? My opinion is that just as soon as we commence to build and show the northeast, southeast, and, in fact, all parts of the city, that we shall find many of our best citizens willing to come in and help us, for no one could engage in better work that is more satisfactory than working for hospitals.

We have the promise from officers, members, and friends of our board to furnish seven rooms in the new hospital, and when it is finished I am sure that enough hospital

furniture will be secured to furnish the patients' rooms.

Hoping that we shall be able to send you a better report at the close of next year, I am,

Yours, sincerely,

Martha J. Vaughan, President Board of Lady Managers.

## Young Ladies' Guild of Hospital.

The Young Ladies' Guild are few in number, but they do quite a little work in connection with the Nurses' Home and the diet kitchen. They are prepared to furnish a nice, large room in the new hospital; they also assist the board of managers with the annual luncheon, musical, dansant, and many other times during the year. They are very glad to take this opportunity of thanking the public for their generous assistance in making these affairs a success.

chair.

We hope to have a much better report this next year.

M. J. VAUGHAN.

## DONATIONS. Mr. Wheeler, 1 pair of crutches, 1 wheel 1 armchair, Miss Trail 1 dozen spoons, Miss Windsor. Dishes, Miss Wolf. Dishes, Miss Windsor. Dishes, Miss Young. Dishes, Miss White. #### REPORT OF THE WOMAN'S DISPENSARY.

Attending physicians for treatment of general, surgical, and gynecological cases.—Dr. George K. Baier, Dr. Mary Holmes, Dr. Louis A. Johnson, chief of staff.

Officers.-Dr. Louis A. Johnson, president; Dr. Mary Holmes, secretary; Alexander

Muncaster, treasurer.

Board of directors.—Dr. Louis A. Johnson, Dr. George K. Baier, Dr. David W. Tastet, Alexander Muncaster, Mrs. M. J. Stroud, Dr. Mary Holmes, Miss Margaret Stephenson, Dr. Charles S. White.

Washington, D. C., September 16, 1916.

George S. Wilson, Esq.,

Secretary of the Board of Charities, Washington, D. C.

DEAR SIR: I have the honor to submit herewith the following report of the Woman's Dispensary for the year ending June 30, 1916.

Our assets consist of the cash balance of \$33.73, shown by the accompanying financial statement, and dispensary furniture and instruments valued at \$300. There are no liabilities other than current expenses.

Owing to the great increase in the cost of drugs we respectfully

request that the allotment be increased to \$450.

Very respectfully,

MARY HOLMES, Secretary of Woman's Dispensary.

Washington, June 26, 1916.

GEORGE S. WILSON,

Secretary, Board of Charities, Washington.

Dear Sir: Inclosed you will find a list of officers and members of the Board of the Home for Incurables; financial report which contains a statement of all assets of the home at the end of the year liabilities we have none—and detailed statement of receipts and

expenditures.

The condition of the home, as usual, has been most satisfactory as regards condition of patients and management, our only difficulty lying in the lack of accommodations for an ever-increasing waiting list of applicants, both men and women. This being the only institution between Philadelphia and Atlanta and Atlanta and Chicago which takes cancer cases, except almshouses and expensive pay hospitals, we are always liable to sudden calls for such cases, which are admitted upon the signature of the president of the home, and find that, owing to such cancer cases, we are obliged to keep our other applicants waiting many months.

We find, after careful investigation, that it is impossible to extend the home in any direction owing to difficulties as to roads and possible changes by the District government in the property. We therefore see no means of increasing our usefulness except in the hope that we may be able to dispose of our property and go out where we can get more land. The present home would make a most admirable home for convalescents, which is sadly needed by all existing hospitals. Trusting that you may be able to assist me in arranging this matter, I am,

Respectfully, yours,

CHARLOTTE LOWELL HOPKINS,

President.

#### REPORT OF THE TUBERCULOSIS HOSPITAL.

Medical Staff.—Physicians: John D. Thomas, A. B., M. D., Thomas A. Claytor, M. D. Surgeons: L. H. Reichelderfer, M. D., George Tully Vaughan, M. D. Laryngologists: Charles W. Richardson, M. D., Reginald R. Walker, M. D. Superintendent: W. D. Tewksbury, M. D. Pathologist: J. J. Kinyoun, Ph. D., M. D. Resident Physicians: H. C. Drew, M. D., John Pracher, M. D. Superintendent of Nursing: Miss Rose De Coursey.

#### GENERAL INFORMATION.

The Tuberculosis Hospital of the District of Columbia was opened for patients July 1, 1908, since which time over 3,000 patients have been admitted. It is located on a site in the northwestern section of Washington, comprising 36 acres of land, which was purchased by the Government some 15 years ago. The institution is built on the ward plan, having four wards for far-advanced cases and four wards for earlier cases, the capacity being about 120 patients. In addition to the wards, there are accommodations for 25 patients in openair shacks on the hospital grounds. This gives the institution a total capacity of 145 patients.

A portion of the ground is utilized for gardening purposes, which furnishes fresh vegetables during the summer months. The patients are given plenty of milk and eggs in addition to three meals a day, and special diets are prepared to a great extent for the more ad-

vanced cases.

The institution is owned by the municipal government and is under the direct control of the Board of Charities. Patients in all stages of tuberculosis are admitted to the hospital, but those in the earlier stages are separated from the more advanced cases. There is no charge for treatment, but it is necessary for all patients before being admitted to obtain a permit from the Board of Charities offices in the Municipal Building.

GENTLEMEN: I have the honor to submit herewith the Eighth Annual Report of the Tuberculosis Hospital of the District of Columbia for the fixed war and d June 20, 1016

bia for the fiscal year ended June 30, 1916.

During the year we have treated a total of 529 patients. The daily average number of patients was 140 and the average length of stay was 13.7 weeks. The number of days' maintenance furnished was 51,214, and the daily cost per patient was \$1.10.

#### INCREASED NUMBER OF PATIENTS.

I wish to call to your attention the fact that during the past year we have had another increase in our daily average number of patients, namely, 140, as opposed to 124 in 1915. I would also draw atten-

tion to the decrease in our daily cost per patient. This has been due to the rapid growth in our number of patients during the past two years, without a proportionate increase in our appropriations from Congress.

In order to conduct this institution at this low cost it has been necessary to do without many things which would increase the com-

fort of our patients and render them more contented.

With the cost of supplies increasing, I do not think we shall be able to again attain as low a daily cost and do justice to our patients.

#### TREATMENT, WITH RESULTS.

During the past year we have treated 22 patients in the incipient stage. Of these, 2 left the institution with disease arrested, 7 with disease apparently arrested, 7 in which the disease was quiescent, 3 were improved, and there were 3 cases remaining in the hospital at the end of the year.

We treated 145 patients in the moderately advanced stage. Out of this number 4 were arrested, 5 were apparently arrested, 21 in which the disease was quiescent, 29 were improved, 9 were unimproved,

18 died, and there were 59 remaining at the close of the year.

Only 1 nontubercular case was admitted during the year. She was discharged after being kept under observation for a brief period. The remaining 361 cases were in the far-advanced stage. Of this number 3 left the institution arrested, 4 were apparently arrested, 4 in which the disease was quiescent, 23 were improved, 37 were unimproved, 222 died, and there were 68 remaining at the close of the year.

You will note that very gratifying results were obtained with incipient and moderately advanced cases; 78 of these patients were able to leave the hospital during the year, either arrested or decidedly improved, and a great proportion of them were able to return to their work. Even among the far-advanced cases there were 11 patients who returned to their work and 23 distinctly benefited.

#### ARTIFICIAL PNEUMOTHORAX TREATMENT.

During the past two years we have been using artificial pneumothorax treatment in selected cases. Of the 16 far-advanced patients treated 6 returned to work as arrested cases and have had no recurrence of their trouble, 1 left quiescent, 1 improved, 1 unimproved, 5 died, and there are 2 remaining in the hospital at present. The 6 patients discharged with disease arrested have been leading a normal life, without any cough, fever, or symptoms of any kind for from 3 months to  $1\frac{1}{2}$  years. When we remember that these were all far advanced, apparently hopeless cases, it makes us realize the striking results this treatment has accomplished.

#### DIETETIC DEPARTMENT.

During the past year there have been a large number of special diets prepared for both the incipient and advanced ward patients. The following is a list of special diets and desserts prepared regularly by the dietician during the year:

Broths: Chicken, beef or mutton.
Eggs: Soft boiled, fried, poached, scrambled, deviled, creamed.

Meats: Broiled steak, lamb chops, creamed chicken, kidney stew, ham, creamed fish.

Toasts: Milk, dry and buttered.

Desserts: Rice pudding, apple pudding, tapioca, tapioca pudding, chocolate blancmange, bread pudding. Pies: Mince, sweet potato, apple, lemon custard. Custard, baked and boiled. Apples, baked and sauce.

Jellies: Wine, fruit, lemon. Cakes: Sponge, ginger, coconut, doughnuts. Cake

with sauce.

The following is a list of fruits and preserves which were used for special diets:

Fruits: Apples, pineapples, bananas, grapefruit, oranges, peaches, grapes, berries, cantalounes

Preserves: Apple butter, grape jelly, peach, blackberry, cherry.

Canned pears, peaches, and cherries are used for special diets all the year round.

#### FARM AND GARDEN.

During the year we raised considerable quantities of the following vegetables:

Spinach, cabbage, onions, peas, beets, string beans, lima beans, squash, cucumbers, potatoes, sweet potatoes, tomatoes, turnips, sugar corn, and field corn. The aggregate value of the vegetables raised, at market price, was approximately \$500. This enabled us to serve fresh vegetables to our patients during the four summer months.

#### TABLES GIVING CLASSIFICATION OF PATIENTS AND STATISTICS.

Table 1 classifies the patients according to sex and color, and shows that of 141 remaining 57 were male white, 28 were female white, 40 were male colored, and 16 were female colored, while there were admitted 132 male white, 61 female white, 112 male colored, and 83 female colored, making a total of 529 patients treated.

#### GENERAL STATISTICS.

Since the opening of the institution there has been a marked increase in both the daily average number of patients and the average length of stay. There was a marked increase, as you will note, in 1916, as opposed to 1915.

Year.	Average length of stay.	Daily average number of patients.	Year.	Average length of stay.	Daily average number of patients.
1909	Weeks, 8.9 9.4 10.2 10.7	83. 23 84. 39 81. 11 94. 02	1913	Weeks. 10.8 12.5 13.0 13.7	93. 4 103. 5 124. 0 140. 0

#### FINANCES.

The following table deals with appropriations and expenditures, and shows that our entire appropriation for maintenance was expended and a deficiency appropriation of \$5,000 was incurred on the authority of the Commissioners of the District of Columbia in order to maintain the institution for the year. The table further shows that 51,214 days' maintenance was furnished to a daily average of 140 patients, and that the cost per patient for maintenance, including salaries, repairs, and all items of expense, was \$1.10.

The above deficiency was made necessary on account of the marked and unexpected increase in our daily average number of patients.

The above is approximate, as all bills have not been received at the auditor's office for settlement as yet.

#### RECOMMENDATIONS.

I would respectfully recommend an increase of \$3,000 for maintenance during the coming year. Our daily average number of patients is still increasing, and there is considerable equipment which

should be purchased.

During the past five years our daily average number of patients has increased from 83 to 140. Most of this increase has occurred during the past two years. In order to render satisfactory service it is absolutely necessary that our help be increased. I would recommend the following:

1. Four orderlies at \$360 per annum, instead of 3 orderlies at \$360

per annum.

2. Three ward maids at \$300 per annum, instead of 2 ward maids

at \$240 per annum.

3. Two assistant cooks at \$300 per annum, instead of 2 assistant cooks at \$240 per annum.

Respectfully submitted.

W. D. TEWKSBURY, M. D., Superintendent.

The Board of Charities of the District of Columbia.

#### REPORT OF THE PATHOLOGIST.

SUPERINTENDENT: The following data concerning the work of the pathological department for the fiscal year ending June 30, 1916, are herewith submitted: During the year there were 1,429 examinations made. Of these 19 were autopsies, 411 urinalyses, 978 sputa, and 31 Wasserman tests.

The microscopic examination of the tissues obtained from the autop-

sies revealed the following pathological changes:

Heart.—Most of the specimens examined showed a thickened pericardium, interstitial myocarditis, and an increase of connective tissue along the course of the vessels. Arteriosclerosis was present in 3 and a thickened endocardium in 8.

Lung.—The general changes were a thickened pleura, catarrhal pneumonia, and tubercular infiltration. In 1 case death of the

patient was due to streptothricosis of the lung.

Liver.—In nearly all the specimens the capsule was thickened. Fatty infiltration was present in 10, general cirrhosis in 4, miliary tubercles in 8. In most of the cases there was an increase of connective tissue along the course of the vessels.

Spleen.—The capsule was thickened in most instances. Arteriosclerosis was present in 6, infarcts in 2, miliary tubercles in 3, an increase of connective tissue along the course of the vessels in 7.

*Kidney.*—Most of the cases showed a parenchymatous and interstitial nephritis. Infarcts were found in 2, arteriosclerosis in 3, and the capsule was thickened in 14.

Adrenal.—This organ was found normal in most instances. Miliary tubercles were found in 1, infarct in 1, and an interstitial inflamma-

Pancreas.—The pancreas was normal in 10. There was an interstitial inflammation in 2, an arteriosclerosis in 2, recent hemorrhages

Gastrointestinal tract.—The mucosa showed in nearly all cases a catarrhal and, in a few, an interstitial inflammation. In all cases tubercular ulcers were found in the lower part of the small intestine in the cecum.

> J. J. Kinyoun, M. D., Pathologist.

#### REPORT OF BOARD OF CHILDREN'S GUARDIANS.

MEMPERSHIP OF THE BOARD AT THE CLOSE OF THE FISCAL YEAR.

•	Date of original appointment.

Mrs. Julia R. Hall, M. D., was appointed physician to the board January 6, 1894, but since July 1, 1906, has been called to attend the wards of the board as physician, with compensation based on service rendered, with a maximum limit of \$100 per month.

Washington, D. C., September 1, 1916.

To the BOARD OF CHARITIES OF THE DISTRICT OF COLUMBIA.

Gentlemen: The following is the twenty-third annual report of the Board of Children's Guardians, being the report for the fiscal year ended June 30, 1916.

#### GENERAL STATEMENT.

The Board of Children's Guardians is a body corporate and politic,

created by act of Congress July 26, 1892 (27 Stat., 268).

It is composed of nine members, three of whom must always be women, and it is the legal guardian of all children committed to its care by the police and criminal courts of the District prior to July 1, 1906, and since that date by the juvenile court.

#### OBJECTS OF THE BOARD.

The object of the board is, primarily, to furnish safe and happy homes for the wards placed in its care by the court, so that they may grow up to useful citizenship. This object can not be fully attained without, in general, the support of the public and in particular the cooperation of the courts, the Board of Charities, the Associated Charities, the police department, and all child-caring organizations, as well as that of the governing bodies and heads of institutions to whose care many of the wards of the board are intrusted.

Neither can the board accomplish this object without an efficient organization of paid workers of its own. Such an efficient organization means proper office management, adequate salaries, and a sufficient number of employees to carry on the work properly.

Lastly, successful work by the board demands sufficient funds with

which to care for its wards.

The hearty cooperation of all the organizations mentioned above has enabled the board to carry on its activities to much better advan-

tage than could otherwise have been possible.

The office force and all investigating officers of the board have worked faithfully and efficiently during the year, giving much more than the required number of hours in order to finish necessary work and carry out efficiently what has been needed for the welfare of our wards. For the amount of work which should be done, the office staff and staff of investigators and placing officers is not adequate. It is considerably smaller in proportion to the number of cases it handles than the staffs of similar bodies in the larger cities of the country. Congress has provided one more placing and investigating officer, but there is the greatest need for considerable increase in the staff in order

to place our wards in the best possible homes, to visit them with sufficient frequency, to insure their proper development, and, finally, to restore them to normal conditions.

#### MAGNITUDE OF WORK.

On July 1, 1915, there were 1,930 children under the care of the board, 1,677 permanent wards (of whom 33 were on the roll of feebleminded), 183 temporary wards, and 70 others on the roll of feebleminded.

There were received during the year 35 permanent, 387 temporary wards (many of these temporary words were recommitted, there being 557 temporary commitments), and 7 children were added to the list

of feeble-minded.

During the same period 125 permanent wards and 229 ¹ temporary wards passed from care, and 5 were dropped from the roll of feebleminded, leaving on June 30, 1916, 1,587 permanent wards (of whom 48 were on the roll of feeble-minded), 341 temporary wards (of whom 6 were on the roll of feeble-minded), and 72 others carried on the roll of feeble-minded, or a total of 2,000. Of these, 762 were white and 1,238 were colored.

The investigating department handled 986 complaints during the year, 666 complaints on new cases, and 309 complaints on families previously known to the board. Eleven cases were carried over from

last year and investigated this year.

The homes of 266 families, involving 464 children, in cases where commitments to the board were about to expire, were reinvestigated. In the cases of 83 families, involving 145 children, the children were returned to their relatives; in the cases of 20 families, involving 27 children, the children were committed during minority; in the cases of 161 families, involving 289 children, the children were committed to the board temporarily; and in the cases of 2 families, involving 3 children, the petitions were dismissed by the court.

Fifty applications for the return of children to relatives under the supervision of the board were investigated. Thirty of these applications were approved, 6 were rejected, and 14 were pending at the end

This gave the investigating department, with a staff of two investigators, a total of 1,302 investigations during the year, altogether enough work for a much larger force.

Three hundred and forty-four petitions were filed by the Board of Children's Guardians in the juvenile court. Of these, 326 petitions

were granted.

By communicating with the registration bureau of the Associated Charities when complaints as to conditions of children were received at this office it was found that many of the families were known to the agencies using the confidential exchange. In these cases the board had the benefit of the previous investigations made by the probation officers of the juvenile court, the nurses of the Instructive Visiting Nurse Society, and the Washington Diet Kitchen, and the investigators of the Associated Charities. In many cases the information thus furnished was used as the basis for its own investigations.

In some cases it was found that the organizations which had previously registered with the registration bureau were able and willing to handle the cases when referred to them.

#### FEEBLE-MINDED WARDS.

As reported last year, the District of Columbia has not yet made any proper arrangement for taking care of the feeble-minded. The board is still placing such cases at the Training School at Vineland, N. J.; the Pennsylvania Training School at Elwyn, Pa.; and the Gundry Home and Training School at Falls Church, Va. There is no well-equipped institution to which the board may send colored feeble-minded children. It is encouraging to be able to report that a bill for the establishment of an institution for the care and training of the feeble-minded is now before Congress. This bill is written along the lines of the best tegislation enacted in other places and should be made a law as soon as possible. It would then be within the power of the board to say that its feeble-minded wards are properly taken care of at a short distance from their homes in a public institution belonging to the District of Columbia.

#### COST OF CARE OF CHILDREN.

A considerable number of wards of the board are cared for in institutions supported by public funds. The Board of Children's Guardians, therefore, does not pay for their support from appropriations made for its use. A great many of our children, however, are cared for in private homes. For those over 3 years of age \$10 a month is paid; \$11 for infants under 3; and \$12 for sick children. A special rate of \$15 is paid for feeble-minded children cared for in private homes. On account of the increase in the cost of food and practically all other supplies, and also with the desire to obtain better homes wherever possible, the board feels that a higher rate than the amount named should be paid. This can be done either by increasing the cash payments or by issuing larger supplies of clothing to the wards supported in private homes. This will mean a larger expense for the maintenance of the work of the board, which would certainly be expected if the living conditions of children are to be improved or even maintained at the present standard.

From \$100 to \$180 is paid for the care and support of wards in various denominational and private institutions; \$250 to \$300 for their support in regular institutions for the feeble-minded. These rates are likely to be raised by the various institutions on account of

the increase in cost of supplies.

The board, through its staff, endeavors to place as many children as possible in free homes and arrange for the adoption of a considerable number into the homes that are proved desirable. The present practice of the juvenile court, however, of committing nearly all children coming before it for short periods makes it practically impossible with new cases to interest families in the permanent care of the children with the thought of adoption at a future time.

A number of the older wards are put into homes on apprenticeship, and thus cause no expense to the public except that incidental to visiting. These wards usually learn a trade, and at the same time earn a small amount of money for themselves, which in most cases is held until they are of age and discharged thereby from the custody of the board.

#### COMMITMENTS OF THE JUVENILE COURT.

The juvenile court, since the decision by the court of appeals that the permanent commitments to the board can not be recalled for further adjudication after the expiration of the term of court in which such commitments were made, has continued its policy to make very few permanent commitments. This practice continues to increase the proportion of temporary wards, has continued the extra burden thus placed upon our force of investigators in connection with recommitments, and has, as noted previously, made it more difficult to arrange for the permanent care of an increased proportion of the wards of the board. Expenses are more difficult to estimate under such conditions, and the effect in the uncertainty of placement and the control of the wards, especially those suitable for placement in free homes with the thought of permanent location and even final adoption is marked, and certainly injurious to the work of the board.

#### SPECIAL FUNDS BELONGING TO WARDS.

There was \$13,401.11 in the indenture and apprentice accounts of the wards of the board at the beginning of the year. During the year \$2,793.93 was received and \$1,545.99 expended in payments to wards, leaving a balance of \$14,649.05 at the end of the year. This money is held in District depositories subject to the check of the agent and the countersignature of the auditor of the District of Columbia.

#### EXPENSES.

It was necessary to ask during the year for a deficiency appropriation for the board and care of children and for the care of feeble-minded children. These deficiencies were granted, but the institutions and some of the nurses were compelled to wait several months for their money while this appropriation bill was being passed. There was a very small balance in the appropriation for contingent expenses.

#### COOPERATION.

The special thanks of the Board of Children's Guardians is extended to the juvenile court, Associated Charities, Washington Diet Kitchen, Instructive Visiting Nurse Society, Board of Charities, the social-service departments of the various hospitals, the police department, and the many other organizations which have given most important aid to the board through their hearty and earnest cooperation.

## CHANGES AND IMPROVEMENTS.

During the past year certain changes and improvements in the work of the office in caring for the wards of the board have been made which deserve special mention. The private homes in which wards

have been placed have been visited more frequently, and a great many homes not maintaining especially good standards have been dropped from the list and replaced by better homes, in which the care of the wards has been more satisfactory. The more inaccessible homes have also been abandoned in order that more frequent visits may be made and better supervision may be given by the visiting force to the care of the children.

The paid nurses in all of the homes now used have given a higher degree of cooperation, with the result of better average conditions, both physical and moral. Practically every child has been visited within 30 days after it is placed in the home, again within six months, and thereafter not less than twice a year. Much more frequent visits than that have been made, of course, to wards located in the District of Columbia.

#### NEEDS OF THE BOARD.

One of the most urgent needs of the board is an increase in the staff of paid workers and investigators. This has been urged upon the Board of Charities and by them upon Congress regularly each year, and it is hoped that a large increase in the staff will be provided for the next fiscal year. In spite of the weeding out of inaccessible homes and the increased activity of the present staff in making visits, it is still not possible to keep in touch with our wards as closely as is desired. This, together with the increasing numbers of children committed to the board, makes an increase in the placing

staff imperative.

Another great need which has been brought to the attention of the Board of Charities, and by them urged upon Congress without as yet completely satisfactory results, has been that of improving the financial standing of the board by the appropriation of sufficient funds to carry out the board's work for the fiscal year without the necessity of asking for large deficiency appropriations. Institutions and even private homes, for a number of years past, have been, with the present lack of appropriations, asked to wait for weeks and even months for the payment of just bills for the care of our wards. has caused much inconvenience to those who wish to help the board in the care of its wards, has caused a loss of dignity and standing of the work of the board, and is an entirely unnecessary condition, considering the well-known needs of the Board of Children's Guardians and its carefully drawn estimates of expense. It is hoped that in the future sufficient appropriations will be made to take care of all wards in the proper manner and to place the board in the position of paying promptly for services rendered.

#### CONCLUSION.

It was stated in the annual report for last year that a board of children's guardians seemed to many persons experienced in child-caring work to be as near an ideal arrangement as can be found, when such a board is properly supported by public opinion and public funds. In a number of cities and States the tendency has been toward the establishment of such a public administrative body.

The care and welfare of both dependent and delinquent children in the District of Columbia has been of so great importance to the community that over 20 years ago the Board of Children's Guardians was founded for the administration of such work, including the care of the children after commitment, the finding of suitable homes, visiting of children, and arranging for adoption whenever suitable homes were found. It has been the endeavor of the board to supply

the parents' place as far as possible.

Believing that in this work the board has already met with some success and that with more liberal assistance will be able to carry out its work in an even more satisfactory manner, it asks for increasing interest and assistance from all child-caring organizations of the District and from the general public.

Respectfully submitted.

PERCIVAL HALL, President.

#### APPENDIX E.

The following is a summary of the cases investigated by the heard during the past 10 years, and beginning with the year 1910–11, includes the children involved. Prior to the year 1908–0 the number of cases investigated was made up from monthly reports and includes cases continued from one month to another, and thus duplicated. Beginning with the year 1908–9, the number given represents the cases investigated and adjusted during the year.

# REPORT OF THE BOARD OF TRUSTEES OF THE INDUSTRIAL HOME SCHOOL OF THE DISTRICT OF COLUMBIA.

Washington, D. C., July 8, 1916.

To the Board of Charities, District of Columbia.

Gentlemen: The board of trustees of the Industrial Home School of the District of Columbia have the honor to submit the following as the annual report of that institution for the fiscal year which ended June 30, 1916. The home is located at 2525-2575 Wisconsin Avenue NW.

The following is a list of the officers and members of the board of trustees as of that date:

#### OFFICERS.

President, Walter C. Clephane; vice president, J. B. T. Tupper; secretary, Mrs. Emily L. Nourse.

#### BOARD OF TRUSTEES.

	expires.
Walter C. Clephane, Wilkins Building	1916
Mrs. Alexander C. Steuart, 3058 R Street NW	1916
Miss Ella Moore, 1680 Thirty-first Street NW	1916
Mrs. Emily L. Nourse, 2823 Q Street NW	1917
J. B. T. Tupper, 1316 Nineteenth Street NW	1917
Richard R. Bright, 238 Maryland Avenue NE	
George H. Russell, 3538 Warder Street	1919
Mrs. Robert Whitehead, 1521 Twenty-eighth Street NW	1919
John Hadley Doyle, 3016 O Street NW	1919

#### COMMITTEES.

Buildings, grounds, expenses, and legislation: Walter C. Clephane (chairman), John Hadley Doyle, and George H. Russell.

Employees, education, and industries: Richard R. Bright (chair-

man), Mrs. Alexander C. Steuart, and Mrs. Emily L. Nourse.

Admission, placement, housekeeping, and hygiene: James B. T. Tupper (chairman), Miss Ella Moore, and Mrs. Robert Whitehead.

# ADMISSION TO THE SCHOOL.

The Board of Children's Guardians and the Juvenile Court are now the only doors for admission to this school. Only normal children between 6 and 14 years of age are desired.

## VISITORS.

Visiting hours for relatives of the children are any day, once a month, between the hours of 9 a.m. and 5 p.m. The contents of packages designed for the children should be submitted at the office

of the superintendent before being given to the children. Ripe fruit,

suitable toys, and new, clean clothing are acceptable.

The registration book will be found on the office table, and the name, street, and number of the relatives, together with the date of each recurring visit, should be recorded. It is important that visiting hours be observed.

Inspection of the school by officials or those interested in philan-

thropic service is welcomed at any time.

# COORERATION OF RELATIVES AND OFFICIALS OF THE SCHOOL.

The officials of the school urgently solicit the cooperation of parents and relatives in stimulating the children to form correct habits and conform to the discipline of the school. They also entreat them to make their whole influence count in attaching children to the school as a normal home.

Parents who laugh at childish insubordination and encourage wrongdoing render the stay of their children unpleasant and useless because of their interference. Men and women under the influence of liquor are not allowed to remain on the grounds.

#### GIFTS.

# We cheerfully acknowledge the following gifts:

F. B. Dewey, 1901 Summit Place, 54 books.

From Health Department, typhoid serum for 150 people.

Mrs. Alford, 23 books and a box of doll clothes.

Mrs. Fred Buckler, 1 set of encyclopædia and a quantity of worn clothing. Dumbarton Theater, invitations to all children and officials to attend exhibits free of charge on three different occasions.

D. C. Department of Weights and Measure, 6 pounds choice candy.

Mr. McKee, 200 bananas.

St. Alban's Church, answers to Christmas letters from all Protestant boys. National Cathedral School for Girls, answers to all Christmas letters from Protestant girls.

Christ Child Society, answers to all letters to the Christ Child by the Catholic

children.

Miss McDonald, National Cathedral School for Girls, bimonthly contribution of magazines and periodicals.

Friends Club, year's subscription to Scattered Seeds.

Public Library, 150 worn books.

B. P. O. E., excursion to Glen Echo and most generous entertainments

J. Lawrence Solly, 10 gallons ice cream.

Karl E. Kritsch, services of great value, such as coach for ball team, instruction of band, and friendly visitor to all.

The religious life of the school is indicated by the fact that a large proportion of the children unite with some church before leaving the school. Among the names of Sunday-school superintendents of Washington a good percentage were once in the Industrial Home School.

The Catholic children attend Trinity Church, Georgetown, and

the Protestants. St. Alban's Church, Mount St. Albans.

The school should be removed to a farm of several hundred acres, where all branches of agriculture could be taught and where there would be room for shops to house a variety of industries.

The farm and greenhouses have been as productive as ever. The classes in domestic art and housekeeping have occupied the attention of nearly one hundred girls who have spent a small portion of their time making beds, washing dishes, scrubbing floors, austing, cooking, mending, and making garments, and in a general way fitting themselves to participate in domestic duties.

## IN MEMORIAM.

Bernard T. Janney, for nearly a third of a century a member of the board of trustees of the Industrial Home School of the District of Columbia and for many years its president, has been called to his reward.

We, his associates, standing at the open door of the great beyond, find words inadequate to express our feelings. We rejoice that his life has been spared for so many years, so that by his example of unselfish living those who remain to carry on his labors may have before them the inspiration of his devoted and successful service. Our sorrow is tempered with gratitude that our departed colleague and friend was able to the end to perform his duties without diminution of vigor and with all the active intelligence of his best years.

Because of his leadership in the work of the Industrial Home School hundreds of children of this and a former generation have been the recipients of his kindly ministrations and now rise up and

call him blessed.

A mention of his many activities for good would not adequately describe the man. Worthy as were his deeds, we loved him not for them so much as for his pure and lofty ideals, his courageous convictions, his intelligent judgment, his unselfish disposition, and his upright. Christian character, all combined with a geniality and gentleness of spirit which made him a prince among men.

Because this simple attempt to record our feelings brings comfort to our own hearts, we enter upon the records of the board of trustees of the Industrial Home School this memorial and send a copy to his widow and children in the hope that through it they may appreciate that the memory of Bernard T. Janney will be a perpetual incentive for good to those who are spared a little longer to carry forward his

work.

REGULATIONS OF THE BOARD OF TRUSTEES OF THE DISTRICT OF COLUMBIA INDUSTRIAL HOME SCHOOL.

(1) Object.—The object of the Industrial Home School is to provide for destitute white children of both sexes in the District of Columbia a good home, in which they shall receive the moral, mental, and industrial education calculated to make them upright, intelligent, and useful citizens upon arriving at years of maturity.

(2) Officers.—The officers of the board of trustees shall consist of a president, vice president, and secretary, who shall be elected annually at the first meeting in July of each year, if there be a quorum present, or at the next meeting thereafter at which there is a quorum

present; shall hold their offices for one year and until their successors are elected, and shall perform the usual duties belonging to their re-

spective offices by parliamentary rules and usages.

(3) Meetings.—The regular meeting of the board of trustees shall be held on the second Wednesday of each month, at such place and hour as the board shall designate. Notices of meetings shall be served on members personally, or mailed to them at least two days previous to the time of the meetings by the secretary. The president shall call special meetings when he shall deem it necessary, or when so requested in writing by five members of the board.

(4) Order of business.—At all the meetings of the board for the transaction of ordinary business the order of proceedings shall be as follows: (1) Reading of the minutes; (2) report of the superintendent; (3) reports of the committees; (4) unfinished business;

(5) communications: (6) new business.

(5) Committees.—The following standing committees, to consist of three members each, shall be appointed annually by the president, unless otherwise ordered by the board: Committee on buildings, grounds, expenses, and legislation; committee on employees, education, and industries; committee on admission, placement, housekeep-

ing, and hygiene.

(6) Duties of the committee on buildings, grounds, expenses, and legislation.—(1) They shall have care of the buildings, attend to all needed repairs and insurance, see that the grounds are properly inclosed, protected, and provided with roads and walks, and supervise the erection of new buildings and requisitions for supplies for their department; (2) they shall keep themselves informed as to the general expenses of the school, and see that all money appropriated for the school is expended to the best advantage; (3) they shall make up and submit to the board for approval all estimates of amounts required for the annual maintenance of the school improvements of the grounds, repairs of buildings, and new buildings, and attend to all legislation required from Congress; (4) they shall make a written or verbal report of their department at each regular meeting of the board.

(7) Duties of the committee on employees, education, and industries.—(1) They shall consider all questions relating to the number and qualifications of employees required for the school and the salaries or compensation to be paid the same, and make report thereon to the board, with such recommendation as they deem proper; (2) they shall nominate to the board for confirmation all regular employees authorized by the board, and provide for temporary help in any emergency; (3) they shall supervise the schools, shops, greenhouses, gardens, cultivation of the grounds, all other industries, the sales of their department; (4) they shall make a written or verbal report of their department at each regular meeting of the board.

(8) Duties of the committee on admission, placement, housekeeping, and hygiene.—(1) They shall exercise control of the admission of children and placing them in homes under regulations approved by the board of trustees; they shall require a semiannual report of the conditions and progress of all children placed in homes until they become of adult age, or able to look out for their own interest; they shall prescribe a form of book to be kept at the home and to

contain a full history of each child, and shall see that the superintendent properly makes all entries therein up to date; they shall require such assistance from the secretary in keeping this record as they may deem proper; (2) they shall have the general oversight of the domestic affairs of the home, approve the bill of fare, and supervise the requisitions for supplies for their department; (3) they shall give special attention to all hygienic conditions of the home and the health of the children; (4) they shall make a written or verbal report of their department at each regular meeting of the board.

(9) Regulations relating to children of the Industrial Home School.—(1) Admissions: Only destitute children, or those depending upon charity for support and care, shall be admitted and no child under 6 years of age or over 14 years of age shall be admitted without a special order of the board. (2) Placement: Whenever a satisfactory home can be found for any child of the institution, the committee on admissions, etc., shall select a suitable child to be placed in such home. (3) Industrial work: The children in the home of suitable age shall, in addition to their school work, engage regularly in some occupation suited to their capacity, with the object of acquiring habits of industry, of stimulating mental activity as an educational process, and of learning various manual processes for the purpose of securing suitable employment when discharged. (4) Religious instruction: No sect distinction shall be recognized in regard to their teachers or scholars, and the same religious subjects or scripture shall be taught to the whole school, and be confined to points of doctrine and practice about which there is no dispute among Christian sects (5) Classification: The scholars in both week day and Sunday schools shall be graded or classified according to their ages and attainments, and not according to any supposed religious opinions. (6) Discipline: The discipline of the Industrial Home School shall be such as would be exercised by an intelligent. judicious, and kind parent in a family—vigilant, kind, firm. The superintendent and assistants under his direction shall endeavor on all occasions to inculcate upon the minds of the children, truthfulness, self-control, obedience to parents, to all properly constituted human authority, and to the laws of God, respect for the aged, forbearance toward the weak, regard for the rights of others, politeness to all, kindness to animals, industry, temperance, and frugality. The avoidance of corporal punishment as far as may be consistent with due regard to obedience on the part of the children and the good order of the home is enjoined, and the infliction of such punishment on parts of the body liable to be permanently injured thereby, or so as to leave temporary marks of an objectionable character, or by any person other than the superintendent, or an assistant specially authorized by him to do so, is positively forbidden. (7) Leaving without consent: Whenever a child of the home leaves the institution without consent, written notice thereof shall be sent immediately by the superintendent to the person who recommended the child for admission and to the chairman of the committee on admission, etc.

(10) Physician.—A physician shall be employed to visit the home who shall make a monthly report of the health of the children and the sanitary condition of the home to the committee on admis-

sion, etc.

- (11) Duties of the superintendent.—(1) The superintendent shall have direct control of all the employees of the school, see that the duty of each is properly performed, have the power to suspend any inefficient or insubordinate employee temporarily, and immediately shall report such action, with the reasons therefor, to the chairman of the committee on employees, etc.; (2) the superintendent shall make monthly reports to the board, giving for the preceding month the whole number of children in the school during the month, the number admitted and the number discharged, the amounts received from the sale of products and from payments made for board, and the total expenses of the month, as nearly as can be ascertained; (3) the superintendent shall present monthly requisitions for supplies to the board for approval at each monthly meeting, and all requisitions must be presented to and approved by the board, and so certified by the superintendent before they are submitted to the District Commissioners, excepting in a pressing emergency, in which case the committee charged with the supervision of the requisition is authorized to act for the board: Provided, That the secretary is authorized to certify the approval of the board upon bills for the petty expenses necessarily incurred for the school by the superintendent on his own authority, not to exceed the amount of \$10 in any one month.
- (12) Annual report.—The board of trustees shall make a report to the Commissioners of the District of Columbia at the close of each fiscal year, giving the names of the officers and members of the board; of all employees of the board, and their respective salaries; dates of admission, and the names, ages, and places of residence when admitted of all children admitted; and the names, ages, and disposition made of all children discharged during the year; a classified statement of the expenses of the school, the rules of the board of trustees, and a general statement of the work of the school, with such recommendations for the promotion of its greater efficiency as they may deem proper.

(13) Amendement of the regulations.—These regulations may be amended at any regular meeting by a vote of the majority of all the members of the board, provided that the amendement has been sub-

mitted in writing at a previous regular meeting.

## REPORT OF THE SUPERINTENDENT OF THE INDUSTRIAL HOME SCHOOL FOR COLORED CHILDREN.

BLUE PLAINS, Washington, D. C., September 5, 1916.

The report of the superintendent of the Industrial Home School for Colored Children of the District of Columbia for the fiscal year ended June 30, 1916.

To the Board of Charities of the District of Columbia:

The institution whose ninth annual report I now submit was organized July 1, 1907. The establishment of this school solved the important and perplexing problem of how to legally care for and improve the neglected, dependent, and delinquent colored child with

due regard to his rights and the community's best interest.

The depressing and discouraging circumstances, due to poverty, ignorance, and vice, under which many families are compelled to live and work, make it utterly impossible for them to sustain satisfactory homes for their children and to devote sufficient time and attention to their physical and moral well-being. The establishment of this institution has done much to compensate for these deplorable con-

The school receives only male wards of the Board of Children's Guardians of the District of Columbia. Each of our four cottages with modern equipment of steam heat, electric lights, shower

baths, etc., furnishes a model home for 22 boys.

The object of the discipline, instruction, and training given to our inmates during their stay at the school is to produce good citi-The curriculum in our graded school is practically the same as that existing in the public schools of our city.

In addition to the regular schooling each child receives special training in some phase of our industrial work, and it is our earnest endeavor to give every boy sufficient training in some trade to enable him to be self-supporting when he leaves the institution.

#### HEALTH.

The health of the boys has been generally good in comparison to the number cared for during the year. However, scarlet fever entered our ranks and caused us no little anxiety for a period of five months.

By establishing a careful duarantine at the very start of the disease and taking every possible precaution for its prevention and spread the number of cases was limited to 11, with no serious results.

Without the proper hospital facilities strict quarantine is almost impossible. At present the only available place in which to isolate eases of contagion is a small room, with but one window, in the administration building, where the superintendent and his family, together with other employees, reside.

Last winter during the epidemic of scarlet fever it became necessary to devote one entire cottage to hospital purposes, a compulsory

yet very inconvenient and entirely unsatisfactory arrangement. The assembly hall in the school building was converted into a dormitory in order to provide sleeping quarters for the boys of the aban-

doned cottage.

With the unpleasant experience of last winter's quarantine and receiving, as we do, children from all kinds of homes, contagion is likely to break out at any time, and I believe that one of this institution's urgent needs is a detached hospital building. I therefore, to safeguard the health of our boys and to protect those who are devoting their lives to the training of these unfortunates, earnestly recommend that we should have a properly equipped hospital.

During the year one boy died of pneumonia at Freedmen's Hospital. Many cases peculiar to children and some minor accidents were treated

in our dispensary.

I feel that I can not submit this report without expressing my profound gratitude to those who helped us in our fight against the scarlet fever epidemic. Dr. Mary L. Brown, whom we employed at a small remuneration as nurse, remained with our boys night and day, and was physician, nurse, and mother to them.

## POPULATION.

The daily average attendance for the fiscal year 1916 was 92, as compared with 76 of the previous year. In fact, the number of boys in daily attendance exceeds the normal capacity of the school.

It became necessary throughout the year to overtax the capacity of the school in order to accommodate many of the outstanding wards of the Board of Children's Guardians who required institutional care and training. The crowded condition necessarily made the management more difficult and the results less satisfactory than we

would wish.

The erection of at least three more cottages for boys would be a most economical and advantageous way of caring for many wards who at present are being boarded in private homes because of lack of institutional facilities. A recent increase in population, made possible by the converting of the superintendent's residence into a cottage for boys, has served to reduce the per capita cost from \$284.52 to \$221.08. It is therefore quite evident that if the cottages suggested were erected at least 66 additional boys could be accommodated at a still greater reduction in the per capita cost of maintenance.

## SCOPE OF WORK.

The work of the year has been along most practical lines. The boys of every department have entered into the work with better understanding and greater interest than in past years. The trade classes have demonstrated their progress by the excellent quality of their work.

Many improvements have been made with limited funds, and through the untiring efforts of the instructors and the boys, much old material has been economically utilized in the construction work in and around the buildings. Substantial cement porches, walks, culverts, manholes, and gutters were built during the year by our shop

boys. Considerable attention was given to rebuilding and extending

the roads upon our grounds.

The farm boys have worked so industriously and so skillfully that they have made the land more highly productive this year than ever before. The school has had an abundant supply of vegetables, and the boys have been very successful with poultry and eggs.

## AMUSEMENTS.

All holidays were appropriately observed and many friends contributed to the entertainment of our boys during the year. The outdoor games and sports were pursued with unusual interest.

# RELIGIOUS TRAINING.

Religious services were conducted in our assembly hall each Sunday morning and afternoon. All Catholic boys were in regular attendance at mass, celebrated in the Home for the Aged and Infirm.

## RECOMMENDATIONS.

The daily average attendance was 64 when the present matron of the school was appointed. The attendance has increased to 92, which, together with the opening of another cottage, has correspondingly increased the responsibilities of her position. An increase in the salary of the matron of the school is respectfully recommended.

The caretaker of our largest boys has been with us for seven years and has brought her cottage to a high state of excellence. Her work is most painstaking and thorough and an increase in salary would be but just recompense for her long and faithful service.

The need of a clerk, for whom request was made last year, is now more keenly felt since the introduction during the year of the new

inventory system, which requires much time.

The services of exceptional teachers are required in this school. We have an excellent corps at present, but is is difficult, however, to retain the services of such teachers at the existing low salaries.

Frequent changes have been unavoidable on our farm because of the low salary paid the farmer. Such changes work a detriment to both our crops and the progress of the farm boys. I therefore respectfully urge that a salary of \$720 per annum be allowed for a farmer.

The salaries of the cook and laundress have not been raised since the organization of the institution, yet with the growth of the school

their duties have become multiplied.

Maintenance.—For several years an unavoidable maintenance deficiency appropriation has been requested and granted. If we could start the year with an appropriation of \$11,100, which at present is the very lowest estimate upon which the school can be maintained, the many embarrassments and interruptions of the work of the institution would be avoided.

Fire protection.—An appropriation of \$200 is recommended for the purpose of placing a fire hydrant in closer proximity to the outbuildings and for the purchase of additional fire extinguishers for

outbuildings.

Superintendent's residence.—The erection of a residence for the superintendent at a cost of \$5,000 is recommended. The two rooms now being used in the administration building by the superintendent and his family are inadequate.

Barn.—The erection of a barn at a cost of \$1,500 is recommended,

the present barn being unfit for use and very unsafe.

Infirmary building.—With the increased population of the school within the last two years no room remains within the institution for the isolation and treatment of cases of contagion or those who might be suspected of suffering from some infectious disease. An appropriation of \$7,000 is therefore recommended for the purchase of material and rection of an infirmary building.

Cottages.—An appropriation of \$45,000 for the purchase of material and erection of three cottages is recommended in the interest of increasing the population of the institution and thereby affording

much needed training to about 66 additional boys.

LEON L. PERRY. 'Superintendent.

## REPORT OF NATIONAL ASSOCIATION FOR THE RELIEF OF DESTI-TUTE COLORED WOMEN AND CHILDREN.

President, Mrs. Mary L. Meriwether, 1211 S Street; vice president. Mrs. M. M. Waldron, 1334 V Street; treasurer, Mrs. C. W. Harris, 1633 L Street; secretary, Mrs. L. M. Kelly, 2030 Thirteenth Street.

Johnson, Dr. H. L. Bailey, Dr. J. W. F. Smith, Dr. W. S. Montgomery. Superintendent.—Mrs. Eva Hood Smith.

Washington, D. C., July 18, 1916.

Mr. GEO. S. WILSON,

Secretary to the Board of Charities.

DEAR SIR: The board of managers of the Home for Destitute Colored Women and Children submits the following report for the fiscal year ending June 30, 1916. We have been blessed in that none of our officers or teachers have been claimed by death during the year. The health of the children for a time was not as good as we desired, having had diphtheria, measles, and mumps. We were very fortunate not to have either malady become an epidemic, due to the watchful care of our superintendent, Mrs. Smith, and the skill of our physician. Notwithstanding a heavy expense for antitoxin, etc., was incurred. At this writing all of the inmates are in good health. We are sorry to note this year, as never before, there have been heavy inroads upon our numbers. More children taken out, fewer children put in; thereby making an unsatisfactory record in our schools and lessening the amount of pay which we should receive. We most earnestly desire to have enough children sent us to use all the \$9,900 which Congress gives us for the year. Again, we wish to call attention to the fact that the children, in most cases, are sent to us in bad condition-dirty, ragged, shoeless. They remain a short time and then leave comfortably clad, clean, new shoes, etc. I call attention to this because it, with the increased cost of living, causes us to have large bills for clothing, shoes, and food. We will be very grateful to you if this condition can be mitigated by you or helped in any way. We thank you and your honorable board for the interest and courtesy you have manifested toward us in the past, and trust the same pleasant relation may continue.

Respectfully yours

Respectfully, yours.

MARY L. MERIWETHER, President.

CAROLINE W. HARRIS, Treasurer.

# REPORT OF WASHINGTON HOME FOR FOUNDLINGS.

JULY 12, 1916.

George S. Wilson, Esq.,

Secretary Board of Charities.

DEAR SIR: Responsive to yours of June 10 last, I hand you herewith financial report containing information called for, and a statement of the number of children cared for during the year.

The officers of the institution are as follows:

President, Dr. Z. T. Sowers; vice president and secretary. Evans

Browne; treasurer, Charles E. Howe.

The above officers, together with the following, constitute the board of directors: M. M. Parker, J. B. Larner, Chapin Brown, Mrs. Simon Wolf, Mrs. W. P. Stafford, and Murray A. Cobb.

The officers of the board of lady visitors are as follows:

President, Mrs. Simon Wolf; vice presidents, Mrs. Abram Lisner, Mrs. Alex. T. Britton, Mrs. Aldis B. Browne, Mrs. Carl Droop, Mrs. Carl Casey, and Mrs. Easby-Smith; treasurer, Mrs. Chas. J. Williamson; secretary, Mrs. George C. Johnson.

The officers of the Pierce Guild are as follows: President, Mrs. W. H. Bayley; first vice president, Mrs. Simon Wolf; second vice president, Mrs. W. P. Stafford; secretary, Mrs. H. C. Browing; treasurer,

Mrs. G. H. Johnson.

During the past year there has been installed both at the city and county homes, thoroughly modern plumbing, together with the latest appliances for the sanitary care of infants. During the past winter there was conducted at the city home a Montessori school, supported by private contribution. The results of the school were highly gratifying.

Very respectfully,

Evans Browne, Secretary.

# REPORT OF ST. ANN'S INFANT ASYLUM.

Washington, D. C., August 8, 1916.

Mr. G. S. Wilson,

Secretary of the Board of Charities.

DEAR SIR: The president and board of directors of St. Ann's Infant Asylum take pleasure in submitting the report of the institution for

the fiscal year ending June 30, 1916.

The members of the board are as follows, viz: Sister Georgiana Ennisson, president; Sister Louise Anderson, treasurer; Sister Agnes Sheehan, secretary; Sister Rosalie Keaney, Sister Placida McDonald, Sister Clotilda Richardson, Sister Marie Parisienne, directors.

We have made many much-needed improvements during the past year for the convenience and comfort of the children, and there are still many necessities that we are obliged to forego for want of means. The scanty funds at our disposal were barely sufficient to meet our

bills for food supplies, shoes, clothing, etc.

The number of children sent us by the Board of Guardians was not sufficient to entitle us to the full amount of the appropriation, and we would be glad to accommodate an increased number during the coming year, as the appropriation is a substantial aid on which we depend, and for which we are always grateful, as also to the many friends of the institution who contributed toward the support of our little helpless babes. The kindergarten exercises have afforded the children much pleasure, besides benefiting them in a moral and physical way. Our staff of physicians have given their services most generously, and merit our gratitude, as also the nurses who were their willing assistants in caring for the sick children. Despite the many obstacles to a more perfect success we have much reason to be grateful for the many blessings an All-Wise Providence bestowed upon us during the year, and we trust He will still inspire the charitably inclined to think of our many needs.

Yours, very sincerely,

SISTERS OF CHARITY.

# REPORT OF MUNICIPAL LODGING HOUSE.

SUPERINTENDENT'S REPORT.

SEPTEMBER 15, 1916.

To the BOARD OF CHARITIES.

GENTLEMEN: I hereby submit the twenty-third annual report of the Municipal Lodging House, June 30, 1916, being the end of the fiscal year.

There were 7,166 lodgings furnished to transients during the year, and am glad to report that owing to an increase of \$180 in the appropriation for maintenance, available during the past year, I was able

to feed the men daily with a good meat and vegetable stew.

There was over 30 per cent less foreigners proportionately as compared with the previous year. There was but little sickness among the men. The manufacture of war munitions has kept a great many away from the institution. The lodging house has been kept in good condition; painting, whitewashing, cleaning, fumigating, etc., have been pushed right along. I have made the best of the wood business, which under the present circumstances is unavoidably

circumscribed, space and appliances being simply in name.

However, I am looking forward with great pleasure to the new Municipal Lodging House, for which Congress has made an appropriation, and think of the delightful sunlight and the healthful breathing space which we are to enjoy in the new building. I hope we shall not be handicapped in our new wood-yard arrangement for space, so that when the test comes, which I hope the commissioners will put upon us, we shall not only be able to handle the nearly fifteen hundred cords of wood consumed annually by the District and Federal institutions in the District, but also to do our share of wood business in the city; feeling that we should do our utmost in the lodging house to reduce the expense to the Government of running the institution by thus utilizing the labor of ablebodied men who apply for temporary relief.

A. H. Tyson, Superintendent.

# REPORT OF THE HOME FOR THE AGED AND INFIRM.

Blue Plains, D. C., October 7, 1916.

Gentlemen: I have the honor to herewith transmit the annual report of the Home for the Aged and Infirm for the fiscal year ending June 30, 1916.

> WILLIAM J. FAY, Superintendent.

SECRETARY BOARD OF CHARITIES, DISTRICT OF COLUMBIA.

Introductory.—A survey of the labors of the past year at Blue Plains reveals no departure from our fixed policy of progress and accomplishment in an effort to make the Home for the Aged and Infirm a credit to the District of Columbia and a comfort to the old folks gathered under its roof and dependent upon it for their happiness and welfare.

We have passed the year without accident or unusual sickness, and while there are many pathetic cases in our home life, inevitable in an institution gathering up the flotsam and jetsam of a great city, a fair degree of contentment and happiness exists among our people.

The addition to the colored men's ward, now occupied, relieves the congestion in that quarter and contributes much to the comfort of the inmates. Congress has granted an appropriation for a similar addition to the colored women's ward, which will be erected during the coming year. The colored portion of our population will therefore be well provided with ample quarters for many years to come.

The heating system, recently overhauled, gives splendid service, making all parts of the house warm and comfortable in severest

weather.

Many friends from the city have ministered to the spiritual and social welfare of our population, holding religious services on the Sabbath and furnishing entertainment and refreshment treats through the week, the St. Vincent de Paul and Father Galleger being responsible for Catholic services, and Protestant clergymen and lay workers contributing generously of their time and talent. The old folks have enjoyed to the full the many treats of ice cream and cake, candy, music, moving pictures, and other entertainment furnished so generously by people of all denominations, creeds, and races. In truth, we sometimes have trouble in keeping up with some of the old people in their effort to be "all things to all men," in order to win a greater portion of the disbursements.

A glance at the farm production sheet will show some of the creature comforts provided from that source. The item of milk, which enters largely into our food supply, is a very interesting one nearly \$4,000 worth being produced and consumed on the place last year. Fruit, vegetables, pork, beef, eggs, and forage, with a money value of \$15,000, assisted very materially in holding our per

capita cost down to its present low figure.

We desire very definitely to express our gratitude to the many friends inside and outside the District service for help rendered in accomplishment of the results of the year. Without the hearty cooperation of many of the departments of the District government, so generously rendered, these results would have been impossible.

Report of inmates received, discharged, and died during fiscal year 1915-16.

## REPORT OF THE RESIDENT PHYSICIAN.

Mr. W. J. FAY,

Superintendent of the Home for the Aged and Infirm.

Dear Sir: I hereby submit to you my annual report of the work performed by my department during the year ended July 30 last. To repeat what I had the pleasure of saying last year, our home sanitary conditions have been so far perfected over previous years that not only has our mortality percentage greatly diminished but

the morbidity in general has appeared much decreased.

This year more than ever before we have kept accurate account of all the medical attention required and to whom given. At the start of the year we attempted to keep records of the respective weights of all of the inmates of the institution with a view to medical reference in certain cases of senile diseases, but found the task too difficult at this age of the home. We did, however, attempt to tabulate a few statistics concerning the inmates and have found them as follows:

## Average age, sex, marital condition, and color.

Males, white:		Females, white:	
Average age.	65	Average age	65
Average age, married	68	Average age, married	64
Number	38	Number	
Average age, single	63	Average age, single	
Number	35	Number	17
Males, colored:		Females, colored:	
Average age	54	Average age	64
Average age, married	66.5	Average age, married	
Number	73	Number	
Average age, single	57	Average age, single	
Number	36	Number	19

The following is the child-bearing history:

During their lives our white women, collectively, have borne 48 children and our colored women 219.

Eight of our white women had no children and 9 of our colored had none.

One of our white women had 13 children and one of our colored women 14 children. We found that the average length of time that each woman lived with her husband was 25 years.

The percentage of colored women that had had no children was 16. The percentage of white women that had had no children was 26.

Formerly the task of attending the boys of the Industrial Home School had devolved upon the doctor of the Home for the Aged and Infirm, and quite often there was much to attend, mostly in the way of minor illnesses. Recently graduate nurses have been appointed, and such has been their competency that only 37 boys were seen during the last fiscal year, and the general health of the boys has much improved. Such small corrective operations as the removal of hypertrophied tonsils, circumcisions, and the like, could and should, in the opinion of the writer be performed at the boys' home instead of removing them to town at an added expense of time and money. Several operations were performed by the writer until permission was

In summary we wish to state that much gratification is felt over the status of our

present hospital staff and its, at present, two very competent nurses.

There are several ultimate aims that we have in view and among them are: To have a separate private room for our very ill and dying; to have a larger salary for our nursing force to enable us to keep skilled and competent nurses; to have a concrete porch to surround our hospital; to have a hospital diet kitchen and not to allow the return of soiled dishes to endanger the health of the inmates supplied food from the general kitchen.

## Hospital record.

Admissions	219	Sent to other hospitals	18
Discharged cured or improved	161	Deaths	40

This report compares very favorably with that of last year, when the mortality rate was 24 per cent as against 18 per cent this year, and the number of admissions 386 as against 219 this year, which statistically demonstrates the generally improved health of the inmates and thereby praises the sanitary improvement theories of the directors of the institution.

The causes of our deaths were as follows, from-

Arteriosclerosis. Cerebral hemorrhage. Cerebral embolism Pulmonary oedema. Acute gastritis. Acute gastro enteritis	4 1 1	Paresis Lobar pneumonia. Carcinoma of penis. Chronic interstitial nephritis.	3 1 4
Chronic myocarditis	$\frac{7}{2}$	-	

We sent to other hospitals—to Washington Asylum for mental observation, 6; operation, 6; Tuberculosis Hospital, 5.

In conclusion, we wish to thank you for your hearty courtesies and many favors.

Very respectfully,

S. BOYCE POLE, M. D.

# REPORT OF TEMPORARY HOME FOR UNION EX-SOLDIERS AND SAILORS.

**Board of management.—Newton Ferree, president, Treasury Department; Charles A. Williams, vicepresident, The Ontario: Israel W. Stone, secretary, 117 Twelfth Street SE.; S. S. Everett, reasurer; W. August 14, 1916.

Hon. George S. Wilson,

Secretary Board of Charities, Washington, D. C.

DEAR SIR: I have the honor to submit herewith my annual report as president of the board of management of the Temporary Home for

Union ex-Soldiers and Sailors, Grand Army of the Republic.

The organization, aims, and objects were so fully given in the president's report for 1915 that I shall not enter into these details again. A decided change has taken place in the board of management during the past year. As reported by President Hopkins, Superintendent Maxim, who had served the home so well and faithfully for more than 16 years, passed away on July 25, 1915, and President Thomas S. Hopkins severed his relations with the board on August 15, 1915, which necessitated a reorganization.

Maj. E. R. Campbell was elected president and Secretary I. W. Stone placed in charge of affairs, thus securing a careful and efficient conservation of the appropriation. Later on the services of a most competent superintendent in the person of Robert S. Copeland, and that of his wife, Margaret S. Copeland, as matron, was secured.

At the annual meeting in February, 1916, President Campbell declined a reelection on account of continued absence from the city, and I was elected president, and although I have served on the board of management for 25 years, I very reluctantly accepted the responsibility.

responsibility. President Hopkins reported last year that the home was greatly in need of replenishing, and I am glad to report that by the most painstaking care and watchfulness Superintendent Copeland has been able to care for more inmates during the past year and expend the sum of \$243.88 for refurnishings with the most-needed articles, a most unexpected result considering the high price of all supplies.

Feeling that in a few short years younger men would of necessity be called upon to manage the home, an addition of 5 members from the United Spanish War Veterans have been placed on the board, which is now composed of 15 Civil War veterans, 8 United Spanish

War Veterans, and 3 Sons of Veterans, U. S. A.—26 in all.

Although an addition of 20 per cent has been added to most of the articles purchased under contract for the fiscal year 1917, I believe under the careful and prudent management of Superintendent Copeland, so ably assisted by Miss Kate Taylor, in charge of the kitchen,

711

22 74

I shall only recommend that the usual sum be appropriated for the fiscal year ending June 30, 1917—\$5,920. With this sum they will be able to maintain the high standing of the home, giving the inmates the nourishing food required.

Thanking you personally for the many courtesies extended the

home, I am,

Respectfully,

NEWTON FERREE, President.

AUGUST 7, 1916.

To the Board of Charities, Washington, D. C.

Sirs: In submitting herewith the report of the Florence Crittenton Hope and Help Mission of Washington, D. C., for the fiscal year ended June 30, 1916, I wish to express our appreciation of the spirit of cooperation which your office manifests toward our work. In the study of the needs of the individual girl and the problem of fitting her to bear her own burdens as a self-respecting and self-supporting member of society our superintendent receives constant encouragement and help from your officials. We even appreciate the fact that you have shown your approval of our work by placing in our care a greater number of cases than could be paid for from the fund placed at your disposal for this purpose by Congress. This fund, as you know, was exhausted during the month of April, so that your cases between that time and July 1 were cared for entirely at our expense. At the per capita price contracted for, the amount due us would be over \$700.

This is mentioned not at all by way of complaint, as the work you have thus given us the opportunity to do is entirely in line with the purposes for which this home is established and maintained. Since, however, our work must be supported by private benevolence, if not by public appropriation, we feel justified in asking, in view of the above facts, that you request Congress to increase by \$700 the appropriation which you are authorized to expend with us, so that we shall not be forced to appeal to private benevolence for the support of the work we do for the District Board of Charities.

In further support of this request we call attention to a recent extension of our work in the form of a country home which we are maintaining for the second season on a farm near Washington recently acquired by the National Florence Crittenton Mission. A number of the children and mothers intrusted to our care have thus had the opportunity to spend the summer under conditions far superior to

those prevailing in a home in the heart of the city.

One more thing we may be permitted to mention in connection with our claim to public support, and that is the growing sentiment among philanthropic workers and the public at large in favor of the fundamental Crittenton way of caring for the children of unmarried mothers as evidenced by the ruling of the Ohio State Board of Charities against institutions which permit the separation of mother and child and the law passed by the last Maryland Legislature making it a criminal offense to separate a child from its mother before the child is 6 months old.

In closing, may I say that our board of managers keeps a strict oversight over the home with reference to sanitation, economy, and efficiency of administration, and moral and educational conditions. This board is especially anxious in the near future to extend the educational facilities of the home, as many of our girls are very young and greatly in need of such advantages.

Hoping for your continued approval and support, I remain,

Very respectfully,

President Florence Crittenton Hope and Help Mission.

#### INTRODUCTION.

The Aid Association for the Blind is an institution of the District of Columbia, incorporated under its laws, and having for its purposes the maintenance of a home for the blind, the conduct of an industrial feature, and a combination of efforts for their advancement in other ways consistent with the conditions presented in this community.

The objects and purposes are more clearly set forth in a copy of the certificate of incorporation included herein, and in the by-laws

which are published herewith.

The organization was created in 1897 and has been maintained and conducted by an association of charitable ladies whose sympathies and influences have met with a generous response from those who appreciate the great misfortune that attends those who can not see to do for themselves.

No support has been accorded the association by Congress, but several bequests from philanthropists and public-spirited citizens encouraged the building of a substantial home and the provision of attractive and health-giving surroundings which afford comfort and happiness, recreation and learning, to a large family of blind persons for whom no provision is made otherwise in this jurisdiction.

The association represents the early and original effort to aid the blind, and those who may be interested in the work are cordially invited to visit the home to inspect its workings and to learn by practical illustrations of its beautiful accomplishments.

LAURA V. SYLVESTER,

President.

Your sweet letter has found its way to me way out in the West, where my teacher and I are lecturing.

HELEN KELLER TO THE AID ASSOCIATION FOR THE BLIND.

It makes me happy to know that you have linked my name with your beautiful work for my blind fellows.

May all blessings rest upon the home which you and other members have

So long as there must be homes for some of the dependent blind, I think with you the small homes are best because those who live in them feel a little freer

and have more of the joys of family life.

It will indeed give me great pleasure to visit the happy nook you have found

for the sightless when I am in Washington again.

With cordial greetings, I am,

Sincerely, yours,

(Signed) E

HELEN KELLER.

# PRESIDENT'S ANNUAL REPORT.

To the BOARD OF CHARITIES OF THE DISTRICT OF COLUMBIA.

Gentlemen: It was 17 years ago that the president of this organization, accompanied by May D. Russell-Young, Catherine N. Keith, Henrietta C. Metzerott, Kittie R. Pepper, Alice U. Hunt, and Marguerite Dickens, appended her name with theirs to the certificate of incorporation that more closely brought us together as an organization and gave us a permanent and influential standing in the community as The Aid Association for the Blind. It was then that we formally declared the principles of our work—to establish a nonsectarian home for the blind of the District of Columbia, to promote their education and industrial training, and to aid the needy and dependent blind to the end that they might become self-supporting.

That the first object has been thoroughly and beautifully accomplished is best evidenced by the presence of the house in which we gathered for our annual meeting. Surrounded by attractive grounds, the structure stands as a monument to our industry, erected for humanity less fortunate than ourselves. While it was through persistent and unrelenting effort on our part that this has been accomplished, we must ever remember those who have through years extended us a helping hand; and we should also, in some appropriate manner, commemorate the generous and benevolent acts of those who were in accord with our endeavors but who are no longer with us to realize what has been established and maintained largely through their substantial benevolence.

The effort toward our second purpose has been in a measure successful—that of advancing the industrial training. It has not been as extensive, perhaps, as we desired, but it is realized that a plant equipped in detail, with adequate instruction and facilities for disposing of products of the work, must have ample means and employ a business management.

While the first principle uppermost in our thoughts is to afford employment for the sightless in our shops, along which lines we have so well succeeded, there remains a magnificent opportunity to make this feature a source of substantial income for the home.

With an agency for making our sales, keeping accounts, and securing prompt deliveries we would no doubt have established a resourceful feature.

The further provision for the production of the more delicate articles of handwork we have demonstrated can be magnificently executed by the women of the home, thus further promoting their education.

No institution is better provided with means for music, and no hall can afford such splendid acoustics, which should encourage instruction and recitals here. These are facts and suggestions which are advanced, not for the members' consideration alone, but with the hope that a word now and then promulgated by an officer of the association may reach others than ourselves, who will find in them

an inducement to lend us their influence and support.

This association has extended its friendly aid to the blind outside of the home and rendered them comfort and cheer. It was the first organization to take up the question of extending assistance to the blind in the District of Columbia and its early creation was prompted not only by the absence of governmental provision, but through the sorrow and distress that was in evidence in public places where the blind were enforced to desist from pursuing various public means of livelihood, many of them without the comforts of life. Through its efforts those conditions were changed and in all the years that have followed Congress has not appropriated anything toward assistance in the conduct of the institution which has long since made so enviable a record as a worthy factor in the providing for and encouraging of those who can not see to do for themselves, thus accomplishing by private that which the Government should have done by public effort.

The association should receive an annual recognition from Congress by way of appropriation and I have no doubt but what, with

the standing we enjoy, it will follow.

While a kindred sympathy prevails among all who feel an interest in the sightless we must not forget that the association and home are facts, built up after long-continued years of industry, and we believe in these means of caring for the sightless and solicit and request all who may be interested to cooperate with us. There are many who fail to understand that the institution is neither a school or hospital, but a home with its industrial auxiliary.

During the period of my incumbency as presiding officer the home has been fully equipped and furnished through the activity of the members of the board and their friends. To this end the continued good work of the junior auxiliary and the Helen Keller guild and the generous recognition of Miss Wilson, daughter of the President,

has rendered a splendid service.

There has been some decrease in the support from sustaining members, in a measure due to the conflicting of charity interests, and many of those who in former years were identified with this cause have gone elsewhere to reside. It was suggested in this connection that there might be those within the board who would be inclined to be identified with the creation of a summer fund to further our expenses through the most difficult season and there are those who approved of such a movement.

Aside from the building expenses the year of the closing administration has called for the greatest cost, having paid \$524.88 in interest on loan, \$219.50 taxes on the District extension of Q Street, \$108.28 for the workshops (\$150 less than the year before), \$123.15

on buildings and grounds (\$160 less than the year before), while coal cost to date has been \$349.80, as against \$333.30 for the year preceding. The mortgage indebtedness was reduced \$1,900, leaving \$10,400 to be canceled, which will be further reduced \$7,000 upon the

adjustment of the Mayer legacy in a short time.

The year closed included a bazaar and entertainment at the Raleigh Hotel, theater benefit luncheon, and the Abbott lecture as important entertaining events, and in this connection I am prompted to remind the board again of the untiring, energetic, intelligent labor advanced by Mrs. Josephine L. Jacobs, as chairman of the ways and means committee and secretary, for energetic effort in advancement of the cause. For many years her unselfish devotion has been a fine

example of lovalty to this association and its success.

The associate organization, the junior auxiliary, and the Helen Keller guild were active in their cooperative endeavors. The former held 10 parties and realized about \$70. Dinner for the inmates, fruit for the mothers, utensils for the kitchen, and the furnishing of the first hall, which was much needed, were some of the excellent accomplishments. Aside from this, the members were alive in helping the entertainments, giving both labor and means. The Helen Keller guild had \$110 at the beginning of the year, and during the season added \$103.03 to that sum. The guild expended \$147.50 principally for the men's sitting-room furniture. These workers, like their associates in the auxiliary, were alive and generous in their continued effort for the success of our undertaking.

The matron, Mrs. E. C. Gettings, "mother of the home," who has been at her post for many years, aside from her vigilance and mindful attention to duty, donated the attractive handrail that makes for safety and improvement in looks at the front entrance to the building. None of us can praise her attitude and sacrifices for all these

years too highly.

It may not be uninteresting to recall the courtesy of Manager Weston, of the Raleigh Hotel, in according the use of the hotel for the bazaar, and it is assumed that all of those friends who have in any way contributed to the support of the home have been appropriately and earnestly thanked in acknowledgment for their recognition of our work.

I am reminded of Mr. Wall's continued labor as financial agent and realize some of the difficulties he has had to contend with. I would be unmindful and ungrateful if I did not extend to those who have been associated with me officially my heartfelt gratitude for their unceasing attention to the work, and I trust that Mrs. Jacobs, of the ways and means committee; Mrs. Metzerott, of the admission committee; Mrs. Berliner, of the house committee; Mrs. Hyde, of the printing committee; Mrs. Vandergift, of the publicity committee; and Mrs. Mullet, who has had so difficult an undertaking with the industrial work, will accept this conveyance of my regard in the spirit in which it is given.

To the vice presidents, Mrs. Metzerott, Mrs. Gilbert, Mrs. Brown, and Mrs. Berliner, I wish to say I am grateful for their care and guidance in the conduct of the chair; to Mrs. Olney for her assistance; to Dr. Mackall for his prompt and intelligent attention in behalf of the inmates of the home; and to Mr. Wilson, the attorney,

for legal advice in matters pertaining to our affairs.

Accorded the honor of the presidency of this association without consultation, and realizing my aptitude for the work of a mother at home rather than for that of the president of a home, I have given my best endeavors to the work, and those within its keeping will always have any benefit that may come through my prayers, influence, and means for their continued welfare and happiness, which I know will be forthcoming in response to the continued industry in behalf of those who can not see to do for themselves.

Respectfully submitted.

# LAURA V. SYLVESTER,

.. President.

On the third Thursday in May, 1916, Josephine L. Jacobs was chosen president and the former officers and board of managers retained, while Laura V. Sylvester was elected honorary president.

### CERTIFICATE OF INCORPORATION. •

We, the undersigned residents of the District of Columbia, all being of full age. citizens of the United States, and a majority resident in the District of Columbia, being desirous of forming an association for carrying on a benevolent and educational work for the blind of the District of Columbia, under sections 545. 546, 547, 548, 549, and 550 of the Revised Statues of the United States relating to the District of Columbia as amended and in force at this time, do hereby certify that we have this day for ourselves, associates, and successors formed a body corporate and politic and in compliance with the said statutes, state:

First. That the said association shall be known in law as "The Aid Associa-

tion for the Blind of the District of Columbia."

Second. The term of its existence shall be 50 years from the date of this certificate.

Third. The objects of this association are: (1) To establish a nonsectarian home for the blind of the District of Columbia in the said District; (2) to promote the education and industrial training of the blind, to aid the needy and depending blind, and help them to become self-supporting; (3) to carry on and transact any business consistent with the law that may be necessary or desirable in the fulfillment of any or all of the objects and purposes hereinbefore set forth.

Fourth. The board of management for the first year shall consist of 11 directors, and the names of the said directors to hold office until their successors are lawfully elected and qualified are May D. Russell-Young, Henriette C. Metzerott, Mary S. Gist, Mary M. North, Alice U. Hunt, Kittie Rose Pepper, Judith Ellen Foster, Laura V. Sylvester, Ella G. Holt, Marguerite Dickins, Catherine M. Keith.

But the corporation shall have the power to increase its membership in accordance with by-laws to be adopted.

In witness whereof, we have hereunto subscribed our names and affixed our seals at the city of Washington, D. C., this 13 day of April, A. D. 1899.

MAY D. RUSSELL-YOUNG.	[SEAL.]
CATHERINE M. KEITH.	[SEAL.]
HENRIETTE C. METZEROTT.	[SEAL.]
KITTIE ROSE PEPPER.	[SEAL.]
ALICE U. HUNT.	[SEAL.]
LAURA V. SYLVESTER.	[SEAL.]
MARGUERITE DICKINS.	SEAT.

Witnesses as to all: E. S. Mussey, GEO. E. FLEMING. I. Geo. E. Fleming, a notary public in and for the said District of Columbia, do hereby certify that May D. Russell-Young, Catherine M. Keith, Marguerite Dickins, Henriette C. Metzerott, Kittie Rose Pepper, Alice U. Hunt, Laura V. Sylvester, whose names are signed to the foregoing and annexed "Certificate of Incorporation of the Aid Association for the Blind of the District of Columbia," bearing date of April 13, A. D. 1899, personally appeared before me in the said District of Columbia; the said May D. Russell-Young, Catherine M. Keith Marguerite Dickins, Henriette C. Metzerott, Kittie Rose Pepper, Alice U. Hunt, Laura V. Sylvester, being personally well known to me as the persons who executed the said certificate, and each and all acknowledged the same to be her and their act and deed for the purpose therein mentioned.

Given under my hand and seal this 13th day of April, A. D. 1899.

GEO. E. FLEMING, Notary Public.

723

BY-LAWS.

Article I.

NAME.

Conforming to the terms of the certificate of incorporation bearing date April 13, 1899, preceding and made a part hereof, the name of this organization shall be "The Aid Association for the Blind of the District of Columbia."

Article II.

OBJECT.

. The purposes of the association shall be:

1. To establish a nonsectarian home for the blind of the District of Columbia.

2. To promote the education and industrial training of the blind.

To aid the needy and dependent blind and help them to become self-supporting.

3. To carry on and transact any business consistent with the law that may be necessary or desirable in the fulfillment of any or all of the objects and purposes hereinbefore set forth.

## Article III.

## MEMBERSHIP.

SECTION 1. The membership shall be composed of persons who will be willing to promote the purposes as above set forth, who will attend the meetings of the association and lend to its maintenance and advancement their active and moral support.

Sec. 2. The sustaining membership of the association shall be classified as

follows:

1. Active members, those who pay \$1 each year as annual dues.

2. Life members, those who subscribe to aid the association \$25 at any one time.

3. Benefactors, those who subscribe to the aid of the association \$100 at any one time.

4. Patrons, those who subscribe to the aid of the association \$500 at any one time.

Article IV.

#### OFFICERS.

The officers of the association shall be a president, four vice presidents, a recording secretary, a corresponding secretary, a financial secretary, a treasruer, a delegate to the District of Columbia Federation of Women's Clubs, an attorney, and honory presidents.

## Article V.

#### DUTIES OF OFFICERS.

Section 1. The president shall preside at the meetings of the association and of the board of managers, shall appoint all committees, standing and special, unless otherwise ordered by the board; at each annual meeting of the association shall submit a written report with recommendations, and shall sign all

contracts, deeds, or other papers affecting the property or monetary interests of the association, unless otherwise directed by the board of management.

The president shall approve any and all bills and accounts before payment of the same, all of which shall be attested by the signature of the recording secretary.

The president shall be ex officio member of all committees.

#### VICE PRESIDENTS.

Sec. 2. The vice presidents shall perform the duties of the president in the order of their election, when the president may be absent from meetings for any cause or when called upon by the president to do so.

#### RECORDING SECRETARY.

Sec. 3. The recording secretary shall fully, advise with the president at all meetings of the association and board of management as to matters in detail pertaining to the welfare of the organization; shall keep an official record of the officers and membership of the association and of the employees and inmates of the home. Shall officially, and in writing, notify all officers of their election and chairmen and committees of their appointments; shall record the minutes of all meetings of the association and board of management and be the keeper of the association seal.

The detailed proceedings of all meetings duly recorded shall be given to the successor in office of the recording secretary one month after the annual meeting of the association.

#### CORRESPONDING SECRETARY.

Sec. 4. The corresponding secretary shall keep an accurate record of the names of the officers and members of the association and the board of management; send calls to them for any and all meetings; conduct all correspondence of the association and board on subjects pertaining to their affairs, and, as approved and directed at their meetings, and keep the president and recording secretary fully advised of all such transactions for the information of the association and the board.

#### FINANCIAL SECRETARY.

Sec. 5. The financial secretary shall be provided by the recording secretary with the names and addresses of all members of all classes in the association; be the receiver for all moneys subscribed by members or others as dues, donations, subscriptions, or funds derived from entertainments or otherwise, keep a record of all amounts, from whence received, date received, for what purpose paid, and on or before the last day of each month the financial secretary shall deposit with the treasurer of the association all such moneys received, together with a statement thereof, taking the treasurer's receipt therefor. The financial secretary shall give written notice to members for payment of dues and receipt therefor and shall make monthly report to the board.

#### TREASURER.

SEC. 6. The treasurer shall have charge of the funds of the association and deposit the same in a bank or banks satisfactory to the board of management. The treasurer shall make monthly and annual reports of all receipts and disbursements for the information and approval of the board of management.

The treasurer shall pay all bills and accounts incurred by the board of management when the same shall have been approved by the president and recording secretary and make payment of any legal charges against the property of the association after approval by the board as certified by the president and secretary.

SEC. 7. The financial secretary and treasurer shall give bond to the association in such amount as may be required at the premium cost of the association. SEC. 8. The several officers heretofore mentioned shall each of them make a written annual report of the work of their respective officers to the president of the association, together with recommendations, to be filed at least 20 days prior to the annual meeting of the association.

## Article VI.

#### BOARD OF MANAGEMENT. :

Section 1. The board of management shall include honorary presidents, active officers of the association, members of standing committees, and other persons as may be elected to such board at the meetings of the association: Provided, That the number of ladies on the board shall not exceed 60 in number. Any vacancy in the board of management shall be filled by a majority vote of the members present of the board.

Sec. 2. The board of management shall not exceed 70 directors, and all matters pertaining to the maintenance, advancement, and improvement of the home, the welfare of the inmates, regulation of employees, purchase of supplies, accountability of interests, disposal of products, admission of boarders, visitation of the blind, and, in fact, all matters contemplated by the charter shall first nave its consideration and disposal:

#### Article VII.
